Qualification Pack

LSS/N3102: Supervising the production line

Description

This unit provides Performance Criteria, Knowledge & Understanding and Skills & Abilities required to supervise the respective production line and ensure the production targets and quality parameters are met.

Scope

This unit/task covers the following: Supervision of production line

- Conduct Trial Production
- Conduct Mass Production
- Line supervision Team Management Quality Inspection Reporting & Documentation

Elements and Performance Criteria

Line Supervision

To be competent, the user/individual on the job must be able to:

- PC1.** ensure the work area is free from hazards as per the safety norms of the organization
- PC2.** ensure the cleanliness and orderliness of the work place is as per the organizational standards
- PC3.** ensure that all materials required for the production are available and handed over on time
- PC4.** ensure planning and setting the production line
- PC5.** conduct the trial production as per the specifications
- PC6.** set the production line if trial production is successful
- PC7.** take care of any suggestions/ bottlenecks after the trial production
- PC8.** incorporate any suggestions or modifications given , if required
- PC9.** resolve any bottlenecks, if any from the trial production
- PC10.** set the production line for the mass production
- PC11.** ensure the smooth functioning of the production line
- PC12.** ensure maximum utilization of resources and nil defects by allocating work accordingly

Team Management

To be competent, the user/individual on the job must be able to:

- PC13.** ensure the team adheres to the organizational rules on attendance and timekeeping
- PC14.** manage the administrative functions for the team
- PC15.** allocate the work among the team ensuring maximum utilization of resources and nil defects

Quality Inspection

To be competent, the user/individual on the job must be able to:

- PC16.** conduct a visual examination of the trial product on completion
- PC17.** ensure minimum wastage and their proper disposal

Reporting & Documentation

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC18.** prepare all the reports and documentations for the production line, as per organizational standards
- PC19.** liaison with other departments for all production related work

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** local / instructional language
- KU2.** expectations and responsibilities of the job role
- KU3.** the organizations rules, codes, guidelines and standards applicable for the job role
- KU4.** common hazards in the work area and workplace procedures for dealing with them
- KU5.** importance of teamwork and dealing with conflicts
- KU6.** right individual to contact in case of escalation
- KU7.** safety and precautionary measures as per the organizational standards
- KU8.** correct posture to be maintained while standing for long durations
- KU9.** the organizations rules, codes, guidelines and standards applicable for the subordinates
- KU10.** footwear design and technology
- KU11.** different types of leather and non-leather
- KU12.** different components of footwear
- KU13.** organizations standard operating procedures
- KU14.** production processes involved in footwear manufacturing
- KU15.** various materials used in shoemaking

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write in English/local language as applicable
- GS2.** fill up appropriate technical forms, process charts, activity logs, job cards, etc in the prescribed format of the company
- GS3.** prepare the report for the production line
- GS4.** read English/local language as applicable
- GS5.** read and understand manuals, health and safety instructions, memos, reports, job cards etc
- GS6.** provide clear instructions to the team
- GS7.** interact with the internal team members, co workers, other departments, managers, etc. effectively to meet the desired outcomes
- GS8.** provide feedback to the team members for process improvisation
- GS9.** review the performance of operator, helpers in the production line
- GS10.** evaluate and choose effective ways to meet the production targets without compromising on the quality

Qualification Pack

- GS11.** plan work according to the required schedule to meet production targets
- GS12.** effectively plan and delegate work to suit individual skill levels
- GS13.** ensure availability of materials before the beginning of the production process
- GS14.** supervise the production line as per organizational standards
- GS15.** guide the team members in meeting the customer requirements
- GS16.** observe and identify faults in the production to provide appropriate solutions
- GS17.** utilize resources effectively in the production line
- GS18.** resolve issues if any among team members
- GS19.** discuss with the managers on technical as well human resource related issues that cannot be resolved
- GS20.** examine the product to identify defects in the product
- GS21.** analyse available information and evaluate results to identify the best solution available for the particular fault
- GS22.** evaluate the information gathered from process charts, activity logs, job cards and take appropriate actions for process improvements
- GS23.** use logic and reasoning to identify the strengths and weaknesses to provide alternative solutions, conclusions or approaches to problems

Qualification Pack

LSS/N3103: Ensure that the production line, tools and machines are maintained properly for supervising the line.

Description

This unit provides Performance Criteria, Knowledge & Understanding and Skills & Abilities required to organize and maintain their work areas, tools and machines to make sure that agreed production targets and instructions are met.

Scope

This unit/task covers the following: Ensuring environmental conditions for the production line

- Lighting
- Ventilation
- General comfort Ensuring that the maintenance team has done proper maintenance of the production line
- Mechanical condition
- Lubrication technique
- Basic cleaning technique

Elements and Performance Criteria

Maintenance of work area, tools and machines

To be competent, the user/individual on the job must be able to:

- PC1.** check whether materials, machinery, equipment and tools are used safely and correctly by the operators and helpers
- PC2.** ensure correct lifting and handling procedures are followed by the operators and helpers
- PC3.** ensure minimum wastage of materials in the production line
- PC4.** organize work for the subordinates
- PC5.** ensure a clean and hazard free working area is there for the operator and helpers to perform the tasks
- PC6.** deal with work interruptions
- PC7.** ensure proper maintenance within agreed schedules is conducted
- PC8.** report unsafe equipment and other dangerous occurrences to the plant supervisor
- PC9.** ensure that the correct machine guards are in place
- PC10.** ensure that the helpers and operators clean the equipment and methods appropriate for the work to be carried out
- PC11.** ensure the disposal of waste safely in the designated location
- PC12.** ensure storage of equipment safely after use
- PC13.** complete and store accurate records and documentation

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** personal hygiene and duty of care
- KU2.** safe working practices and organizational procedures
- KU3.** limits of ones own and subordinates responsibility
- KU4.** ways of resolving with problems within the production line
- KU5.** the production process and the specific work activities that relate to the whole process
- KU6.** the importance of effective communication with peers, supervisor and subordinates
- KU7.** the lines of communication, authority and reporting procedures
- KU8.** the organizations rules, codes and guidelines (including timekeeping)
- KU9.** the companies maintenance standards
- KU10.** the types of records kept, how are they completed and the importance of keeping them accurate
- KU11.** the importance of complying with written instructions
- KU12.** equipment operating procedures / manufacturers instructions
- KU13.** statutory responsibilities under health, safety and environmental legislation and regulations
- KU14.** work instructions and specifications and interpret them accurately
- KU15.** method to make use of the information detailed in specifications and instructions
- KU16.** relation between work role and the overall manufacturing process
- KU17.** the importance of good time keeping and attendance
- KU18.** the importance of minimized production costs
- KU19.** the importance of taking action when problems are identified
- KU20.** different ways of minimizing waste
- KU21.** the importance of running maintenance and regular cleaning
- KU22.** effects of contamination on products i.e. machine oil, dirt
- KU23.** common faults with equipment and the method to rectify
- KU24.** maintenance procedures
- KU25.** hazards likely to be encountered when conducting routine maintenance
- KU26.** different types of cleaning equipment and substances and their use
- KU27.** safe working practices for cleaning and the method of carrying them out

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write and document appropriate technical forms, job cards, inspection sheets as required format of the company
- GS2.** read and comprehend basic English to read and interpret indicators in the machine and operating manuals, job cards, visual cards,
- GS3.** read and understand manuals, health and safety instructions, memos, reports, job cards etc
- GS4.** speak and communicate effectively to peers and team members
- GS5.** give clear instructions to co-workers, subordinates others
- GS6.** use correct technical term while interacting with colleagues

Qualification Pack

- GS7.** take appropriate decisions regarding to responsibilities
- GS8.** assess for any damage/faulty component in the concerned machinery and take action accordingly
- GS9.** evaluate the decision and conduct basic trouble shooting
- GS10.** plan and manage work routine based on company procedure
- GS11.** plan for cleaning and lubricating the concerned machinery daily
- GS12.** plan for cleaning the concerned tools and workplace daily before and after operations
- GS13.** conduct regular checks on functioning of tools and machinery
- GS14.** maintain work area, tools and machines as per the organizational requirements
- GS15.** solve operational role related issues
- GS16.** report faulty components and machinery to the concerned department
- GS17.** diagnose common problems in the machine based on visual inspection, sound, temperature etc
- GS18.** analyse, evaluate and apply the information gathered from observation, experience, reasoning, or communication to act efficiently

LSS/N8601: Maintain health, safety and security at workplace

Description

This unit provides Performance Criteria, Knowledge & Understanding and Skills & Abilities required to comply with health, safety and security requirements at the workplace and covers procedures to prevent, control and minimize risk to self and others

Scope

This unit/task covers the following:

- Compliance with health, safety and security requirements at work

Elements and Performance Criteria

Compliance with health, safety and security requirements at work

To be competent, the user/individual on the job must be able to:

- PC1.** comply with health and safety related instructions applicable to the workplace
- PC2.** use and maintain personal protective equipment as per protocol
- PC3.** carry out own activities in line with approved guidelines and procedures
- PC4.** maintain a healthy lifestyle and guard against dependency on intoxicants
- PC5.** follow environment management system related procedures
- PC6.** identify and correct (if possible) malfunctions in machinery and equipment
- PC7.** report any service malfunctions that cannot be rectified
- PC8.** store materials and equipment in line with manufacturers and organizational requirements
- PC9.** safely handle and move waste and debris
- PC10.** minimize health and safety risks to self and others due to own actions
- PC11.** seek clarifications, from supervisors or other authorized personnel in case of perceived risks
- PC12.** monitor the workplace and work processes for potential risks and threats
- PC13.** carry out periodic walk-through to keep work area free from hazards and obstructions, if assigned
- PC14.** report hazards and potential risks/ threats to supervisors or other authorized personnel
- PC15.** participate in mock drills/ evacuation procedures organized at the workplace
- PC16.** undertake first aid, fire-fighting and emergency response training, if asked to do so
- PC17.** take action based on instructions in the event of fire, emergencies or accidents
- PC18.** follow organization procedures for shutdown and evacuation when required

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** health and safety related practices applicable at the workplace

Qualification Pack

- KU2.** potential hazards, risks and threats based on nature of operations
- KU3.** organizational procedures for safe handling of equipment and machine operations
- KU4.** potential risks due to own actions and methods to minimize these
- KU5.** environmental management system related procedures at the workplace
- KU6.** layout of the plant and details of emergency exits, escape routes, emergency equipment and assembly points
- KU7.** potential accidents and emergencies and response to these scenarios
- KU8.** reporting protocol and documentation required
- KU9.** details of personnel trained in first aid, fire-fighting and emergency response
- KU10.** actions to take in the event of a mock drills/ evacuation procedures or actual accident, emergency or fire
- KU11.** occupational health and safety risks
- KU12.** personal protective equipment and method of use
- KU13.** identification, handling and storage of hazardous substances
- KU14.** proper disposal system for waste and by-products
- KU15.** signage related to health and safety and their meaning
- KU16.** importance of sound health, hygiene and good habits
- KU17.** ill-effects of alcohol, tobacco and drugs

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** document and report any health and safety related incidents/ accidents
- GS2.** read and comprehend manuals of operations
- GS3.** read all organizational and equipment related health and safety manuals and documents
- GS4.** read instructions, guidelines/procedures/rules related to the worksite and machine operations
- GS5.** give clear instructions to co-workers, subordinates and other personnel
- GS6.** use correct technical terms while interacting with supervisor
- GS7.** make an appropriate timely decision in responding to emergencies/accidents in line with organization
- GS8.** evaluate and use correct ppe and other safety gear while at the workplace
- GS9.** work with supervisors/ team mates to carry out work related tasks
- GS10.** plan work according to the required schedule
- GS11.** keep work area free from potential hazards
- GS12.** ensure and follow organizational procedures pertaining to health and safety are followed
- GS13.** take appropriate actions during emergencies, accidents or fire at the workplace
- GS14.** resolve issues pertaining to malfunctions in machineries and report if required
- GS15.** identify emergency situations
- GS16.** identify cause effect relationship for the emergencies

Qualification Pack

GS17. analyse, evaluate and apply the information gathered from observation, experience, reasoning, or communication to act efficiently

LSS/N8701: Comply with industry, regulatory and organizational requirements

Description

This unit provides Performance Criteria, Knowledge & Understanding and Skills & Abilities required for complying with industry, regulatory and organizational requirements at the workplace.

Scope

This unit/task covers the following:

- Compliance with industry, regulatory and organizational requirements

Elements and Performance Criteria

Compliance with industry, regulatory and organizational requirements

To be competent, the user/individual on the job must be able to:

- PC1.** carry out work functions in accordance with legislation and regulations, organizational guidelines and procedures
- PC2.** seek and obtain clarifications on policies and procedures, from the supervisor or other authorized personnel
- PC3.** apply and follow these policies and procedures within the work practices
- PC4.** provide support to the supervisor and team members in enforcing these considerations
- PC5.** identify and report any possible deviation to these requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the importance of having an ethical and value-based approach to governance
- KU2.** benefits to the company and oneself due to practice of these procedures
- KU3.** specific to the industry/sector, know and understand: legal, regulatory and ethical requirements procedures to follow if someone does not meet the requirements
- KU4.** customer specific requirements mandated as a part of the work process
- KU5.** country / customer specific regulations for the sector and their importance
- KU6.** reporting procedure in case of deviations
- KU7.** limits of personal responsibility

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 50

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
