LSS/N3401: Inspect and check the quality of raw materials

Description

This unit provides Performance Criteria, Knowledge & Understanding, and Skills & Abilities for carrying out quality checks of raw materials received

Scope

The scope covers the following :

- Perform random inspection and quality check of the raw materials

Elements and Performance Criteria

Random inspection and quality check of the raw material

To be competent, the user/individual on the job must be able to:

- PC1.** inspect the work area is free from hazards as per the safety norm of the organization
- PC2.** inspect the work area for the cleanliness and orderliness of the work place as per the organizational standards
- PC3.** randomly inspect and check the various types of raw materials received are free from defects and is as per the quality standards
- PC4.** reject raw material as required
- PC5.** maintain all documents related to inspection
- PC6.** check if raw material is stored properly
- PC7.** check if packing condition is appropriate

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** expectations and responsibilities of the job role
- KU2.** the organizations rules, codes, guidelines and standards
- KU3.** main types of products manufactured by the company
- KU4.** statutory responsibilities under health, safety and environmental legislation and regulations
- KU5.** common hazards in the work area and workplace procedures for dealing with them
- KU6.** importance of team work and harmonious working relationships
- KU7.** contact person in case of queries on procedure or products
- KU8.** method to handle tools and equipment safely and the health and safety implications of not doing so
- KU9.** the manufacturing process
- KU10.** main types of raw materials required by each type of product manufactured by the organization
- KU11.** the organizations standard operating procedures

Qualification Pack

- KU12.** the raw material defects and handling defects
- KU13.** how to identify the process and product problems
- KU14.** the escalation hierarchy

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write in basic English/ local language as applicable
- GS2.** write and document relevant technical forms, job cards, activity logs, quality reports, daily production sheets as per the prescribed format of the company
- GS3.** read and comprehend basic English/ local language as applicable
- GS4.** read and understand manuals, health and safety instructions, memos, reports, job cards, etc
- GS5.** read and comprehend customers requirement and quality standards
- GS6.** listen actively
- GS7.** communicate effectively with the operators and supervisors
- GS8.** provide appropriate feedback to the operators and supervisors
- GS9.** evaluate the situation and apply appropriate method of inspection
- GS10.** analyse the raw material, review and decide on approval/ rejection based on quality standards of the organization
- GS11.** plan quality checks on regular basis
- GS12.** plan for receipt of confirmation of raw materials from the concerned department
- GS13.** ensure quality checks on the raw materials received as per customer standards
- GS14.** ensure customer satisfaction by timely and quality completion of work
- GS15.** identify faults, the causes and rectification for deviations from the quality standards
- GS16.** discuss and suggest methods for rectification
- GS17.** identify possible ways to improve quality and efficiency
- GS18.** assess the quality of the raw material to identify defects
- GS19.** assess the defects and suggest appropriate action
- GS20.** apply balanced judgement to different situations
- GS21.** evaluate the criticality of the quality defect of the raw material and take appropriate action
- GS22.** analyse, evaluate and apply the information gathered from observation, experience, reasoning, or communication to act efficiently

LSS/N3402: Carry out inspection after the cutting operation

Description

This unit provides Performance Criteria, Knowledge & Understanding, and Skills & Abilities for carrying out quality checks of cut components of both leather and non-leather materials

Scope

The scope covers the following :

- Random inspection and quality check of the product after the cutting process

Elements and Performance Criteria

Random inspection and the quality check of the product after the cutting process

To be competent, the user/individual on the job must be able to:

- PC1.** inspect the work area is free from hazards as per the safety norm of the organization
- PC2.** inspect the work area and check for the cleanliness and as per the organizational standards
- PC3.** obtain and check the production plan and ensure that the work is carried out as per the quality specifications mentioned
- PC4.** inspect and check the quality during the cutting process
- PC5.** inspect and randomly check if the semi-finished products are free from defects after cutting process
- PC6.** inspect and handle damages as per the quality standards
- PC7.** reject the semi finished products which do not meet the quality specifications
- PC8.** ensure the parameters are set as per the manufacturers instruction
- PC9.** ensure the quality of the semi finished products is as per the specified quality standards
- PC10.** ensure that the semi finished product is free from production and handling damages

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** expectations and responsibilities of the job role
- KU2.** the organizations rules, codes, guidelines and standards
- KU3.** procedures for operating clicking machine
- KU4.** main types of products manufactured by the company
- KU5.** statutory responsibilities under health, safety and environmental legislation and regulations
- KU6.** common hazards in the work area and workplace procedures for dealing with them
- KU7.** importance of team work and harmonious working relationships
- KU8.** contact person in case of queries on procedure or products
- KU9.** method to handle tools and equipment safely and the health and safety implications of not doing so

Qualification Pack

LSS/N3403: Perform the quality inspection after the pre-closing operations in footwear

Description

This unit provides Performance Criteria, Knowledge & Understanding, and Skills & Abilities required to monitor the quality of the shoe uppers after the pre-closing operations like skiving, fusing, marking, stamping, embossing, etc.,

Scope

The scope covers the following :

- Contribute to achieving the product quality

Elements and Performance Criteria

Contribute to achieving the product quality

To be competent, the user/individual on the job must be able to:

- PC1.** ensure materials and component parts meet specifications
- PC2.** ensure the quality of the product meets specification during production
- PC3.** maintain the required productivity and quality levels
- PC4.** carry out quality checks at agreed intervals and in the approved way
- PC5.** count and verify the number of uppers are as per job card at the start and end of every stage in the processes
- PC6.** sort the components as per the job card after each process before passing it to the next stage of production
- PC7.** ensure that the quality and appearance of the uppers are not affected during materials movement
- PC8.** report and replace faulty materials and component parts which do not meet specification with the operators approval
- PC9.** maintain the continuity of production with minimum interruptions and downtime
- PC10.** identify faults and irregularities in equipment and machinery and report to the superior
- PC11.** ensure minimum wastage and their proper disposal
- PC12.** ensure the components are split as per the thickness specified in the job card
- PC13.** ensure the gimped uppers conform to the curves as specified in the job card
- PC14.** ensure that the ironing is done properly and there are no pleats/wrinkles
- PC15.** correctly mark the uppers as per the design specified
- PC16.** ensure the edge color is done correctly and smoothly and should be matching exactly to the concerned uppers
- PC17.** paste the uppers carefully without any spillage/damage
- PC18.** ensure the folding is done exactly as per the basic design
- PC19.** ensure the eyeletting is done at the proper position as specified in the job card

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the companies quality standards
- KU2.** the importance of complying with written instructions
- KU3.** types of problems with quality and how to report them to appropriate people
- KU4.** consequences of not rectifying problems
- KU5.** safe working practices and organizational procedures
- KU6.** limits of own responsibility
- KU7.** the lines of communication, authority and reporting procedures
- KU8.** the organizations rules, codes and guidelines
- KU9.** manufacturers instructions
- KU10.** methods to receive work instructions and specifications and interpret them accurately
- KU11.** complete sequential processes for manufacturing closed uppers
- KU12.** different types of leather and lining
- KU13.** different colours and their properties
- KU14.** importance/properties of adhesives
- KU15.** impact of adhesives getting spilt on the uppers
- KU16.** exact positioning of back strap
- KU17.** importance of inserting the eyelets at the exact position
- KU18.** process to identify materials which do not conform to requirements and how to report them to appropriate people
- KU19.** the causes of lost production and material wastage
- KU20.** process to maintain the flow of production
- KU21.** the importance of achieving quality and its relation to the end user / customer

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write in English/local language as applicable
- GS2.** fill up appropriate technical forms, process charts, activity logs in the prescribed format of the company
- GS3.** read and comprehend basic English/local language as applicable
- GS4.** read and understand manuals, health and safety instructions, memos, reports, job cards etc
- GS5.** listen actively
- GS6.** communicate effectively with supervisors, managers, etc
- GS7.** analyse the defects and the procedure for dealing with it
- GS8.** take appropriate actions in terms of any deviations from the process
- GS9.** plan and set the targets along with the supervisors and the co workers
- GS10.** organize tools and equipments to be used

Qualification Pack

- GS11.** plan work according to the required schedule and location
- GS12.** ensure all the processes in pre assembly operations are as per customer standards
- GS13.** evaluate and ensure delivery of products as per customers specifications
- GS14.** identify possible defects with the products
- GS15.** review the defects and take appropriate actions to rectify
- GS16.** report to the authority if problems cannot be rectified
- GS17.** diagnose common problems in the machine based on visual inspection
- GS18.** assess and control the quality standards of the product as per customer standards

LSS/N3404: Carry out the quality inspection after the stitching operations

Description

This unit provides Performance Criteria, Knowledge & Understanding, and skills & Abilities for carrying out quality checks of semi-finished products after stitching operations.

Scope

The scope covers the following :

- Performing random inspection and quality check of the product after the stitching process

Elements and Performance Criteria

Random inspection and quality check of the product after the stitching process

To be competent, the user/individual on the job must be able to:

- PC1.** inspect the work area is free from hazards as per the safety norm of the organization
- PC2.** inspect the work area and check for the cleanliness and as per the organizational standards
- PC3.** obtain and check the production plan and ensure that the work is carried out as per the quality specifications mentioned
- PC4.** inspect and check the quality during the stitching process
- PC5.** inspect and randomly check if the semi finished products are free from defects after stitching process
- PC6.** inspect and handle damages as per the quality standards
- PC7.** reject the semi finished products which do not meet the quality specifications
- PC8.** ensure the parameters are set as per the manufacturers instruction
- PC9.** ensure the quality of the semi finished products is as per the specified quality standards
- PC10.** ensure that the semi finished product is free from production and handling damages
- PC11.** give feedback on the quality of the product on the continuous basis

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** expectations and responsibilities of the job role
- KU2.** the organizations rules, codes, guidelines and standards
- KU3.** procedures for operating stitching machine
- KU4.** main types of products manufactured by the company
- KU5.** statutory responsibilities under health, safety and environmental legislation and regulations
- KU6.** common hazards in the work area and workplace procedures for dealing with them
- KU7.** importance of team work and harmonious working relationships
- KU8.** contact person in case of queries on procedure or products

Qualification Pack

- KU9.** method to handle tools and equipment safely and the health and safety implications of not doing so
- KU10.** the stitching process
- KU11.** the various types of stitching required by various products
- KU12.** organizations standard operating procedures
- KU13.** stitching defects and handling defects
- KU14.** how to identify the process and product problems
- KU15.** the escalation hierarchy

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write in basic English/ local language as applicable
- GS2.** write and document relevant technical forms, job cards, activity logs, quality reports, daily production sheets as per the prescribed format of the company
- GS3.** read and comprehend basic English/ local language as applicable
- GS4.** read and understand manuals, health and safety instructions, memos, reports, job cards, etc
- GS5.** read and comprehend customers requirement and quality standards
- GS6.** listen actively
- GS7.** communicate effectively with the operators and supervisors
- GS8.** provide appropriate feedback to the operators and supervisors
- GS9.** evaluate the situation and apply appropriate method of inspection
- GS10.** analyse the stitched product, review and decide on approval/ rejection based on quality standards of the organization
- GS11.** plan quality checks on regular basis
- GS12.** plan for receipt of confirmation of raw materials from the concerned department
- GS13.** ensure quality checks on the semi finished stitched footwear as per the customer standards
- GS14.** ensure customer satisfaction by timely and quality completion of work
- GS15.** identify faults, the causes and rectification for deviations from the quality standards
- GS16.** discuss and suggest methods for rectification
- GS17.** identify possible ways to improve quality and efficiency
- GS18.** assess the quality of the semi finished product to identify defects in the stitched product
- GS19.** assess the defects and suggest appropriate action
- GS20.** apply balanced judgement to different situations
- GS21.** evaluate probable defects and ways to avoid them
- GS22.** evaluate the criticality of the quality defect of the semi finished product and take appropriate action
- GS23.** analyse, evaluate and apply the information gathered from observation, experience, reasoning, or communication to act efficiently

LSS/N3405: Perform quality inspection in lasting operations

Description

This unit provides Performance Criteria, Knowledge & Understanding and Skills & Abilities required to monitor the quality of the production while undertaking lasting related activities to ensure products meet specifications.

Scope

The scope covers the following :

- Inspection
- Reporting and Documentation

Elements and Performance Criteria

Inspection

To be competent, the user/individual on the job must be able to:

- PC1.** set up and test machines to ensure correct operation
- PC2.** operate the machine in accordance with machine and workplace standards
- PC3.** ensure the last and upper is placed appropriately in the machines
- PC4.** ensure creases do not appear on the inside of the back portion of the upper while counter tightening
- PC5.** ensure the shape of the shoe is retained during toe moulding operation
- PC6.** ensure pleats do not appear in the seat portion of the lasted upper after seat lasting process
- PC7.** selection of appropriate lasts as per the sizes
- PC8.** ensuring the quality of the lasting as per the specifications and the standards
- PC9.** roughing as per the specifications and ensure the upper of shoe is free from roughing damages
- PC10.** check the performance of the machine for signs of faulty operations and take action in accordance with workplace procedures
- PC11.** ensure materials and component parts meet specifications
- PC12.** maintain the required productivity and quality levels
- PC13.** carry out quality checks at agreed intervals and in the approved way

Reporting & Documentation

To be competent, the user/individual on the job must be able to:

- PC14.** identify faults in materials and products
- PC15.** identify causes of faults and take action to rectify the same to maintain product quality
- PC16.** report and replace faulty materials and component parts which do not meet specification
- PC17.** report faults outside personal responsibility to the appropriate person
- PC18.** follow reporting procedures where the cause of faults cannot be identified
- PC19.** follow reporting procedures where the cause of faults cannot be identified

Qualification Pack

PC20. identify process problems that effect product quality and report them promptly to appropriate people

PC21. identify faults in finished products and trace their causes

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** types of problems with quality and how to report them to appropriate people
- KU2.** consequences of not rectifying problems
- KU3.** safe working practices and organizational procedures
- KU4.** limits of personal responsibility
- KU5.** the lines of communication, authority and reporting procedures
- KU6.** the organizations rules and guidelines (including timekeeping)
- KU7.** the companies quality standards
- KU8.** equipment operating procedures / manufacturers instructions
- KU9.** the different types of faults likely to be found in the lasting process and method to put them right
- KU10.** the different techniques and methods used to detect faults in the lasting process
- KU11.** the inspection methods that can be used
- KU12.** importance of product checks
- KU13.** the acceptable solutions for particular faults
- KU14.** the consequences of not rectifying problems
- KU15.** the types of adjustments suitable for specific types of faults
- KU16.** responsibilities at work during production
- KU17.** companys quality and production targets and the effect of not meeting these on self and/or the team
- KU18.** allowed tolerances
- KU19.** difference between correctable and non-correctable faults
- KU20.** manufacturers instructions

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write in English/ local language as applicable
- GS2.** fill up appropriate technical forms, process charts, activity logs in the prescribed format of the company
- GS3.** read and comprehend basic English/local language as applicable
- GS4.** read and understand manuals, health and safety instructions, memos, reports, job cards etc
- GS5.** listen actively
- GS6.** communicate effectively with operators supervisors, managers, etc

Qualification Pack

- GS7.** analyse the defects and the procedure for dealing with it
- GS8.** take appropriate actions in terms of any deviations from the process
- GS9.** plan and set the targets along with the supervisors and the co workers
- GS10.** organize tools and equipments to be used
- GS11.** plan work according to the required schedule and location
- GS12.** ensure lasting operation is as per customer standards
- GS13.** evaluate and ensure delivery of products as per customers specifications
- GS14.** identify possible defects with the products
- GS15.** review the defects and take appropriate actions to rectify
- GS16.** report to the authority if problems cannot be rectified
- GS17.** diagnose common problems in the machine based on visual inspection
- GS18.** assess and control the quality standards of the product as per customer standards

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Inspection</i>	15	25	-	-
PC1. set up and test machines to ensure correct operation	1	2	-	-
PC2. operate the machine in accordance with machine and workplace standards	1	1	-	-
PC3. ensure the last and upper is placed appropriately in the machines	2	4	-	-
PC4. ensure creases do not appear on the inside of the back portion of the upper while counter tightening	1	2	-	-
PC5. ensure the shape of the shoe is retained during toe moulding operation	2	2	-	-
PC6. ensure pleats do not appear in the seat portion of the lasted upper after seat lasting process	2	1	-	-
PC7. selection of appropriate lasts as per the sizes	2	4	-	-
PC8. ensuring the quality of the lasting as per the specifications and the standards	1	2	-	-
PC9. roughing as per the specifications and ensure the upper of shoe is free from roughing damages	1	2	-	-
PC10. check the performance of the machine for signs of faulty operations and take action in accordance with workplace procedures	-	1	-	-
PC11. ensure materials and component parts meet specifications	1	2	-	-
PC12. maintain the required productivity and quality levels	-	1	-	-
PC13. carry out quality checks at agreed intervals and in the approved way	1	1	-	-

LSS/N3406: Check the quality of the product after the footwear finishing process

Description

This unit provides Performance Criteria, Knowledge & Understanding and Skills & Abilities for carrying out quality checks of finished products.

Scope

The scope covers the following :

- Performing random inspection and quality check of the finished product

Elements and Performance Criteria

Random inspection and quality check of the finished product

To be competent, the user/individual on the job must be able to:

- PC1.** ensure the work area is free from hazards as per the safety norm of the organization
- PC2.** inspect the work area is free from hazards as per the safety norm of the organization
- PC3.** inspect the work area and check for the cleanliness and as per the organizational standards
- PC4.** inspect and randomly check if the finished products are free from defects
- PC5.** inspect and handle damages as per the quality standards
- PC6.** reject the finished products which do not meet the quality specifications
- PC7.** ensure the parameters are set as per the manufacturers instruction
- PC8.** ensure the quality of the finished products is as per the specified quality standards
- PC9.** ensure that the finished product is free from production and handling damages
- PC10.** give feedback on the quality of the product on the continuous basis

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** expectations and responsibilities of the job role
- KU2.** the organizations rules, codes, guidelines and standards
- KU3.** procedures for operating molding machine
- KU4.** main types of products manufactured by the company
- KU5.** statutory responsibilities under health, safety and environmental legislation and regulations
- KU6.** common hazards in the work area and workplace procedures for dealing with them
- KU7.** importance of team work and harmonious working relationships
- KU8.** contact person in case of queries on procedure or products
- KU9.** method to handle tools and equipment safely and the health and safety implications of not doing so

Qualification Pack

- KU10.** the finishing process
- KU11.** organizations standard operating procedures
- KU12.** product defects and handling defects
- KU13.** how to identify the process and product problems
- KU14.** the escalation hierarchy

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write in basic English/ local language as applicable
- GS2.** write and document relevant technical forms, job cards, activity logs, quality reports, daily production sheets as per the prescribed format of the company
- GS3.** read and comprehend basic English/ local language as applicable
- GS4.** read and understand manuals, health and safety instructions, memos, reports, job cards, etc
- GS5.** read and comprehend customers requirement and quality standards
- GS6.** listen actively
- GS7.** communicate effectively with the operators and supervisors
- GS8.** provide appropriate feedback to the operators and supervisors
- GS9.** evaluate the situation and apply appropriate method of inspection
- GS10.** analyse the finished footwear, review and decide on approval/ rejection based on quality standards of the organization
- GS11.** plan quality checks on regular basis
- GS12.** plan for receipt of finished footwear and organize random checks
- GS13.** ensure quality checks on the finished footwear as per the customer standards
- GS14.** ensure customer satisfaction by timely and quality completion of work
- GS15.** identify faults, the causes and rectification for deviations from the quality standards
- GS16.** discuss and suggest methods for rectification
- GS17.** identify possible ways to improve quality and efficiency
- GS18.** assess the quality of the finished footwear to identify defects
- GS19.** assess the defects and suggest appropriate action
- GS20.** apply balanced judgement to different situations
- GS21.** evaluate probable defects and ways to avoid them
- GS22.** evaluate the criticality of the quality defect of the finished footwear and take appropriate action
- GS23.** analyse, evaluate and apply the information gathered from observation, experience, reasoning, or communication to act efficiently

LSS/N7708: Check quality of the semi-finished product after moulding process

Description

This unit provides Performance Criteria, Knowledge & Understanding, and Skills & Abilities for carrying out quality checks of semi-finished products after molding while preparing footwear.

Scope

The scope covers the following :

- Performing random inspection and quality check of the product after the moulding process

Elements and Performance Criteria

Random inspection and quality check of the product after the moulding process

To be competent, the user/individual on the job must be able to:

- PC1.** inspect the work area is free from hazards as per the safety norm of the organization
- PC2.** inspect the work area and check for the cleanliness and as per the organizational standards
- PC3.** obtain and check the production plan and ensure that the work is carried out as per the quality specifications mentioned
- PC4.** inspect and check the quality of the pu chemical mix
- PC5.** inspect and check the quality during the molding process
- PC6.** inspect and randomly check if the semi finished products are free from defects after molding process
- PC7.** inspect and handle damages as per the quality standards
- PC8.** reject the semi finished products which do not meet the quality specifications
- PC9.** ensure the parameters are set as per the manufacturers instruction
- PC10.** ensure the quality of the semi finished products is as per the specified quality standards
- PC11.** ensure that the semi finished product is free from production and handling damages
- PC12.** give feedback on the quality of the product on the continuous basis

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

LSS/N3407: Interact and coordinate across the levels and the departments

Description

This unit provides Performance Criteria, Knowledge & Understanding and Skills & Abilities for interacting and coordinating with superiors, juniors and colleagues while preparing non-leather footwear.

Scope

The scope covers the following :

- Interact with subordinates
- Interact and coordinate with superiors
- Interact and coordinate with colleagues within and outside the department

Elements and Performance Criteria

Interaction with subordinates

To be competent, the user/individual on the job must be able to:

- PC1.** give work instructions to the team members
- PC2.** product defects received from previous process, repairs and maintenance of tools and machinery as required
- PC3.** instruct about the delivery time, tools and machines, and consumables to be used and quality requirements
- PC4.** educate about a new requirements/objectives of the company
- PC5.** train about using and maintenance of machines and tools
- PC6.** communicate any potential hazards or safety measures to be followed
- PC7.** listen to various problems reported by the team members and provide solution
- PC8.** quality check completed work from the team member and give feedback

Interaction and coordination with superiors

To be competent, the user/individual on the job must be able to:

- PC9.** receive work instructions and feedback from reporting manager or other senior
- PC10.** communicate to reporting superior about process-flow improvements, product
- PC11.** defects received from previous process, repairs and maintenance of tools and machinery as required
- PC12.** communicate to reporting superior about employee management, i.e., shortages or performance related
- PC13.** communicate any potential hazards or expected process disruptions
- PC14.** re-work based on feedback provided by superior on product, process and people
- PC15.** handover completed work to superior

Interaction and coordination with colleagues within and outside the department

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC16.** work as a team with colleagues and share work as per their or own work load and skills
- PC17.** work with colleagues of other departments
- PC18.** communicate and discuss work flow related difficulties in order to find solutions with mutual agreement
- PC19.** receive feedback from QC and rework in order to complete work on time

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** details of the various job roles and responsibilities
- KU2.** responsibilities and line of reporting within the work area
- KU3.** protocol to obtain more information on work related tasks
- KU4.** organizational policies and procedures
- KU5.** work target and review mechanism
- KU6.** method of obtaining/ giving feedback related to performance
- KU7.** importance of team work and harmonious working relationships
- KU8.** process for offering/ obtaining work related assistance
- KU9.** protocol and format for reporting work related risks/ problems
- KU10.** contact person in case of queries on procedure or products
- KU11.** common hazards in the work area and procedures for dealing with them
- KU12.** procedures for handling the tools and equipment
- KU13.** procedures with regard to material re-usage and disposal
- KU14.** quality standards
- KU15.** documentation required as part of the process
- KU16.** procedures to operate the PU moulding machines
- KU17.** procedures and concept of the operations followed in the moulding process
- KU18.** the ways by which material can be contaminated or damaged during processing and the effects on quality
- KU19.** knowledge of the chemicals used in the PU moulding machine
- KU20.** knowledge of the hinged type last and two part metal last
- KU21.** basic units of measurements knowledge

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write in English/ local language as applicable
- GS2.** write and document relevant technical forms, job cards, activity logs, quality reports, daily production sheets as per the prescribed format of the company
- GS3.** read English/ local language as applicable
- GS4.** read and understand manuals, health and safety instructions, memos, reports, job cards, etc

Qualification Pack

- GS5.** read and comprehend organizational hierarchy, rules and regulations
- GS6.** listen actively
- GS7.** communicate effectively with the operators supervisors and colleagues
- GS8.** provide appropriate feedback to the operators and supervisors
- GS9.** evaluate the situation and apply appropriate mode of communication
- GS10.** plan quality checks on regular basis
- GS11.** plan for receipt of finished footwear and organize random checks
- GS12.** ensure interaction and coordination is as per the set standards
- GS13.** identify faults, the causes and rectification for deviations from the quality standards
- GS14.** discuss and suggest methods for rectification
- GS15.** identify possible ways to improve quality and efficiency
- GS16.** assess the quality of the finished footwear to identify defects
- GS17.** assess the defects and suggest appropriate action
- GS18.** apply balanced judgement to different situations
- GS19.** evaluate probable defects and ways to avoid them
- GS20.** evaluate the criticality of the quality defect of the finished footwear and take appropriate action

LSS/N8601: Maintain health, safety & security, a clean work area & equipment, use optimized resources at the workplace, and comply with industry & organizational Requirements

Description

This unit is about maintaining good hygiene, health, and workplace safety standards, maintaining work areas and activities to ensure tools and machines are maintained as per norms, understanding and complying with the requirements of the organization and respecting everyone at the workplace, adopting sustainable practices and optimizing the use of resources, especially material, energy, and waste, in day-to-day operations at the workplace.

Scope

The scope covers the following :

- Compliance with health, safety, and security requirements
- Maintain hygiene and sanitation
- Maintain the work area
- Perform maintenance operations
- Compliance with industry, regulatory and organizational requirements
- Respect diversity
- Material conservation practices
- Energy/electricity conservation practices
- Effective waste management/recycling practices

Elements and Performance Criteria

Compliance with health, safety and security requirements at the workplace

To be competent, the user/individual on the job must be able to:

- PC1.** comply with health and safety-related instructions applicable to the workplace
- PC2.** use the personal protective equipment as per protocol
- PC3.** maintain a healthy lifestyle and guard against dependency on intoxicants
- PC4.** follow environment management system related procedures
- PC5.** monitor the workplace and work processes for potential risks and threats
- PC6.** carry out periodic walk-through to keep the work area free from hazards and obstructions, if assigned
- PC7.** report hazards and potential risks/ threats to supervisors or other authorized personnel
- PC8.** participate in mock drills/ evacuation procedures organized at the workplace
- PC9.** undertake first aid training, fire-fighting drill, and emergency response training, etc.,
- PC10.** take action based on instructions in the event of fire, emergencies or accidents
- PC11.** safely handle and move waste and debris
- PC12.** follow organization procedures for shutdown and evacuation when require

Maintain hygiene and sanitation at the workplace

Qualification Pack

To be competent, the user/individual on the job must be able to:

PC13. maintain personal body hygiene and dental hygiene

PC14. follow social distancing at the workplace

PC15. ensure not to go to work if unwell, to avoid the risk of spreading an infection to other people

PC16. cover the mouth with an elbow/handkerchief or turn away from people while sneezing or coughing

PC17. ensure equipment, work area, restrooms, etc. are sanitized before and after sessions

PC18. ensure regular vaccinations to avoid any spreading of diseases

Maintain the work area

To be competent, the user/individual on the job must be able to:

PC19. handle materials, machinery, equipment and tools safely and correctly

PC20. use correct lifting and handling procedures

PC21. use materials to minimize waste

Perform maintenance operations

To be competent, the user/individual on the job must be able to:

PC22. Perform the cleaning of machine or tools at the end of each shift

PC23. carry out running maintenance within agreed schedules

PC24. report unsafe equipment and other dangerous occurrences

PC25. carry out works in a comfortable position with the correct posture

PC26. maintain proper lighting, and ventilation to make sure general comfort is there while working

Compliance with industry, regulatory and organizational requirements

To be competent, the user/individual on the job must be able to:

PC27. carry out work functions in accordance with legislation and regulations, organizational guidelines, and procedures

PC28. seek and obtain clarifications on policies and procedures from the authorized personnel

PC29. follow the policies and procedures within the work practices

PC30. identify and report any possible deviation to these requirements

Respect diversity

To be competent, the user/individual on the job must be able to:

PC31. transact with everyone without any personal bias like gender, disability, caste, religion, color, sexual orientation, and culture

PC32. identify the indicators of harassment and discrimination

PC33. report incidents of harassment and discrimination to appropriate authority

PC34. respect the personal and professional space of others

Material conservation practices

To be competent, the user/individual on the job must be able to:

PC35. identify ways to optimize the usage of material including water in various activities /processes

PC36. check for spills/leakages in various processes and plug the spills and leakages

PC37. use the optimized amount of chemicals that have petroleum products (adhesives, leather chemicals, chrome salt, cleaning agents, IPA, etc.)

Qualification Pack

PC38. use proper PPE when in contact with the above materials as per specifications

Energy/electricity conservation practices

To be competent, the user/individual on the job must be able to:

PC39. identify ways to optimize the usage of electricity/energy in various activities/processes

PC40. check if the equipment/machine is generally functioning before commencing work and rectify wherever required

PC41. ensure electrical equipment and appliances are properly connected and turned off when not in use

Effective waste management/recycling practices

To be competent, the user/individual on the job must be able to:

PC42. identify recyclable and non-recyclable, and hazardous waste generated

PC43. segregate waste into different categories

PC44. dispose of non-recyclable waste appropriately

PC45. deposit recyclable and reusable material at the identified location

PC46. follow processes specified for disposal of hazardous waste

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. the health and safety-related practices applicable at the workplace

KU2. the potential hazards, risks, and threats based on the nature of operations

KU3. the common hazards in the work area and procedure for dealing with them

KU4. the organizational procedures for safe handling of equipment and machine operations

KU5. details of personal protective equipment and method to use it

KU6. the signage used for personnel protective equipment, fire and safety, and first aid

KU7. layout of the plant and details of emergency exits, escape routes, emergency equipment, and assembly points

KU8. details of personnel trained in first aid, fire-fighting, and emergency response

KU9. actions to take in the event of mock drills/ evacuation procedures or actual accident, emergency, or fire

KU10. the storage and disposal of hazardous substances and wastes

KU11. relevance of health and safety requirements applicable at the workplace

KU12. importance of sound health, hygiene, and good habits

KU13. the ill-effects of alcohol, tobacco, and other drugs

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read the manuals, health and safety instructions, memos, reports, job cards, etc.

GS2. communicate proficiently in the local language

GS3. listen the issues and comments given by the co-workers, supervisors, and managers

Qualification Pack

- GS4.** communicate effectively with co-workers, supervisors, managers, etc.,
- GS5.** fill up appropriate technical forms, process charts, activity logs in the prescribed format of the company
- GS6.** analyze the defects and the procedure for dealing with it
- GS7.** complete the tasks efficiently and accurately within the stipulated time
- GS8.** organize the material requirements sequentially
- GS9.** select the optimal process and appropriate tools & equipment to complete the work efficiently
- GS10.** use reasoning skills to make proper decisions and troubleshoot concerns related to own responsibilities
- GS11.** use problem-solving skills to solve the problems that occurred during relevant operation

Qualification Pack

Qualification Pack

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 50

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Compulsory NOS

National Occupational Standards	Theory Marks	Practical Marks	Project Marks	Viva Marks	Total Marks	Weightage
LSS/N3401. Inspect and check the quality of raw materials	10	30	-	-	40	7

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
