Qualification Pack

MEP/N0506: Perform Business Value Chain and Operations

Description

This NOS covers the skills required to analyse a business's value chain and operational processes across functions and industries to identify key activities, dependencies, and potential risk areas impacting overall performance.

Scope

The scope covers the following :

- Analyze organisational frameworks and value chains
- Evaluate impact of operating models on business effectiveness
- Drive innovation and enhance customer satisfaction

Elements and Performance Criteria

Analyze organisational frameworks and value chains

To be competent, the user/individual on the job must be able to:

- PC1.** identify the key elements and importance of different organizational structures
- PC2.** recall the components of the McKinsey 7-S Model and their interrelationships
- PC3.** analyze how the Balanced Scorecard framework is used to measure organizational performance and strategy execution
- PC4.** identify various value chain components
- PC5.** differentiate between value chains and supply chains
- PC6.** recognise the strategic role of value chains in enhancing organization effectiveness

Evaluate impact of operating models on business effectiveness

To be competent, the user/individual on the job must be able to:

- PC7.** analyze and optimize the procurement process to enhance efficiency
- PC8.** improve working capital through efficient order management
- PC9.** evaluate the impact of fixed asset management on organizational profitability
- PC10.** optimize inventory levels to balance cost and service levels
- PC11.** align HR practices with organizational strategy to enhance productivity
- PC12.** assess the suitability of different operating models for various business environments

Drive innovation and enhance customer satisfaction

To be competent, the user/individual on the job must be able to:

- PC13.** implement strategies that encourage innovation and continuous improvement
- PC14.** develop strategies to increase customer loyalty and reduce churn
- PC15.** enhance organizational responsiveness to dynamic business environments
- PC16.** establish a culture that supports learning and adaptability
- PC17.** develop and present comprehensive business models tailored to different industries

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Key organizational structures and their influence on business performance
- KU2.** Components and application of the McKinsey 7-S Model and Balanced Scorecard
- KU3.** Differences between value chains and supply chains, and the strategic role of value chains
- KU4.** Operational levers such as procurement, inventory, and asset management that impact efficiency
- KU5.** Methods to foster innovation, improve customer loyalty, and build adaptable business models

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Communicate ideas, strategies, and operational insights effectively in both written and verbal form
- GS2.** Use digital tools and data to analyze business performance and operational processes
- GS3.** Think critically to evaluate operating models and propose improvements
- GS4.** Collaborate with cross-functional teams to gather operational inputs and drive alignment
- GS5.** Manage tasks and time effectively while handling complex business analysis and reporting

MEP/N0507: Perform Process Mapping Techniques

Description

This NOS covers the knowledge and skills required to apply process mapping techniques across industries to document, analyze, and improve workflows using tools like process maps and value stream mapping for enhanced operational efficiency.

Scope

The scope covers the following :

- Carry out process mapping techniques across different industries

Elements and Performance Criteria

Carry out process mapping techniques across different industries

To be competent, the user/individual on the job must be able to:

- PC1.** identify the role of process mapping in improving business efficiency
- PC2.** analyze various types of process maps and their specific applications
- PC3.** develop a process map for a business process using process mapping steps and guidelines
- PC4.** apply value stream mapping principles to identify value and wastes in processes
- PC5.** conduct process mapping in a retail environment
- PC6.** apply process mapping techniques in manufacturing processes
- PC7.** create a process map for a service-based process
- PC8.** conduct process mapping in a telecom industry environment

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** The purpose and benefits of process mapping in improving business efficiency
- KU2.** Types of process maps (e.g., flowcharts, swimlane diagrams, SIPOC) and their appropriate applications
- KU3.** Principles of value stream mapping and identifying value-added vs. non-value-added activities
- KU4.** Industry-specific considerations in process mapping for retail, manufacturing, service, and telecom sectors

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Use process mapping software or tools to design and document workflows
- GS2.** Analyze processes logically to identify inefficiencies and improvement areas

Qualification Pack

- GS3.** Communicate findings and process improvements clearly through reports and visuals
- GS4.** Collaborate with internal stakeholders to gather accurate process information
- GS5.** Adapt mapping techniques to suit different industry environments and business functions

MEP/N0508: Apply Process Assurance and Operational Efficiency Methodologies

Description

This NOS involves applying process assurance techniques and operational efficiency methodologies - including analytics, control frameworks, internal audits and process reviews - to evaluate, optimise and align business processes with organisational goals and risk controls.

Scope

The scope covers the following :

- Analyse process assurance and operating efficiency methodologies
- Apply risk management and control frameworks in business processes
- Carryout internal audit and provide assurance on processes
- Review activities in various business processes
- Optimise processes to drive efficiency

Elements and Performance Criteria

Analyse process assurance and operating efficiency methodologies

To be competent, the user/individual on the job must be able to:

- PC1.** identify key concepts of process assurance and the importance of operating efficiency
- PC2.** apply analytics to assess and improve process efficiency
- PC3.** implement strategies that encourage innovation and continuous improvement in processes

Apply risk management and control frameworks in business processes

To be competent, the user/individual on the job must be able to:

- PC4.** identify the linkage between business objectives, associated risks, and controls; recognize different types of controls
- PC5.** recognize the various components of COSO framework and its principles
- PC6.** apply COSO framework in process assurance

Carryout internal audit and provide assurance on processes

To be competent, the user/individual on the job must be able to:

- PC7.** analyze the role of internal audits and audit planning in process assurance
- PC8.** evaluate internal audit responsibilities and understand stakeholder management
- PC9.** develop and implement audit plans focusing on risk management and process optimization
- PC10.** evaluate and communicate audit findings to drive continuous improvement

Review activities in various business processes

To be competent, the user/individual on the job must be able to:

- PC11.** inspect key activities in order-to-cash process and improve working capital through efficient order management
- PC12.** assess key activities in procure-to-pay process
- PC13.** review key activities in fixed asset management process

Qualification Pack

- PC14.** check key activities in inventory management process
- PC15.** analyze and optimize the procurement process to enhance efficiency
- PC16.** review key activities in HR and payroll process
- PC17.** examine key activities in record-to-report process

Optimise processes to drive efficiency

To be competent, the user/individual on the job must be able to:

- PC18.** evaluate the impact of fixed asset management on organizational profitability
- PC19.** facilitate optimization in inventory levels to balance cost and service levels
- PC20.** promote improvement in working capital through efficient order management
- PC21.** drive alignment in HR practices with organizational strategy to enhance productivity
- PC22.** facilitate implementation of strategies that encourage innovation and continuous improvement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Concepts of process assurance, operational efficiency, and their role in business performance
- KU2.** Use of analytics and continuous improvement strategies to enhance process effectiveness
- KU3.** Components and application of the COSO framework for risk management and control
- KU4.** Role and responsibilities of internal audit in process assurance and stakeholder alignment
- KU5.** Key activities and performance levers across business processes such as order-to-cash, procure-to-pay, inventory, HR, and record-to-report

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Analyze business data to evaluate process performance and identify improvement areas
- GS2.** Apply structured audit and review methods to assess process compliance and efficiency
- GS3.** Communicate audit findings and process improvement insights effectively through reports and presentations
- GS4.** Use digital tools and dashboards to monitor, measure, and optimize operational workflows
- GS5.** Collaborate across departments to assess risks, align controls, and implement improvement strategies

MEP/N0509: Manage Internal Controls Over Financial Reporting

Description

This NOS covers the application of financial and operational control principles, implementation of compliance frameworks like SOX and ICFR, and assessment of deficiencies to ensure robust internal controls over financial reporting and regulatory compliance.

Scope

The scope covers the following :

- Apply fundamental principles of financial and operational controls
- Implement financial and internal control and compliance frameworks in organisations
- Ensure compliance with financial and internal control frameworks

Elements and Performance Criteria

Apply fundamental principles of financial and operational controls

To be competent, the user/individual on the job must be able to:

- PC1.** demonstrate basics of accounting
- PC2.** interpret financial statements of an organisation
- PC3.** identify operating and financial controls and their significance
- PC4.** differentiate between operating and financial controls
- PC5.** evaluate financial controls

Implement financial and internal control and compliance frameworks in organisations

To be competent, the user/individual on the job must be able to:

- PC6.** identify the role of SOX and its importance in corporate governance
- PC7.** identify the role of ICFR and its importance in regulation compliance
- PC8.** develop and implement SOX program and its deliverables
- PC9.** test and track SOX program using various methods
- PC10.** recognize the role of ITGC in ICFR and its importance in audit
- PC11.** apply various methods for improving ITGC framework in an organization
- PC12.** review management representation letters
- PC13.** identify the various provisions of Companies Act 2013 relating to IFC and ICFR

Ensure compliance with financial and internal control frameworks

To be competent, the user/individual on the job must be able to:

- PC14.** identify and assess materiality, material weakness and significant deficiency
- PC15.** identify the responsibilities of auditors
- PC16.** assess the impact of deficiency in financial reporting controls
- PC17.** determine remediation for deficiencies.
- PC18.** recognize the importance of IFC and various auditing standards

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Basic accounting principles and interpretation of financial statements
- KU2.** Differences and significance of operational and financial controls in organizations
- KU3.** Core elements and application of SOX, ICFR, and ITGC frameworks
- KU4.** Provisions of the Companies Act 2013 related to IFC and ICFR
- KU5.** Concepts of materiality, control deficiencies, auditor responsibilities, and remediation techniques

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Apply accounting knowledge to analyze financial controls and statements
- GS2.** Interpret compliance requirements and assess risks in control environments
- GS3.** Communicate control findings, audit requirements, and remediation steps clearly
- GS4.** Use digital tools and audit software to track compliance and control testing
- GS5.** Collaborate with audit teams and stakeholders to implement and review financial control systems

MEP/N0510: Carryout Market, Credit and Operational Risk Management

Description

This NOS focuses on applying financial risk management principles to identify, assess, and manage market, credit, operational, and foreign exchange risks through regulatory frameworks, models, and instruments such as securitization, derivatives, and asset-liability management.

Scope

The scope covers the following :

- Apply financial risk management principles to address risk management failures
- Carryout credit risk and country risk analysis
- Analyse securitization, banking risks, and asset liability management (ALM) principles
- Analyse foreign exchange risk and derivatives in financial markets
- Evaluate financial failures, regulatory frameworks, and their outcomes

Elements and Performance Criteria

Apply financial risk management principles to address risk management failures

To be competent, the user/individual on the job must be able to:

- PC1.** identify the building blocks of financial risk management and how firms manage financial risks
- PC2.** analyse the governance around financial risk management, exploring financial disasters and the causes of financial risk management failures
- PC3.** identify the concept of capital asset pricing model (CAPM)
- PC4.** recognize the importance of systematic risk (market risk), risk-free rate, Beta, unsystematic risk, risk and diversification

Carryout credit risk and country risk analysis

To be competent, the user/individual on the job must be able to:

- PC5.** identify credit risk, credit risk management techniques, and role of credit rating agencies
- PC6.** assess the credibility of credit rating agencies, including rating shopping and credit scoring methodologies
- PC7.** perform country risk analysis, including techniques to assess country risk, rating assignment methodologies and constructing a risk matrix

Analyse securitization, banking risks, and asset liability management (ALM) principles

To be competent, the user/individual on the job must be able to:

- PC8.** analyse the securitization process, types, structure, and the impact of securitization on the financial crisis
- PC9.** identify operational risks, challenges, referencing the Basel Accord and relevant international regulatory frameworks
- PC10.** identify and analyse risks in banking, including liquidity risk, interest rate risk, foreign exchange risk, operational risk, market risk and cyber risk

Qualification Pack

PC11. analyze the concept of asset liability management (ALM), detailing risk models such as gap, duration, simulation, and value at risk (VaR) to manage banking industry specific risks

Analyse foreign exchange risk and derivatives in financial markets

To be competent, the user/individual on the job must be able to:

PC12. identify market risks in organisations including the international monetary system and foreign exchange market

PC13. analyse foreign exchange risk management, covering transaction, translation, and economic exposures

PC14. manage translation exposure using various translation methods

PC15. differentiate and compare key translation methods using examples

PC16. manage transactions risk and economic exposure risk

PC17. identify risks associated to derivatives in financial markets, including futures and forwards

PC18. identify structure and mechanics around hedging, including hedging with derivatives, corporate bonds

PC19. understand concepts of leading and lagging, netting, supported by case studies

PC20. apply interest rate and currency swaps in practical scenarios, structuring strategies and numerical examples

Evaluate financial failures, regulatory frameworks, and their outcomes

To be competent, the user/individual on the job must be able to:

PC21. identify key regulations and analyze financial failures in banks and financial institutions

PC22. evaluate the major international regulatory frameworks, including those developed post-global financial crisis, and their role in managing risk

PC23. assess the impact of special financial events on various risk types—liquidity, credit, market, and operational risks

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Principles of financial risk management and lessons from historical risk management failures

KU2. Credit risk assessment techniques, credit rating agency operations, and country risk analysis methods

KU3. Components of market risk, ALM techniques, Basel framework, and various banking and operational risks

KU4. Foreign exchange risk exposures, hedging strategies using derivatives, swaps, and other financial instruments

KU5. Global regulatory frameworks and the impact of financial crises on risk governance and policy reforms

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Analyse risk scenarios using quantitative models such as CAPM, VaR, gap and duration models

Qualification Pack

- GS2.** Evaluate creditworthiness and country risk using scoring tools and risk matrices
- GS3.** Communicate financial risk findings through structured analysis and reports
- GS4.** Use financial data and simulation tools to assess risk exposures and hedging strategies
- GS5.** Apply critical thinking to learn from financial failures and interpret evolving global regulatory standards

Qualification Pack

MEP/N0511: Drive Strategic Thinking Process

Description

This NOS covers the application of strategic thinking frameworks and decision-making models to enhance long-term business success, assess organizational vision, evaluate leadership practices, and foster critical, intuitive, and adaptive thinking across strategic contexts.

Scope

The scope covers the following :

- Apply strategic thinking in business processes
- Analyse strategic thinking models and theories
- Apply strategic thinking in decision-making processes

Elements and Performance Criteria

Apply strategic thinking in business processes

To be competent, the user/individual on the job must be able to:

- PC1.** identify concept thinking as a skill emphasizing its role in developing effective managers capable of making informed, strategic decisions
- PC2.** recognize the risks of focusing solely on short-term goals, discussing how the absence of strategic thinking and long-term vision can lead to business failures and missed opportunities for growth and enhancements
- PC3.** analyze the benefits of strategic thinking for corporate longevity, exploring how focus on long-term growth helps businesses navigate changes and sustain competitive advantage
- PC4.** identify common causes of strategy implementation failure, including lack of communication on strategic direction and failure to engage partners in the co-creation of strategy
- PC5.** analyze the challenges posed by narrow functional thinking and blurred distinctions between strategy and operations, emphasizing the importance of clear roles and alignment across departments
- PC6.** evaluate the impact of outsourcing strategy development, hollow mission statements, and a lack of focus on actionable results, considering the importance of effective implementation
- PC7.** identify success and winning across multiple levels and their contribution to the strategic goals of a business
- PC8.** apply the 7 C's framework for internal and external analysis to assess factors that impact success at both the organizational and individual levels

Analyse strategic thinking models and theories

To be competent, the user/individual on the job must be able to:

- PC9.** recognize the role of vision in shaping a business's direction, highlighting the Balanced Goals Model and steps to develop a clear vision and mission statement, including key questions and components
- PC10.** evaluate the impact of common myths about successful corporations and leaders, and the impact of well-defined vision on sustainable growth and resilience in organisations
- PC11.** analyse the strategy in older times and their relevance to modern business strategy

Qualification Pack

- PC12.** analyse contemporary strategic perspectives
- PC13.** differentiate between strategic thinking and strategic planning
- PC14.** explore the cognitive clusters of strategic thinking and strategic planning
- PC15.** utilize Sloan Triad Model to examine the roles of informal and formal learning, context, learning transfer, and the role of metaphor and analogy in enhancing strategic thinking skills
- PC16.** analyse three-stage model of strategic thinking, including combination of formal and informal processes, and the importance of experience and reflection

Apply strategic thinking in decision-making processes

To be competent, the user/individual on the job must be able to:

- PC17.** explore strategic learning domains and the influence of learning domains, transformative learning, and lateral thinking on strategic thinking development
- PC18.** evaluate the role of dialogue, inquiry, and intuition in strategic thinking
- PC19.** differentiate between dialogue, discussion, and debate to develop critical dialogue skills
- PC20.** apply decision-making models within strategic contexts, balancing intuition and analysis and examining the impact of cultural factors on decision-making

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** The importance of strategic thinking in contrast to short-term and operational focus
- KU2.** Key frameworks such as the 7 C's Balanced Goals Model, Sloan Triad Model, and the three-stage strategic thinking model
- KU3.** Common barriers to strategy implementation and how to overcome them
- KU4.** The role of vision, mission, and internal-external alignment in driving strategy
- KU5.** Decision-making models and the influence of culture, dialogue, and intuition in strategic contexts

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Apply strategic thinking models to analyze business direction and decision-making
- GS2.** Reflect critically on past experiences and incorporate learning into strategic actions
- GS3.** Communicate strategic ideas effectively using frameworks and structured dialogue
- GS4.** Collaborate across departments to align strategic thinking with functional roles
- GS5.** Evaluate business challenges using a mix of cognitive, intuitive, and analytical thinking

MEP/N0512: Implement Human Resource Management Process

Description

This NOS focuses on applying core principles and practices of human resource management including planning, recruitment, training, performance appraisal and employee relations to effectively manage human talent and align HR strategies with organisational goals

Scope

The scope covers the following :

- Apply core principles of HRM in business processes
- Apply HR practices to manage human talent more effectively

Elements and Performance Criteria

Apply core principles of HRM in business processes

To be competent, the user/individual on the job must be able to:

- PC1.** analyse concepts and scope of human resource management, including its history, functions, and the roles of HR executives in an organization
- PC2.** analyse the human resource planning process, including the need, techniques for HR forecasting, and strategies for successful HR planning
- PC3.** conduct job analysis and job design, recognizing essential tasks, responsibilities, required skills, and qualifications necessary for various roles
- PC4.** evaluate recruitment and selection processes, identifying key factors and assessing the impact of effective recruitment and onboarding in an organization

Apply HR practices to manage human talent more effectively

To be competent, the user/individual on the job must be able to:

- PC5.** analyse training methods and conduct training needs analysis to identify suitable approaches for employee development and optimizing training impact
- PC6.** develop a performance management and appraisal system aligned with organizational strategy to enhance productivity, exploring various appraisal methods and benefits.
- PC7.** assess job evaluation techniques, understanding the objectives, advantages, and limitations of different models to suit organizational needs
- PC8.** design and implement effective compensation structures, understanding wage administration, theories of compensation, and reward systems
- PC9.** develop strategies for effective employee relations, focusing on ethics, employee rights, labor relations, employee health and safety and promoting industrial harmony
- PC10.** analyse and apply emerging HR trends, including competency mapping, workforce optimization, talent management, and grievance management to increase organizational agility

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** Core functions, history, and scope of human resource management and the role of HR professionals
- KU2.** Processes involved in HR planning, job analysis, recruitment, and selection
- KU3.** Methods for training needs assessment and employee development
- KU4.** Principles of performance management, job evaluation, and compensation planning
- KU5.** Strategies for employee relations, ethical practices, and emerging trends in HR such as talent and grievance management

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Communicate HR concepts, procedures, and strategies clearly across functional teams
- GS2.** Apply analytical thinking to assess HR needs, training impact, and compensation effectiveness
- GS3.** Use digital tools and HR software to support recruitment, appraisals, and workforce planning
- GS4.** Collaborate with different departments to align HR functions with business objectives
- GS5.** Maintain employee-centric thinking while addressing organizational needs and legal compliance

MEP/N0513: Analyse Organizational Behaviour Analysis

Description

This NOS involves analyzing individual and interpersonal dynamics, leadership styles, organizational culture, and structural systems to understand and influence behaviour within organizations for improved collaboration, change management, and performance outcomes.

Scope

The scope covers the following :

- Explore individual dynamics in organizational behaviour
- Analyse the influence of interpersonal dynamics and leadership in organizations
- Manage organisational systems, structures, culture and change

Elements and Performance Criteria

Explore individual dynamics in organizational behaviour

To be competent, the user/individual on the job must be able to:

- PC1.** analyse the nature and approaches to organization and management in contemporary business world
- PC2.** analyse the concept of diversity and its management strategies
- PC3.** evaluate the personality and values of people in an organization
- PC4.** identify learning and attitude of people in an organization and measures of job satisfaction in the workplace
- PC5.** recognize the concept of perceptions and individual decision-making in the workplace
- PC6.** recognize the concept of motivation and its applicability in the workplace

Analyse the influence of interpersonal dynamics and leadership in organizations

To be competent, the user/individual on the job must be able to:

- PC7.** apply the concept of group dynamics while working in groups
- PC8.** identify the process of communication in an organization
- PC9.** identify the various leadership styles and the role of leaders in a decision-making process
- PC10.** identify the various causes of power politics and the importance of following the ethics of organizational politics
- PC11.** apply effective measures to resolve conflicts using negotiations and the concept of conflict

Manage organisational systems, structures, culture and change

To be competent, the user/individual on the job must be able to:

- PC12.** identify the significance of organizational culture and create a positive and sustaining culture
- PC13.** implement the concepts of organizational change and stress management principles in the workplace
- PC14.** analyse the concept of organizational strategy and structural patterns
- PC15.** enhance organizational performance by implementing effective control techniques

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Concepts of personality, perception, motivation, attitudes, and job satisfaction in workplace settings
- KU2.** Group dynamics, communication processes, leadership styles, and political behaviour in organizations
- KU3.** Significance of diversity, ethics, and conflict resolution strategies
- KU4.** Principles of organizational culture, change management, and stress mitigation
- KU5.** Relationship between organizational structure, strategy, and behavioural performance

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Analyse behavioural patterns and interpersonal dynamics using structured frameworks
- GS2.** Communicate effectively to support motivation, conflict resolution, and change management
- GS3.** Apply critical thinking to assess leadership approaches and ethical challenges
- GS4.** Collaborate within diverse teams and support inclusive workplace practices
- GS5.** Use observation, reflection, and feedback tools to improve organizational behaviour and systems

MEP/N0514: Apply Third-Party Risk Management Techniques

Description

This NOS covers the implementation of third-party risk management strategies, including risk classification, assessments, audits, monitoring, and remediation, to ensure compliance, ethical alignment, and operational integrity across the third-party lifecycle.

Scope

The scope covers the following :

- Implement third-party risk management strategies in the organisation

Elements and Performance Criteria

Implement third-party risk management strategies in the organisation

To be competent, the user/individual on the job must be able to:

- PC1.** identify various types of third parties and risks associated with third parties
- PC2.** recognize the components of third-party risk management framework and its importance in managing third-party risks
- PC3.** classify third parties based on inherent parameters for different risk areas
- PC4.** carryout third-party risk assessment
- PC5.** identify controls based on review of questionnaire responses and evidence
- PC6.** conduct FRA and audits to compare code of conduct with that of industry leaders
- PC7.** identify the importance of tracking and remediating open issues promptly
- PC8.** monitor third party risks throughout their lifecycle

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Types of third parties and the risks they pose to organizations across operational, compliance, financial, and reputational domains
- KU2.** Components of a third-party risk management (TPRM) framework and its strategic significance
- KU3.** Criteria for classifying third parties based on inherent risk parameters
- KU4.** Methods for conducting third-party assessments, FRA (fraud risk assessment), audits, and code of conduct reviews
- KU5.** Importance of issue remediation and continuous monitoring across the third-party relationship lifecycle

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** Apply structured assessment tools and risk classification techniques to evaluate third-party risks
- GS2.** Communicate compliance expectations and audit results to stakeholders and third parties
- GS3.** Use digital platforms to track risk indicators, manage assessment responses, and monitor open issues
- GS4.** Collaborate with compliance, legal, and procurement teams for effective risk governance
- GS5.** Document and report third-party performance, audit findings, and remediation progress clearly and accurately

MEP/N0515: Evaluate Enterprise Risk Management Methodologies

Description

This NOS covers the evaluation and application of enterprise risk management (ERM) principles, frameworks, infrastructure, and mitigation strategies across industries, with a focus on integrating governance, financial regulations, and sector-specific risks into a robust ERM system.

Scope

The scope covers the following :

- Analyse ERM principles, frameworks, infrastructure and risk mitigation strategies
- Analyse risk management in banks and financial institutions
- Apply ERM in various sectors

Elements and Performance Criteria

Analyse ERM principles, frameworks, infrastructure and risk mitigation strategies

To be competent, the user/individual on the job must be able to:

- PC1.** identify multiple risks impacting corporate enterprises
- PC2.** recognize various concepts related to ERM
- PC3.** identify the need for ERM and how risk management strategies have evolved
- PC4.** differentiate between traditional risk management and ERM
- PC5.** carryout the steps to implement ERM and identify the challenges while implementing ERM
- PC6.** recognize the relevance of the global financial crisis in 2008
- PC7.** identify key principles of ERM
- PC8.** evaluate companies' ERM practices and impact of ERM ratings on a company's performance
- PC9.** develop robust ERM frameworks- Bow-Tie method, Pestle analysis, FIRM risk scorecard
- PC10.** identify core elements of ERM infrastructure
- PC11.** recognize the stages of evolution of ERM
- PC12.** identify components of COSO ERM framework
- PC13.** identify various types of risks and develop a risk scale
- PC14.** explore the role of corporate governance in supporting effective ERM
- PC15.** draft a risk assessment questionnaire and forced risk rankings by understanding risk assessment matrix (RAM) for various sectors
- PC16.** identify and develop risk mitigation strategies

Analyse risk management in banks and financial institutions

To be competent, the user/individual on the job must be able to:

- PC17.** identify DODD-Frank Act and its importance
- PC18.** review Basel norms and their implications for banking sector in maintaining capital
- PC19.** calculate capital adequacy ratio considering the emerging regulatory environment for banks and financial institutions

Qualification Pack

- PC20.** recognize liquidity risk management in banks and financial institutions
- PC21.** differentiate between structural and dynamic liquidity
- PC22.** analyse the application of rate-sensitive assets and liabilities
- PC23.** evaluate credit risk management practices within the banking sector
- PC24.** identify financial failures in banks and financial institutions
- PC25.** identify risk management practices in banks
- PC26.** analyse capital structure in banks
- PC27.** analyse the balance sheet of a bank

Apply ERM in various sectors

To be competent, the user/individual on the job must be able to:

- PC28.** formulate a framework to identify critical risks for integration into the ERM process in the manufacturing industry
- PC29.** design a process to identify and evaluate key risks for inclusion in the ERM system within the retail industry
- PC30.** develop a comprehensive strategy for identifying and addressing key risks in the ERM framework for the hospitality industry
- PC31.** create a systematic method for recognizing and incorporating essential risks into the ERM process for the telecom industry
- PC32.** develop a thought process for identifying the key risk which would be part of the ERM framework in BFS Industry

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Principles, evolution, and frameworks of ERM including COSO, Bow-Tie, PESTLE, and FIRM risk scorecard
- KU2.** Differences between traditional risk management and enterprise-wide risk approaches
- KU3.** ERM infrastructure components, risk assessment matrices, and questionnaire design
- KU4.** Regulatory frameworks like Basel norms, DODD-Frank Act, and capital adequacy practices in financial institutions
- KU5.** Sector-specific ERM practices for manufacturing, retail, hospitality, telecom, and BFSI sectors

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Apply ERM frameworks to assess and mitigate risks across diverse business functions and industries
- GS2.** Use analytical tools to evaluate ERM ratings, risk matrices, and capital adequacy ratios
- GS3.** Communicate ERM insights and risk management practices through structured reports and presentations
- GS4.** Collaborate with cross-functional teams to design and implement customized ERM frameworks
- GS5.** Review financial statements and regulatory documents to assess institutional risk posture

MEP/N0516: Manage Regulatory, Ethical and Compliance Risks

Description

This NOS involves identifying and analysing regulatory frameworks, ethical standards and compliance risks across sectors focusing on anti-bribery, anti-money laundering, environmental laws, labour laws and industry-specific compliance requirements to promote responsible and lawful business practices

Scope

The scope covers the following :

- Apply regulatory frameworks and ethical risk management strategies within organization

Elements and Performance Criteria

Apply regulatory frameworks and ethical risk management strategies within organization

To be competent, the user/individual on the job must be able to:

- PC1.** identify basics of key regulatory frameworks impacting organizations
- PC2.** analyse role of ethics and compliance in business
- PC3.** analyse anti-bribery regulations and compliance by organizations.
- PC4.** analyse impact of environmental regulations on businesses
- PC5.** evaluate anti-money laundering (AML) compliance requirements
- PC6.** assess challenges in pharma industry compliance
- PC7.** evaluate the legal responsibilities of directors
- PC8.** analyse anti-competition cases and compliance strategies
- PC9.** apply labour laws to enhance workplace ethics

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Key regulatory frameworks and their implications for different industries
- KU2.** The role of ethics and compliance in sustaining organizational integrity and reputation
- KU3.** Provisions and global implications of anti-bribery and anti-money laundering regulations
- KU4.** Sector-specific compliance challenges, such as in pharma, and their operational impact
- KU5.** Legal responsibilities of directors and compliance obligations under labor and environmental laws

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Interpret and apply regulatory and compliance requirements to real-world business scenarios

Qualification Pack

- GS2.** Communicate compliance expectations and ethical standards across business units
- GS3.** Analyse and report on regulatory breaches, legal risks, and corrective actions
- GS4.** Collaborate with legal, HR, and compliance teams to implement ethical practices and policies
- GS5.** Stay updated on evolving regulations and compliance trends relevant to multiple industries

MEP/N0517: Analyse Information Technology Risk Management Strategies

Description

This NOS focuses on applying IT risk management frameworks, performing IT audits, and addressing emerging technology risks and compliance mandates to ensure secure, aligned, and resilient IT environments in support of business objectives.

Scope

The scope covers the following :

- Implement IT risk and control frameworks
- Assess IT audits, emerging technologies, and compliance requirements

Elements and Performance Criteria

Implement IT risk and control frameworks

To be competent, the user/individual on the job must be able to:

- PC1.** identify role of IT risk management in modern businesses
- PC2.** perform IT audits and their significance in managing IT risks
- PC3.** identify role of information technology general controls (ITGC) and their importance in safeguarding IT environments
- PC4.** differentiate between application controls and general controls, and their impact on IT risk management
- PC5.** identify and categorize common IT risks
- PC6.** apply risk assessment methodologies to evaluate IT risks and prioritize mitigation strategies
- PC7.** apply control objectives for information and related technology (COBIT) framework to manage IT risks
- PC8.** evaluate the national institute of standards and technology (NIST) cybersecurity framework and its role in enhancing IT security

Assess IT audits, emerging technologies, and compliance requirements

To be competent, the user/individual on the job must be able to:

- PC9.** conduct IT audits using established methodologies and evaluate the design and effectiveness of IT controls
- PC10.** analyse and test the operating effectiveness of IT controls in various environments
- PC11.** identify risks associated with emerging technologies like AI, ML and blockchain
- PC12.** develop comprehensive IT risk management plans that include strategies for managing risks in emerging technologies
- PC13.** evaluate the importance of regulatory compliance in IT risk management, including Sarbanes-Oxley act (SOX) and general data protection regulation (GDPR)
- PC14.** analyse role of IT governance in aligning IT risk management with business objectives

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** The role and importance of IT risk management and control frameworks like COBIT and NIST
- KU2.** Types of IT risks, including general and application controls, and their significance in IT environments
- KU3.** Methodologies for IT audits and evaluating the effectiveness of IT controls
- KU4.** Risks and governance challenges related to emerging technologies such as AI, ML, and blockchain
- KU5.** IT-related regulatory compliance requirements such as SOX and GDPR, and their business implications

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Conduct IT risk assessments and prioritize mitigation using structured methodologies
- GS2.** Perform IT audits and assess control effectiveness in diverse technology environments
- GS3.** Communicate IT risk findings, compliance requirements, and strategies effectively
- GS4.** Use IT governance tools to align risk management practices with organizational goals
- GS5.** Monitor and evaluate risks related to emerging technologies and suggest suitable control strategies

Qualification Pack

MEP/N0518: Apply Cyber Security Principles and Practices

Description

This NOS focuses on implementing cybersecurity frameworks, managing cyber threats and vulnerabilities, applying regulatory standards, and executing incident response and recovery strategies to ensure business continuity and organizational resilience.

Scope

The scope covers the following :

- Implement cyber security frameworks to manage risks
- Perform incident response to ensure business continuity

Elements and Performance Criteria

Implement cyber security frameworks to manage risks

To be competent, the user/individual on the job must be able to:

- PC1.** trace the historical development of cyberspace, highlighting key milestones and technological advancements
- PC2.** analyse how evolution of the internet has led to new business models and associated risks
- PC3.** identify principles of cyber security
- PC4.** differentiate between cyber security and information security
- PC5.** identify common threats and vulnerabilities in cyber security, and their potential impact
- PC6.** apply risk management strategies to mitigate identified threats and vulnerabilities
- PC7.** identify the structure, components and application of national institute of standards and technology (NIST) cyber security framework
- PC8.** implement ISO 27001 for enhancing organizational security
- PC9.** identify various industry-standardized cyber security tools and their applications in detecting and preventing cyber threats
- PC10.** identify emerging technologies like AI, ML and blockchain in cybersecurity

Perform incident response to ensure business continuity

To be competent, the user/individual on the job must be able to:

- PC11.** recognize role of governance in cyber security and key responsibilities of stakeholders
- PC12.** evaluate significance of compliance with cyber security regulations and standards
- PC13.** carry out an incident response to manage a cyber security breach
- PC14.** implement recovery and continuity plans to ensure business resilience after a cyber security incident

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** Principles of cybersecurity and the distinction between cybersecurity and information security
- KU2.** Common threats, vulnerabilities, and associated business risks in digital environments
- KU3.** Cybersecurity frameworks such as NIST and ISO 27001, including their structure and application
- KU4.** Use of cybersecurity tools and the role of emerging technologies like AI, ML, and blockchain
- KU5.** Governance roles, regulatory compliance requirements, and incident response planning in cybersecurity

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Analyse cybersecurity threats and apply risk mitigation strategies effectively
- GS2.** Implement recognized cybersecurity frameworks and tools within organizational systems
- GS3.** Communicate risks, incidents, and recovery actions to relevant stakeholders clearly and promptly
- GS4.** Respond to cybersecurity breaches and execute business continuity plans
- GS5.** Collaborate with IT, compliance, and leadership teams to ensure cyber governance and resilience

MEP/N0519: Implement Data Analytics Techniques

Description

This NOS covers the application of data analytics techniques to enhance auditing, risk management, compliance, and decision-making by leveraging data-driven tools, visualization practices, and emerging analytics trends.

Scope

The scope covers the following :

- Apply data analytics in auditing and risk management

Elements and Performance Criteria

Apply data analytics in auditing and risk management

To be competent, the user/individual on the job must be able to:

- PC1.** identify the fundamental concepts of data analytics, its approach and its importance in modern businesses
- PC2.** analyse how data analytics enhances the effectiveness and efficiency of internal audit processes
- PC3.** identify and evaluate the various challenges associated with implementing data analytics in organizations
- PC4.** identify characteristics and benefits of data-driven organizations, and how they leverage analytics for decision-making
- PC5.** recognize stages of data analytics maturity curve and role of stakeholders in advancing analytics capabilities
- PC6.** explore how data analytics is applied in ensuring regulatory compliance and managing operational risks
- PC7.** identify role of data analytics in managing financial risks and strengthening internal control systems
- PC8.** leverage data visualization tools, best practices, and creating architecture for effective data analysis
- PC9.** identify and apply knowledge of data analytics tools, integrating with different data sources and using SaaS-based reporting
- PC10.** identify emerging trends in data analytics
- PC11.** recognize step-by-step process followed by risk professionals while implementing audit analytics

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Fundamental concepts, stages, and maturity of data analytics in business contexts

Qualification Pack

- KU2.** Applications of data analytics in audit, financial risk management, compliance, and operational risk
- KU3.** Challenges in implementing data analytics and the characteristics of data-driven organizations
- KU4.** Tools and practices used for data visualization and reporting, including SaaS-based platforms
- KU5.** Emerging trends in analytics and the structured process followed for audit analytics implementation

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Apply data analytics techniques to assess internal controls and audit effectiveness
- GS2.** Use visualization tools to present insights clearly and drive business decisions
- GS3.** Collaborate with cross-functional teams to integrate data from various sources
- GS4.** Communicate analytics-based risk assessments and findings through reports and dashboards
- GS5.** Stay updated on evolving tools and trends in analytics relevant to business risk management

Qualification Pack

MEP/N0520: Implement Environmental, Social and Governance Frameworks and Practices

Description

This NOS covers the application of ESG principles, sustainability reporting standards, and governance frameworks to promote responsible business practices, meet regulatory expectations, manage ESG-related risks, and support sustainable value creation.

Scope

The scope covers the following :

- Recognize ESG foundational concepts and principles
- Implement reporting requirements around ESG
- Evaluate governance, risk management, and ESG audit practices

Elements and Performance Criteria

Recognize ESG foundational concepts and principles

To be competent, the user/individual on the job must be able to:

- PC1.** track evolution of the concepts of sustainability
- PC2.** recognize meaning and nature of sustainability according to the different schools of thought
- PC3.** identify key concepts of ESG
- PC4.** identify key pillars of ESG
- PC5.** de-code ESG to know the importance and positive impact of corporate sustainability and ESG
- PC6.** identify the concept of value derivation through ESG and methodologies to measure their impact
- PC7.** recognize the intersection of ERM with corporate sustainability and ESG
- PC8.** identify core concepts of sustainable finance and sustainable finance products

Implement reporting requirements around ESG

To be competent, the user/individual on the job must be able to:

- PC9.** identify emerging trends in sustainability in India and across the globe
- PC10.** track evolution of sustainability reporting in India
- PC11.** identify Indian and international frameworks for reporting, risks and opportunities including need for climate reporting and scope 1, 2, 3 emissions
- PC12.** carryout corporate sustainability reporting
- PC13.** recognize environmental issues, challenges and opportunities
- PC14.** identify the need to upskill human capital for a green economy
- PC15.** conduct lifecycle assessments to recognize product liability
- PC16.** identify stakeholder challenges and risks around sustainability for corporates and their mitigation
- PC17.** differentiate between CSR and ESG

Qualification Pack

- PC18.** implement CSR to promote ESG practices
- PC19.** follow SEBI guidelines for business responsibility and sustainability reporting (BRSR) and apply them within organization
- PC20.** identify international reporting formats - SBTi, GRI, TCFD
- PC21.** integrate international formats with BRSR, ESG indices and rating providers
- PC22.** track evolving regulatory landscapes in the US and EU and apply them within organisation as required

Evaluate governance, risk management, and ESG audit practices

To be competent, the user/individual on the job must be able to:

- PC23.** recognize commitment to sustainability and global climate change of the leadership, Board and CEO of the organisation
- PC24.** identify role of the corporate mission and vision statement and organizational culture
- PC25.** identify core principles of corporate governance and sustainability.
- PC26.** recognize elements of corporate behaviour around sustainability initiatives
- PC27.** implement governance practices to support sustainability goals and build corporate reputation
- PC28.** analyze concepts of materiality in the context of sustainability
- PC29.** conduct materiality assessments and apply them within organization
- PC30.** visualize enterprise risk through ESG lens
- PC31.** analyze governance, strategy and management structures for ESG-related risks and conduct internal auditing for ESG
- PC32.** apply COSO principles to achieve effective internal control over sustainability initiatives and reporting

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Foundational concepts of sustainability, ESG pillars, and their value creation methodologies
- KU2.** ESG's intersection with ERM and sustainable finance practices and products
- KU3.** Indian and international ESG reporting frameworks including BRSR, SBTi. GRI, TCFD, Scope 1-3 emissions
- KU4.** Role of corporate governance, board leadership, and organizational culture in driving sustainability
- KU5.** ESG auditing, materiality assessments, stakeholder risk analysis, and COSO principles for sustainability control

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Apply ESG frameworks and reporting standards across various industry contexts
- GS2.** Conduct materiality assessments, lifecycle analysis, and ESG-related risk evaluations
- GS3.** Communicate ESG strategy, reporting, and governance outcomes effectively to stakeholders

Qualification Pack

- GS4.** Collaborate with internal departments and external bodies to implement ESG initiatives
- GS5.** Track evolving global ESG regulations and align practices with Indian and international standards

MEP/N0521: Use Research Methodology Techniques

Description

This NOS focuses on applying research methodology and academic writing techniques, including data analysis, ethical practices, report preparation, and proposal writing, to generate evidence-based insights and contribute to academic and professional research.

Scope

The scope covers the following :

- Apply research methodology and academic writing
- Create research articles and proposals

Elements and Performance Criteria

Apply research methodology and academic writing

To be competent, the user/individual on the job must be able to:

- PC1.** identify key concepts in research methodology
- PC2.** identify various types of research
- PC3.** analyze steps involved in research process
- PC4.** recognize the importance of literature review
- PC5.** identify research gaps and formulate research hypotheses
- PC6.** analyze research design strategies, sampling techniques and data collection methods
- PC7.** apply data analysis tools and techniques
- PC8.** recognize ethical issues in research
- PC9.** identify ways to obtain consent and ensure confidentiality
- PC10.** create research reports to present data and communicate research outcomes effectively
- PC11.** conduct quantitative research and statistical analysis using software
- PC12.** perform qualitative research and thematic analysis
- PC13.** conduct mixed method research
- PC14.** carry out data analysis

Create research articles and proposals

To be competent, the user/individual on the job must be able to:

- PC15.** identify the components of a research proposal
- PC16.** perform proposal writing techniques
- PC17.** follow process to writing proposals
- PC18.** identify various peer-reviewed journals
- PC19.** identify various tools and plagiarism software

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** Key concepts in research methodology, types of research, and steps in the research process
- KU2.** Research design strategies, sampling methods, data collection, and ethical considerations
- KU3.** Techniques for conducting quantitative, qualitative, and mixed-method research
- KU4.** Tools and software used for data analysis, statistical interpretation, and plagiarism detection
- KU5.** Components of a research proposal, literature review, and academic writing best practices

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Conduct research using structured methodologies and data collection tools
- GS2.** Analyze and interpret research data using appropriate analytical software
- GS3.** Prepare professional research reports, proposals, and academic articles
- GS4.** Communicate findings clearly and ethically, ensuring confidentiality and consent protocols
- GS5.** Evaluate and select peer-reviewed sources and avoid plagiarism through proper referencing tools

MEP/N9914: Communicating with clients, visitors and colleagues effectively

Description

This unit deals in detail with communicating effectively with superiors, colleagues, visitors and customers to achieve a smooth workflow.

Scope

The scope covers the following :

- Interact with superiors
- Communicate with colleagues
- Communicate effectively with visitors and customers

Elements and Performance Criteria

Interact with Superiors

To be competent, the user/individual on the job must be able to:

- PC1.** seek clarification about job related requirements, performance indicators and incentives from reporting superior
- PC2.** record and report work output, exceptions and any anticipated reasons for delays to supervisor as per organisational requirements
- PC3.** escalate grievances and problems to appropriate authority
- PC4.** receive feedback on performance output and quality
- PC5.** report to appropriate authority unethical and inappropriate behaviour at the workplace

Communicate with colleagues

To be competent, the user/individual on the job must be able to:

- PC6.** receive information and instructions from colleagues asking clarification where required
- PC7.** accurately pass on information to authorized persons within agreed time and confirm its receipt
- PC8.** give information to others at a pace and in a clear and specific manner
- PC9.** assist others to maximize effectiveness and efficiency in carrying out tasks
- PC10.** display appropriate communication etiquette at work (Communication etiquette: do not use abusive language; use appropriate titles and terms of respect; do not eat or chew while talking (vice versa) etc.)

DGT/VSQ/N0103: Employability Skills (90 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** understand the significance of employability skills in meeting the current job market requirement and future of work
- PC2.** identify and explore learning and employability relevant portals
- PC3.** research about the different industries, job market trends, latest skills required and the available opportunities

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC4.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC5.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC6.** recognize the significance of 21st Century Skills for employment

Qualification Pack

- PC7.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life
- PC8.** adopt a continuous learning mindset for personal and professional development

Basic English Skills

To be competent, the user/individual on the job must be able to:

- PC9.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC10.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC11.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC12.** identify career goals based on the skills, interests, knowledge, and personal attributes
- PC13.** prepare a career development plan with short- and long-term goals

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC14.** follow verbal and non-verbal communication etiquette while communicating in professional and public settings
- PC15.** use active listening techniques for effective communication
- PC16.** communicate in writing using appropriate style and format based on formal or informal requirements
- PC17.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC18.** communicate and behave appropriately with all genders and PwD
- PC19.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC20.** identify and select reliable institutions for various financial products and services such as bank account, debit and credit cards, loans, insurance etc.
- PC21.** carry out offline and online financial transactions, safely and securely, using various methods and check the entries in the passbook
- PC22.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC23.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC24.** operate digital devices and use their features and applications securely and safely
- PC25.** carry out basic internet operations by connecting to the internet safely and securely, using the mobile data or other available networks through Bluetooth, Wi-Fi, etc.
- PC26.** display responsible online behaviour while using various social media platforms

Qualification Pack

- PC27.** create a personal email account, send and process received messages as per requirement
- PC28.** carry out basic procedures in documents, spreadsheets and presentations using respective and appropriate applications
- PC29.** utilize virtual collaboration tools to work effectively

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC30.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC31.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC32.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC33.** identify different types of customers and ways to communicate with them
- PC34.** identify and respond to customer requests and needs in a professional manner
- PC35.** use appropriate tools to collect customer feedback
- PC36.** follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

- PC37.** create a professional Curriculum vitae (Résumé)
- PC38.** search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively
- PC39.** apply to identified job openings using offline /online methods as per requirement
- PC40.** answer questions politely, with clarity and confidence, during recruitment and selection
- PC41.** identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** need for employability skills and different learning and employability related portals
- KU2.** various constitutional and personal values
- KU3.** different environmentally sustainable practices and their importance
- KU4.** Twenty first (21st) century skills and their importance
- KU5.** how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up
- KU6.** importance of career development and setting long- and short-term goals
- KU7.** about effective communication
- KU8.** POSH Act
- KU9.** Gender sensitivity and inclusivity
- KU10.** different types of financial institutes, products, and services

Qualification Pack

- KU11.** components of salary and how to compute income and expenditure
- KU12.** importance of maintaining safety and security in offline and online financial transactions
- KU13.** different legal rights and laws
- KU14.** different types of digital devices and the procedure to operate them safely and securely
- KU15.** how to create and operate an e- mail account
- KU16.** use applications such as word processors, spreadsheets etc.
- KU17.** how to identify business opportunities
- KU18.** types and needs of customers
- KU19.** how to apply for a job and prepare for an interview
- KU20.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and write different types of documents/instructions/correspondence in English and other languages
- GS2.** communicate effectively using appropriate language in formal and informal settings
- GS3.** behave politely and appropriately with all to maintain effective work relationship
- GS4.** how to work in a virtual mode, using various technological platforms
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down the proportion of marks for Theory and Skills Practical for each PC.
2. The assessment for the theory part will be based on the knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for the theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score recommended pass % aggregate for the QP.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
National Occupational Standard	NOS define the measurable performance outcomes required from an individual engaged in a particular task. They list down what an individual performing that task should know and also do.
Qualification	A formal outcome of an assessment and validation process which is obtained when a competent body determines that an individual has achieved learning outcomes to given standards
Long Term Training (LTT)	Long-term skilling means any vocational training program undertaken for a year and above.
Sector	A grouping of professional activities on the basis of their main economic function, product, service or technology.
