Qualification Pack

LSS/N3303: Carry out supporting operations within footwear bottom making

Description

This unit provides Performance Criteria, Knowledge & Understanding and Skills & Abilities required for carrying out supporting operations within bottommaking processes in footwear.

Scope

This unit/task covers the following:

- Carry out supporting operations within footwear
- Assists in Mulling operations
- Carry out insole putting
- Assists in Counter Tightening & Toe Attaching
- Assist in Lasting Operations
- Assist in Heat Setting
- Assist in Pounding & Roughing Operations
- Assist in Buffing Operations
- Carry out Bottom filling
- Carry out adhesive adding
- Assists in Reactivation
- Assists in Sole Pressing
- Assists in Cooling & De-lasting
- Insertion of socks

Elements and Performance Criteria

Carry out supporting operations with in footwear

To be competent, the user/individual on the job must be able to:

- PC1.** follow the instructions on the work ticket/ job card
- PC2.** check that the work area is free from hazards and report risks/problems likely to affect services to the relevant person promptly and accurately
- PC3.** support the operator in checking the materials used meet the specification matching within a product between a pair of products where applicable
- PC4.** agree and review your agreed upon work targets with your supervisor
- PC5.** assist in carrying out foundation footwear operations safely and at a rate which maintains work flow and meets production targets
- PC6.** report any damaged work to the responsible person
- PC7.** ask questions to obtain more information on tasks when the instructions you have are unclear
- PC8.** anticipate and respond to requests for assistance from colleagues willingly and politely
- PC9.** update and develop knowledge of the products, check with others when unsure of new product details

Qualification Pack

PC10. sort and place work to assist the next stage of production and minimize the risk of damage

Assists in Mulling operations

To be competent, the user/individual on the job must be able to:

PC11. choose the tools and materials required for the lasting process and get the closed uppers from the closing section

PC12. check that the numbers of closed uppers are equal to that in the work ticket/job card.

PC13. place the closed uppers in the mulling chamber for vaporizing

PC14. correctly sort and place the work to assist the next stage of production

PC15. clean and oil the machinery and report any repairs, if required

Carry out insole putting

To be competent, the user/individual on the job must be able to:

PC16. collect the closed uppers from the mulling chamber and puts the insole onto the lasts

PC17. correctly sort and place the work to assist the next stage of production

Carry out insoleputting

To be competent, the user/individual on the job must be able to:

PC18. cleans the tools and keep the workplace tidy

Assists in CounterTightening & ToeAttaching

To be competent, the user/individual on the job must be able to:

PC19. choose the tools and materials required for the lasting process and get the closed uppers from the closing section

PC20. place the closed uppers onto the counter tightening machine for counter tightening

PC21. takes the closed uppers from the machine after counter tightening and place the uppers to toe molding machine

PC22. clean and oil the machinery and report any repairs, if required

Assist in LastingOperations

To be competent, the user/individual on the job must be able to:

PC23. choose the tools and materials required for the lasting process and get the uppers from the upper making section

PC24. check that the numbers of closed uppers are equal to that in the work ticket/job card.

PC25. place the closed uppers on to the forepart/toe lasting machine

PC26. take the closed uppers from the forepart lasting machine and place them on to the side lasting machine

PC27. take the closed uppers from the side lasting machine and place them on to the seat lasting machine

PC28. mark the back height on the last by tack

PC29. check the amount of wrinkles or folds and see that the lasting is properly done

PC30. correctly sort and place the work to assist the next stage of production

PC31. clean and oil the machinery and report any repairs, if required

Assist in HeatSetting

To be competent, the user/individual on the job must be able to:

PC32. choose the tools and materials required for the heat setting process and get the lasted uppers from the lasting section

Qualification Pack

PC33. check that the numbers of lasted uppers are equal to that in the work ticket/job card.

PC34. keep the lasted footwear in the heat setting machine

PC35. take the footwear out of the machine after the heat setting

PC36. correctly sort and place the work to assist the next stage of production

PC37. clean and oil the machinery and report any repairs, if required

Assist in Pounding

To be competent, the user/individual on the job must be able to:

PC38. choose the tools and materials required for the roughening process and get the lasted uppers from the heat setting section

& Roughing Operations

To be competent, the user/individual on the job must be able to:

PC39. check that the numbers of lasted uppers are equal to that in the work ticket/job card.

PC40. flatten the bottom of the lasted uppers with pounding machine

PC41. assist the operator in roughening out the finishing/peripheral layer of the lasted uppers

PC42. correctly sort and place the work to assist the next stage of production

PC43. cleans the tools and keep the workplace tidy

Assist in Buffing Operations

To be competent, the user/individual on the job must be able to:

PC44. choose the tools and materials required for the buffing process and get the footwear from the roughened section

PC45. help in sorting the roughened uppers to ensure quality norms are adhered to

PC46. assist the buffing operator to buff the roughened upper to make it dust free

PC47. correctly sort and place the work to assist the next stage of production

PC48. clean the tools and keep the workplace tidy

PC49. choose the tools and materials required for the bottom filling and get the footwear pieces from the buffing section

PC50. check that the numbers of buffed uppers are equal to that in the work ticket/ job card.

PC51. attach bottom fillers to the buffed uppers

PC52. check the quality and appearance of the product as per job card

PC53. correctly sort and place the work to assist the next stage of production

PC54. clean the tools and keep the workplace tidy

Carry out adhesive adding

To be competent, the user/individual on the job must be able to:

PC55. choose the tools and materials required for adhesive adding and get the footwear pieces from the bottom filling section

PC56. apply two thin layers of adhesive on the lasted part of the uppers

PC57. apply one thin layer of adhesive on the sole

PC58. dry the adhesive in normal condition

PC59. correctly sort and place the work to assist the next stage of production

PC60. clean the tools and keep the workplace tidy

Assists in Reactivation

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC61.** choose the tools and materials required for the reactivation
- PC62.** place the lasted bottom and sole in the reactivation chamber/machine
- PC63.** take the lasted bottom and sole out of the chamber after the reactivation process
- PC64.** correctly sort and place the work to assist the next stage of production
- PC65.** clean and oil the machinery and report any repairs, if required
- PC66.** choose the tools and materials required for the sole pressing

Assists in SolePressing

To be competent, the user/individual on the job must be able to:

- PC67.** put the sole on to the lasted uppers by hand
- PC68.** place the lasted footwear on the sole pressing machine
- PC69.** take the completed footwear out of the sole pressing machine
- PC70.** correctly sort and place the work to assist the next stage of production
- PC71.** clean and oil the machinery and report any repairs, if required
- PC72.** choose the tools and materials required for the sole pressing

Assists in Cooling& De-lasting

To be competent, the user/individual on the job must be able to:

- PC73.** place the lasted footwear for cooling in the machine
- PC74.** take the footwear out, after the cooling
- PC75.** place the footwear in the de-lasting machine
- PC76.** check the quality and appearance of the product as per job card
- PC77.** correctly sort and place the work to assist the next stage of production
- PC78.** clean and oil the machinery and report any repairs, if required
- PC79.** insert the socks into the footwear

Insertion of socks

To be competent, the user/individual on the job must be able to:

- PC80.** check the quality and appearance of the product as per job card
- PC81.** correctly sort and place the work to assist the next stage of production
- PC82.** check that the number of lasted uppers are equal to that in the work ticket/job card
- PC83.** clean the tools and keep the workplace tidy

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the organizations procedures and guidelines related to footwear manufacturing processes
- KU2.** common hazards in the work area and workplace procedures to deal with them
- KU3.** work target and review mechanism with your supervisor
- KU4.** the different components of footwear
- KU5.** storage and assembly areas for different processes
- KU6.** the various machinery and tools used for the different processes

Qualification Pack

- KU7.** location and process for storage and disposal of waste materials
- KU8.** importance of team work and harmonious working relationships
- KU9.** the complete sequences of the processes involved in footwear making
- KU10.** styles/ design of the products currently being produced
- KU11.** the importance of final appearance of the footwear and quality as per the specifications
- KU12.** the mulling process and the related equipments used
- KU13.** the method of insole putting
- KU14.** the process of counter tightening and toe attaching and the related equipments used
- KU15.** the lasting process and the related equipments used
- KU16.** how to tack the back height properly
- KU17.** the heat setting process and the related equipments
- KU18.** the pounding and roughing processes and the related equipments used
- KU19.** the buffing process and the related equipments used
- KU20.** the correct method of buffing without damaging the lasted uppers
- KU21.** the bottom filling process
- KU22.** the process of adhesive adding and the related equipments used
- KU23.** the importance of correct preparation/mixing of adhesives
- KU24.** the time and consistency required for drying
- KU25.** the reactivation process and the related equipments used
- KU26.** the process of sole pressing
- KU27.** how to insert the sock into the footwear
- KU28.** potential faults in the various processes and methods to avoid them
- KU29.** styles/ design of the products currently being produced
- KU30.** common faults in tools and equipment and implications of working with faulty equipment
- KU31.** manufacturers instructions

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write in English/ local language as applicable
- GS2.** fill up activity logs/work sheet in the prescribed format of the company as applicable
- GS3.** read English/ local language as applicable
- GS4.** read and understand manuals, health and safety instructions, memos, reports, job cards etc
- GS5.** listen actively
- GS6.** communicate effectively with operators supervisors, managers, etc
- GS7.** analyse different sequence of the process and provide for appropriate assistance
- GS8.** assess the material and apply appropriate lifting and handling procedures
- GS9.** confirm the instructions and seek clarifications to ensure accuracy of requirements
- GS10.** evaluate the requirements of the process and prepare for the work area
- GS11.** plan and organize cleaning of tools, equipment and machineries

Qualification Pack

- GS12.** adhere to each of the process guidelines in bottom making
- GS13.** anticipate and provide assistance in bottom making as and when required problem solving
- GS14.** report in case of deviations from the process
- GS15.** anticipate and notify the concerned person if there is any shortage in materials required for bottom making
- GS16.** observe mechanical processing vigilantly and report any deviations
- GS17.** evaluate the material before sorting and placing
- GS18.** identify equipment maintenance requirements and perform themaintenance procedures
- GS19.** analyse, evaluate and apply the information gathered from observation,experience, reasoning, or communication to act efficiently

LSS/N3304: Support to achieving product quality in footwear bottom making activities

Description

This unit provides Performance Criteria, Knowledge & Understanding and Skills & Abilities required to ensure the quality of the production while undertaking supporting bottom making activities.

Scope

This unit/task covers the following:

- Inspection
- Reporting & Documentation

Elements and Performance Criteria

Inspection

To be competent, the user/individual on the job must be able to:

- PC1.** ensure materials and component parts meet specifications
- PC2.** ensure the quality of the product meets specification during production
- PC3.** maintain the required productivity and quality levels
- PC4.** carry out quality checks at agreed intervals and in the approved way
- PC5.** count and verify the number of uppers are as specified in the job card
- PC6.** check for any imperfections/dust/contaminations on the uppers and report them
- PC7.** sort the components as per the job card after counter moulding, lasting and roughening, pounding, buffing, reactivation etc before passing it to the next stage of production
- PC8.** ensure that the quality and appearance of the uppers are not affected during materials movement
- PC9.** check for excess glue/adhesives on the vamp and clean/report them
- PC10.** checks the brand, logo, price, size and other stampings are neat and as per job card
- PC11.** maintain the continuity of production with minimum interruptions and downtime

Reporting & Documentation

To be competent, the user/individual on the job must be able to:

- PC12.** identify causes of faults and take action to rectify the same to maintain product quality
- PC13.** follow reporting procedures where the cause of faults cannot be identified

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the companies quality standards
- KU2.** the importance of complying with written instructions
- KU3.** types of problems with quality and how to report them to appropriate people

Qualification Pack

- KU4.** consequences of not rectifying problems
- KU5.** safe working practices and organizational procedures
- KU6.** limits of your own responsibility
- KU7.** the lines of communication, authority and reporting procedures
- KU8.** the organizations rules, codes and guidelines
- KU9.** manufacturers instructions
- KU10.** methods to receive work instructions and specifications and interpret them accurately
- KU11.** the types of faults in materials and tools
- KU12.** process to identify materials which do not conform to requirements and how to report them to appropriate people
- KU13.** awareness of material/fabric / yarn types
- KU14.** the causes of lost production and material wastage
- KU15.** importance of final look and appearance of the footwear
- KU16.** importance/properties of adhesives and application
- KU17.** knowledge of insole putting, bottom filling, adhesive adding and buffing process and their implications
- KU18.** process to maintain the flow of production
- KU19.** the importance of achieving quality and its relation to the end user customer

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write in English/ local language as applicable
- GS2.** fill up activity logs/work sheet in the prescribed format of the company as applicable
- GS3.** read English/ local language as applicable
- GS4.** read and understand manuals, health and safety instructions, memos, reports, job cards etc
- GS5.** listen actively
- GS6.** communicate effectively with operators supervisors, managers, etc
- GS7.** analyse different sequence of the process and provide for appropriate assistance
- GS8.** assess the material and apply appropriate lifting and handling procedures
- GS9.** confirm the instructions and seek clarifications to ensure accuracy of requirements
- GS10.** evaluate the requirements of the process and prepare for the work area
- GS11.** plan and organize cleaning of tools, equipment and machineries
- GS12.** adhere to each of the process guidelines in bottom making
- GS13.** anticipate and provide assistance in bottom making as and when required
- GS14.** report in case of deviations from the process
- GS15.** anticipate and notify the concerned person if there is any shortage in materials required for bottom making
- GS16.** observe mechanical processing vigilantly and report any deviations
- GS17.** evaluate the material before sorting and placing

Qualification Pack

- GS18.** identify equipment maintenance requirements and perform themaintenance procedures
- GS19.** analyse, evaluate and apply the information gathered from observation, experience, reasoning, or communication to act efficiently

Qualification Pack

LSS/N8501: Maintain the work area, tools and machines

Description

This unit provides Performance Criteria, Knowledge & Understanding and Skills & Abilities required to organise/ maintain work areas and activities to ensure tools and machines are maintained as per norms.

Scope

This unit/task covers the following:

- Maintenance of the work area, tools and machines

Elements and Performance Criteria

Maintenance of work area, tools and machines

To be competent, the user/individual on the job must be able to:

- PC1.** handle materials, machinery, equipment and tools safely and correctly
- PC2.** use correct lifting and handling procedures
- PC3.** use materials to minimize waste
- PC4.** prepare and organize work
- PC5.** maintain a clean and hazard free working area
- PC6.** deal with work interruptions
- PC7.** move around the workplace with care
- PC8.** maintain tools and equipment
- PC9.** carry out running maintenance within agreed schedules
- PC10.** carry out maintenance and/or cleaning outside responsibility
- PC11.** report unsafe equipment and other dangerous occurrences
- PC12.** ensure that the correct machine guards are in place
- PC13.** work in a comfortable position with the correct posture
- PC14.** use cleaning equipment and methods appropriate for the work to be carried out
- PC15.** dispose of waste safely in the designated location
- PC16.** store cleaning equipment safely after use
- PC17.** complete and store accurate records and documentation
- PC18.** maintain proper lighting, ventilation to make sure general comfort is there while working
- PC19.** give inputs and assist in completing documentation
- PC20.** report the need for maintenance and/or cleaning outside your area of responsibility
- PC21.** ensure safe and correct handling of materials, equipment and tools
- PC22.** maintain appropriate environment to protect stock from pilfering, theft, damage and deterioration

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** personal hygiene and duty of care
- KU2.** safe working practices and organizational procedures
- KU3.** limits of ones own responsibility
- KU4.** ways of resolving with problems within the work area
- KU5.** the production process and the specific work activities that relate to the whole process
- KU6.** the lines of communication, authority and reporting procedures
- KU7.** the organizations rules, codes and guidelines (including timekeeping)
- KU8.** the companies quality standards
- KU9.** the types of records kept, how are they completed and the importance of keeping them accurate
- KU10.** the importance of complying with written instructions
- KU11.** equipment operating procedures / manufacturers instructions
- KU12.** statutory responsibilities under health, safety and environmental legislation and regulations
- KU13.** the quality standards and processes followed by the organization relevant to your role
- KU14.** documentation required for reporting
- KU15.** work instructions and specifications and interpret them accurately
- KU16.** method to make use of the information detailed in specifications and instructions
- KU17.** relation between work role and the overall manufacturing process
- KU18.** the importance of good time keeping and attendance
- KU19.** the importance of minimized production costs
- KU20.** the importance of taking action when problems are identified
- KU21.** different ways of minimizing waste
- KU22.** the importance of running maintenance and regular cleaning
- KU23.** effects of contamination on products i.e. machine oil, dirt
- KU24.** common faults with equipment and the method to rectify
- KU25.** maintenance procedures and manufacturers instructions
- KU26.** hazards likely to be encountered when conducting routine maintenance
- KU27.** different types of cleaning equipment and substances and their use
- KU28.** safe working practices for cleaning and the method of carrying them out
- KU29.** the production process and the specific work activities that relate to the whole process

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write and document appropriate technical forms, job cards, inspection sheets as required format of the company
- GS2.** read and comprehend basic english to read and interpret indicators in the machine and operating manuals, job cards, visual cards,
- GS3.** read and understand manuals, health and safety instructions, memos, reports, job cards etc

Qualification Pack

- GS4.** speak and communicate effectively to peers and supervisors
- GS5.** give clear instructions to co-workers, subordinates others
- GS6.** use correct technical term while interacting with supervisor
- GS7.** take appropriate decisions regarding to responsibilities
- GS8.** assess for any damage/faulty component in the concerned machinery and take action accordingly
- GS9.** evaluate the decision and conduct basic trouble shooting
- GS10.** plan and manage work routine based on company procedure
- GS11.** work with supervisors/ team mates to carry out work related tasks
- GS12.** plan for cleaning and lubricating the concerned machinery daily
- GS13.** plan for cleaning the concerned tools and workplace daily before and after operations
- GS14.** ensure and follow organizational procedures pertaining to health and safety are followed
- GS15.** solve operational role related issues
- GS16.** diagnose common problems in the machine based on visual inspection, sound, temperature etc.
- GS17.** analyse, evaluate and apply the information gathered from observation, experience, reasoning, or communication to act efficiently

LSS/N8601: Maintain health, safety and security at workplace

Description

This unit provides Performance Criteria, Knowledge & Understanding and Skills & Abilities required to comply with health, safety and security requirements at the workplace and covers procedures to prevent, control and minimize risk to self and others

Scope

This unit/task covers the following:

- Compliance with health, safety and security requirements at work

Elements and Performance Criteria

Compliance with health, safety and security requirements at work

To be competent, the user/individual on the job must be able to:

- PC1.** comply with health and safety related instructions applicable to the workplace
- PC2.** use and maintain personal protective equipment as per protocol
- PC3.** carry out own activities in line with approved guidelines and procedures
- PC4.** maintain a healthy lifestyle and guard against dependency on intoxicants
- PC5.** follow environment management system related procedures
- PC6.** identify and correct (if possible) malfunctions in machinery and equipment
- PC7.** report any service malfunctions that cannot be rectified
- PC8.** store materials and equipment in line with manufacturers and organizational requirements
- PC9.** safely handle and move waste and debris
- PC10.** minimize health and safety risks to self and others due to own actions
- PC11.** seek clarifications, from supervisors or other authorized personnel in case of perceived risks
- PC12.** monitor the workplace and work processes for potential risks and threats
- PC13.** carry out periodic walk-through to keep work area free from hazards and obstructions, if assigned
- PC14.** report hazards and potential risks/ threats to supervisors or other authorized personnel
- PC15.** participate in mock drills/ evacuation procedures organized at the workplace
- PC16.** undertake first aid, fire-fighting and emergency response training, if asked to do so
- PC17.** take action based on instructions in the event of fire, emergencies or accidents
- PC18.** follow organization procedures for shutdown and evacuation when required

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** health and safety related practices applicable at the workplace

Qualification Pack

- KU2.** potential hazards, risks and threats based on nature of operations
- KU3.** organizational procedures for safe handling of equipment and machine operations
- KU4.** potential risks due to own actions and methods to minimize these
- KU5.** environmental management system related procedures at the workplace
- KU6.** layout of the plant and details of emergency exits, escape routes, emergency equipment and assembly points
- KU7.** potential accidents and emergencies and response to these scenarios
- KU8.** reporting protocol and documentation required
- KU9.** details of personnel trained in first aid, fire-fighting and emergency response
- KU10.** actions to take in the event of a mock drills/ evacuation procedures or actual accident, emergency or fire
- KU11.** occupational health and safety risks
- KU12.** personal protective equipment and method of use
- KU13.** identification, handling and storage of hazardous substances
- KU14.** proper disposal system for waste and by-products
- KU15.** signage related to health and safety and their meaning
- KU16.** importance of sound health, hygiene and good habits
- KU17.** ill-effects of alcohol, tobacco and drugs

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** document and report any health and safety related incidents/ accidents
- GS2.** read and comprehend manuals of operations
- GS3.** read all organizational and equipment related health and safety manuals and documents
- GS4.** read instructions, guidelines/procedures/rules related to the worksite and machine operations
- GS5.** give clear instructions to co-workers, subordinates and other personnel
- GS6.** use correct technical terms while interacting with supervisor
- GS7.** make an appropriate timely decision in responding to emergencies/accidents in line with organization
- GS8.** evaluate and use correct ppe and other safety gear while at the workplace
- GS9.** work with supervisors/ team mates to carry out work related tasks
- GS10.** plan work according to the required schedule
- GS11.** keep work area free from potential hazards
- GS12.** ensure and follow organizational procedures pertaining to health and safety are followed
- GS13.** take appropriate actions during emergencies, accidents or fire at the workplace
- GS14.** resolve issues pertaining to malfunctions in machineries and report if required
- GS15.** identify emergency situations
- GS16.** identify cause effect relationship for the emergencies

Qualification Pack

GS17. analyse, evaluate and apply the information gathered from observation, experience, reasoning, or communication to act efficiently

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 50

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
