MEP/Q0501: Design Thinking Executive

Brief Job Description

Design Thinking Executive is a professional practicing design thinking can apply a human-centred approach effectively at workplace for problem solving, generating new ideas, implementing projects innovatively with a high level of empathy for all involved in the process including users and non-users. The individual would be more hands-on in their approach towards presenting & implementing ideas, working with prototypes from initial stages itself and use both analytical and intuitive capabilities for achieving desired outcomes.

Personal Attributes

The individual must be a good listener, have high level of empathy towards all, be active and energetic towards work, have an open mind and be a good communicator.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [MEP/N0503: Develop a design thinking mindset](#)
2. [MEP/N0504: Follow the process of design thinking for managing a project](#)
3. [MEP/N0505: Implement design solutions and evaluate impact](#)
4. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

Qualification Pack

MEP/N0503: Develop a design thinking mindset

Description

This unit covers the ways to develop a design thinking mindset as a tool and methodology for project management

Scope

The scope covers the following :

- Understand principles of design thinking
- Cultivate a design thinking mindset

Elements and Performance Criteria

Understand principles of design thinking

To be competent, the user/individual on the job must be able to:

- PC1.** Demonstrate understanding of the core principles of design thinking and human centred approach
- PC2.** Explain the importance of empathy in design thinking
- PC3.** Identify techniques for fostering creativity and innovation
- PC4.** Recognize the value of interdisciplinary collaboration in design thinking
- PC5.** Analyse case studies and examples of successful design thinking applications
- PC6.** Critically evaluate different design thinking frameworks and methodologies

Cultivate a design thinking mindset

To be competent, the user/individual on the job must be able to:

- PC7.** Practice reframing problems from a user-centric perspective.
- PC8.** Practice deep listening to draw inspiration and formulate solution
- PC9.** Embrace ambiguity and iterate solutions through prototyping
- PC10.** Foster a culture of experimentation and learning within the team
- PC11.** Encourage open-mindedness and exploration of diverse perspectives
- PC12.** Reflect on personal biases and assumptions to foster a more empathetic approach
- PC13.** Seek out opportunities for interdisciplinary collaboration and and knowledge sharing

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Organisation's policies and procedures for work
- KU2.** Process of deep listening
- KU3.** Definition of design thinking and understanding empathy
- KU4.** Core principles of design thinking and human-centred approach

Qualification Pack

- KU5.** Concepts of business management such as planning, organizing, staffing, leading & controlling
- KU6.** Analytical tools, techniques, and their application in project management
- KU7.** Value of interdisciplinary collaboration in design thinking
- KU8.** Factors impacting a business including economic, social, environmental, and cultural
- KU9.** Customer behaviour and emotional quotient
- KU10.** Primary and secondary data collection techniques

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Present ideas with clarity using physical or digital media
- GS2.** Read and interpret instructions, procedures and information in the workplace
- GS3.** Correspond with other institutions/departments
- GS4.** Communicate effectively with manager, supervisors and co-workers
- GS5.** Take decisions related to job responsibilities
- GS6.** Accurately estimate time and effort to required to complete a task
- GS7.** Identify and organize systems and required resources
- GS8.** Manage work effectively as per project timelines
- GS9.** Establish priorities systematically, differentiating urgent, important and unimportant tasks
- GS10.** Be polite and courteous under all circumstances
- GS11.** Avoid conflicts and solve them amicably
- GS12.** Work effectively in a team
- GS13.** Be open to feedback and incorporate necessary changes
- GS14.** Carryout research and study customer behaviour and trends
- GS15.** Work with enthusiasm with a positive attitude

MEP/N0504: Follow the process of design thinking for managing a project

Description

This unit is about following five steps involved in the process of Design Thinking during project management.

Scope

The scope covers the following :

- Empathize - research the user needs
- Define - state the user needs and problems
- Ideate - challenge assumptions and create ideas
- Prototype - create potential solutions
- Test - try out the identified solutions

Elements and Performance Criteria

Empathize – research the user needs

To be competent, the user/individual on the job must be able to:

- PC1.** Apply empathy in to design a human-centred process to solve problems.
- PC2.** Use appropriate tools (e.g., interviews, mind map, empathy map, observations, etc.) to gain a deeper, personal understanding of the issues involved in order to capture and synthesize user insights and pain points.
- PC3.** Collaborate with diverse experts/ stakeholders to understand their areas of concern, and gauge their perspectives about the service/ product
- PC4.** Validate assumptions through empathy driven research and user feedback loops.

Define – state the user needs and problems

To be competent, the user/individual on the job must be able to:

- PC5.** Gather and organise all project related observations/ findings from empathize stage
- PC6.** Analyse the observations/ findings to define the core problem(s) and then formulate the problem statement(s) in a human centred manner.
- PC7.** Bring clarity about the problem(s) that needs to be solved.

Ideate – challenge assumptions and create ideas

To be competent, the user/individual on the job must be able to:

- PC8.** Look at the problem from multiple perspectives and ideate innovative solutions to the problem statement(s).
- PC9.** Generate as many ideas as possible at the start of the ideation stage.
- PC10.** Utilise different ideation techniques/ tools (such as Brainstorm, Brainwrite, Worst Possible Idea, SCAMPER – Substitute, Combine, Adapt, Modify, Put to another use, Eliminate, Rearrange/ Reverse, Timeboxing, Sketching & Dot Voting etc.)
- PC11.** Investigate and test ideas to choose the best ones in order to move forward, either to solve the problem or provide elements required to circumvent it.

Prototype – create potential solutions

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC12.** Investigate the key solutions and develop prototypes (inexpensive versions or specific features) of the product/ service
- PC13.** Share and run the test of the prototypes within a focus group.
- PC14.** Identify the best possible solution for each of the problems identified during the first three stages of the design thinking process
- PC15.** Implement the chosen solutions within the prototypes and then test them one-by-one to investigate the same.
- PC16.** Accept, improve or reject the prototypes based on real users experiences.

Test – try out the identified solutions

To be competent, the user/individual on the job must be able to:

- PC17.** Test the product/ service using the best solutions identified in the prototype stage.
- PC18.** Collect feedback from the users in a constructive manner to investigate the conditions of the use and the behaviours, thoughts and feelings of these users towards the end product.
- PC19.** Rule out alternative solutions by proceeding with further iterations, alterations and refinements.
- PC20.** Loop back to an appropriate previous stage in the process in case of one or more further problems are redefined in this stage.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Meaning of design thinking processes and its tools
- KU2.** Five key steps of design thinking process
- KU3.** Tools to support empathy walk such as interviews, mind map, empathy map etc.
- KU4.** Meaning of a problem statement and how to write the same
- KU5.** Concepts of effective business communication
- KU6.** Concepts of leadership skills, decision making skills, team work etc.
- KU7.** Tools for effective ideation such as Brainstorming, Brainwriting, Timeboxing, Sketching & Dot Voting etc.
- KU8.** Organisation's management tools and systems for recording, categorizing and analysing data.
- KU9.** Standard tools, templates, and scripts available for dealing with user's data and feedback.
- KU10.** Industrial standards and policies relevant to the organisation/ department
- KU11.** Information systems used for recording and managing data and information
- KU12.** Importance of maintaining the privacy and confidentiality of documents.
- KU13.** Various type of clients/customer organization is dealing with
- KU14.** Gender egalitarian communication

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** Empathize with internal and external customers
- GS2.** Follow appropriate etiquette with all the stakeholders at workplace
- GS3.** Be patient and courteous with co-workers and clients under all circumstances and situations
- GS4.** Apply problem solving skills, to resolve problems from clients and colleagues
- GS5.** Communicate effectively with stakeholders, seniors, peers, clients and others.
- GS6.** Read and interpret instructions, procedures and work-related information accurately
- GS7.** Practice active listening skills
- GS8.** Conduct empathy walk
- GS9.** Prepare and present a prototype
- GS10.** Carryout testing of a prototype
- GS11.** Incorporate relevant feedback to improve the work process

MEP/N0505: Implement design solutions and evaluate impact

Description

This unit covers the implementation of design solutions and evaluating their impact to ensure they meet user needs and project goals, with an emphasis on ethical considerations

Scope

The scope covers the following :

- Effective execution and management of design projects
- Assessment of design impact and ethical considerations

Elements and Performance Criteria

Effective execution and management of design projects

To be competent, the user/individual on the job must be able to:

- PC1.** Develop a comprehensive implementation plan detailing tasks, timelines, and resources.
- PC2.** Assign clear roles and responsibilities to team members involved in the implementation.
- PC3.** Conduct regular team meetings to monitor progress and address issues.
- PC4.** Utilize project management tools to track implementation activities.
- PC5.** Ensure that the design solution adheres to defined quality standards.
- PC6.** Collect feedback from stakeholders throughout the implementation process.
- PC7.** Conduct regular quality assurance checks to ensure compliance with design specifications.
- PC8.** Develop and follow a risk management plan to mitigate potential issues.
- PC9.** Document the implementation process thoroughly for future reference.
- PC10.** Promote sustainable practices by selecting eco-friendly materials and processes.

Assessment of design impact and ethical considerations

To be competent, the user/individual on the job must be able to:

- PC11.** Define and monitor key performance indicators (KPIs) to evaluate the success of the design solution.
- PC12.** Conduct post-implementation reviews to assess project outcomes.
- PC13.** Gather and analyse user feedback to measure satisfaction and usability.
- PC14.** Compare pre-implementation and post-implementation data to evaluate impact.
- PC15.** Ensure user privacy and data security throughout the implementation and evaluation phases.
- PC16.** Obtain informed consent from participants in all user research and testing activities.
- PC17.** Address ethical considerations and potential biases in the design solution.
- PC18.** Implement design solutions that are inclusive and accessible to all users.
- PC19.** Engage with stakeholders transparently, providing regular updates and addressing concerns.
- PC20.** Document lessons learned and best practices to guide future projects

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** Principles and methodologies of design thinking and their application in project implementation.
- KU2.** Project management tools and techniques, including planning, scheduling, and risk management.
- KU3.** Quality assurance and quality control standards relevant to design implementation.
- KU4.** Key performance indicators (KPIs) and metrics for evaluating the success of design solutions.
- KU5.** Methods for collecting and analysing user feedback and performance data.
- KU6.** Ethical considerations in design, including user privacy, data security, and inclusivity.
- KU7.** Techniques for conducting post-implementation reviews and documenting lessons learned.
- KU8.** Sustainable design practices and eco-friendly material selection.
- KU9.** Effective communication and stakeholder management strategies.
- KU10.** Regulatory and compliance requirements related to design and implementation projects.
- KU11.** Methods for fostering collaboration within cross-functional teams.
- KU12.** Principles of user-centered design and usability testing.
- KU13.** Techniques for creating detailed implementation plans and documentation.
- KU14.** Best practices for maintaining transparency and ethical integrity throughout the project lifecycle.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Critical thinking and problem-solving skills to address implementation challenges.
- GS2.** Effective communication skills for interacting with team members, stakeholders, and users.
- GS3.** Time management skills to ensure project milestones and deadlines are met.
- GS4.** Analytical skills for evaluating performance data and user feedback.
- GS5.** Teamwork and collaboration skills to work effectively within cross-functional teams.
- GS6.** Adaptability to adjust plans and strategies based on feedback and changing requirements.
- GS7.** Attention to detail to ensure quality standards are met in all aspects of the implementation.
- GS8.** Ethical judgment to handle sensitive information and make decisions that align with ethical standards.
- GS9.** Documentation skills to maintain clear and thorough records of the implementation process.
- GS10.** Leadership skills to guide and motivate team members towards successful project completion.
- GS11.** Negotiation skills to manage stakeholder expectations and resolve conflicts.
- GS12.** Research skills to stay updated with industry trends, best practices, and emerging technologies.
- GS13.** Creativity and innovation skills to develop and implement effective design solutions.
- GS14.** Customer focus to ensure design solutions meet user needs and enhance user satisfaction.

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Qualification Pack

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
