LFS/Q0615: Chemist - Retail Pharmacy

Brief Job Description

Chemist - Retail Pharmacy is responsible for supporting pharmacy operations by ensuring valid prescription processing, accurate order fulfilment, and effective customer interaction in compliance with regulatory standards. The role involves managing sales transactions, maintaining proper drug storage with cold chain and expiry monitoring, and handling inventory efficiently. The job holder is also expected to uphold the pharmacy professional image, promote responsible use of medicines, and contribute to pharmacovigilance and safe handling of controlled substances, while understanding the basics of retail operations within the Life Sciences industry.

Personal Attributes

The individual should have knowledge of different materials and chemicals along with the storing and selling appropriate pharma product. He must be able to identify defects, select appropriate storage areas, and handle inventory/stock. He should have the ability to do quality assurance, inventory control, manufacturing dispensing .

Applicable National Occupational Standards (NOS)

Qualification Pack

LFS/N0674: Introduction to Life Sciences sector and basics of retail pharmacy

Description

This NOS is about introduction to Life Sciences sector and basics of retail pharmacy

Scope

The scope covers the following :

- Introduction to Life Sciences Sector
- Basic of retail Pharmacy
- Environment Sustainability

Elements and Performance Criteria

Introduction to Life Sciences Sector

To be competent, the user/individual on the job must be able to:

- PC1.** describe the key sectors and value chain of the Life Sciences industry in Indian and global context.
- PC2.** list applicable regulations and good practices such as GMP, GLP, and GDP relevant to pharmacy operations.
- PC3.** list key responsibilities and duties of a Chemist Retail Pharmacist.

Basic of retail Pharmacy

To be competent, the user/individual on the job must be able to:

- PC4.** Explain the difference between OTC, prescription, controlled, and Schedule H/X drugs.
- PC5.** identify brand name, generic name, expiry date, and batch number from packaging
- PC6.** interpret basic components of a prescription including dosage form, frequency, and route of administration.
- PC7.** demonstrate correct storage of drugs as per label instructions and regulatory norms.
- PC8.** respond appropriately to scenarios such as prescription denial or customer confusion

Environment Sustainability

To be competent, the user/individual on the job must be able to:

- PC9.** list energy conservation practices relevant to pharmacy operations.
- PC10.** identify actions that optimize electricity and equipment usage during daily operations
- PC11.** follow practices that reduce water wastage, chemical spills, and air pollution
- PC12.** segregate waste into recyclable, non-recyclable, and hazardous categories
- PC13.** use appropriate color-coded containers for waste collection and disposal
- PC14.** prepare and follow a waste management checklist for daily pharmacy operations

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** key subsectors of the Life Sciences industry, such as pharmaceuticals, biotechnology, and medical devices.
- KU2.** overall structure and supply chain of the Life Sciences industry in India and its alignment with global practices
- KU3.** role of Good Manufacturing Practices (GMP), Good Laboratory Practices (GLP), and Good Distribution Practices (GDP) in pharmaceutical operations
- KU4.** objectives and regulatory framework of the Pharmacy Act, Drugs and Cosmetics Act, and related healthcare legislations.
- KU5.** typical roles and responsibilities of a retail pharmacist in providing patient-centric pharmaceutical care
- KU6.** classification and regulatory restrictions associated with OTC, prescription, Schedule H, and Schedule X drugs.
- KU7.** importance of identifying key information on medicine labels such as brand/generic names, batch numbers, and expiry dates.
- KU8.** structure and interpretation of a prescription, including dosage frequency, route, and form of medication.
- KU9.** Basic concepts of environmental sustainability relevant to pharmacy operations such as energy and water conservation.
- KU10.** Common sources of waste in retail pharmacy and proper waste management practices in compliance with biomedical waste regulations.
- KU11.** significance of maintaining a waste management checklist and monitoring daily adherence to sustainability practices.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Communicate clearly with customers, team members, and healthcare professionals using appropriate language and tone.
- GS2.** Read and interpret prescriptions and labels accurately to avoid medication errors.
- GS3.** Apply logical reasoning to handle customer concerns, prescription discrepancies, or drug substitution requests.
- GS4.** Demonstrate time management in completing tasks such as prescription review, customer service, and stock updates efficiently.
- GS5.** Maintain a customer-centric approach while dealing with sensitive healthcare-related queries or complaints.
- GS6.** Work in a hygienic and safe manner while handling drugs, waste, and pharmacy equipment.
- GS7.** Use basic numeracy skills to calculate dosages, expiry durations, and maintain inventory levels.
- GS8.** Follow structured problem-solving approaches when faced with operational or regulatory challenges.
- GS9.** Exhibit a responsible and ethical attitude while ensuring regulatory compliance and patient safety.

LFS/N0661: Perform Inventory Management and Replenishment in a Retail Pharmacy

Description

This NOS outlines the procedures and responsibilities involved in managing inventory at a retail pharmacy, including stock monitoring, buffer stock planning, expiry tracking, replenishment, documentation, safety to ensure uninterrupted pharmacy operations.

Scope

The scope covers the following :

- Inventory Monitoring and Reorder Level Setting
- Stock Replenishment and Buffer Stock Management
- Documentation and Safety Compliance

Elements and Performance Criteria

Inventory Monitoring and Reorder Level Setting

To be competent, the user/individual on the job must be able to:

- PC1.** Use stock control software or tools to assess current inventory levels, set reorder thresholds, and identify gaps against minimum stock requirements
- PC2.** Track product consumption patterns using historical sales data and seasonal trends to anticipate demand fluctuations.
- PC3.** Review and adjust reorder levels periodically based on updated consumption data, stock movement frequency, and shelf life.
- PC4.** Monitor expiry dates regularly and ensure timely removal of near-expiry or unsaleable stock; update records accordingly.
- PC5.** Flag low-stock alerts early to ensure replenishment without stockouts or delays in patient service.

Stock Replenishment and Buffer Stock Management

To be competent, the user/individual on the job must be able to:

- PC6.** Maintain buffer stock for fast-moving and life-saving medications, guided by company policy and past sales records.
- PC7.** Raise purchase requisitions based on reorder level breaches, buffer stock depletion, and supplier lead times.
- PC8.** Coordinate with approved vendors or suppliers to ensure timely delivery and maintain continuity of inventory.
- PC9.** Cross-check incoming stock against invoices, batch numbers, expiry dates, and purchase orders before updating inventory records.

Documentation and Safety Compliance

To be competent, the user/individual on the job must be able to:

- PC10.** Handle stock safely to avoid product damage, contamination, or disruption to daily operations.

Qualification Pack

- PC11.** Keep the storage and sales area clean and organized responsibly per SOPs.
- PC12.** Maintain up-to-date and accurate records of stock adjustments, transfers, replenishments, and disposals in the inventory system.
- PC13.** Escalate recurring stock issues, such as frequent shortages, supplier delays, or inaccurate deliveries, to the inventory or purchasing manager with recommendations.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Principles of inventory management including FIFO/FEFO and safety stock
- KU2.** Use of inventory management software for tracking and ordering
- KU3.** Importance of buffer stock and criteria for identifying fast-moving drugs
- KU4.** Reorder level setting based on demand trends, shelf life, and lead time
- KU5.** SOPs for receiving, inspecting, and updating incoming stock
- KU6.** Techniques to handle, store, and organize medicines to avoid damage
- KU7.** Regulatory and documentation requirements for inventory records
- KU8.** Protocols for managing and reporting expired, damaged, or missing stock
- KU9.** Roles of team members and how to coordinate for efficient operations
- KU10.** Procedures during emergencies like theft, fire, or system failure

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Communicate effectively with suppliers, pharmacists, and internal team
- GS2.** Use inventory management systems and digital tools accurately
- GS3.** Follow SOPs for stock handling and documentation
- GS4.** Prioritize tasks to handle peak hours, shortages, or delays
- GS5.** Record and report issues clearly using appropriate formats
- GS6.** Manage stress and remain composed during high-pressure situations
- GS7.** Collaborate to solve routine problems like billing or mismatch issues
- GS8.** Prepare documentation for audits and respond professionally to inspectors
- GS9.** Take initiative in flagging issues and recommending improvements
- GS10.** Work in a team environment with professionalism and respect

LFS/N0668: Maintain Regulatory-Compliant Drug Storage Through Systematic Layout Planning, Expiry Management, and Cold Chain Monitoring

Description

This NOS focuses on maintaining proper drug storage in compliance with regulatory norms by planning shelf layouts, implementing expiry management systems (FIFO/FEFO), and ensuring temperature control for sensitive products.

Scope

The scope covers the following :

- Organize Storage Space Using Approved Shelf Layouts
- Implement FIFO/FEFO for Efficient Inventory Rotation
- Monitor and Document Temperature for Sensitive Stock

Elements and Performance Criteria

Organize Storage Space Using Approved Shelf Layouts

To be competent, the user/individual on the job must be able to:

- PC1.** Arrange drug products as per defined shelf layout plans, ensuring proper segregation based on dosage forms, therapeutic classes, and storage conditions.
- PC2.** Label all shelves clearly to indicate drug category, storage temperature range, and hazard classifications where applicable.
- PC3.** Ensure restricted-access drugs (e.g., narcotics, psychotropics) are stored in designated, locked sections of the storage area.
- PC4.** Maintain adequate spacing between stock units to allow airflow and prevent cross-contamination.
- PC5.** Periodically review and update shelf layouts to accommodate new inventory, expired goods removal, or revised compliance guidelines.

Implement FIFO/FEFO for Efficient Inventory Rotation

To be competent, the user/individual on the job must be able to:

- PC6.** Apply First-In-First-Out (FIFO) for non-perishable or general drug products to ensure older stock is dispensed before newer stock.
- PC7.** Follow First-Expiry-First-Out (FEFO) for drugs with short shelf lives, ensuring products nearing expiry are prioritized for use or flagged.
- PC8.** Check and document batch numbers and expiry dates during every inward entry and physical stock audit.
- PC9.** Train staff on visual identification of expiry risk items and assign responsibility for regular expiry monitoring.
- PC10.** Ensure expired or short-expiry goods are separated immediately and marked for disposal as per SOPs.

Monitor and Document Temperature for Sensitive Stock

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC11.** Store temperature-sensitive products (e.g., vaccines, biologics, insulin) in temperature-controlled environments as per label instructions.
- PC12.** Use calibrated thermometers, data loggers, or automated monitoring systems to track storage conditions.
- PC13.** Record minimum and maximum temperatures at least twice daily, and maintain these logs for audit compliance.
- PC14.** Investigate and report any deviation from specified temperature ranges immediately, following cold chain breach protocols.
- PC15.** Ensure alternate storage arrangements (e.g., backup refrigeration) are in place during power outages or equipment failures.

Utilize Software Tools in pharmacy

To be competent, the user/individual on the job must be able to:

- PC16.** Generate and process sales bills accurately using the retail pharmacy software, including item entry by name, category, or barcode.
- PC17.** Record inward stock entries by updating batch numbers, expiry dates, and invoice details in the software
- PC18.** Track low stock levels, short-expiry items, and expired medicines using software alerts and dashboards

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Regulatory norms for drug storage, including labeling and segregation
- KU2.** Classification of drugs based on form, therapeutic use, and storage conditions
- KU3.** Importance of shelf layout and airflow in preventing contamination
- KU4.** Concepts and procedures for FIFO and FEFO inventory management
- KU5.** Methods for identifying, marking, and disposing expired drugs
- KU6.** Temperature sensitivity of certain drug categories (e.g., biologics, vaccines)
- KU7.** Use and calibration of thermometers and data loggers for temperature monitoring
- KU8.** Documentation practices for temperature logs and storage records
- KU9.** SOPs for handling cold chain breaches or equipment failures
- KU10.** Emergency protocols for backup refrigeration during power loss

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Communicate clearly with team members on storage protocols and changes
- GS2.** Follow standard operating procedures precisely
- GS3.** Use basic numeracy to record temperature readings and expiry dates
- GS4.** Apply attention to detail while segregating and labeling products

Qualification Pack

- GS5.** Work systematically to maintain an organized and compliant storage area
- GS6.** Identify and respond to risks such as expired goods or cold chain breaches
- GS7.** Use digital tools or paper logs for accurate recordkeeping
- GS8.** Manage time effectively for regular checks and documentation
- GS9.** Escalate deviations or breaches in storage norms appropriately
- GS10.** Collaborate with staff to ensure compliance and readiness for audits

LFS/N0664: Ensure valid prescription processing, customer need assessment, and accurate order fulfilment as per Regulatory Standards

Description

This NOS outlines the skills required to validate prescriptions, assess customer needs, and fulfill orders accurately while complying with pharmacy regulations.

Scope

The scope covers the following :

- Prescription Validation and Customer Need Assessment
- Schedule Drug Handling and Regulatory Compliance
- E-Order Processing and Fulfilment
- Compliance Documentation and Data Security
- Operations During Constrained/Epidemic Situation

Elements and Performance Criteria

Prescription Validation and Customer Need Assessment

To be competent, the user/individual on the job must be able to:

- PC1.** identify customer needs by asking relevant and compliant questions regarding symptoms or prescription requirements.
- PC2.** identify the goods that will meet customers needs and check with customers that these are satisfactory.
- PC3.** Verify the validity of prescriptions, including the prescriber's details, drug schedule category, date, dosage, and duration, as per applicable legal standards.
- PC4.** Ensure that the prescribed drugs are permitted for dispensing and are not expired, forged, or falling under restricted supply without proper authorization.
- PC5.** Give customers clear, accurate and complete information about the availability of goods and the terms of supply.

Schedule Drug Handling and Regulatory Compliance

To be competent, the user/individual on the job must be able to:

- PC6.** Identify whether requested drugs fall under Schedule H, H1, X, or other restricted categories and follow proper protocols before processing.
- PC7.** Maintain documentation such as prescription copies and pharmacist's verification records for scheduled drugs, as per statutory norms.
- PC8.** prepare accurate, clear and complete information about the order & pass this information to people responsible for fulfilment.
- PC9.** Inform customers about potential side effects, dosage, contraindications, and regulatory restrictions, particularly for scheduled substances.

E-Order Processing and Fulfilment

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC10.** Accurately input customer orders into the e-order system, ensuring product selection aligns with prescription details and stock availability.
- PC11.** Follow legal and organizational procedures to verify customer identity, especially for online orders involving prescription and scheduled medicines.
- PC12.** Provide real-time updates on order status, dispatch, and expected delivery through the e-order management system.
- PC13.** Communicate promptly and clearly with customers if ordered products are unavailable or if the delivery timeline changes.

Compliance Documentation and Data Security

To be competent, the user/individual on the job must be able to:

- PC14.** Generate and maintain compliance documentation, including prescription logs, batch numbers, and invoice details, for audits and inspections.
- PC15.** Share order-related and prescription data only with authorized personnel and ensure secure digital and/or physical storage of customer records.

Operations During Constrained/Epidemic Situation

To be competent, the user/individual on the job must be able to:

- PC16.** Demonstrate correct donning and doffing of PPE (gloves, masks, aprons, face shields) as per hygiene and safety protocols.
- PC17.** Sanitize high-contact pharmacy surfaces and equipment using appropriate disinfectants and follow standard operating procedures.
- PC18.** Communicate empathetically and safely with symptomatic or anxious customers, ensuring physical distancing and PPE use.
- PC19.** Respond calmly and effectively during high-pressure scenarios such as stockouts, panic buying, or long queues through role-play simulations.
- PC20.** Maintain and follow a hygiene and safety checklist for customer-facing activities during epidemic situations in line with public health advisories.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Categories of scheduled drugs (e.g., H, H1, X) and protocols for handling each.
- KU2.** How to assess customer requirements based on prescription and verbal communication.
- KU3.** Standards for checking prescription authenticity, including mandatory fields and authorization marks.
- KU4.** Procedures for maintaining regulatory documentation, including prescription records and batch traceability.
- KU5.** Requirements for e-pharmacy operations, including digital security, order tracking, and customer data protection.
- KU6.** Common side effects and contraindications of high-risk drugs and how to communicate them clearly.
- KU7.** Use of pharmacy software and e-order management platforms for order fulfilment.
- KU8.** Importance of secure handling and restricted access to sensitive prescription data.
- KU9.** Standard practices for physical and digital documentation for audit readiness and traceability.

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Communicate clearly and professionally with customers and healthcare professionals.
- GS2.** Maintain attention to detail when verifying prescriptions and processing orders.
- GS3.** Use pharmacy management software and digital tools for order entry and updates.
- GS4.** Demonstrate time management in processing multiple orders with accuracy and speed.
- GS5.** Apply critical thinking to detect forged or invalid prescriptions.
- GS6.** Handle confidential customer and prescription data with discretion and integrity.
- GS7.** Follow up with customers and suppliers for order status and resolution of discrepancies.
- GS8.** Apply problem-solving approaches when handling out-of-stock or restricted items.
- GS9.** Interpret regulations and apply them correctly in real-time order situations.
- GS10.** Stay updated with regulatory changes and compliance protocols through continuous learning.

LFS/N0660: Processing the sales transactions in cash or credit at point of sale

Description

This NOS is about effectively operating point-of-sale (POS) systems to carry out cash, credit, digital, and insurance-based transactions in a retail pharmacy.

Scope

The scope covers the following :

- Operate Point-of-Sale (POS) Systems and Manage Credit Transactions
- Handle Cash, Digital Payments, and Insurance Billing
- Process Refunds and Reconcile Transactions
- Coordination with Colleague and relevant Stakeholders

Elements and Performance Criteria

Operate Point-of-Sale (POS) Systems and Manage Credit Transactions

To be competent, the user/individual on the job must be able to:

- PC1.** follow company guidelines for setting customer credit limits.
- PC2.** check customer accounts accurately and at suitable intervals to check that payments are up to date.
- PC3.** Use the POS system efficiently to initiate, process, and complete customer transactions in cash, card, or digital modes.
- PC4.** Monitor credit transactions at regular intervals and ensure timely follow-up on pending or missed payments.
- PC5.** Identify instances where credit limits are exceeded and report them promptly to designated personnel.
- PC6.** Document and report the outcomes of actions taken to manage customer credit breaches to the concerned authority.

Handle Cash, Digital Payments, and Insurance Billing

To be competent, the user/individual on the job must be able to:

- PC7.** Validate all incoming payments, including cash, card, UPI, and insurance reimbursements, ensuring accuracy and legitimacy.
- PC8.** Record all transactions promptly in the POS system, including breakdowns by payment mode and GST charges.
- PC9.** Verify and document patient insurance details for billing, claim generation, and reconciliation as per regulatory norms.
- PC10.** Identify and resolve common transaction-related issues such as payment mismatches, declined cards, or billing discrepancies.
- PC11.** Escalate unresolved or complex payment issues to the concerned authority without delay.
- PC12.** Ensure all collected cash is counted, stored securely, and deposited in accordance with organizational SOPs.

Qualification Pack

Process Refunds and Reconcile Transactions

To be competent, the user/individual on the job must be able to:

- PC13.** Validate refund requests against sales records, return conditions, and payment method, ensuring GST adjustments are correctly made.
- PC14.** Process refunds accurately through the POS system using the original mode of payment and document the reason for return.
- PC15.** Regularly reconcile customer accounts for accuracy in charges, credits, insurance settlements, and GST compliance.
- PC16.** Identify and address inconsistencies in account records, and report issues beyond one's authority or control to the appropriate supervisor.

Coordination with colleague and relevant stakeholders

To be competent, the user/individual on the job must be able to:

- PC17.** Effectively interact with internal team members (e.g., billing staff, pharmacist) and external parties (e.g., suppliers, delivery agents, auditors) to ensure smooth daily operations.
- PC18.** Accurately report incidents like stock mismatches, customer complaints, expired medicines, or equipment malfunctions to the manager using proper tools and formats.
- PC19.** Demonstrate emotional control, respectful communication, and professionalism when handling high-pressure situations, conflicts, or routine team interactions.
- PC20.** Work cooperatively to manage prescription orders, restock inventory, handle peak-hour loads, and resolve common challenges like stock shortages or billing issues.
- PC21.** Support audit preparations by maintaining proper documentation and responding appropriately during inspections.
- PC22.** Follow manager instructions during emergencies such as theft, fire, or system failures.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Organizational policies related to customer credit limits and POS operations
- KU2.** The structure and features of POS systems used in retail pharmacies
- KU3.** GST rules and documentation requirements for pharmacy billing
- KU4.** Insurance billing guidelines and reconciliation procedures
- KU5.** Security protocols for handling cash and sensitive financial data
- KU6.** Methods for identifying and reporting payment mismatches or fraud
- KU7.** Organizational escalation protocols for unresolved financial discrepancies
- KU8.** Procedures for reconciling daily, weekly, and monthly transaction reports
- KU9.** Rules governing refunds and applicable tax adjustments
- KU10.** Digital payment methods and their troubleshooting procedure

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Communicate clearly with customers about payments, billing, and refunds

Qualification Pack

- GS2.** Use basic numeracy to calculate totals, discounts, and GST correctly
- GS3.** Operate computer-based POS systems with accuracy
- GS4.** Manage time efficiently during peak customer hours
- GS5.** Manage time efficiently during peak customer hours
- GS6.** Solve routine issues with payments or POS systems
- GS7.** Apply attention to detail while reconciling transactions
- GS8.** Escalate technical or customer-related issues appropriately
- GS9.** Work collaboratively with team members and supervisors

LFS/N0666: Perform Pharmacovigilance, Promote Responsible Antibiotic Use, and Ensure Safe Handling of Controlled Substances

Description

This NOS covers the responsibilities of a retail pharmacy entrepreneur in practicing ethical pharmacy rules, identifying and reporting adverse drug reactions (ADRs) and ensuring rational use of antibiotics to combat antimicrobial resistance (AMR), and safe handling, dispensing, and disposal of controlled substances in compliance with legal and ethical standards.

Scope

The scope covers the following :

- Pharmacovigilance and Drug Safety
- Antimicrobial Resistance (AMR) and Antibiotic Stewardship
- Substance Abuse and Controlled Drug Handling

Elements and Performance Criteria

Pharmacovigilance and Drug Safety

To be competent, the user/individual on the job must be able to:

- PC1.** identify types of adverse drug reactions (ADRs) and describe their common causes.
- PC2.** describe the structure and function of national pharmacovigilance systems (e.g., PvPI).
- PC3.** explain international ADR databases and reporting tools like VigiFlow and VigiBase.
- PC4.** accurately complete a mock ADR reporting form using sample data.
- PC5.** demonstrate submission of an ADR report to PvPI using a demo form or digital tool.
- PC6.** maintain patient confidentiality and follow data handling procedures during ADR reporting.

Antimicrobial Resistance (AMR) and Antibiotic Stewardship

To be competent, the user/individual on the job must be able to:

- PC7.** describe the causes of antimicrobial resistance (AMR) and its impact on treatment outcomes.
- PC8.** classify antibiotics using WHO AWARE classification: Access, Watch, and Reserve.
- PC9.** demonstrate patient counseling on safe and rational use of antibiotics.
- PC10.** sort and categorize antibiotics from a given list under AWARE categories..
- PC11.** prepare an awareness poster or leaflet highlighting antibiotic misuse and AMR risks.

Substance Abuse and Controlled Drug Handling

To be competent, the user/individual on the job must be able to:

- PC12.** identify behavioral and physical signs of substance abuse in patients.
- PC13.** describe the pharmacist responsibilities in early intervention counseling and referrals for substance abuse.
- PC14.** explain regulations for safe storage, dispensing, and disposal of narcotics and Schedule H/ X drugs.
- PC15.** demonstrate correct procedures for disposal of expired or unused narcotics.

Qualification Pack

PC16. design and display educational material on drug abuse prevention and rehabilitation resources

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Types, signs, and causes of adverse drug reactions (ADRs)
- KU2.** Structure and objectives of India Pharmacovigilance Programme (PvPI)
- KU3.** Tools and global databases for ADR reporting (e.g., VigiBase, VigiFlow)
- KU4.** Basics of clinical trial phases related to drug safety monitoring
- KU5.** WHO AWARE classification of antibiotics and its use
- KU6.** India National Action Plan on AMR and pharmacist role in its implementation
- KU7.** Best practices for antibiotic stewardship and patient education
- KU8.** Regulatory requirements for controlled drugs (Schedule H/X, narcotics)
- KU9.** Proper disposal techniques for expired or unused controlled substances
- KU10.** Ethical responsibilities in identifying substance abuse and guiding affected individuals

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Communicate effectively with patients about ADRs, antibiotic use, and substance risks
- GS2.** Use digital tools or forms to accurately report pharmacovigilance data
- GS3.** Maintain data confidentiality during ADR or substance-related reporting
- GS4.** Educate the public through posters, leaflets, or counseling on AMR and drug abuse
- GS5.** Identify misuse patterns and intervene sensitively in potential substance abuse cases
- GS6.** Collaborate with healthcare providers for referrals or escalations
- GS7.** Follow procedures for handling restricted drugs as per compliance standards
- GS8.** Remain updated on evolving drug safety and AMR protocols
- GS9.** Prioritize patient safety and uphold professional ethics in handling sensitive issues
- GS10.** Organize awareness campaigns or materials promoting safe medication practices

LFS/N0675: Comply EHS Rules and sanitization protocol at retail pharmacy in Compliance with Good Storage Area Practices

Description

This NOS outlines the role of micro-entrepreneur in ensuring environmental, health, and safety (EHS) rules, sanitization protocols and waste disposal at retail pharmacy as per Good Storage Practices (GSP), local laws and regulations for a compliant workplace.

Scope

The scope covers the following :

- Compliance with health, hygiene, and safety protocols
- workplace hazards and emergencies
- safe and compliant storage practices
- Manage waste and expired items responsibly
- workplace security and legal compliance

Elements and Performance Criteria

Compliance with health, hygiene, and safety protocols

To be competent, the user/individual on the job must be able to:

- PC1.** Adhere to company and legal health, hygiene, and safety procedures for retail pharmacy.
- PC2.** Maintain grooming standards and personal hygiene as per organizational guidelines.
- PC3.** Monitor and document daily housekeeping and cleaning tasks in the pharmacy.
- PC4.** Conduct safety awareness activities for pharmacy staff and customers.

workplace hazards and emergencies

To be competent, the user/individual on the job must be able to:

- PC5.** Recognize fire hazards, medical risks, theft indicators, and other potential emergencies.
- PC6.** Initiate appropriate emergency response actions such as raising alarms or notifying the manager.
- PC7.** Participate in scheduled mock drills for fire, lockdowns, and earthquake preparedness.
- PC8.** Escalate incidents such as equipment malfunction or safety breaches to responsible authorities.

safe and compliant storage practices

To be competent, the user/individual on the job must be able to:

- PC9.** Apply proper segregation, labeling, and storage methods for medicines and pharmacy equipment.
- PC10.** Follow Good Storage Practices (GSP) and 5S methodology to organize the storage area.
- PC11.** Conduct routine inspection of refrigeration and ventilation systems for compliance.
- PC12.** Document temperature logs and ensure maintenance of cold chain for sensitive products.

Manage waste and expired items responsibly

To be competent, the user/individual on the job must be able to:

Qualification Pack

PC13. Identify and segregate biomedical waste, expired medicines, and hazardous materials.

PC14. Adhere to prescribed biomedical waste disposal protocols and maintain related records.

PC15. Communicate clearly with vendors or agencies responsible for waste collection.

workplace security and legal compliance

To be competent, the user/individual on the job must be able to:

PC16. Implement store-level security protocols to prevent loss or damage of inventory.

PC17. Support audits and inspections by maintaining and presenting required documents.

PC18. Follow POSH (Sexual Harassment of Women at Workplace) Act guidelines at the pharmacy.

PC19. Maintain confidentiality of customer records and prescription data.

PC20. Use PPE correctly and encourage staff to follow SOPs during all tasks.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Legal and organizational EHS policies for retail pharmacies

KU2. Personal hygiene and grooming standards for medical retail

KU3. Hazard identification and emergency response protocols

KU4. Use of fire safety equipment, emergency exits, and evacuation drills

KU5. Principles of Good Storage Practices (GSP) and the 5S methodology

KU6. Biomedical waste categories and disposal procedures

KU7. Cold chain maintenance for temperature-sensitive products

KU8. Equipment monitoring and maintenance standards

KU9. POSH Act provisions and anti-harassment measures at the workplace

KU10. Store security, inventory protection, and legal documentation processes

KU11. Confidential handling of patient records and digital data security

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Maintain personal hygiene and support a clean pharmacy environment

GS2. Perform daily housekeeping and sanitization tasks effectively

GS3. Identify risks like fire, medical issues, or theft and take prompt action

GS4. Participate in safety drills and follow emergency protocols

GS5. Organize and label stock following GSP and 5S principles

GS6. Record and monitor storage conditions using logs or digital tools

GS7. Dispose of expired drugs and hazardous waste per regulatory standards

GS8. Communicate clearly with waste vendors and audit authorities

GS9. Maintain compliance records for inspections and audits

GS10. Encourage use of PPE and standard safety procedures among staff

GS11. Respect confidentiality and implement store-level safety and security measures

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by Life Sciences Sector Skill Development Council (LSSSDC)
2. Each Element will be assigned marks proportional to its importance in NOS. LSSSDC will also lay down the proportion of marks for Theory, Practical, Project, and Viva for each Element.
3. The assessment for the theory part will be based on the knowledge bank of questions created by the LSSSDC.
4. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
5. LSSSDC as an assessment and awarding body will create unique evaluations for each assessment component i.e. theory, practical, project, and viva for every student at each examination/training center based on this criterion.
6. Wherever any assessment component is not applicable/ feasible, the balance assessment components will be used to assess the candidate, and accordingly the total marks will be calculated only for the applied

Qualification Pack

assessment component.

7. To pass the Qualification Pack, every trainee should score a minimum of 50%-70% of marks in each NOS (depending on NSQF Level) to successfully clear the assessment. In the case of a Govt funded program, the program guidelines will be overarching on the pass percentage rules.

8. In case of unsuccessful completion, the trainee may seek re-assessment on the Qualification Pack.

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Minimum Passing % at NOS Level: 70

(Please note: A Trainee must score the minimum percentage for each NOS separately as well as on the QP as a whole.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
