MEP/Q1502: Business Analytics Executive

Brief Job Description

The Business Analytics Executive qualification equips learners with essential skills in data analysis, statistical techniques, and business analysis tools such as Power BI, enabling them to support data-driven decision-making in organizations. This qualification focuses on practical applications of analytics in various business domains, preparing individuals for entry-level roles in business analytics.

Personal Attributes

Analytical thinking, problem-solving ability, attention to detail, logical reasoning, strong communication skills, adaptability, technical proficiency, data-driven mindset.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [MEP/N1506: Fundamentals of Business Analytics](#)
2. [MEP/N1507: Web & Social Media Analytics](#)
3. [MEP/N1508: Statistical Analytics for Business Analytics](#)
4. [MEP/N1142: Fundamentals of Environment Studies](#)
5. [MEP/N0406: Business Communication - I](#)
6. [DGT/VSQ/N0104: Employability Skills \(120 Hours\)](#)
7. [MEP/N1511: Data Visualization Tools - MS Power BI](#)
8. [MEP/N1524: Analytics in HR](#)
9. [MEP/N1512: Business Research Methods](#)
10. [MEP/N0255: Computer Application](#)
11. [MEP/N0413: Business Communication II](#)

Electives (mandatory to select at least one):

Elective 1: Micro-Economics

The student/ trainee has to select either Elective 1 - Micro-Economics or Elective 2 - Digital Transformation of Business in semester 1

Qualification Pack

1. [MEP/N1509: Micro-Economics](#)

Elective 2: Digital Transformation of Business

The student/ trainee has to select either Elective 1 - Micro-Economics or Elective 2 - Digital Transformation of Business in semester 1

1. [MEP/N1510: Digital Transformation of Business](#)

Elective 3: Macro-Economics

The student/ trainee has to select either Elective 3 - Macro-Economics or Elective 4 - Finance Analytics in semester 2

1. [MEP/N1513: Macro-Economics](#)

Elective 4: Finance Analytics

The student/ trainee has to select either Elective 3 - Macro-Economics or Elective 4 - Finance Analytics in semester 2

1. [MEP/N1514: Finance Analytics](#)

MEP/N1506: Fundamentals of Business Analytics

Description

This NOS discusses about the fundamentals of business analytics.

Scope

The scope covers the following :

- Introduction to Business Analytics
- Databases, Data Warehousing, and Data Mining
- Analytics Methodology
- Visualization of Data
- Time Series Analysis
- Linear Regression Analysis
- Types of Business Analytics
- Business Analytics Future Trends

Elements and Performance Criteria

Introduction to Business Analytics

To be competent, the user/individual on the job must be able to:

- PC1.** Define and explain the concept of business analytics and its importance in decision-making processes.
- PC2.** Differentiate between various types of analytics, including descriptive, predictive, and prescriptive analytics, and their applications in business.
- PC3.** Identify and describe the application fields of business analytics, such as marketing, finance, HR, and operations analytics.
- PC4.** Discuss the organization and sources of data, emphasizing the importance of data quality and strategies for dealing with missing or incomplete data.
- PC5.** Analyze the role of a data scientist in business and society, highlighting key responsibilities and the impact on organizational performance.

Databases, Data Warehousing, and Data Mining

To be competent, the user/individual on the job must be able to:

- PC6.** Differentiate between structured, semi-structured, and unstructured data, and explain their significance in business analytics.
- PC7.** Compare and contrast data warehouses and databases, highlighting their roles in data storage and retrieval.
- PC8.** Explain the differences between relational and non-relational databases and describe RDBMS and columnar data structures in the context of business analytics.
- PC9.** Define data mining and explain its importance in discovering patterns and insights from large datasets.
- PC10.** Apply data mining techniques such as association rules, clustering, decision trees, and random forests to real-world business problems.

Qualification Pack

Analytics Methodology

To be competent, the user/individual on the job must be able to:

- PC11.** Describe the analytics methodology, outlining key steps from preparing objectives to evaluating outcomes.
- PC12.** Identify data requirements and apply appropriate data collection methods to gather relevant data for analysis.
- PC13.** Perform data preparation tasks, including data cleansing, normalization, data blending, and data modeling.
- PC14.** Evaluate the effectiveness of the analytics process by applying feedback mechanisms to refine and improve models.

Visualization of Data

To be competent, the user/individual on the job must be able to:

- PC15.** Summarize data using various visualization methods, including tables, graphs, charts, histograms, and frequency distributions.
- PC16.** Calculate and interpret measures of central tendency and dispersion, using tools such as box plots to represent data distribution.
- PC17.** Apply basic probability concepts, including conditional probability, to analyze and visualize data distributions.
- PC18.** Differentiate between continuous and discrete probability distributions and apply them in sequential decision-making processes.

Time Series Analysis

To be competent, the user/individual on the job must be able to:

- PC19.** Conduct trend analysis and identify seasonality and cyclical behaviors in time series data.
- PC20.** Apply moving average and exponential smoothing methods, including single, double, and HOLT-WINTERS, to forecast future data points.
- PC21.** Utilize ARIMA and multiple linear regression-based forecasting techniques to predict trends and patterns in business data.

Linear Regression Analysis

To be competent, the user/individual on the job must be able to:

- PC22.** Perform simple linear regression analysis, including calculating the coefficient of determination, conducting significance tests, and performing residual analysis.
- PC23.** Interpret the results of simple linear regression, including confidence and prediction intervals.
- PC24.** Conduct multiple linear regression analysis, interpreting the coefficients, dealing with categorical variables, and addressing issues like heteroscedasticity, multi-collinearity, and outliers.
- PC25.** Apply autoregression techniques and variable transformations to improve model accuracy and predictive power.

Types of Business Analytics

To be competent, the user/individual on the job must be able to:

- PC26.** Compare the four different types of data analytics- Descriptive analytics , Diagnostic analytics, Predictive analytics and Prescriptive analytics
- PC27.** Explain different types of diagnostic analytics
- PC28.** Analyze which business analytics types do different companies prefer

Qualification Pack

PC29. Determine which type of business analytics are right for you

PC30. Apply various business analytical tool.

Business Analytics Future Trends

To be competent, the user/individual on the job must be able to:

PC31. Analyze the role of artificial intelligence and machine intelligence in transforming business analytics practices.

PC32. Explore the concepts of competitive intelligence, text mining, and web analytics, including web content mining, web usage mining, and web structure mining.

PC33. Discuss the role of intelligent agents in e-business, e-commerce, m-commerce, and location analytics, focusing on personalization and comparison.

PC34. Apply social networking analysis, big data tools, and content analytics, including sentiment analysis and opinion analysis, to real-world business problems.

PC35. Evaluate ethical and legal considerations in business analytics, emphasizing the importance of compliance and data privacy in analytics practices.

PC36. Utilize Natural Language Processing (NLP) techniques for micro-text analysis on social media platforms.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Understand the key concepts and importance of business analytics in decision-making.

KU2. Recognize various types of data and their relevance in business scenarios.

KU3. Explain fundamental statistical and analytical methods used in business analytics.

KU4. Identify popular business analytics tools and software, including their basic functionalities.

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Communicate effectively with team members to share data insights and recommendations.

GS2. Apply critical thinking to analyze business problems and identify data-driven solutions.

GS3. Use time management skills to prioritize tasks and meet project deadlines in analytics.

GS4. Demonstrate proficiency in using spreadsheets and visualization tools to represent data.

MEP/N1507: Web & Social Media Analytics

Description

This NOS focuses on analyzing web and social media data to measure performance, track user behavior, and optimize digital marketing strategies for business growth.

Scope

The scope covers the following :

- Introduction to Social Media Analytics (SMA)
- Web Metrics and Web Analytics
- Facebook Analytics
- Data Analysis Language and Tools

Elements and Performance Criteria

Introduction to Social Media Analytics (SMA)

To be competent, the user/individual on the job must be able to:

- PC1.** Explain the components of the social media landscape, including websites, web apps, mobile apps, and social media platforms.
- PC2.** Identify the need for social media analytics (SMA) in both small and large organizations, highlighting its importance in business decision-making.
- PC3.** Discuss the application of SMA across different areas, such as marketing, customer service, and brand management.
- PC4.** Define and explain key social media KPIs, including reach and engagement, and their significance in evaluating social media performance.
- PC5.** Implement a structured approach to performing social media analytics, including setting business goals, selecting KPIs, gathering data, conducting analysis, and providing feedback.

Web Metrics and Web Analytics

To be competent, the user/individual on the job must be able to:

- PC6.** Conduct clickstream analysis and A/B testing to evaluate user behavior and optimize web performance.
- PC7.** Utilize online surveys to gather user feedback and insights for web analytics.
- PC8.** Apply Google Analytics to monitor and analyze web traffic and user interactions.
- PC9.** Explain the process of web crawling and indexing and its relevance to search engine optimization (SEO).
- PC10.** Analyze PULSE metrics (Page views, Uptime, Latency, Seven-day active users) to assess business and technical performance issues.
- PC11.** Evaluate HEART metrics (Happiness, Engagement, Adoption, Retention, and Task success) to understand user behavior and improve user experience.
- PC12.** Differentiate between on-site and off-site web analytics and apply the goal-signal-metric process for comprehensive web performance analysis.

Facebook Analytics

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC13.** Introduce the key parameters and demographics used in Facebook Analytics to understand user engagement and behavior.
- PC14.** Analyze Facebook page audience, focusing on reach and engagement metrics to evaluate content performance.
- PC15.** Utilize Facebook Business Manager to manage and analyze social campaigns, including setting goals and evaluating outcomes.
- PC16.** Measure and analyze the effectiveness of social campaigns across different platforms, including LinkedIn, Instagram, YouTube, and Twitter.
- PC17.** Conduct network analysis to identify key influencers and understand the dynamics of social media networks.

Data Analysis Language and Tools

To be competent, the user/individual on the job must be able to:

- PC18.** Identify and use ready-made tools for web and social media analytics, such as key Google Analytics metrics, dashboards, and social reports.
- PC19.** Introduce Python programming for data collection and analysis, focusing on social media data.
- PC20.** Apply data visualization techniques to explore and present social media analytics insights effectively.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand key web analytics metrics, including traffic sources, user engagement, and conversion rates.
- KU2.** Recognize social media analytics tools and techniques for tracking audience insights and campaign performance.
- KU3.** Explain data-driven decision-making in digital marketing, including A/B testing and customer segmentation.
- KU4.** Identify best practices for monitoring, reporting, and improving online presence using analytical tools.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Communicate insights effectively using data visualization and reports.
- GS2.** Analytical skills to interpret web and social media data for strategy optimization.
- GS3.** Use problem-solving techniques to improve user engagement and digital marketing ROI.
- GS4.** Proficiency in web analytics tools such as Google Analytics, Meta Business Suite, and other social media dashboards.

MEP/N1508: Statistical Analytics for Business Analytics

Description

This NOS focuses on applying statistical methods to analyze business data, identify trends, and support data-driven decision-making for improved business performance.

Scope

The scope covers the following :

- Introduction to Statistical Analytics
- Regression and Correlation Analysis
- Probability
- Analysis of Time Series

Elements and Performance Criteria

Introduction to Statistical Analytics

To be competent, the user/individual on the job must be able to:

- PC1.** Explain the evolution of statistics, its importance, and its limitations in business decision-making.
- PC2.** Apply methods for the collection and tabulation of statistical data relevant to business analytics.
- PC3.** Present statistical data effectively using graphs and diagrams to communicate insights clearly.
- PC4.** Calculate and interpret measures of central tendency, including mean, median, and mode, in various business contexts.
- PC5.** Evaluate and compare absolute and relative measures of dispersion, including range, quartile deviation, mean deviation, standard deviation, and coefficient of variation, to assess variability in business data.

Regression and Correlation Analysis

To be competent, the user/individual on the job must be able to:

- PC6.** Explain the meaning and significance of correlation, distinguishing between correlation and causation.
- PC7.** Identify different types of correlation and apply appropriate methods to study simple correlation, including scatter diagrams, Karl Pearson's coefficient of correlation, and Spearman's rank correlation coefficient.
- PC8.** Define regression analysis, explain its significance, and differentiate it from correlation analysis.
- PC9.** Perform regression analysis to establish relationships between variables and predict outcomes in business scenarios.

Probability

To be competent, the user/individual on the job must be able to:

- PC10.** Define the concepts of probability and explain its need and applications in business analytics.

Qualification Pack

- PC11.** Apply theorems of addition and multiplication in solving probability problems.
- PC12.** Use conditional probability and Bayes' theorem to update predictions based on new information.
- PC13.** Explain the characteristics of different probability distributions, including binomial, Poisson, negative binomial, exponential, and normal distributions.
- PC14.** Calculate expectation and variance for discrete and continuous random variables in business contexts.
- PC15.** Apply the central limit theorem to understand the distribution of sample means and its significance in business analytics.

Analysis of Time Series

To be competent, the user/individual on the job must be able to:

- PC16.** Define time series and explain its significance and utility in business forecasting.
- PC17.** Identify and analyze the components of time series, including trends, seasonality, cycles, and irregular variations.
- PC18.** Apply different models of time series, such as additive and multiplicative, to decompose and forecast time series data.
- PC19.** Measure trends in time series data using methods such as least squares, parabolic trends, and logarithmic trends.
- PC20.** Explain the meaning and significance of index numbers, identify the problems in constructing index numbers, and apply weighted and unweighted methods to construct them.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand key statistical concepts such as probability, correlation, regression, and hypothesis testing.
- KU2.** Role of descriptive and inferential statistics in business analytics.
- KU3.** Statistical techniques for data modeling, forecasting, and risk analysis.
- KU4.** Commonly used statistical tools and software, such as Excel, R, Python, and SPSS.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Communicate statistical findings effectively using reports, charts, and dashboards.
- GS2.** Apply analytical skills to interpret data and derive meaningful business insights.
- GS3.** Use problem-solving techniques to address business challenges through statistical analysis.
- GS4.** Demonstrate proficiency in statistical tools to optimize business decision-making.

MEP/N1142: Fundamentals of Environment Studies

Description

This NOS discusses about fundamentals of the environment

Scope

The scope covers the following :

- Introduction to Environmental Studies
- Ecosystem
- Biodiversity and its conservation
- Environmental pollution
- Social issues and the environment
- Environmental ethics
- General issues

Elements and Performance Criteria

Introduction to Environmental Studies

To be competent, the user/individual on the job must be able to:

- PC1.** Define environmental studies and explain its scope, importance, and need.
- PC2.** Discuss the use, exploitation, and changes of natural resources, including renewable and non-renewable resources.
- PC3.** Evaluate the benefits and conflicts associated with forest, water, minerals, food, energy, and land resources.
- PC4.** Describe the role of an individual in the conservation of natural resources and promoting sustainable lifestyles.

Ecosystem

To be competent, the user/individual on the job must be able to:

- PC5.** Define the concept of an ecosystem and describe its structure and functions.
- PC6.** Identify the roles of producers, consumers, and decomposers in the eco
- PC7.** Explain energy flow, ecological succession, food chains, food webs, and ecological pyramids.
- PC8.** Describe various types of ecosystems including forest, grassland, desert, and aquatic.

Biodiversity and its conservation

To be competent, the user/individual on the job must be able to:

- PC9.** Define biodiversity, including genetic, species, and ecosystem diversity, and discuss its value and levels.
- PC10.** Recognize India's position as a mega diversity nation and identify hot spots, threats, endangered, and endemic species.
- PC11.** Discuss in-situ and ex-situ conservation strategies for biodiversity.

Environmental pollution

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC12.** Define types of pollution and describe causes, effects, prevention, and control measures of air, water, soil, marine, noise, thermal, and nuclear hazards.
- PC13.** Discuss solid waste management and disaster management strategies for floods, earthquakes, cyclones, tsunamis, landslides, and e-waste.
- PC14.** Describe the role of an individual in the prevention of pollution.
- PC15.** Analyze pollution case studies to illustrate real-world issues and solutions.

Social issues and the environment

To be competent, the user/individual on the job must be able to:

- PC16.** Discuss the transition from unsustainable practices to sustainable development.
- PC17.** Analyze urban problems related to energy and urban planning, including water conservation, rainwater harvesting, and watershed management.
- PC18.** Examine resettlement and rehabilitation issues and concerns, including relevant case studies.

Environmental ethics

To be competent, the user/individual on the job must be able to:

- PC19.** Discuss environmental ethics, climate change, global warming, acid rain, ozone layer depletion, and their impacts.
- PC20.** Study the Environmental Protection Act and other environmental legislation, addressing enforcement and public awareness issues.
- PC21.** Analyze issues related to wasteland reclamation, consumerism, waste products, and their management.

General issues

To be competent, the user/individual on the job must be able to:

- PC22.** Discuss the impact of human population growth and environmental health, highlighting variations among nations.
- PC23.** Address population explosion, human rights, and the role of education in environmental protection.
- PC24.** Evaluate the role of NGOs, NSS, and information technology in environmental protection and human health.
- PC25.** Review case studies to understand the practical implications of these roles.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand the importance of environmental studies and its role in sustainable development.
- KU2.** Recognize various ecosystems and their components, including the interdependence between living and non-living elements.
- KU3.** Explain the causes and consequences of environmental issues such as pollution, deforestation, and climate change.
- KU4.** Identify key environmental protection laws and policies at national and global levels.

Generic Skills (GS)

Qualification Pack

User/individual on the job needs to know how to:

- GS1.** Communicate environmental concepts effectively through presentations and discussions.
- GS2.** Analyze real-world environmental problems and propose sustainable solutions.
- GS3.** Demonstrate the ability to collect, organize, and interpret environmental data.
- GS4.** Work collaboratively on projects focused on environmental awareness and conservation.

MEP/N0406: Business Communication - I

Description

This unit details business communication, both oral and written.

Scope

The scope covers the following :

- Basic Communication
- Introduction to Business Communication
- Written Communication
- Oral Communication
- Recent Trends in Business Communication

Elements and Performance Criteria

Basic Communication

To be competent, the user/individual on the job must be able to:

- PC1.** Explain the structures in present and present continuous tense
- PC2.** Describe the structures in past and past continuous tense
- PC3.** Explain the structure in present perfect and present perfect continuous tense
- PC4.** Identify structures in future tense
- PC5.** Define and apply modals (helping verbs) appropriately
- PC6.** Use prepositions correctly in sentences
- PC7.** Understand and use common idioms in communication
- PC8.** Practice delivering a speech on a given topic
- PC9.** Demonstrate proficiency in delivering an extempore speech

Introduction to Business Communication

To be competent, the user/individual on the job must be able to:

- PC10.** Define communication and its importance in business
- PC11.** Explain downward, upward, horizontal, and lateral communication
- PC12.** Differentiate between formal and informal communication networks
- PC13.** Describe the process of communication, including encoding, transmission, and decoding
- PC14.** Identify barriers to communication and strategies to overcome them
- PC15.** Recognize gateways to effective communication, such as active listening and feedback mechanisms
- PC16.** Understand the role of communication in organisational success and productivity

Written Communication

To be competent, the user/individual on the job must be able to:

- PC17.** Explain the principles of written communication using the 7C's concept (Clear, Concise, Concrete, Correct, Coherent, Complete, Courteous)

Qualification Pack

- PC18.** Draft various types of business letters, including request letters, newsletters, persuasive letters, and sales letters
- PC19.** Demonstrate proficiency in writing job applications and resumes according to industry standards
- PC20.** Apply appropriate formatting and tone in written communication
- PC21.** Utilize language effectively to convey ideas and information clearly
- PC22.** Demonstrate awareness of cultural differences in written communication

Oral Communication

To be competent, the user/individual on the job must be able to:

- PC23.** Explain the principles of effective oral presentations, including organisation, clarity, and engagement
- PC24.** Identify factors that affect presentation effectiveness, such as audience analysis and delivery techniques
- PC25.** Understand the use of video-conferencing and Skype for remote communication
- PC26.** Identify and interpret non-verbal communication cues, including para language, time, space, silence, and body language
- PC27.** Demonstrate effective listening skills in various communication contexts
- PC28.** Deliver informative and persuasive speeches with confidence and clarity

Recent Trends in Business Communication

To be competent, the user/individual on the job must be able to:

- PC29.** Explain the impact of online communication on personal relationships
- PC30.** Describe best practices for conducting online meetings, including technology use and etiquette
- PC31.** Understand the role of social networks in business communication
- PC32.** Demonstrate proficiency in writing social blogs for business purposes
- PC33.** Explain the challenges and strategies of intercultural communication in a globalized business environment
- PC34.** Identify and address ethical and legal issues related to business communication, such as privacy concerns and intellectual property rights

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Principles and concepts of marketing management and their application in digital and traditional marketing
- KU2.** Digital marketing channels, including SEO, SEM, social media, email, and content marketing
- KU3.** Web design, content management systems (CMS), and web analytics
- KU4.** Creating and managing online presence
- KU5.** Marketing strategies, including mobile marketing and ecommerce
- KU6.** Consumer behavior and purchasing decisions
- KU7.** Ways of advertising to contribute to brand awareness and sales generation
- KU8.** Importance of brand identity

Qualification Pack

- KU9.** Communication strategies, and advertising in shaping consumer perceptions
- KU10.** Generative AI and automation tools
- KU11.** Personalized marketing approaches
- KU12.** Significance of marketing analytics in tracking performance, measuring ROI, and optimizing campaigns
- KU13.** Principles of business communication, both verbal and written, for effective professional interactions
- KU14.** Entrepreneurial mindset, innovation, and how businesses develop and adapt to market trends
- KU15.** Importance of employability skills such as teamwork, adaptability, and professionalism in the workplace
- KU16.** Impact of environmental sustainability and ethical practices in modern business and marketing strategies
- KU17.** Customer relationship management (CRM) systems and their role in managing customer data
- KU18.** Role of data privacy and security in marketing, particularly with the use of AI and data-driven strategies
- KU19.** Significance of aligning marketing efforts with overall business goals to drive growth and profitability
- KU20.** Use of various digital marketing tools and platforms for campaign management and performance tracking
- KU21.** Importance of customer engagement and retention strategies in both online and offline marketing efforts
- KU22.** Fundamentals of data-driven decision-making and how data analysis informs marketing strategies
- KU23.** How marketing campaigns are structured, from planning and budgeting to execution and evaluation
- KU24.** Role of consumer behaviour insights in designing targeted marketing campaigns that meet specific needs and preferences
- KU25.** Ethical considerations in digital marketing, including data usage, transparency, and consumer protection
- KU26.** Concept of integrated marketing communications (IMC) and how different marketing channels work together to achieve business objectives

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Write factual and quantitative information correctly
- GS2.** Read and extract relevant information from documentation including purpose, nature of document, etc.
- GS3.** Communicate effectively with co-workers and clients
- GS4.** Use effective listening and probing/questioning skills
- GS5.** Plan day to day tasks to achieve optimum productivity

Qualification Pack

- GS6.** Apply digital literacy and use digital skills securely
- GS7.** Manage distractions
- GS8.** Be patient and courteous under all circumstances and situations
- GS9.** Apply problem solving skills that require negotiation to resolve problems of a difficult nature
- GS10.** Breakdown relevant work process into its constituent activities for ease of analysis
- GS11.** Estimate time and effort required to complete a task accurately
- GS12.** Seek clarification on problems and its solution from others

To be competent, the user/individual on the job must be able to:

- PC20.** • ensure personal behaviour, conduct, and use appropriate communication by taking gender into consideration
- PC21.** empathize with a PwD and aid a PwD, if asked
- PC22.** escalate any issues related to sexual harassment at the workplace in accordance with the POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC23.** identify and select reliable institutions for various financial products and services such as bank account, debit and credit cards, loans, insurance etc.
- PC24.** carry out offline and online financial transactions, safely and securely, using various methods and check the entries in the passbook
- PC25.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC26.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC27.** operate digital devices and use their features and applications securely and safely
- PC28.** carry out basic internet operations by connecting to the internet safely and securely, using the mobile data or other available networks through Bluetooth, Wi-Fi, etc.
- PC29.** display responsible online behaviour while using various social media platforms
- PC30.** create a personal email account, send and process received messages as per requirement
- PC31.** carry out basic procedures in documents, spreadsheets and presentations using respective and appropriate applications
- PC32.** utilize virtual collaboration tools to work effectively

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC33.** identify different types of Entrepreneurship and Enterprises
- PC34.** use research and networking skills to identify and assess opportunities for potential business
- PC35.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC36.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC37.** identify different types of customers
- PC38.** identify and respond to customer requests and needs in a professional manner
- PC39.** use appropriate tools to collect customer feedback
- PC40.** follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

- PC41.** create a professional Curriculum vitae (Résumé)
- PC42.** search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively
- PC43.** apply to identified job openings using offline /online methods as per requirement
- PC44.** answer questions politely, with clarity and confidence, during recruitment and selection
- PC45.** identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** need for employability skills
- KU2.** different learning and employability related portals
- KU3.** various constitutional and personal values
- KU4.** different environmentally sustainable practices and their importance
- KU5.** Twenty first (21st) century skills and their importance

Qualification Pack

- KU6.** how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up
- KU7.** importance of career development and setting long- and short-term goals
- KU8.** Do's and don'ts of effective communication
- KU9.** POSH Act
- KU10.** inclusivity and its importance
- KU11.** different types of disabilities and appropriate verbal and non-verbal communication and behaviour towards PwD
- KU12.** different types of financial institutes, products, and services
- KU13.** components of salary and how to compute income and expenditure
- KU14.** importance of maintaining safety and security in offline and online financial transactions
- KU15.** different legal rights and laws
- KU16.** different types of digital devices and the procedure to operate them safely and securely
- KU17.** how to create and operate an e- mail account
- KU18.** use applications such as word processors, spreadsheets etc.
- KU19.** different types of Enterprises and ways to identify business opportunities
- KU20.** types and needs of customers
- KU21.** how to apply for a job and prepare for an interview
- KU22.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and write different types of documents/instructions/correspondence in English and other languages
- GS2.** communicate effectively using appropriate language in formal and informal settings
- GS3.** behave politely and appropriately with all to maintain effective work relationship
- GS4.** how to work in a virtual mode, using various technological platforms
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

MEP/N1511: Data Visualization Tools - MS Power BI

Description

This NOS focuses on using Microsoft Power BI for data visualization, analysis, and reporting to support data-driven decision-making in business analytics.

Scope

The scope covers the following :

- Introduction to Power BI
- Reports & Auto Filters
- Visualization
- Advanced Visualization Tools
- Data Management with Hierarchies & Drill Down

Elements and Performance Criteria

Introduction to Power BI

To be competent, the user/individual on the job must be able to:

- PC1.** Explain the need, importance, and advantages of Power BI for data visualization and business intelligence.
- PC2.** Describe the history and evolution of Power BI, including key components like Power View, Power Query, and Power Pivot.
- PC3.** Identify and explain the different data sources supported by Power BI, including data warehouse files and cloud services.
- PC4.** Describe Power BI architecture, including data access options for on-premises and cloud data sources like Microsoft OneDrive.
- PC5.** Demonstrate the installation of Power BI Desktop and the setup of a Power BI Cloud account.
- PC6.** Explain the features and benefits of Power BI Cloud and Power BI Service, including collaboration options for business analysts using MS Cloud Tools.

Reports & Auto Filters

To be competent, the user/individual on the job must be able to:

- PC7.** Design reports using legacy files, .DAT files, and database tables in Power BI.
- PC8.** Utilize the Power BI Report Designer, including report canvas and report pages, for creating, renaming, and organizing multiple visualizations.
- PC9.** Use the “GET DATA” options to import data, apply report fields, and set up filters for effective data analysis.
- PC10.** Experiment with visual interactions, including advantages of using multiple pages and visualizations within a single report.
- PC11.** Publish reports to the Power BI Cloud and verify their functionality using different view options (e.g., full screen, fit page, width scale).
- PC12.** Design reports using databases and queries, including setting up query settings and data preloads for optimized report performance.

Qualification Pack

PC13. Customize report visuals using stacked bar charts, clustered bar charts, and other chart types, including adding report titles and adjusting format options.

Visualization

To be competent, the user/individual on the job must be able to:

PC14. Design Power BI visualizations using the canvas, visualizations pane, and fields pane effectively.

PC15. Import data using various options within Power BI, and explain the advantages of using models, direct query options, and real-time data access.

PC16. Apply visualization filters, page filters, and report filters in Power BI, including setting conditional filters and clearing them as needed.

PC17. Create and customize tables using Power BI Editor, including adjusting general properties, sizing, dimensions, alternate text, and tiles.

PC18. Apply different table styles, including static and dynamic row colors, and use focus mode for detailed analysis.

PC19. Compute totals and adjust background settings for tables and other visualizations, ensuring clarity and readability in reports.

Advanced Visualization Tools

To be competent, the user/individual on the job must be able to:

PC20. Create and customize various chart types, including stacked bar charts, line charts, waterfall charts, and scatter charts, adjusting properties such as axis, legend, value, and tooltips.

PC21. Apply advanced formatting options, including legend settings, axis adjustments, data labels, and plot area customization.

PC22. Utilize analytics features like constant lines, position labels, and modifying legends and visual filters to enhance chart reports.

PC23. Design and work with map reports, creating and utilizing field hierarchies for chart reports, and understanding the advantages of preordered attribute collections.

PC24. Configure advanced query mode and connection settings, including direct import options and in-memory loads, to optimize data retrieval and report performance.

Data Management with Hierarchies & Drill Down

To be competent, the user/individual on the job must be able to:

PC25. Create and manage data hierarchies in Power BI, using drill-down options to navigate through different hierarchy levels and drill modes.

PC26. Utilize drill-thru options with tree maps and pie charts to explore data at various levels of granularity.

PC27. Apply aggregation techniques, including multi-field aggregations, and use bottom-up navigation to analyze data at different hierarchy levels.

PC28. Implement dependent and independent aggregations, using drilldown buttons, mouse hover options, and visual filters to explore detailed data.

PC29. Create and manage report parameters, including setting available values, default values, and linking parameters to query columns.

PC30. Configure connection parameters and use dynamic data sources, including the creation and usage of synonyms for streamlined data management.

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** Understand the fundamentals of data visualization and its importance in business analytics.
- KU2.** Recognize the key features and functionalities of MS Power BI, including dashboards, reports, and data modeling.
- KU3.** Explain techniques for transforming raw data into meaningful visual insights using Power BI.
- KU4.** Identify best practices for designing interactive and user-friendly reports to enhance decision-making.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Communicate insights effectively through visually appealing Power BI dashboards and reports.
- GS2.** Apply analytical skills to interpret data trends and patterns for business strategy.
- GS3.** Use problem-solving techniques to optimize data representation and report accuracy.
- GS4.** Demonstrate proficiency in Power BI tools, including DAX functions, Power Query, and data connectors.

MEP/N1524: Analytics in HR

Description

This NOS focuses on leveraging data-driven techniques and HR analytics tools to optimize workforce planning, talent management, employee engagement, and organizational decision-making.

Scope

The scope covers the following :

- Introduction to HR Analytics
- HR Practices and Benchmarking
- Workforce Planning and Talent Sourcing Analytics
- Talent Acquisition & Development Analytics
- Induction and Culture Fit - Value Congruence
- Talent Engagement Analytics
- Collaboration Analytics - Building Effective Teams
- Talent Analytics - Performance, Potential, and Rewards
- Talent Retention Analytics
- Employee Wellness - Health and Safety
- Data Analysis with Power BI

Elements and Performance Criteria

Introduction to HR Analytics

To be competent, the user/individual on the job must be able to:

- PC1.** Outline key HR functions and their strategic contributions.
- PC2.** Identify key components of HR analytics and data-driven decision-making.
- PC3.** Apply statistical techniques for analyzing HR data.
- PC4.** Implement a structured problem-solving approach in HR analytics.
- PC5.** Map talent life cycle stages with key HR interventions.
- PC6.** Identify issues and propose solutions in HR

HR Practices and Benchmarking

To be competent, the user/individual on the job must be able to:

- PC7.** Track and interpret key HR metrics across the employee journey.
- PC8.** Conduct HR valuations using appropriate assessment methods.
- PC9.** Benchmark HR performance using internal and external data sources.
- PC10.** Develop KPI dashboards using Tableau or Excel.
- PC11.** Align performance goals with business objectives.
- PC12.** Deliver structured performance feedback based on data insights.

Workforce Planning and Talent Sourcing Analytics

To be competent, the user/individual on the job must be able to:

- PC13.** Apply workforce planning models to optimize talent supply and demand.

Qualification Pack

PC14. Perform gap and solution analysis using Markov Chain, Scatter Plot, and Trend Analysis.

PC15. Conduct job analysis and prepare structured job descriptions (JDs).

PC16. Evaluate job roles using standard job evaluation metrics.

PC17. Implement job redesign strategies using data-driven insights.

Talent Acquisition & Development Analytics

To be competent, the user/individual on the job must be able to:

PC18. Assess key selection factors influencing the quality of hire.

PC19. Apply predictive models to estimate employee performance potential.

PC20. Track hiring effectiveness using predictive analytics measures.

PC21. Measure the efficiency of talent acquisition processes.

PC22. Analyze training and development impact using HR analytics.

Induction and Culture Fit - Value Congruence

To be competent, the user/individual on the job must be able to:

PC23. Assess organizational culture and its impact on employees.

PC24. Map the socialization process and onboarding stages.

PC25. Develop a predictive model for optimizing onboarding effectiveness.

PC26. Align employee values with organizational culture for better retention.

Talent Engagement Analytics

To be competent, the user/individual on the job must be able to:

PC27. Measure employee engagement levels using HR analytics.

PC28. Identify major drivers influencing employee engagement.

PC29. Design and conduct employee engagement surveys.

PC30. Analyze variations in engagement levels across different periods.

PC31. Track team-based engagement metrics and recommend interventions.

Collaboration Analytics - Building Effective Teams

To be competent, the user/individual on the job must be able to:

PC32. Assess collaboration patterns in organizational teams.

PC33. Analyze internal networks using Organizational Network Analysis (ONA).

PC34. Identify gaps in collaboration and suggest improvement strategies.

PC35. Implement interventions to enhance team collaboration and communication.

Talent Analytics - Performance, Potential, and Rewards

To be competent, the user/individual on the job must be able to:

PC36. Identify key competencies required for different job roles.

PC37. Assess employee performance vs. potential using structured methods.

PC38. Develop reward systems based on HR analytics insights.

Talent Retention Analytics

To be competent, the user/individual on the job must be able to:

PC39. Track and analyze employee attrition patterns.

PC40. Implement effective talent retention strategies using HR analytics.

PC41. Monitor key retention metrics and generate insights for improvement.

Qualification Pack

Employee Wellness - Health and Safety

To be competent, the user/individual on the job must be able to:

- PC42.** Assess employee wellness programs and their effectiveness.
- PC43.** Implement best practices for workplace wellness initiatives.
- PC44.** Apply predictive analytics to optimize wellness interventions.

Data Analysis with Power BI

To be competent, the user/individual on the job must be able to:

- PC45.** Build interactive dashboards using Power BI for HR analytics.
- PC46.** Model and visualize HR data for actionable insights.
- PC47.** Integrate data from relational and non-relational sources.
- PC48.** Deploy and manage HR reports and dashboards effectively.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Fundamentals of HR analytics and its role in data-driven decision-making.
- KU2.** Recognize key HR metrics, benchmarking techniques, and workforce planning models used for talent management.
- KU3.** Gain knowledge of predictive analytics, data visualization, and HR dashboards using tools like Power BI, Tableau, and Excel.
- KU4.** Understand the application of employee engagement, retention strategies, and performance analytics in HR decision-making.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Apply analytical and problem-solving skills to interpret HR data and trends.
- GS2.** Use critical thinking to evaluate HR processes and suggest improvements based on data insights.
- GS3.** Demonstrate effective communication skills for presenting HR analytics reports and recommendations.
- GS4.** Utilize technical skills in data analytics tools such as Power BI, Excel, and Tableau for HR applications.

MEP/N1512: Business Research Methods

Description

This NOS focuses on applying research methodologies to collect, analyze, and interpret business data for informed decision-making and strategic planning.

Scope

The scope covers the following :

- Introduction to Business Research
- Research Process and Concepts in Research
- Formulation of Research Problem and Hypotheses
- Measurement Scales & Sampling Techniques
- Data Collection
- Data Analysis
- Statistical Techniques for Analysis

Elements and Performance Criteria

Introduction to Business Research

To be competent, the user/individual on the job must be able to:

- PC1.** Define business research, explaining its objectives and the role it plays in organizational decision-making.
- PC2.** Identify and describe the characteristics of research, including the scientific method and criteria for good research.
- PC3.** Differentiate between various types of research, such as exploratory, descriptive, and causal, and discuss their applications in business contexts.
- PC4.** Discuss the importance of ethics in research, outlining ethical considerations and practices that ensure integrity and validity in research.

Research Process and Concepts in Research

To be competent, the user/individual on the job must be able to:

- PC5.** Outline the steps involved in the research process, from problem identification to data analysis and reporting.
- PC6.** Describe and differentiate between various research designs, including experimental, exploratory, and explanatory, and discuss their relevance to business research.
- PC7.** Explain key research concepts such as methodology and methods, and the distinction between theory, concepts, constructs, and variables.
- PC8.** Apply deductive and inductive logic in formulating and testing research hypotheses and theories.

Formulation of Research Problem and Hypotheses

To be competent, the user/individual on the job must be able to:

- PC9.** Identify and formulate research problems by diagnosing symptoms and understanding the underlying issues.

Qualification Pack

- PC10.** Set clear and achievable research objectives based on the identified problems.
- PC11.** Conduct a review of relevant literature, explaining the purpose and methods for gathering and synthesizing existing research.
- PC12.** Define and explain the purpose of hypotheses in research, including their sources and characteristics.
- PC13.** Differentiate between various types of hypotheses and apply appropriate methods for testing them.

Measurement Scales & Sampling Techniques

To be competent, the user/individual on the job must be able to:

- PC14.** Describe different types of measurement scales and their applications in business research.
- PC15.** Apply various scaling techniques, ensuring the characteristics of good instruments, such as reliability and validity, are met.
- PC16.** Identify and correct errors in measurement, ensuring accuracy and consistency in research findings.
- PC17.** Explain the significance of sampling in research and outline the steps involved in the sampling process.
- PC18.** Differentiate between various sampling methods and determine appropriate sample sizes based on research objectives and criteria for a good sample.

Data Collection

To be competent, the user/individual on the job must be able to:

- PC19.** Identify and differentiate between primary and secondary data sources in business research.
- PC20.** Apply appropriate data collection methods, including surveys, observations, interviews, and focus group techniques, depending on the research objectives.
- PC21.** Design and utilize data collection instruments, such as questionnaires, schedules, and electro-mechanical devices, to gather relevant data.

Data Analysis

To be competent, the user/individual on the job must be able to:

- PC22.** Perform data processing tasks, including editing, coding, and tabulating data, and address common problems in data processing.
- PC23.** Present data effectively using pictorial and graphical methods to communicate research findings clearly.
- PC24.** Select appropriate statistical methods based on research objectives and the type of data scale used.
- PC25.** Provide an overview of different types of statistical analysis, including descriptive, validation, and inferential tools, as well as non-parametric and qualitative data analysis techniques.

Statistical Techniques for Analysis

To be competent, the user/individual on the job must be able to:

- PC26.** Explain the differences between parametric and non-parametric statistical testing, and their applications in business research.
- PC27.** Apply statistical testing techniques, including confidence intervals, power of the test, and normal curve analysis, to validate research hypotheses.
- PC28.** Conduct normality tests, homogeneity of variance assessments, and bootstrapping to ensure the robustness of research findings.

Qualification Pack

PC29. Interpret and apply advanced statistical techniques to analyze complex business data and draw meaningful conclusions.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand the fundamental concepts of business research, including qualitative and quantitative research methods.
- KU2.** Recognize various data collection techniques, such as surveys, interviews, and secondary research.
- KU3.** Explain statistical and analytical tools used for interpreting business data and drawing meaningful conclusions.
- KU4.** Identify ethical considerations and best practices in conducting business research.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Communicate research findings effectively through reports, presentations, and data visualization.
- GS2.** Apply analytical skills to assess business problems and derive data-driven insights.
- GS3.** Use problem-solving techniques to design effective research studies and methodologies.
- GS4.** Proficiency in research tools such as Excel, SPSS, and business intelligence software.

PC21. Design and utilize data collection instruments, such as questionnaires, schedules, and electro-mechanical devices, to gather relevant data.	-	-	-	-
<i>Data Analysis</i>	10	3	-	10
PC22. Perform data processing tasks, including editing, coding, and tabulating data, and address common problems in data processing.	-	-	-	-
PC23. Present data effectively using pictorial and graphical methods to communicate research findings clearly.	-	-	-	-
PC24. Select appropriate statistical methods based on research objectives and the type of data scale used.	-	-	-	-
PC25. Provide an overview of different types of statistical analysis, including descriptive, validation, and inferential tools, as well as non-parametric and qualitative data analysis techniques.	-	-	-	-
<i>Statistical Techniques for Analysis</i>	10	2	-	10
PC26. Explain the differences between parametric and non-parametric statistical testing, and their applications in business research.	-	-	-	-
PC27. Apply statistical testing techniques, including confidence intervals, power of the test, and normal curve analysis, to validate research hypotheses.	-	-	-	-
PC28. Conduct normality tests, homogeneity of variance assessments, and bootstrapping to ensure the robustness of research findings.	-	-	-	-
PC29. Interpret and apply advanced statistical techniques to analyze complex business data and draw meaningful conclusions.	-	-	-	-

MEP/N0255: Computer Application

Description

This NOS discusses about the basics of computer and commonly used office management tools

Scope

The scope covers the following :

- Elements of computer system
- Hardware and its uses
- MS Word
- MS Excel
- MS PowerPoint (PPT)
- Internet and email
- System software

Elements and Performance Criteria

Elements of computer system

To be competent, the user/individual on the job must be able to:

- PC1.** Define a computer and discuss its various classifications.
- PC2.** Explain the primary functions of a computer.
- PC3.** Identify the advantages and limitations of using computers.
- PC4.** Describe various applications of computers in different fields.

Hardware and its uses

To be competent, the user/individual on the job must be able to:

- PC5.** Identify and describe the physical components of a computer.
- PC6.** Discuss the different generations of computers and their evolution.
- PC7.** Describe various types of storage (e.g., HDD, SSD, cloud storage).
- PC8.** Explain the functions of common input and output devices.

MS Word

To be competent, the user/individual on the job must be able to:

- PC9.** Navigate the Microsoft Word interface and manage document tasks (open, create, save).
- PC10.** Use editing tools to select, edit, find, and replace text.
- PC11.** Apply formatting techniques including bullets, numbering, tabs, and paragraph formatting.
- PC12.** Insert tables, flow charts, and manage text wrapping.
- PC13.** Conduct a Mail Merge for documents, envelopes, and labels.

MS Excel

To be competent, the user/individual on the job must be able to:

- PC14.** Understand spreadsheet concepts and perform operations with formulas, including relative and absolute cell referencing.

Qualification Pack

PC15. Use common functions like SUM, AVERAGE, MAX, MIN, COUNT, COUNTA, and COUNTBLANK.

PC16. Create and customize charts (line, pie, bar) and manage chart layouts.

PC17. Implement sorting, filtering, and lookup functions (HLookup, VLookup).

MS PowerPoint (PPT)

To be competent, the user/individual on the job must be able to:

PC18. Develop new presentations, insert and format slides, and manage slide transitions and animations.

PC19. Incorporate multimedia elements such as pictures, videos, and sounds.

PC20. Adjust slide design, change slide order, and print handouts from a PowerPoint presentation.

Internet and email

To be competent, the user/individual on the job must be able to:

PC21. Demonstrate how to search for and access web pages.

PC22. Create an email account and manage email communication including sending and receiving emails.

PC23. Explore applications of the internet in online banking and other online services.

System software

To be competent, the user/individual on the job must be able to:

PC24. Discuss the role and functions of operating systems with a focus on Microsoft Windows.

PC25. Describe system software components including translators like interpreters and compilers.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Understand the components of a computer system, including hardware and software, and their functions.

KU2. Recognize the uses and features of various hardware devices such as input, output, and storage devices.

KU3. Explain the basic functions and applications of MS Word, MS Excel, and MS PowerPoint in creating and managing documents, spreadsheets, and presentations.

KU4. Identify the role and features of system software, including operating systems and utility programs.

KU5. Understand the basics of internet usage, email communication, and online safety protocols

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Communicate effectively using emails and internet-based tools for professional interactions.

GS2. Apply critical thinking to troubleshoot basic hardware and software issues.

GS3. Use time management skills to efficiently complete tasks using MS Office applications.

GS4. Demonstrate the ability to create professional documents, data reports, and presentations using MS Word, Excel, and PowerPoint.

MEP/N0413: Business Communication II

Description

This unit details advanced business communication skills.

Scope

The scope covers the following :

- Etiquettes and Manners
- Listening Skills
- Group Discussion (GD)

Elements and Performance Criteria

Etiquettes and Manners

To be competent, the user/individual on the job must be able to:

- PC1.** Demonstrate an understanding of college etiquettes, including classroom conduct, respect for faculty and peers, and appropriate attire
- PC2.** Explain the importance of conversation etiquettes in professional and social settings, including active listening, eye contact, and non-verbal communication cues
- PC3.** Discuss social etiquettes for various occasions, such as formal events, networking functions, and informal gatherings, including table manners and greetings
- PC4.** Outline telephone etiquettes for effective communication, including answering calls professionally, taking messages, and managing phone conversations
- PC5.** Identify cultural differences in etiquettes and manners and demonstrate sensitivity and adaptability in diverse social and professional environments
- PC6.** Role-play scenarios to practice applying etiquettes and manners in different situations, such as introductions, meetings, and social interactions
- PC7.** Analyse case studies and examples of breaches in etiquettes and manners and discuss the potential consequences for relationships and reputations
- PC8.** Develop strategies for handling challenging situations and conflicts with diplomacy, tact, and professionalism
- PC9.** Reflect on personal etiquettes and manners and identify areas for improvement and development through self-assessment and feedback
- PC10.** Collaborate with peers to create a code of conduct outlining expected etiquettes and manners within the academic and professional community

Listening Skills

To be competent, the user/individual on the job must be able to:

- PC11.** Explain the concept of active listening and its importance in effective communication and interpersonal relationships
- PC12.** Demonstrate the do's and don'ts of listening, including maintaining eye contact, avoiding interruptions, and showing empathy and understanding

Qualification Pack

- PC13.** Discuss guidelines for active listening, such as paraphrasing, summarising, and asking clarifying questions to demonstrate engagement and comprehension
- PC14.** Practice active listening techniques through interactive exercises, role-plays, and real-life scenarios
- PC15.** Analyse barriers to effective listening, such as distractions, biases, and preconceptions, and develop strategies for overcoming them
- PC16.** Explore the impact of non-verbal communication cues, such as body language and facial expressions, on the listening process
- PC17.** Reflect on personal listening habits and behaviours and identify strengths and areas for improvement through self-assessment and peer feedback
- PC18.** Engage in reflective listening activities to deepen understanding and empathy in interpersonal interactions
- PC19.** Discuss the role of listening in conflict resolution and negotiation, including active listening strategies for de-escalating tension and finding common ground
- PC20.** Collaborate with peers to create a listening skills toolkit with practical tips and techniques for enhancing listening effectiveness in various contexts

Group Discussion (GD)

To be competent, the user/individual on the job must be able to:

- PC21.** Explain the purpose and objectives of a group discussion (GD) in academic and professional settings
- PC22.** Outline the do's and don'ts of participating in a group discussion, including active participation, respecting others' viewpoints, and avoiding dominating the conversation
- PC23.** Provide examples of useful words and phrases for initiating, elaborating, agreeing, disagreeing, and concluding during a group discussion
- PC24.** Facilitate practice sessions on basic group discussion topics, allowing participants to express their opinions, listen to others, and engage in constructive dialogue
- PC25.** Analyse the structure and dynamics of a group discussion, including the roles of the moderator, participants, and observers
- PC26.** Discuss strategies for effective communication in a group discussion, such as clarity, relevance, and persuasiveness of arguments
- PC27.** Evaluate group discussion performances based on criteria such as content, communication skills, teamwork, and leadership
- PC28.** Provide constructive feedback to participants on their strengths and areas for improvement in group discussion techniques
- PC29.** Foster an inclusive and collaborative environment in group discussions, encouraging participation from all members and valuing diverse perspectives
- PC30.** Reflect on personal experiences and insights gained from participating in group discussions, identifying strategies for enhancing future performance

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Principles and concepts of marketing management and their application in digital and traditional marketing

Qualification Pack

- KU2.** Digital marketing channels, including SEO, SEM, social media, email, and content marketing
- KU3.** Web design, content management systems (CMS), and web analytics
- KU4.** Creating and managing online presence
- KU5.** Marketing strategies, including mobile marketing and ecommerce
- KU6.** Consumer behaviour and purchasing decisions
- KU7.** Ways of advertising to contribute to brand awareness and sales generation
- KU8.** Importance of brand identity
- KU9.** Communication strategies, and advertising in shaping consumer perceptions
- KU10.** Generative AI and automation tools
- KU11.** Personalized marketing approaches
- KU12.** Significance of marketing analytics in tracking performance, measuring ROI, and optimizing campaigns
- KU13.** Principles of business communication, both verbal and written, for effective professional interactions
- KU14.** Entrepreneurial mindset, innovation, and how businesses develop and adapt to market trends
- KU15.** Importance of employability skills such as teamwork, adaptability, and professionalism in the workplace
- KU16.** Impact of environmental sustainability and ethical practices in modern business and marketing strategies
- KU17.** Customer relationship management (CRM) systems and their role in managing customer data
- KU18.** Role of data privacy and security in marketing, particularly with the use of AI and data-driven strategies

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Write factual and quantitative information correctly
- GS2.** Read and extract relevant information from documentation including purpose, nature of document, etc.
- GS3.** Communicate effectively with co-workers and clients
- GS4.** Use effective listening and probing/questioning skills
- GS5.** Apply digital literacy and use digital skills securely
- GS6.** Plan day to day tasks to achieve optimum productivity
- GS7.** Manage distractions
- GS8.** Be patient and courteous under all circumstances and situations
- GS9.** Apply problem solving skills that require negotiation to resolve problems of a difficult nature
- GS10.** Breakdown relevant work process into its constituent activities for ease of analysis
- GS11.** Estimate time and effort required to complete a task accurately
- GS12.** Seek clarification on problems and its solution from others

MEP/N1509: Micro-Economics

Description

This NOS focuses on understanding microeconomic principles and their application in business decision-making, including market structures, consumer behavior, and pricing strategies.

Scope

The scope covers the following :

- Introduction to Demand
- Production and Cost Analysis
- Cost concepts and curves
- Market structure

Elements and Performance Criteria

Introduction to Demand

To be competent, the user/individual on the job must be able to:

- PC1.** Explain consumer behaviour using cardinal utility and indifference curve
- PC2.** Calculate and interpret consumer's surplus in different market scenarios.
- PC3.** Derive and explain the market demand curve based on individual demand functions.
- PC4.** Analyze and calculate different elasticities of demand, including price elasticity, income elasticity, and cross elasticity.
- PC5.** Evaluate the relationship between total revenue, marginal revenue, and price elasticity of demand in various market conditions.

Production and Cost Analysis

To be competent, the user/individual on the job must be able to:

- PC6.** Describe the production function and explain the laws of production, including the law of variable proportions and returns to scale.
- PC7.** Analyze the optimal combination of factors of production and determine the expansion path for a firm.
- PC8.** Evaluate different pricing principles, including full-cost pricing and limit-pricing theory, and discuss barriers to entry for new firms.
- PC9.** Explain and compare managerial theories of the firm, such as Baumol's Theory of Sales Revenue Maximization, Marris's Model of the Managerial Enterprise, and Williamson's Model of Managerial Discretion.
- PC10.** Discuss the behavioral models of the firm, focusing on Cyert and March's approaches to decision-making within an organization.

Cost concepts and curves

To be competent, the user/individual on the job must be able to:

- PC11.** Define and explain key cost concepts and illustrate them using cost curves.
- PC12.** Analyze the traditional theory of costs, distinguishing between short-run and long-run cost behavior.

Qualification Pack

- PC13.** Evaluate the short-run and long-run cost curves, including the concept of the envelope curve and the L-shaped cost curve in the modern theory of costs.
- PC14.** Examine the concept of perfect competition, detailing the assumptions, short-run and long-run equilibrium of firms and industries, and the implications for resource allocation.
- PC15.** Critically assess the relevance of perfect competition in the real world by exploring cases of near-perfect competition.

Market structure

To be competent, the user/individual on the job must be able to:

- PC16.** Analyze the equilibrium of a firm under monopoly in both short-run and long-run scenarios.
- PC17.** Compare and contrast pure competition and monopoly, focusing on their effects on prices, output, and consumer welfare.
- PC18.** Explain the concept of discriminating monopoly and analyze its impact on market outcomes.
- PC19.** Describe monopolistic competition, including the assumptions, product differentiation, and the equilibrium of firms, and compare it with pure competition.
- PC20.** Differentiate between non-collusive and collusive oligopoly models and provide examples of each from the real world.
- PC21.** Evaluate the implications of oligopoly market structures on pricing strategies, market power, and consumer welfare.
- PC22.** Discuss the average cost-pricing principle and its application in different market structures.
- PC23.** Analyze limit-pricing theory and its role as a barrier to entry in oligopolistic markets.
- PC24.** Explore managerial theories of the firm, including the behavioral models of Cyert and March, and their implications for market strategies and organizational decision-making.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand the fundamental concepts of microeconomics, including demand and supply, elasticity, and market equilibrium.
- KU2.** Recognize different market structures such as perfect competition, monopoly, oligopoly, and monopolistic competition.
- KU3.** Explain consumer behavior theories, including utility maximization and the law of diminishing marginal utility.
- KU4.** Identify pricing strategies and production cost analysis for business decision-making.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Communicate economic insights effectively using reports and presentations.
- GS2.** Apply analytical skills to interpret microeconomic data and assess market conditions.
- GS3.** Use problem-solving techniques to optimize pricing, production, and business strategies.
- GS4.** Demonstrate decision-making abilities based on microeconomic analysis and forecasting.

MEP/N1510: Digital Transformation of Business

Description

This NOS focuses on leveraging digital technologies to optimize business processes, enhance customer experiences, and drive innovation for sustainable growth.

Scope

The scope covers the following :

- Digital Strategy
- Managing IT Trends & Emerging Technologies
- Digital Disruption and Strategies for Digital Transformation
- Future of Technology Innovation
- Best Practices for Digital Transformation

Elements and Performance Criteria

Digital Strategy

To be competent, the user/individual on the job must be able to:

- PC1.** Define and explain the key characteristics of digital innovation, highlighting how it differs from traditional and conventional innovation.
- PC2.** Analyze the distinctions between digital innovation and traditional innovation, providing examples to illustrate the differences.
- PC3.** Introduce the principles of technology management and innovation, emphasizing their roles in driving digital transformation within organizations.
- PC4.** Provide a high-level overview of digital transformation, including its definition, significance, and impact on business operations.
- PC5.** Explain the concept of “Homo informaticus” and discuss the changes in technology and business practices over the last decade that have facilitated digital transformation.

Managing IT Trends & Emerging Technologies

To be competent, the user/individual on the job must be able to:

- PC6.** Analyze current and future trends in technology evolution, predicting their potential impacts on various business sectors.
- PC7.** Explain the concepts and benefits of Cloud computing, Big Data, and the Internet of Things (IoT), and demonstrate how businesses can leverage these technologies to enhance operations and decision-making.
- PC8.** Develop strategies for organizations to effectively anticipate, assess, introduce, and integrate emerging technologies to maintain competitive advantage.
- PC9.** Define Big Data and illustrate its applications in everyday business scenarios, emphasizing its role in data-driven decision-making and operational efficiency.
- PC10.** Describe the fundamentals of Cloud computing, including its advantages, potential risks, and practical applications in business environments.
- PC11.** Explain the Internet of Things (IoT), including its components, functionalities, and the transformative impact it has on business processes and customer interactions.

Qualification Pack

Digital Disruption and Strategies for Digital Transformation

To be competent, the user/individual on the job must be able to:

- PC12.** Identify and analyze the underlying patterns and strategies that characterize successful digital disruptors in various industries.
- PC13.** Evaluate how disruptive technologies, such as Artificial Intelligence (AI), are transforming the business landscape and reshaping industry standards.
- PC14.** Formulate and implement strategies to leverage disruptive technologies for achieving business growth, enhancing competitive advantage, and driving innovation.

Future of Technology Innovation

To be competent, the user/individual on the job must be able to:

- PC15.** Forecast and analyze the key technological innovations expected to influence businesses and society over the next five years.
- PC16.** Identify and evaluate potential future inventions that are likely to change the world within the next five to ten years, drawing comparisons to significant technological changes of the past decade.

Best Practices for Digital Transformation

To be competent, the user/individual on the job must be able to:

- PC17.** Explain McKinsey's five keys to successful digital transformation and demonstrate how these best practices can be applied in real-world business scenarios.
- PC18.** Identify common difficulties organizations may encounter when following McKinsey's prescriptions for digital transformation and propose effective solutions to overcome these challenges.
- PC19.** Demonstrate effective leadership practices required for digital transformation, including setting strategic goals, motivating teams, and managing organizational change to optimize success.
- PC20.** Describe the role of equipping and deploying new technologies across a business and develop strategies to ensure their successful integration into existing processes.
- PC21.** Design and implement effective communication channels that support digital transformation initiatives, ensuring clear and consistent information flow within the organization.
- PC22.** Analyze and restructure organizational design to facilitate digital transformation, enhancing flexibility, collaboration, and innovation within the business.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand the key concepts and strategies of digital transformation in business operations.
- KU2.** Recognize the role of emerging technologies such as AI, cloud computing, automation, and IoT in business evolution.
- KU3.** Explain the impact of digital transformation on business models, customer engagement, and market competitiveness.
- KU4.** Identify best practices for implementing digital transformation initiatives, including change management and technology adoption.

Generic Skills (GS)

Qualification Pack

User/individual on the job needs to know how to:

- GS1.** Communicate digital transformation strategies effectively with stakeholders.
- GS2.** Apply analytical skills to assess digital trends and their impact on business processes.
- GS3.** Use problem-solving techniques to address challenges in digital adoption and process optimization.
- GS4.** Demonstrate proficiency in digital tools and platforms that drive business transformation.

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Digital Strategy</i>	20	-	20	-
PC1. Define and explain the key characteristics of digital innovation, highlighting how it differs from traditional and conventional innovation.	-	-	-	-
PC2. Analyze the distinctions between digital innovation and traditional innovation, providing examples to illustrate the differences.	-	-	-	-
PC3. Introduce the principles of technology management and innovation, emphasizing their roles in driving digital transformation within organizations.	-	-	-	-
PC4. Provide a high-level overview of digital transformation, including its definition, significance, and impact on business operations.	-	-	-	-
PC5. Explain the concept of “Homo informaticus” and discuss the changes in technology and business practices over the last decade that have facilitated digital transformation.	-	-	-	-
<i>Managing IT Trends & Emerging Technologies</i>	10	-	20	-
PC6. Analyze current and future trends in technology evolution, predicting their potential impacts on various business sectors.	-	-	-	-
PC7. Explain the concepts and benefits of Cloud computing, Big Data, and the Internet of Things (IoT), and demonstrate how businesses can leverage these technologies to enhance operations and decision-making.	-	-	-	-
PC8. Develop strategies for organizations to effectively anticipate, assess, introduce, and integrate emerging technologies to maintain competitive advantage.	-	-	-	-
PC9. Define Big Data and illustrate its applications in everyday business scenarios, emphasizing its role in data-driven decision-making and operational efficiency.	-	-	-	-

Qualification Pack

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC10. Describe the fundamentals of Cloud computing, including its advantages, potential risks, and practical applications in business environments.	-	-	-	-
PC11. Explain the Internet of Things (IoT), including its components, functionalities, and the transformative impact it has on business processes and customer interactions.	-	-	-	-
<i>Digital Disruption and Strategies for Digital Transformation</i>	20	-	20	-
PC12. Identify and analyze the underlying patterns and strategies that characterize successful digital disruptors in various industries.	-	-	-	-
PC13. Evaluate how disruptive technologies, such as Artificial Intelligence (AI), are transforming the business landscape and reshaping industry standards.	-	-	-	-
PC14. Formulate and implement strategies to leverage disruptive technologies for achieving business growth, enhancing competitive advantage, and driving innovation.	-	-	-	-
<i>Future of Technology Innovation</i>	20	-	20	-
PC15. Forecast and analyze the key technological innovations expected to influence businesses and society over the next five years.	-	-	-	-
PC16. Identify and evaluate potential future inventions that are likely to change the world within the next five to ten years, drawing comparisons to significant technological changes of the past decade.	-	-	-	-
<i>Best Practices for Digital Transformation</i>	10	-	20	-
PC17. Explain McKinsey's five keys to successful digital transformation and demonstrate how these best practices can be applied in real-world business scenarios.	-	-	-	-

MEP/N1513: Macro-Economics

Description

This NOS focuses on understanding macroeconomic principles and their impact on business decision-making, including economic growth, inflation, fiscal policies, and global economic trends.

Scope

The scope covers the following :

- Introduction to Macro Economics
- Fiscal and Monetary Policy
- Balance of Payments
- Macro-Economic Planning

Elements and Performance Criteria

Introduction to Macro Economics

To be competent, the user/individual on the job must be able to:

- PC1.** Explain the nature and characteristics of the macro-economic system, emphasizing its role in shaping national and global economies.
- PC2.** Illustrate the circular flow of income, describing the movement of goods, services, and money between households, firms, and the government.
- PC3.** Define and explain the different concepts of national income, such as GDP, GNP, NNP, and NI, and demonstrate methods of measuring national income.
- PC4.** Analyze the determinants of economic growth and their impact on national income
- PC5.** Describe the quantity theory of money and its relationship with inflation and economic stability.
- PC6.** Explain the concepts of the investment multiplier and accelerator and analyze their effects on income determination.
- PC7.** Apply Keynesian theory to determine income and output levels in an economy.
- PC8.** Analyze the inter-relationship between inflation rate, exchange rate, and interest rate, and discuss their combined effect on the macro-economy.
- PC9.** Explore the relationship between trade growth and economic development.

Fiscal and Monetary Policy

To be competent, the user/individual on the job must be able to:

- PC10.** Define fiscal policy, including its nature, components, and significance in achieving macro-economic objectives.
- PC11.** Explain the operations of fiscal policy aimed at macro-economic growth and stabilization.
- PC12.** Analyze the implications of fiscal deficits on the economy and propose strategies for effective fiscal deficit management.
- PC13.** Explain public debt operations and assess their impact on economic stability and growth.
- PC14.** Describe the operations of central banking and the various aspects of monetary management.

Qualification Pack

- PC15.** Evaluate the growth and stabilization effects of monetary policy on the economy.
- PC16.** Analyze liquidity and interest rate management techniques used by central banks to control inflation and support economic growth.
- PC17.** Discuss the importance of coordinating fiscal and monetary policies for effective macro-economic management.
- PC18.** Analyze how corporations adjust to variations in monetary and fiscal policies

Balance of Payments

To be competent, the user/individual on the job must be able to:

- PC19.** Explain the components and significance of the balance of payments (BOP), focusing on its role in international trade and economic stability.
- PC20.** Describe various exchange rate management techniques used to maintain macro-economic balance.
- PC21.** Analyze approaches to managing trade and BOP deficits, emphasizing the role of macro-economic policies in achieving internal and external balance.
- PC22.** Discuss strategies for managing internal and external economic balance simultaneously, considering the impact on the broader economy.
- PC23.** Evaluate how corporations respond to variations in exchange rates and related policies and propose strategies for mitigating risks associated with exchange rate fluctuations.

Macro-Economic Planning

To be competent, the user/individual on the job must be able to:

- PC24.** Define the approaches to macro-economic planning, including the setting of objectives and the importance of resource mobilization.
- PC25.** Analyze the strategies and objectives of the current five-year plan in India, highlighting the business opportunities it presents.
- PC26.** Conduct an appraisal of the performance of the current five-year plan, identifying key successes and areas for improvement.
- PC27.** Assess the effect of macro-economic planning on corporate decision-making, focusing on how businesses can align their strategies with national economic goals.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand fundamental macroeconomic concepts such as GDP, inflation, unemployment, and economic cycles.
- KU2.** Recognize the role of fiscal and monetary policies in regulating economic stability and growth.
- KU3.** Explain the impact of international trade, exchange rates, and globalization on business operations.
- KU4.** Identify key macroeconomic indicators used for analyzing economic trends and forecasting.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Communicate macroeconomic insights effectively through reports and presentations.

Qualification Pack

- GS2.** Apply analytical skills to interpret economic data and assess its business implications.
- GS3.** Use problem-solving techniques to develop strategies based on macroeconomic trends.
- GS4.** Demonstrate decision-making abilities using macroeconomic forecasting and policy analysis.

MEP/N1514: Finance Analytics

Description

This NOS focuses on applying financial data analysis techniques to evaluate business performance, optimize financial decision-making, and support strategic planning.

Scope

The scope covers the following :

- Introduction to Financial Analytics
- Performance Measures and Holt-Winters Model
- Stationarity and ARIMA Model
- Modern Portfolio Theory
- Introduction to Algorithmic Trading

Elements and Performance Criteria

Introduction to Financial Analytics

To be competent, the user/individual on the job must be able to:

- PC1.** Define financial analytics and explain its significance in business forecasting and decision-making.
- PC2.** Describe the role of subjective forecasting in financial analytics, emphasizing its application in real-world scenarios.
- PC3.** Explain the concepts of business forecasting and time series analysis, highlighting their importance in predicting financial outcomes.
- PC4.** Analyze forecasting performance measurements, focusing on distance metrics and their use in evaluating forecasting accuracy.

Performance Measures and Holt-Winters Model

To be competent, the user/individual on the job must be able to:

- PC5.** Apply various forecasting methods, including the average method, naïve method, and linear regression, to predict financial trends.
- PC6.** Use R programming to implement forecasting techniques, such as moving averages and exponential smoothing, and assess their effectiveness.
- PC7.** Explain the principles of exponential smoothing, including simple and Holt's exponential smoothing methods.
- PC8.** Apply Holt-Winters forecasting model using R programming, demonstrating how it accounts for seasonality in financial data.
- PC9.** Describe the concept of auto-regression and apply it to financial time series data using R programming for improved forecasting accuracy.

Stationarity and ARIMA Model

To be competent, the user/individual on the job must be able to:

- PC10.** Define stationarity and explain its significance in time series analysis for financial forecasting.

Qualification Pack

- PC11.** Apply different techniques to achieve stationarity in financial time series data.
- PC12.** Explain the components of the ARIMA model and its relevance in financial forecasting.
- PC13.** Develop and apply ARIMA models using R programming, interpreting the results to make informed financial predictions.

Modern Portfolio Theory

To be competent, the user/individual on the job must be able to:

- PC14.** Introduce the key concepts of modern portfolio theory, including expected returns and risk of a security.
- PC15.** Analyze the efficient frontier and its implications for portfolio optimization.
- PC16.** Calculate portfolio weights and evaluate the capital allocation line to optimize investment strategies.
- PC17.** Apply diversification principles to minimize risk and enhance portfolio performance.

Introduction to Algorithmic Trading

To be competent, the user/individual on the job must be able to:

- PC18.** Define algorithmic trading and explain its role in modern financial markets.
- PC19.** Describe trend following strategies used in algorithmic trading and their impact on trading performance.
- PC20.** Implement back-testing techniques to evaluate the effectiveness of algorithmic trading strategies.
- PC21.** Summarize the application of data analytics in finance, emphasizing its importance in developing and refining algorithmic trading models.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand key financial metrics, including profitability ratios, cash flow analysis, and risk assessment.
- KU2.** Recognize the role of financial analytics in budgeting, forecasting, and investment decision-making.
- KU3.** Financial modeling techniques and tools used for data-driven financial insights.
- KU4.** Identify best practices for ensuring financial data accuracy, compliance, and reporting standards.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Communicate financial insights effectively using data visualization and reporting tools.
- GS2.** Apply analytical skills to interpret financial data and assess business performance.
- GS3.** Use problem-solving techniques to optimize financial strategies and risk management.
- GS4.** Demonstrate proficiency in financial analytics tools such as Excel, Power BI, and financial modeling software.

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down the proportion of marks for Theory and Skills Practical for each PC.
2. The assessment for the theory part will be based on the knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for the theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score recommended pass % aggregate for the QP.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
