Qualification Pack

LSS/Q4101: Shoe Maker

Brief Job Description

Makes entire footwear using hand tools and machine depending on the requirements from the end customers or as required by the footwear manufacturing units.

Personal Attributes

The individual should possess good hand-eye coordination and judgment in positioning and cutting. Also should have basic estimation and numerical skills along with ability to choose the correct leather/non-leather parts for different components. He/She should be inclined towards creativity and interested in mixing materials, textures and threads to create quality products.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [LSS/N4101: Carry out complex repairs on the footwear and other goods](#)
2. [LSS/N4102: Carry out footwear making operations using hand tools, equipment, and basic machines](#)
3. [LSS/N4103: Contribute to achieving Product Quality in leather repair works and footwear making](#)
4. [LSS/N4104: Coordinate with vendors and footwear manufacturing unit for work](#)
5. [LSS/N4105: Start and manage enterprise for footwear repair and assembling](#)
6. [LSS/N8601: Maintain health, safety & security, a clean work area & equipment, use optimized resources at the workplace, and comply with industry & organizational Requirements](#)
7. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

Qualification Pack

LSS/N4101: Carry out complex repairs on the footwear and other goods

Description

This unit is about doing complex repairs in footwear, leather goods and bags & luggage

Scope

The scope covers the following :

- Carry out complex repairs on the footwear and other goods

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** describe leather, artificial leather & materials
- PC2.** understand the materials used in making footwear or goods
- PC3.** describe hand tools for repairing of footwear
- PC4.** explain stitching and pasting methods
- PC5.** explain complex repairing procedures
- PC6.** identify different types of stitching
- PC7.** stitch the torn part using appropriate tools and materials
- PC8.** use hand tools and perform different types of stitching
- PC9.** perform heel attaching/ heel replacing/ heel trimming as per repair requirements
- PC10.** fix various types of accessories of the footwear

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** expectations and responsibilities of the job role
- KU2.** organization's rules, codes, guidelines and standards
- KU3.** main types of hide and leather manufactured by the company
- KU4.** statutory responsibilities under health, safety and environmental legislation and regulations
- KU5.** common hazards in the work area and workplace procedures for dealing with them
- KU6.** importance of team work and harmonious working relationships
- KU7.** the contact person in case of queries on procedure or products
- KU8.** method to handle tools and equipment safely and the health and safety implications of not doing so
- KU9.** knowledge of the pattern cutting process
- KU10.** materials used in making footwear
- KU11.** basic footwear design
- KU12.** grading techniques

Qualification Pack

- KU13.** basic principles of pattern cutting
- KU14.** basic mathematical knowledge
- KU15.** footwear manufacturing process
- KU16.** leather defects and handling defects

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write in English/ local language as applicable
- GS2.** fill up appropriate technical forms, process charts, activity logs in the prescribed format of the company
- GS3.** read English/ local language as applicable
- GS4.** read and understand manuals, health and safety instructions, memos, reports, job cards etc.
- GS5.** listen actively
- GS6.** communicate effectively with supervisors, managers, customers, etc.
- GS7.** take appropriate actions in terms of any deviations from the process
- GS8.** plan work according to the required schedule and location
- GS9.** keep the required materials sequentially in an organized manner
- GS10.** work as per customer requirements
- GS11.** review the defects in patterns cut and take appropriate actions
- GS12.** analyse different patterns before cutting
- GS13.** assess and control the quality standards of the cut materials as per customer standards

LSS/N4102: Carry out footwear making operations using hand tools, equipment, and basic machines

Description

The person is required to make complete footwear using tools, equipment and basic machines

Scope

The scope covers the following :

- Carry out footwear making operations using hand tools, equipment, and basic machines

Elements and Performance Criteria

Cutting

To be competent, the user/individual on the job must be able to:

- PC1.** make sure the work area is free from hazards
- PC2.** calculate the number of components needed for production
- PC3.** select the tools and materials for the work
- PC4.** set up the equipment
- PC5.** check the quality and characteristics of the material match the required standards before starting to cut
- PC6.** use appropriate tools and equipment for hand or machine cutting
- PC7.** make sure that when cutting the material avoid damaging self and others avoid damage to the knife and other equipment avoid any imperfections in the material when cutting calculate the components required cut appropriately to avoid wastage
- PC8.** meet company usage tolerances for efficient pattern interlocking
- PC9.** identify and respond to imperfections, defects and damage due to mishandling
- PC10.** make sure that the cut material is correctly sorted to assist the next stage of production

Skiving

To be competent, the user/individual on the job must be able to:

- PC11.** ensure if the Rampi/Khurpi is clean, if not, clean the Rampi/Khurpi
- PC12.** ensure if the Rampi/Khurpi is sharp, if not, sharpen the Rampi/Khurpi using the sharpening stone
- PC13.** adjust the width and thickness as per the specifications to perform skiving of the material (marked leather sheets)
- PC14.** carry out skiving operation as per the specification
- PC15.** carry out folding post skiving based on the net pattern or base pattern, if required
- PC16.** carry out visual inspection to ensure the accuracy of the skiving machine

Pre-assembly operation

To be competent, the user/individual on the job must be able to:

Qualification Pack

PC17. carry out pre-assembly operations splitting gimping ironing marking edge colouring hand folding eye letting

Stitching

To be competent, the user/individual on the job must be able to:

- PC18.** sort out the material and threads as per the specifications of the product
- PC19.** select the right thread, needle and stitching tools as per the specifications of the product
- PC20.** adjust the tension and stitch length
- PC21.** check the upper components and conduct shade wise pairing
- PC22.** stitch the correct materials in the right sequence as required by the production specification
- PC23.** operate machines safely and in accordance with guidelines when necessary
- PC24.** apply adhesives on the components if required
- PC25.** fold the components by hand as per the requirement of the design
- PC26.** conduct visual inspection after the stitching is complete

Lasting

To be competent, the user/individual on the job must be able to:

- PC27.** set up the equipment and machineries for lasting as per the job requirement
- PC28.** ensure the adhesive is prepared appropriately as per the standard procedure
- PC29.** soak the toe cap and counter in the adhesive as per the manufacturers instruction
- PC30.** ensure the toe cap and counter is dry by allowing them to dry as per the specified drying time
- PC31.** insert the toe cap and counter inside the upper as per the operating procedure
- PC32.** fix the upper on the last as per the standard operating procedure
- PC33.** ensure the back height of the upper is adjusted as per the mark on the last
- PC34.** apply the glue evenly on the inner edges of the upper and outer edges of the insole as per the operating procedures
- PC35.** attach the upper onto the insole and draft the nail as per the standard procedure
- PC36.** trim the excess edges of the upper to avoid wrinkles as per the standard procedures
- PC37.** dry the upper for the specified amount of time
- PC38.** remove the nails from the upper following safety and operating standards
- PC39.** hammer the fore part, side and seat of the upper on to the insole as per the standard procedures
- PC40.** remove the wrinkles by hammering using mallet following the standard safety and operating procedures
- PC41.** ensure the lasted uppers are prepared for the next operation as per the standards specified by the organization
- PC42.** ensure the lasted upper is free from production and handling damages

Sole Attaching

To be competent, the user/individual on the job must be able to:

- PC43.** keep the materials and tools ready for sole attaching
- PC44.** ensure the adhesive is prepared appropriately as per the standard procedure
- PC45.** ensure that the sole and the upper are matched as per the end product

Qualification Pack

- PC46.** check for any damages in the upper and the bottom sole before attaching
- PC47.** apply the adhesive to the upper and the sole evenly
- PC48.** attach the sole and the upper correctly
- PC49.** press the sole and the upper using hand, hammer or a machine
- PC50.** leave the footwear for drying before passing it to the next stage of production
- PC51.** clean the footwear if there is any spillage of adhesive or any other waste material on the footwear

Finishing

To be competent, the user/individual on the job must be able to:

- PC52.** clean the footwear carefully to remove any residues
- PC53.** ensure that any extra threads or material on the footwear are trimmed properly
- PC54.** check the stamping/ embossing required as per client specifications
- PC55.** ensure that the stamping or embossing is done properly and as per client specifications
- PC56.** swipe a cotton brush over the surface of the footwear to erase any excess wax or other residues
- PC57.** application of cream/wax evenly for a smooth finish and appearance of the footwear
- PC58.** polish the footwear with a manual brush or through the brushing wheel to ensure a smooth finish for the footwear
- PC59.** wrap the footwear with wrapping paper
- PC60.** ensure the wrapped footwear is placed in the box

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** types of problems with quality
- KU2.** consequences of not rectifying problems
- KU3.** safe working practices and organizational procedures
- KU4.** limits of personal responsibility
- KU5.** lines of communication, authority and reporting procedures
- KU6.** organizations rules and guidelines (including timekeeping)
- KU7.** companys quality standards
- KU8.** equipment operating procedures/manufacturers instructions
- KU9.** footwear products and styles of footwear currently being produced
- KU10.** basic units of measurements, methods of calculating the number of components required
- KU11.** methods of cutting to ensure maximum usage and minimum wastage
- KU12.** method of safely setting up and closing down cutting and other equipment in the work station
- KU13.** mechanics of stitching machines and other equipment
- KU14.** procedures to use Rampi/Khurpi for skiving
- KU15.** procedures and concept of the operations followed in the skiving process
- KU16.** procedure to use the tools for lasting hammer, pincher, etc.

Qualification Pack

- KU17.** knowledge of the parameter setting in the skiving machines(thickness,width)
- KU18.** procedures and concept of the operations followed in the lasting process
- KU19.** different kinds of lasts and the appropriate ones to be used
- KU20.** various adhesives and proper application of adhesive
- KU21.** how to pull and attach the sides of the shoes
- KU22.** sole attaching process
- KU23.** types of adhesives- permanent and temporary
- KU24.** basic reactivation process
- KU25.** various steps involved in footwear finishing operations
- KU26.** importance of the finishing process and its implications on the final quality and appearance of the footwear
- KU27.** parameter setting in the lasting machines (Temp, Timing Pressure)
- KU28.** importance of cleaning and the implications of not doing it properly
- KU29.** steps involved in the trimming process
- KU30.** steps involved in polishing process and the preparatory work required
- KU31.** various coating techniques which include roller coating, curtain coating and spraying
- KU32.** finishing methods: cream finish, spray finish and wax finishing.
- KU33.** different kinds of waxes and their proper application
- KU34.** different kinds of brushes and their proper application

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write in English/ local language as applicable
- GS2.** read and comprehend English/ local language as applicable
- GS3.** read and understand manuals, health and safety instructions, memos, reports, job cards etc
- GS4.** communicate effectively with supervisors, managers, etc.
- GS5.** analyse the defects and the procedure for dealing with it
- GS6.** take appropriate actions in terms of any deviations from the process
- GS7.** organize tools and equipment to be used
- GS8.** plan work according to the required schedule
- GS9.** ensure timely delivery of products as per customer specifications
- GS10.** identify possible defects and how to rectify them
- GS11.** review the defects and take appropriate actions to rectify
- GS12.** diagnose common problems in the tools/ equipment based on visual inspection
- GS13.** assess and control the quality standards of the product as per customer

LSS/N4103: Contribute to achieving Product Quality in leather repair works and footwear making

Description

The person is required to ensure that the quality is achieved while making footwear

Scope

The scope covers the following :

- Contribute to achieving Product Quality in leather repair works and footwear making

Elements and Performance Criteria

Contribute to achieving the product quality

To be competent, the user/individual on the job must be able to:

- PC1.** analyse the footwear/ leather goods to determine quality issues
- PC2.** identify faults in finished products and trace their causes
- PC3.** ensure the optimum condition of the hand tools used in footwear making
- PC4.** identify faults in materials and products
- PC5.** ensure that the stitching is done appropriately and neatly
- PC6.** check for any loose threads after the stitching is complete and trim if required
- PC7.** ensure that both the pair of the footwear look similar after completion of the process
- PC8.** ensure that there is no spillage of glue in any part of the footwear after pasting different parts
- PC9.** ensure that enough pressure is put by hand/ hammer after glue application to avoid opening of any part

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** types of problems with quality
- KU2.** consequences of not rectifying problems
- KU3.** safe working practices and organizational procedures
- KU4.** limits of personal responsibility
- KU5.** lines of communication, authority and reporting procedures
- KU6.** organizations rules and guidelines (including timekeeping)
- KU7.** companys quality standards
- KU8.** equipment operating procedures/manufacturers instructions
- KU9.** different techniques and methods used to detect faults
- KU10.** inspection methods that can be used
- KU11.** importance of product checks

Qualification Pack

- KU12.** acceptable solutions for particular faults
- KU13.** consequences of not rectifying problems
- KU14.** types of adjustments suitable for specific types of faults
- KU15.** responsibilities at work during production
- KU16.** company's quality and production targets and the effect of not meeting these on self and/or the team

Qualification Pack

LSS/N4104: Coordinate with vendors and footwear manufacturing unit for work

Description

The person is required to coordinate with other shoe makers and clients for the completion of work orders.

Scope

The scope covers the following :

- Coordinate with vendors and footwear manufacturing unit for work

Elements and Performance Criteria

Coordinate with vendors

To be competent, the user/individual on the job must be able to:

- PC1.** distribute and delegate work among vendors in the region
- PC2.** ensure the work is distributed based on parts of shoe to respective vendor
- PC3.** coordinate the workings of different vendors to ensure completion of work before the deadline
- PC4.** ensure the quality of their work and the footwear components are as per the standards

Coordinate with footwear manufacturing units

To be competent, the user/individual on the job must be able to:

- PC5.** receive work orders from the existing clients
- PC6.** understand the client requirements and specifications
- PC7.** discuss work order deadlines and payment schedules
- PC8.** inspect the quality of the final product before the final delivery to the client
- PC9.** ensure work orders are delivered on time
- PC10.** identify potential clients in the nearby locations/ region to expand the clientele

Costing & financial transactions

To be competent, the user/individual on the job must be able to:

- PC11.** ascertain the prices of various materials used for footwear making from the market
- PC12.** check the amount received from the customer/ client for the work order
- PC13.** receive the payment via different modes- cash, cheque, online transfers, etc.
- PC14.** calculate the inflow and outflow of cash to determine the profits
- PC15.** maintain record and documentation

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** protocol to obtain more information on work related tasks

Qualification Pack

- KU2.** common hazards in the work area and procedures for dealing with them
- KU3.** procedures for handling the tools and equipment
- KU4.** procedures with regard to material re-usage and disposal
- KU5.** quality standards and the reporting procedures
- KU6.** documentation required as part of the process
- KU7.** components of footwear
- KU8.** procedures for quality checks

LSS/N4105: Start and manage enterprise for footwear repair and assembling

Description

The person is required to carry out and manage day to day business activities

Scope

The scope covers the following :

- Start and manage enterprise for footwear repair and assembling

Elements and Performance Criteria

Procurement of materials

To be competent, the user/individual on the job must be able to:

- PC1.** ascertain the prices of various materials used for footwear making from the market
- PC2.** identify the material required for footwear making
- PC3.** ensure the availability of all the materials required for footwear making at all times
- PC4.** maintain record of purchase from the market/ dealers

Customer Service

To be competent, the user/individual on the job must be able to:

- PC5.** identify customer requirement for the footwear
- PC6.** analyse the footwear design to determine the amount of efforts and material required
- PC7.** estimate the cost based on the requirements
- PC8.** communicate to the customer the charges for making the footwear
- PC9.** negotiate politely with the customers if required

Cash Transactions

To be competent, the user/individual on the job must be able to:

- PC10.** check the amount received from the customer
- PC11.** return the balance amount to the customer if requirement
- PC12.** maintain record of money earned on a daily basis
- PC13.** calculate the inflow and outflow of cash to determine the profits

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** protocol to obtain more information on work related tasks
- KU2.** common hazards in the work area and procedures for dealing with them
- KU3.** procedures for handling the tools and equipment
- KU4.** procedures with regard to material re-usage and disposal

Qualification Pack

- KU5.** quality standards and the reporting procedures
- KU6.** documentation required as part of the process
- KU7.** materials required for footwear making
- KU8.** market for procurement of materials
- KU9.** importance of customer service
- KU10.** importance of effective communication

LSS/N8601: Maintain health, safety & security, a clean work area & equipment, use optimized resources at the workplace, and comply with industry & organizational Requirements

Description

This unit is about maintaining good hygiene, health, and workplace safety standards, maintaining work areas and activities to ensure tools and machines are maintained as per norms, understanding and complying with the requirements of the organization and respecting everyone at the workplace, adopting sustainable practices and optimizing the use of resources, especially material, energy, and waste, in day-to-day operations at the workplace.

Scope

The scope covers the following :

- Compliance with health, safety, and security requirements
- Maintain hygiene and sanitation
- Maintain the work area
- Perform maintenance operations
- Compliance with industry, regulatory and organizational requirements
- Respect diversity
- Material conservation practices
- Energy/electricity conservation practices
- Effective waste management/recycling practices

Elements and Performance Criteria

Compliance with health, safety and security requirements at the workplace

To be competent, the user/individual on the job must be able to:

- PC1.** comply with health and safety-related instructions applicable to the workplace
- PC2.** use the personal protective equipment as per protocol
- PC3.** maintain a healthy lifestyle and guard against dependency on intoxicants
- PC4.** follow environment management system related procedures
- PC5.** monitor the workplace and work processes for potential risks and threats
- PC6.** carry out periodic walk-through to keep the work area free from hazards and obstructions, if assigned
- PC7.** report hazards and potential risks/ threats to supervisors or other authorized personnel
- PC8.** participate in mock drills/ evacuation procedures organized at the workplace
- PC9.** undertake first aid training, fire-fighting drill, and emergency response training, etc.,
- PC10.** take action based on instructions in the event of fire, emergencies or accidents
- PC11.** safely handle and move waste and debris
- PC12.** follow organization procedures for shutdown and evacuation when require

Maintain hygiene and sanitation at the workplace

Qualification Pack

To be competent, the user/individual on the job must be able to:

PC13. maintain personal body hygiene and dental hygiene

PC14. follow social distancing at the workplace

PC15. ensure not to go to work if unwell, to avoid the risk of spreading an infection to other people

PC16. cover the mouth with an elbow/handkerchief or turn away from people while sneezing or coughing

PC17. ensure equipment, work area, restrooms, etc. are sanitized before and after sessions

PC18. ensure regular vaccinations to avoid any spreading of diseases

Maintain the work area

To be competent, the user/individual on the job must be able to:

PC19. handle materials, machinery, equipment and tools safely and correctly

PC20. use correct lifting and handling procedures

PC21. use materials to minimize waste

Perform maintenance operations

To be competent, the user/individual on the job must be able to:

PC22. Perform the cleaning of machine or tools at the end of each shift

PC23. carry out running maintenance within agreed schedules

PC24. report unsafe equipment and other dangerous occurrences

PC25. carry out works in a comfortable position with the correct posture

PC26. maintain proper lighting, and ventilation to make sure general comfort is there while working

Compliance with industry, regulatory and organizational requirements

To be competent, the user/individual on the job must be able to:

PC27. carry out work functions in accordance with legislation and regulations, organizational guidelines, and procedures

PC28. seek and obtain clarifications on policies and procedures from the authorized personnel

PC29. follow the policies and procedures within the work practices

PC30. identify and report any possible deviation to these requirements

Respect diversity

To be competent, the user/individual on the job must be able to:

PC31. transact with everyone without any personal bias like gender, disability, caste, religion, color, sexual orientation, and culture

PC32. identify the indicators of harassment and discrimination

PC33. report incidents of harassment and discrimination to appropriate authority

PC34. respect the personal and professional space of others

Material conservation practices

To be competent, the user/individual on the job must be able to:

PC35. identify ways to optimize the usage of material including water in various activities /processes

PC36. check for spills/leakages in various processes and plug the spills and leakages

PC37. use the optimized amount of chemicals that have petroleum products (adhesives, leather chemicals, chrome salt, cleaning agents, IPA, etc.)

Qualification Pack

PC38. use proper PPE when in contact with the above materials as per specifications

Energy/electricity conservation practices

To be competent, the user/individual on the job must be able to:

PC39. identify ways to optimize the usage of electricity/energy in various activities/processes

PC40. check if the equipment/machine is generally functioning before commencing work and rectify wherever required

PC41. ensure electrical equipment and appliances are properly connected and turned off when not in use

Effective waste management/recycling practices

To be competent, the user/individual on the job must be able to:

PC42. identify recyclable and non-recyclable, and hazardous waste generated

PC43. segregate waste into different categories

PC44. dispose of non-recyclable waste appropriately

PC45. deposit recyclable and reusable material at the identified location

PC46. follow processes specified for disposal of hazardous waste

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. the health and safety-related practices applicable at the workplace

KU2. the potential hazards, risks, and threats based on the nature of operations

KU3. the common hazards in the work area and procedure for dealing with them

KU4. the organizational procedures for safe handling of equipment and machine operations

KU5. details of personal protective equipment and method to use it

KU6. the signage used for personnel protective equipment, fire and safety, and first aid

KU7. layout of the plant and details of emergency exits, escape routes, emergency equipment, and assembly points

KU8. details of personnel trained in first aid, fire-fighting, and emergency response

KU9. actions to take in the event of mock drills/ evacuation procedures or actual accident, emergency, or fire

KU10. the storage and disposal of hazardous substances and wastes

KU11. relevance of health and safety requirements applicable at the workplace

KU12. importance of sound health, hygiene, and good habits

KU13. the ill-effects of alcohol, tobacco, and other drugs

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read the manuals, health and safety instructions, memos, reports, job cards, etc.

GS2. communicate proficiently in the local language

GS3. listen the issues and comments given by the co-workers, supervisors, and managers

Qualification Pack

- GS4.** communicate effectively with co-workers, supervisors, managers, etc.,
- GS5.** fill up appropriate technical forms, process charts, activity logs in the prescribed format of the company
- GS6.** analyze the defects and the procedure for dealing with it
- GS7.** complete the tasks efficiently and accurately within the stipulated time
- GS8.** organize the material requirements sequentially
- GS9.** select the optimal process and appropriate tools & equipment to complete the work efficiently
- GS10.** use reasoning skills to make proper decisions and troubleshoot concerns related to own responsibilities
- GS11.** use problem-solving skills to solve the problems that occurred during relevant operation

Qualification Pack

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
