MEP/N1137: Integrate ESG in business

Description

Oversee the systematic embedding of environmental, social, and governance principles across organizational structures and processes to align with corporate strategies and goals.

Scope

The scope covers the following :

- Conduct ESG assessment and research
- Develop benchmarking and compliance
- Manage risk and opportunity
- Develop strategic plan and monitor performance

Elements and Performance Criteria

Conduct ESG assessment and research

To be competent, the user/individual on the job must be able to:

- PC1.** Assess the scope and relevance of ESG factors in different sectors of the economy to understand their impact on the organization.
- PC2.** Conduct sector-specific research to identify key ESG issues affecting each sector, providing insights for strategic planning.
- PC3.** Conduct an audit of current business operations to identify gaps in ESG compliance and performance.
- PC4.** Map identified ESG issues against their impact on the organization and its stakeholders to prioritize focus areas.
- PC5.** Research and compile a list of applicable local, national, and international ESG regulations.
- PC6.** Analyze the current organizational structure to identify potential barriers to effective ESG integration.

Develop benchmarking and compliance

To be competent, the user/individual on the job must be able to:

- PC7.** Benchmark ESG practices of leading companies within the industry to identify best practices and areas for improvement.
- PC8.** Compare the organization's current ESG practices against industry standards and best practices to ensure competitiveness and compliance.
- PC9.** Assess the organization's current compliance status with these regulations, identifying areas of risk.
- PC10.** Develop a compliance plan to address any deficiencies and ensure ongoing regulatory adherence.

Manage risk and opportunity

To be competent, the user/individual on the job must be able to:

- PC11.** Evaluate the impact of ESG factors on the organization's financial performance and risk management, providing data-driven recommendations to the executive team.

Qualification Pack

- PC12.** Identify ESG-related risks, such as regulatory and reputational risks, and opportunities, including efficiency improvements and market differentiation.
- PC13.** Develop a scoring system to prioritize identified risks and opportunities based on their potential impact on the organization.
- PC14.** Create a comprehensive mitigation plan for identified risks and an action plan to capitalize on ESG opportunities.
- PC15.** Recommend structural adjustments to facilitate efficient ESG oversight and decision-making.

Develop strategic plan and monitor performance

To be competent, the user/individual on the job must be able to:

- PC16.** Outline key ESG initiatives and projects, including timelines and responsibilities, to achieve the organization's ESG goals.
- PC17.** Establish metrics and KPIs to monitor the progress and performance of ESG initiatives against set objectives.
- PC18.** Assess the landscape of employment opportunities and potential career paths related to ESG within the organization and beyond, promoting internal and external talent development.
- PC19.** Map out key ESG roles and responsibilities within the organization to ensure clarity and alignment with strategic goals.
- PC20.** Analyze the skill and qualification requirements for various ESG positions to guide recruitment and professional development strategies.
- PC21.** Recommend actionable steps to address identified ESG gaps, prioritizing initiatives by their impact and feasibility.
- PC22.** Identify and engage with stakeholders to gather their views on ESG priorities, ensuring their perspectives are incorporated into the organization's strategy.
- PC23.** Develop a focused ESG strategy that aligns with business objectives based on the materiality assessment.
- PC24.** Develop an ESG reporting framework to ensure accountability, transparency, and continuous improvement.
- PC25.** Create a detailed roadmap for ESG integration, setting clear objectives for sustainable growth that align with the organization's strategic vision.
- PC26.** Define both short-term and long-term ESG goals and outline the initiatives required to achieve these goals.
- PC27.** Select relevant ESG KPIs that accurately reflect the outcomes of ESG initiatives.
- PC28.** Collect and analyze data to measure the impact of ESG initiatives, providing insights for continuous improvement.
- PC29.** Prepare and disseminate comprehensive reports showcasing the successes, lessons learned, and areas for improvement in ESG initiatives.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge of relevant ESG frameworks, standards, and regulations applicable to the business context.
- KU2.** Understanding of organizational goals and industry-specific challenges to effectively integrate ESG into strategic decision-making.

Qualification Pack

- KU3.** Familiarity with methodologies for measuring ESG performance, setting targets, and reporting progress.
- KU4.** Awareness of stakeholder expectations, potential ESG-related risks, and opportunities for value creation.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Analytical thinking and problem-solving skills for evaluating ESG complexities and recommending viable solutions.
- GS2.** Effective communication to engage with diverse stakeholders, including senior management and external partners.
- GS3.** Project management proficiency to oversee cross-functional collaboration and timely implementation of ESG initiatives.
- GS4.** Collaboration and interpersonal skills to foster synergy among internal teams and external networks.

MEP/N1138: Develop ESG frameworks, disclosures and ratings

Description

Establish and implement standardized frameworks, disclosure practices, and rating methodologies to accurately measure, compare, and communicate the organization's ESG performance.

Scope

The scope covers the following :

- Outline frameworks and standards
- Determine ESG indicators and scorecards
- Discuss reporting and transparency
- Determine tools and integration

Elements and Performance Criteria

Outline frameworks and standards

To be competent, the user/individual on the job must be able to:

- PC1.** Identify key principles and criteria for both the Global Reporting Initiative (GRI) and Integrated Reporting (IR).
- PC2.** Prepare a comparative table highlighting the focus areas, reporting standards, and methodologies of GRI vs. IR.
- PC3.** Analyze the applicability and adoption rates of both frameworks in different industries.
- PC4.** List the subgroups or categories covered by the Business Responsibility and Sustainability Report (BRSR).
- PC5.** Outline the specific metrics within the Sustainability Accounting Standards Board (SASB) framework.
- PC6.** Compare the approaches of BRSR and SASB in measuring and reporting sustainability.
- PC7.** Identify the ESG categories used by MSCI in their rating system.
- PC8.** Outline the assessment categories utilized by Sustainalytics for ESG ratings.
- PC9.** Compare and contrast the focus of MSCI and Sustainalytics in their ESG assessments.

Determine ESG indicators and scorecards

To be competent, the user/individual on the job must be able to:

- PC10.** Identify a comprehensive set of ESG indicators used across different industries.
- PC11.** Categorize the indicators into environmental, social, and governance groups.
- PC12.** Assess the relevance of each indicator to various stakeholders.
- PC13.** Develop an ESG scorecard template based on course learnings.
- PC14.** Determine the criteria and weightings for each ESG component within the scorecard.
- PC15.** Create a mock assessment using the scorecard for a hypothetical company.
- PC16.** Define the qualitative and quantitative factors contributing to a strong ESG score.
- PC17.** Discuss the importance of transparency and accuracy in reporting for a good ESG score.
- PC18.** Highlight the role of stakeholder engagement and materiality in achieving a high ESG score.

Qualification Pack

Discuss reporting and transparency

To be competent, the user/individual on the job must be able to:

- PC19.** Evaluate the effectiveness of various ESG reporting frameworks in ensuring transparency.
- PC20.** Discuss the standardization of ESG reporting and its impact on stakeholder trust.
- PC21.** Examine the role of third-party audits and certifications in validating ESG disclosures.
- PC22.** Outline a process for regular evaluation of ESG performance against set standards.
- PC23.** Develop a continuous improvement plan for maintaining and updating ESG practices.
- PC24.** Discuss the integration of new regulations and stakeholder expectations into existing ESG standards.

Determine tools and integration

To be competent, the user/individual on the job must be able to:

- PC25.** Identify ESG-integrated business intelligence tools available in the market.
- PC26.** Analyze how these tools can be used to identify and mitigate ESG-related risks.
- PC27.** Discuss case studies where ESG tools have successfully aided in risk mitigation.
- PC28.** Define business intelligence in the context of decision-making and strategic planning.
- PC29.** Discuss the integration of ESG metrics into business intelligence platforms.
- PC30.** Evaluate the impact of ESG tools on business transformation and performance over recent years.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Familiarity with key sustainability reporting standards (e.g., GRI, SASB, TCFD) and their application.
- KU2.** Understanding of different ESG rating methodologies and their relevance to stakeholder expectations.
- KU3.** Awareness of regulatory requirements, industry benchmarks, and trends influencing ESG disclosures.
- KU4.** Knowledge of data collection, validation, and reporting techniques for transparent ESG communication.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Analytical skills to interpret complex ESG data and derive meaningful insights.
- GS2.** Communication skills to effectively convey ESG performance and disclosure requirements to stakeholders.
- GS3.** Project management skills to coordinate timelines, resources, and cross-functional collaboration for ESG reporting.
- GS4.** Collaboration and negotiation abilities to align internal teams and external partners on disclosure goals and standards.

MEP/N1139: Manage sustainable finance

Description

Oversee the development and implementation of financial strategies and instruments that align with ESG objectives, ensuring responsible resource allocation and ethical investment practices.

Scope

The scope covers the following :

- Outline ESG reporting frameworks and standards for sustainable finance
- Evaluate ESG risk management and financial performance
- Evaluate ESG in Mergers and Acquisitions (M&A)
- Develop ESG investing and sustainable development for sustainable finance

Elements and Performance Criteria

Outline ESG reporting frameworks and standards for sustainable finance

To be competent, the user/individual on the job must be able to:

- PC1.** Prepare a table to distinguish between ESG reporting frameworks - GRI and IR.
- PC2.** Define the scope and reporting principles for both the Global Reporting Initiative (GRI) and Integrated Reporting (IR).
- PC3.** Create a side-by-side comparison table highlighting the key differences in reporting standards between GRI and IR.
- PC4.** Discuss the suitability of each framework for different types of organizations.
- PC5.** List the key financial and non-financial metrics commonly used in ESG assessment.
- PC6.** Determine the most reliable data sources for gathering ESG information.
- PC7.** Track the latest trends in ESG practices and reporting.
- PC8.** Analyze the drivers behind these trends.
- PC9.** Predict future developments in ESG based on current trends.

Evaluate ESG risk management and financial performance

To be competent, the user/individual on the job must be able to:

- PC10.** Describe methodologies for quantifying and integrating ESG outcomes into business analysis.
- PC11.** Identify the range of ESG risks that can impact financial performance.
- PC12.** Quantify potential financial losses from ESG risks.
- PC13.** Develop strategic recommendations for managing and mitigating ESG risks.
- PC14.** Track stock price movements following ESG news announcements.
- PC15.** Analyze the correlation between ESG news and stock performance.
- PC16.** Report on case studies where ESG developments have had a notable impact on shareholder value.
- PC17.** Identify companies with recent ESG controversies.
- PC18.** Examine the financial impact of these controversies on the companies.

Qualification Pack

PC19. Analyze the response strategies and their effectiveness in mitigating financial loss.

PC20. Discuss the main challenges companies face when using ESG as a financial tool.

PC21. Explore how ESG issues can lead to financial oppression or exclusion.

PC22. Predict future trends in the financial application of ESG principles.

Evaluate ESG in Mergers and Acquisitions (M&A)

To be competent, the user/individual on the job must be able to:

PC23. Outline the ESG due diligence process in M&A transactions.

PC24. Analyze how ESG considerations can affect the valuation of deals.

PC25. Evaluate the post-transaction financial performance of companies that have undergone ESG-focused M&A.

Develop ESG investing and sustainable development for sustainable finance

To be competent, the user/individual on the job must be able to:

PC26. Compare historical performance data of ESG investments with traditional investments.

PC27. Examine the risk/return profile of ESG investments.

PC28. Discuss the long-term financial benefits and drawbacks of ESG investing.

PC29. Research companies recognized for their ESG integration.

PC30. Analyze the financial performance indicators before and after ESG integration.

PC31. Highlight case studies where ESG integration has led to financial success.

PC32. Define what constitutes sustainable financial development.

PC33. Create a step-by-step process that financial institutions can follow to achieve sustainability.

PC34. Propose tools and methodologies for tracking progress towards sustainable financial development.

PC35. Outline the key steps for industry participants to integrate ESG into their operations.

PC36. Develop a guide for investors on incorporating ESG factors into investment decisions.

PC37. Create a timeline for implementing ESG integration strategies.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Understand the principles of sustainable finance, including ESG integration into financial decision-making.

KU2. Recognize the key sustainable finance instruments, such as green bonds, sustainability-linked loans, and impact investments.

KU3. Explain the role of regulatory frameworks and international standards in promoting sustainable financial practices.

KU4. Identify methods for assessing the financial and non-financial performance of sustainable finance initiatives.

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** Communicate financial strategies effectively with stakeholders, emphasizing ESG goals and outcomes.
- GS2.** Apply critical thinking to evaluate sustainable investment opportunities and mitigate associated risks.
- GS3.** Use analytical skills to interpret ESG data and assess the impact of sustainable finance decisions.
- GS4.** Demonstrate proficiency in preparing detailed financial reports that align with sustainability objectives.

MEP/N1140: Manage GHG accounting and governance

Description

This NOS focuses on monitoring, measuring, and managing greenhouse gas (GHG) emissions while ensuring compliance with regulatory standards and promoting sustainability.

Scope

The scope covers the following :

- Evaluate GHG emissions calculation and management
- Analyse corporate governance
- Manage ethics and human capital
- Manage resources efficiently and sustainably

Elements and Performance Criteria

Evaluate GHG emissions calculation and management

To be competent, the user/individual on the job must be able to:

- PC1.** Identify the overall process for calculating GHG emissions.
- PC2.** Research internationally recognized protocols for GHG emissions calculation.
- PC3.** Outline the steps involved in collecting data for GHG emissions.
- PC4.** Define the formulas and conversion factors used in the calculation process.
- PC5.** Collect historical GHG emissions data from various sources.
- PC6.** Analyze the data to identify trends over time.
- PC7.** Interpret the trends in the context of industry, geography, and regulation changes.
- PC8.** Assess direct and indirect costs associated with GHG emissions for businesses.
- PC9.** Evaluate the reputational impact of GHG emissions.
- PC10.** Analyze the operational impacts and risks linked to GHG emissions.
- PC11.** Identify reduction targets based on current emissions and industry benchmarks.
- PC12.** Propose actionable strategies for emissions reduction.
- PC13.** Create a timeline and framework for implementing the reduction strategies.

Analyze corporate governance

To be competent, the user/individual on the job must be able to:

- PC14.** Investigate the correlation between governance practices and financial performance.
- PC15.** Analyze the effects of governance structures on operational efficiency.
- PC16.** Examine case studies of companies with strong governance and their performance outcomes.
- PC17.** Compile a list of current hot topics and debates in corporate governance.
- PC18.** Summarize the differing viewpoints and arguments within these debates.
- PC19.** Facilitate a discussion or forum to explore these topics further.
- PC20.** Select a range of research papers or articles on corporate governance.

Qualification Pack

- PC21.** Perform a critical analysis of the issues discussed in these papers.
- PC22.** Synthesize findings to identify common themes and unique perspectives.
- PC23.** Collect recent annual reports from a diverse set of companies.
- PC24.** Review the corporate governance sections for insights into practices and performance.
- PC25.** Compare governance disclosures and their relation to overall company transparency and accountability.

Manage ethics and human capital

To be competent, the user/individual on the job must be able to:

- PC26.** Research the key ethical values in business practice.
- PC27.** Discuss the role of these ethical values in guiding professional behavior.
- PC28.** Explore the implications of ethical values on stakeholder trust and business sustainability.
- PC29.** Define the scope and components of human capital management.
- PC30.** Identify the metrics for measuring the impact of human capital on performance.
- PC31.** Analyze case studies where human capital management has directly influenced organizational success.
- PC32.** Review current document templates and communication protocols for gender neutrality.
- PC33.** Develop guidelines for creating gender-inclusive documents and communications.
- PC34.** Train staff on the importance of gender neutrality and cultural diversity respect.

Manage resources efficiently and sustainably

To be competent, the user/individual on the job must be able to:

- PC35.** Audit current processes to identify inefficiencies in material utilization.
- PC36.** Research and propose energy-efficient equipment and technologies.
- PC37.** Develop initiatives aimed at optimizing resource use and reducing waste.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand the principles and methodologies of GHG accounting, including Scope 1, Scope 2, and Scope 3 emissions.
- KU2.** Recognize key international standards for GHG reporting, such as the GHG Protocol and ISO 14064.
- KU3.** Explain the role of governance in ensuring accountability and transparency in GHG management.
- KU4.** Identify tools and technologies used for tracking, measuring, and verifying GHG emissions.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Communicate GHG accounting processes and findings effectively with stakeholders.
- GS2.** Apply analytical skills to interpret GHG data and assess the impact of mitigation strategies.
- GS3.** Use problem-solving skills to develop and implement GHG reduction plans.

Qualification Pack

- GS4.** Demonstrate the ability to prepare detailed GHG reports in compliance with international and organizational standards.

MEP/N1141: Mitigate risk and manage climate related disclosures

Description

This NOS focuses on identifying, assessing, and mitigating climate-related risks while ensuring accurate and transparent disclosure of climate-related information in compliance with regulatory and stakeholder requirements.

Scope

The scope covers the following :

- Manage and identify risk related to climate issues
- Develop strategy to reduce emissions and waste
- Develop strategy to increase efficiently use energy and resource
- Identify areas for innovation

Elements and Performance Criteria

Manage and identify risk related to climate issues

To be competent, the user/individual on the job must be able to:

- PC1.** Identify various types of risks including market, credit, operational, and climate-related.
- PC2.** Construct a risk matrix and categorize risks based on impact and probability.
- PC3.** Develop a balanced portfolio of risk mitigation strategies and financial instruments.
- PC4.** Identify areas of opportunity for innovation in climate risk management.
- PC5.** Allocate resources for R&D in sustainable technologies and practices.
- PC6.** Evaluate potential partnerships with academic institutions or startups for R&D initiatives.
- PC7.** Research and summarize various climate change scenarios provided by authoritative sources.
- PC8.** Analyze the potential impacts of these scenarios on different business sectors.
- PC9.** Discuss adaptation and mitigation strategies for each scenario.
- PC10.** Review the United Nations' guidelines for climate-related financial disclosures.
- PC11.** Summarize the core criteria and recommendations of the guidelines.
- PC12.** Explain how businesses can align their reporting with these criteria.

Develop strategy to reduce emissions and waste

To be competent, the user/individual on the job must be able to:

- PC13.** Define the scope of emissions and types of waste to be measured.
- PC14.** Identify the appropriate methodologies for calculating emissions and quantifying waste.
- PC15.** Apply the calculations to real-world business scenarios to measure outputs.
- PC16.** Research best practices in emissions reduction across various industries.
- PC17.** Document strategies focusing on the 3Rs (reduce, reuse, recycle).
- PC18.** Analyze the effectiveness of these strategies in actual company cases.
- PC19.** Outline a comprehensive climate strategy that aligns with global standards.

Qualification Pack

PC20. Set clear and measurable targets for emissions reductions.

PC21. Establish milestones and a timeline for achieving these targets.

Develop strategy to increase efficiently use energy and resource

To be competent, the user/individual on the job must be able to:

PC22. Audit current energy usage and identify major consumption areas.

PC23. Research and compile a list of energy-efficient technologies and practices.

PC24. Assess the feasibility and potential energy savings of implementing these technologies.

PC25. Develop a set of environmental performance criteria for supplier evaluation.

PC26. Integrate these criteria into the procurement process.

PC27. Create a monitoring system to ensure ongoing compliance and performance by suppliers.

PC28. Establish a framework for assessing water-related risks.

PC29. Perform regular water risk assessments across the business's operations.

PC30. Develop a plan to mitigate identified water risks and monitor its implementation

Identify areas for innovation

To be competent, the user/individual on the job must be able to:

PC31. Identify areas of opportunity for innovation in climate risk management.

PC32. Allocate resources for R&D in sustainable technologies and practices.

PC33. Evaluate potential partnerships with academic institutions or startups for R&D initiatives.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Understand the types of climate-related risks, including physical and transition risks, and their potential impact on business operations.

KU2. Recognize key frameworks for climate-related disclosures, such as the Task Force on Climate-related Financial Disclosures (TCFD) and CDP (Carbon Disclosure Project).

KU3. Explain strategies for risk mitigation, including adaptation and resilience planning.

KU4. Identify the metrics and targets used for monitoring and reporting climate-related risks and opportunities.

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Communicate climate-related risks and mitigation strategies effectively to stakeholders.

GS2. Apply critical thinking to assess climate risks and develop action plans for mitigation.

GS3. Demonstrate analytical skills to interpret climate-related data and prepare disclosure reports.

GS4. Use project management skills to implement climate risk mitigation and disclosure initiatives efficiently.

Qualification Pack

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down the proportion of marks for Theory and Skills Practical for each PC.
2. The assessment for the theory part will be based on the knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for the theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score recommended pass % aggregate for the QP.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
