MEP/Q2901: Instructional Designer

Brief Job Description

The Instructional Designer qualification equips individuals with the skills to design, develop, and evaluate effective training programs across various learning formats, including classroom and digital environments. The role involves applying instructional design models, creating learner-centric content, integrating assessment strategies, and ensuring quality through alignment with legal, ethical, and pedagogical standards. It prepares professionals to work collaboratively with stakeholders and subject matter experts to deliver impactful and engaging learning experiences.

Personal Attributes

The individual must have expertise in the technical/vocational domain of instruction. They must have strong communication, organizational and interpersonal skills. They must be quality focused and encourage learner engagement. Additionally, they should remain abreast with the latest trends in their domain and upgrade their facilitation skills.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [MEP/N2910: Apply instructional design principles and models](#)
2. [MEP/N2911: Design training courses and evaluation plans](#)
3. [MEP/N2902: Plan and design specific learning and development interventions and programs](#)
4. [MEP/N2908: Review learning resources as per design document](#)
5. [MEP/N2912: Design and evaluate e-learning courses](#)
6. [MEP/N2909: Comply with Intellectual Property Rights \(IPR\), Rules, Regulations and Ethics](#)
7. [MEP/N2913: Design and evaluate assessment methods](#)
8. [MEP/N9912: Apply principles of professional practice at the workplace](#)
9. [DGT/VSQ/N0103: Employability Skills \(90 Hours\)](#)

Qualification Pack

MEP/N2910: Apply instructional design principles and models

Description

This NOS focuses on applying instructional design principles to create effective, learner centered training experiences. It covers analyzing learners, selecting suitable models, and developing structured, outcome-aligned learning content.

Scope

The scope covers the following :

- Understand the foundations of instructional design and learning principles
- Analyze learning context and audience
- Apply instructional models and frameworks

Elements and Performance Criteria

Understand the foundations of instructional design and learning principles

To be competent, the user/individual on the job must be able to:

- PC1.** Explain the concept, purpose, and value of instructional design in developing effective learning experiences.
- PC2.** Describe essential learning theories (such as behaviorism, cognitivism, and constructivism) and their implications for instructional design.
- PC3.** Distinguish between different learning styles and apply key principles for creating learner-centered environments.
- PC4.** Identify and describe core guiding principles of accelerated learning for increasing learner motivation and retention.

Analyze learning context and audience

To be competent, the user/individual on the job must be able to:

- PC5.** Conduct learner analysis to identify audience characteristics, prior knowledge, and learning needs.
- PC6.** Perform content and task analysis to structure learning logically and sequentially.
- PC7.** Analyze contextual factors such as learning environment, delivery mode, and available resources to guide instructional decisions.
- PC8.** Apply differentiated learning principles suitable for designing training for children and adults, based on their developmental and cognitive needs.

Apply instructional models and frameworks

To be competent, the user/individual on the job must be able to:

- PC9.** Identify and apply instructional design models such as ADDIE, Gagné's Nine Events of Instruction, and Bloom's Taxonomy.
- PC10.** Use Kirkpatrick's Four Levels of Evaluation to design outcome-aligned assessment strategies.
- PC11.** Write clear, measurable learning outcomes using action verbs aligned with Bloom's taxonomy levels.

Qualification Pack

- PC12.** Use the results from various types of analysis to inform instructional structure, sequencing, and assessment planning.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Fundamental concepts, purpose, and significance of instructional design in creating effective learning experiences.
- KU2.** Key learning theories such as behaviorism, cognitivism, and constructivism, and how they influence training design.
- KU3.** Different learning styles and principles for developing learner centered and inclusive learning environments.
- KU4.** Concepts of accelerated learning and strategies to enhance motivation, engagement, and retention.
- KU5.** Techniques for conducting learner, content, and task analysis to plan structured and logical learning sequences.
- KU6.** Contextual factors delivery mode, environment, and resources that impact instructional design decisions.
- KU7.** • Major instructional design models including ADDIE, Gagne's Nine Events, and Blooms Taxonomy and their appropriate
• applications.
- KU8.** Principles of writing clear, measurable learning outcomes and aligning them with assessments using Kirkpatrick's evaluation model.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read, interpret, and extract relevant information from all work related documentation
- GS2.** Know the common words, signs, and set phrases consistently used within the work environment
- GS3.** Communicate clearly and effectively with client staff and team members
- GS4.** Listen carefully to all instructions and ensure they are followed precisely
- GS5.** Always demonstrate courtesy and professionalism to customers and all external contacts
- GS6.** Plan day-to-day tasks strategically to maximize productivity and proactively prepare checklists for quick reference
- GS7.** Be punctual and prioritize work according to agreed schedules
- GS8.** Identify various approaches to problem resolution, weigh their pros and cons, then select and implement the optimal, cost-effective solution, and review the solution at various stages for necessary course correction

MEP/N2911: Design training courses and evaluation plans

Description

This NOS enables professionals to plan and design training programs based on learner needs and organisational goals. It also guides them in developing evaluation strategies to measure training effectiveness.

Scope

The scope covers the following :

- Design the structure and components of a training course
- Conduct need analysis to determine course requirements
- Design training evaluation plans

Elements and Performance Criteria

Design the structure and components of a training course

To be competent, the user/individual on the job must be able to:

- PC1.** Identify the purpose and scope of the training course in alignment with organizational or learner objectives.
- PC2.** Define the key elements of the training course including course objectives, content topics, delivery modes, duration, and instructional strategies.
- PC3.** Organize the course structure into logical modules or units that align with the intended learning outcomes.
- PC4.** Document the course design plan with clearly outlined components and alignment to desired competencies.

Conduct need analysis to determine course requirements

To be competent, the user/individual on the job must be able to:

- PC5.** Select an appropriate need analysis methodology such as surveys, interviews, job/task analysis, or performance data review.
- PC6.** Collect and analyze data to determine training needs, performance gaps, learner profiles, and contextual challenges.
- PC7.** Use findings from the need analysis to tailor the course content, delivery methods, and level of complexity.

Design training evaluation plans

To be competent, the user/individual on the job must be able to:

- PC8.** Identify key training outcomes to be evaluated (e.g., learning, behavior change, performance improvement).
- PC9.** Design a training evaluation strategy using relevant models such as Kirkpatrick's Four Levels or equivalent approaches.
- PC10.** Select appropriate tools and criteria for evaluating training effectiveness, including pre/post assessments, feedback forms, observation checklists, or interviews.
- PC11.** Document the evaluation plan specifying what will be measured, how, when, and by whom.

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Principles of training design, including aligning course objectives with organisational or learner needs.
- KU2.** Components of a training course, such as objectives, content structure, delivery modes, duration, and instructional strategies.
- KU3.** Methods of needs analysis, including surveys, interviews, job/task analysis, and performance data review.
- KU4.** Techniques for analysing learner profiles and identifying performance gaps and contextual challenges.
- KU5.** Frameworks for organising training content into logical modules or units aligned with intended learning outcomes.
- KU6.** Evaluation models, such as Kirkpatrick's Four Levels and other relevant approaches for assessing training effectiveness
- KU7.** Tools and criteria for evaluation, including pre/post assessments, observation checklists, feedback forms, and interviews
- KU8.** Documentation standards, including how to clearly record course design plans and evaluation strategies.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read, interpret, and extract relevant information from all work related documentation
- GS2.** Know the common words, signs, and set phrases consistently used within the work environment
- GS3.** Communicate clearly and effectively with client staff and team members
- GS4.** Listen carefully to all instructions and ensure they are followed precisely
- GS5.** Always demonstrate courtesy and professionalism to customers and all external contacts
- GS6.** Plan day-to-day tasks strategically to maximize productivity and proactively prepare checklists for quick reference
- GS7.** Be punctual and prioritize work according to agreed schedules
- GS8.** Identify various approaches to problem resolution, weigh their pros and cons, then select and implement the optimal, cost-effective solution, and review the solution at various stages for necessary course correction

MEP/N2902: Plan and design specific learning and development interventions and programs

Description

This unit deals in detail with planning and designing learning and development interventions and programs based on identified training and development needs.

Scope

The scope covers the following :

- Identify the learning outcomes required for learning and development programmes
- Prepare a plan for a learning and development intervention to meet learning outcomes
- Review learning program and structure

Elements and Performance Criteria

Identify the learning outcomes required for learning and development programmes

To be competent, the user/individual on the job must be able to:

- PC1.** Identify the objectives of the learning intervention by referring to the training needs analysis and engaging with stakeholders.
- PC2.** Confirm competency standards and training specifications to be addressed in the learning program.
- PC3.** Identify characteristics of the target learner group including age, literacy levels, prior learning, and language preferences.
- PC4.** Draft learning outcomes aligned to the program objectives and obtain stakeholder feedback and approvals.

Prepare a plan for a learning and development intervention to meet learning outcomes

To be competent, the user/individual on the job must be able to:

- PC5.** Identify available resources including budgets, delivery modes, trainers, materials, and timeframes for implementation.
- PC6.** Develop a training structure using instructional principles, segmenting content, sequencing sessions, and aligning to defined learning outcomes.
- PC7.** Prepare a session plan that defines methodologies, duration, assessment strategy, and required materials for each learning segment.
- PC8.** Review and validate the planned intervention with stakeholders and obtain necessary approvals.

Review learning program and structure

To be competent, the user/individual on the job must be able to:

- PC9.** Review the draft program and content with stakeholders using appropriate tools and collect structured feedback.
- PC10.** Revise the learning program based on feedback and obtain final approvals.
- PC11.** Document the final learning program in line with organizational and national qualification frameworks.

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Principles of training needs analysis and methods for identifying learning requirements and competency gaps.
- KU2.** Components of a learning program design, including objectives, outcomes, content structure, delivery modes, and assessment plans.
- KU3.** Key adult learning principles and theories such as andragogy, experiential learning, behavioural and cognitive learning theory.
- KU4.** Learner profile characteristics including literacy levels, prior learning, age, language preferences, and learning styles.
- KU5.** Instructional design principles for sequencing content, developing session plans, and selecting methodologies.
- KU6.** Available learning delivery modes (face-to-face, online, blended, workplace-based) and their suitability for different contexts.
- KU7.** Appropriate use of learning activities and materials such as case studies, simulations, role-plays, worksheets, and workplace resources.
- KU8.** Evaluation models (e.g., Kirkpatrick) and tools used to review and assess learning program effectiveness.
- KU9.** Stakeholder engagement processes and methods for collecting, analysing, and incorporating structured feedback into program design.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read, interpret, and extract relevant information from all work-related documentation
- GS2.** Know the common words, signs, and set phrases consistently used within the work environment
- GS3.** Communicate clearly and effectively with client staff and team members
- GS4.** Listen carefully to all instructions and ensure they are followed precisely
- GS5.** Always demonstrate courtesy and professionalism to customers and all external contacts
- GS6.** Plan day-to-day tasks strategically to maximize productivity and proactively prepare checklists for quick reference
- GS7.** Be punctual and prioritize work according to agreed schedules
- GS8.** Identify various approaches to problem resolution, weigh their pros and cons, then select and implement the optimal, cost-effective solution, and review the solution at various stages for necessary course correction

MEP/N2908: Review learning resources as per design document

Description

This unit deals in detail with the review and finalization learning resources as per the design document.

Scope

The scope covers the following :

- Identify scope of work for review
- Evaluate learning materials and make recommendations
- Ensure incorporation of necessary changes based on recommendations
- Evaluate training material effectiveness by conducting a pilot test

Elements and Performance Criteria

Identify scope of work for review

To be competent, the user/individual on the job must be able to:

- PC1.** Obtain correct version of the learning materials to be reviewed and relevant design document from authorised personnel
- PC2.** Identify key parameters on which the learning materials need to be reviewed as well as timelines and process to be followed

Evaluate learning materials and make recommendations

To be competent, the user/individual on the job must be able to:

- PC3.** Evaluate the structure, content, media, and instructional flow for alignment with the design document, learning outcomes, sequence, delivery methods, and assessment strategy.
- PC4.** Review the relevance, currency, and accuracy of the content using reliable sources, SMEs, or validated materials.
- PC5.** Check language quality, formatting, and compliance with IPR and plagiarism norms using suitable tools.
- PC6.** Record and communicate review recommendations clearly and appropriately to the content developer and stakeholders.

Ensure incorporation of necessary changes based on recommendations

To be competent, the user/individual on the job must be able to:

- PC7.** Discuss recommendations with the content developer, clarify concerns, and incorporate approved changes.
- PC8.** Review the revised content to ensure issues are addressed and finalise materials for testing, adhering to defined timelines.

Evaluate training material effectiveness by conducting a pilot test

To be competent, the user/individual on the job must be able to:

- PC9.** Conduct a pilot test of the updated materials with intended users (learners, trainers, and stakeholders) to evaluate usability and effectiveness.
- PC10.** Collect and analyse feedback, identify areas for improvement, and finalise the learning materials after incorporating validated changes.

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Types of learning materials (e.g., participant guides, facilitator guides, assessments, multimedia content) and their purpose in training delivery.
- KU2.** Structure and components of a design document including learning outcomes, content outline, delivery modes, instructional strategy, and assessment plan.
- KU3.** Parameters for reviewing learning materials such as accuracy, relevance, alignment to outcomes, instructional flow, and learning sequence
- KU4.** Methods to evaluate content quality using reliable sources, SMEs, validated references, and standard verification practices.
- KU5.** Standards for reviewing instructional design elements such as chunking, scaffolding, sequencing, interactivity, and learner engagement.
- KU6.** Principles of media and format evaluation including layout, visual design, accessibility, readability, and user experience.
- KU7.** Language quality benchmarks covering grammar, clarity, learner-friendly tone, technical accuracy, and consistency.
- KU8.** Guidelines on plagiarism, intellectual property rights (IPR), copyright compliance, and use of plagiarism-checking tools.
- KU9.** Processes for documenting review findings, preparing actionable recommendations, and communicating them to developers and stakeholders.
- KU10.** Methods for validating changes, including collaborative review discussions, version control, and approval processes.
- KU11.** Procedures for pilot testing learning materials, including participant selection, data collection tools, and observation
- KU12.** Techniques for analysing pilot test feedback to determine usability, learner comprehension, instructional effectiveness, and areas requiring improvement.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read, interpret, and extract relevant information from all work related documentation
- GS2.** Know the common words, signs, and set phrases consistently used within the work environment
- GS3.** Communicate clearly and effectively with client staff and team members
- GS4.** Listen carefully to all instructions and ensure they are followed precisely
- GS5.** Always demonstrate courtesy and professionalism to customers and all external contacts
- GS6.** Plan day-to-day tasks strategically to maximize productivity and proactively prepare checklists for quick reference
- GS7.** Be punctual and prioritize work according to agreed schedules
- GS8.** Identify various approaches to problem resolution, weigh their pros and cons, then select and implement the optimal, cost-effective solution, and review the solution at various stages for necessary course correction

MEP/N2912: Design and evaluate e-learning courses

Description

This Course covers the skills required to plan, design, develop, and evaluate eLearning courses using instructional design principles and digital tools. It includes creating design documents, developing online content, integrating interactivity, validating content with SMEs, and assessing course effectiveness for continuous improvement.

Scope

The scope covers the following :

- Understand eLearning principles and plan eLearning course design
- Develop eLearning content using standard design processes
- Integrate interactivity and learner engagement features
- Collaborate with Subject Matter Experts (SMEs) and evaluate
- course effectiveness

Elements and Performance Criteria

Understand e-learning principles and plan eLearning course design

To be competent, the user/individual on the job must be able to:

- PC1.** Explain the concept, scope, and benefits of eLearning courses in comparison to traditional and blended training models.
- PC2.** Identify the target audience, learning goals, and technology context to inform the design of the eLearning course.
- PC3.** Create a design document outlining the learning objectives, content structure, delivery method, and evaluation strategy.
- PC4.** Select suitable authoring tools, platforms, and instructional strategies appropriate for online delivery.

Develop e-learning content using standard design processes

To be competent, the user/individual on the job must be able to:

- PC5.** Develop storyboards and scripts aligned with the design document to structure the course flow and learner experience.
- PC6.** Create assessment items and activities aligned with the learning objectives and e-learning format.
- PC7.** Apply quality assurance measures to ensure accuracy, technical integrity, content consistency, and accessibility before implementation.
- PC8.** Implement the e-learning course on the selected platform or LMS as per the approved plan.

Integrate interactivity and learner engagement features

To be competent, the user/individual on the job must be able to:

- PC9.** Incorporate interactive elements such as click-and-reveal, drag-and-drop, quizzes, branching scenarios, and media to promote learner engagement.

Qualification Pack

- PC10.** Ensure interactivity is purposeful, relevant to the learning outcomes, and compatible with the delivery platform.
- PC11.** Test interactive features for functionality, responsiveness, and accessibility across devices and user settings.

Collaborate with Subject Matter Experts (SMEs) and evaluate course effectiveness

To be competent, the user/individual on the job must be able to:

- PC12.** Coordinate with SMEs to validate content accuracy, appropriateness of instructional flow, and technical correctness
- PC13.** Share storyboards, scripts, and draft modules with SMEs and revise based on feedback received.
- PC14.** Evaluate the eLearning course through learner feedback, assessment results, usability testing, and apply improvement suggestions.
- PC15.** Document the course design, evaluation outcomes, and recommended updates for future iterations.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Principles, scope, and benefits of e-learning compared to traditional and blended learning models.
- KU2.** Methods to analyse target learners, learning goals, digital readiness, and technology constraints for online course design.
- KU3.** Components of an eLearning design document including objectives, content structure, delivery methods, and evaluation plans.
- KU4.** Features and applications of eLearning authoring tools, LMS platforms, and multimedia development tools.
- KU5.** Storyboarding, scripting techniques, and instructional flow sequencing for eLearning content development.
- KU6.** Standards for developing online assessments, quizzes, activities, and digital evaluation items aligned to learning objectives.
- KU7.** Quality assurance requirements for eLearning, including technical accuracy, accessibility, content consistency, and SCORM/xAPI compliance.
- KU8.** Types of interactivity (e.g., branching, drag-and-drop, click to-reveal, simulations) and their alignment with learning outcomes.
- KU9.** SME collaboration processes, including content validation, review discussions, iterative feedback cycles, and version control.
- KU10.** Approaches for evaluating e-learning effectiveness using learner feedback, analytics, assessment performance, usability testing, and improvement cycles

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read, interpret, and extract relevant information from all work related documentation

Qualification Pack

- GS2.** Know the common words, signs, and set phrases consistently used within the work environment
- GS3.** Communicate clearly and effectively with client staff and team members
- GS4.** Listen carefully to all instructions and ensure they are followed precisely
- GS5.** Always demonstrate courtesy and professionalism to customers and all external contacts
- GS6.** Plan day-to-day tasks strategically to maximize productivity and proactively prepare checklists for quick reference
- GS7.** Be punctual and prioritize work according to agreed schedules
- GS8.** Identify various approaches to problem resolution, weigh their pros and cons, then select and implement the optimal, cost-effective solution, and review the solution at various stages for necessary course correction

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Understand e-learning principles and plan eLearning course design</i>	10	10	-	-
PC1. Explain the concept, scope, and benefits of eLearning courses in comparison to traditional and blended training models.	-	-	-	-
PC2. Identify the target audience, learning goals, and technology context to inform the design of the eLearning course.	-	-	-	-
PC3. Create a design document outlining the learning objectives, content structure, delivery method, and evaluation strategy.	-	-	-	-
PC4. Select suitable authoring tools, platforms, and instructional strategies appropriate for online delivery.	-	-	-	-
<i>Develop e-learning content using standard design processes</i>	10	20	-	-
PC5. Develop storyboards and scripts aligned with the design document to structure the course flow and learner experience.	-	-	-	-
PC6. Create assessment items and activities aligned with the learning objectives and e-learning format.	-	-	-	-
PC7. Apply quality assurance measures to ensure accuracy, technical integrity, content consistency, and accessibility before implementation.	-	-	-	-
PC8. Implement the e-learning course on the selected platform or LMS as per the approved plan.	-	-	-	-
<i>Integrate interactivity and learner engagement features</i>	10	20	-	-
PC9. Incorporate interactive elements such as click-and-reveal, drag-and-drop, quizzes, branching scenarios, and media to promote learner engagement.	-	-	-	-

Qualification Pack

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC10. Ensure interactivity is purposeful, relevant to the learning outcomes, and compatible with the delivery platform.	-	-	-	-
PC11. Test interactive features for functionality, responsiveness, and accessibility across devices and user settings.	-	-	-	-
<i>Collaborate with Subject Matter Experts (SMEs) and evaluate course effectiveness</i>	10	10	-	-
PC12. Coordinate with SMEs to validate content accuracy, appropriateness of instructional flow, and technical correctness	-	-	-	-
PC13. Share storyboards, scripts, and draft modules with SMEs and revise based on feedback received.	-	-	-	-
PC14. Evaluate the eLearning course through learner feedback, assessment results, usability testing, and apply improvement suggestions.	-	-	-	-
PC15. Document the course design, evaluation outcomes, and recommended updates for future iterations.	-	-	-	-

MEP/N2909: Comply with Intellectual Property Rights (IPR), Rules, Regulations and Ethics

Description

This unit deals in detail with following of Intellectual Property Rights, rules, regulations and ethics while developing and using content.

Scope

The scope covers the following :

- Identify IPR applicability and implications of infringement
- Assess IPR permissions, compliance and infringements

Elements and Performance Criteria

Identify IPR applicability and implications of infringement

To be competent, the user/individual on the job must be able to:

- PC1.** Identify copyright and other Intellectual Property Rights (IPR) protections applicable to different types of materials such as text, graphics, audio, video, designs, logos, and digital products.
- PC2.** Identify legislative requirements governing copyright in own country and other relevant jurisdictions.
- PC3.** Identify materials within the organisation that may attract copyright and IPR protection and determine the respective copyright holders.
- PC4.** Identify sources of guidance on IPR and assess when permissions are required to use third-party content.
- PC5.** Identify and communicate the legal and economic implications of copyright infringement to relevant personnel.
- PC6.** Identify IPR implications related to AI-generated content, open-source materials, and content created on collaborative or digital platforms.

Assess IPR permissions, compliance and infringements

To be competent, the user/individual on the job must be able to:

- PC7.** Identify available permission types for using copyrighted materials and initiate legal processes to obtain permissions where needed.
- PC8.** Review and implement organisational policies and procedures to protect original works and prevent direct or indirect infringement.
- PC9.** Apply exceptions and limitations under copyright law that permit legitimate use without prior permission and inform appropriate personnel.
- PC10.** Test learning and media content for copyright infringements using digital tools and ensure compliance with IPR standards.
- PC11.** Maintain documentation for copyright agreements and implement preventive measures to deter misuse or infringement of protected content.

Qualification Pack

- PC12.** Monitor organizational usage of third-party materials and report any potential infringement issues to authorized personnel.
- PC13.** Evaluate licensing or sale of copyright, considering economic value, documentation, legal requirements, usage tracking, and grievance redressal mechanisms.
- PC14.** Apply updated national and international digital copyright laws, including India's post-2012 amendments and fair-use/fair-dealing exceptions, in organisational content practices.
- PC15.** Ensure ethical use of content in collaborative digital environments by educating creators on attribution, consent, and licensing norms.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Types of Intellectual Property Rights (IPR) including copyright, trademarks, designs, patents, and their applicability to text, graphics, audio-visual, digital, and multimedia content.
- KU2.** National and international copyright laws including India's post-2012 amendments and jurisdiction-specific requirements relevant to content creation and usage.
- KU3.** Procedures to identify copyrighted materials within an organisation, determine ownership, and verify copyright holders or licensors.
- KU4.** Sources of guidance on IPR (legal teams, copyright offices, licensing authorities, terms of use, Creative Commons) and when permissions or licenses are required.
- KU5.** Legal, financial, and reputational implications of copyright infringement for organisations and individuals.
- KU6.** IPR considerations related to AI-generated content, open source licenses, collaborative platforms, and digital content sharing.
- KU7.** Types of copyright permissions (e.g., licenses, assignments, Creative Commons), and procedures for initiating and obtaining legal permissions.
- KU8.** Organisational policies, preventive practices, and documentation processes for protecting original works and avoiding direct or indirect infringement.
- KU9.** Use of digital tools and automated systems to test content for plagiarism, copyright violations, and IPR compliance.
- KU10.** Exceptions, limitations, and fair-use/fair-dealing provisions that permit lawful use without prior permission and how to apply them appropriately.
- KU11.** Processes for monitoring, tracking, and reporting improper usage of third-party materials and escalating potential infringements.
- KU12.** Ethical requirements in digital and collaborative environments, including attribution, consent, transparency, and responsible usage norms.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read, interpret, and extract relevant information from all work-related documentation
- GS2.** Know the common words, signs, and set phrases consistently used within the work environment

Qualification Pack

- GS3.** Communicate clearly and effectively with client staff and team members

MEP/N2913: Design and evaluate assessment methods

Description

This NOS covers the skills and knowledge required to design, implement, and evaluate assessment strategies using assessment principles, diagnostic processes, competency standards, and Kirkpatrick's evaluation model. It includes developing assessment tools, conducting diagnostic assessments, evaluating assessor performance, and improving assessment quality based on evidence and feedback.

Scope

The scope covers the following :

- Design and execute assessment strategy using principles of assessment and Kirkpatrick's evaluation model
- Conduct diagnostic assessment to determine individual training and performance needs
- Design and develop competency-based assessment tools and processes
- Evaluate assessment effectiveness and assessor performance to ensure quality and consistency in assessment processes

Elements and Performance Criteria

Design and execute assessment strategy using principles of assessment and Kirkpatrick's evaluation model

To be competent, the user/individual on the job must be able to:

- PC1.** Apply core principles of assessment such as validity, reliability, fairness, authenticity, and flexibility while designing assessments for various learning contexts.
- PC2.** Identify assessment objectives aligned to intended learning outcomes and overall training goals.
- PC3.** Select suitable assessment methods and tools (e.g., quizzes, observations, case studies, practical tasks) that align with the nature and level of competencies being measured.
- PC4.** Design assessment plans that detail the sequence, mode, tools, timing, and performance indicators for evaluating learner achievement.
- PC5.** Explain and apply Kirkpatrick's Four Levels of Evaluation—Reaction, Learning, Behavior, and Results—to design holistic assessment strategies.
- PC6.** Define indicators and data sources to measure each level of Kirkpatrick's model, considering training context and organizational needs.
- PC7.** Execute the assessment process according to the defined plan, ensuring adherence to assessment principles and ethical practices.
- PC8.** Collect and analyze feedback and results at all four levels to evaluate assessment impact and effectiveness.
- PC9.** Document findings from Kirkpatrick-level evaluation to inform future instructional design, training effectiveness, and assessment improvements.

Conduct diagnostic assessment to determine individual training and performance needs

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC10.** Engage with management and stakeholders to define the purpose, business priorities, and expected individual performance outcomes.
- PC11.** Identify performance indicators and document outcomes in alignment with organizational goals, incorporating stakeholder feedback and approvals.
- PC12.** Evaluate existing resources, constraints, risks, and additional data sources required for conducting diagnostic assessment.
- PC13.** Select suitable diagnostic methodologies, tools, and information sources to evaluate current performance levels.
- PC14.** Develop a detailed project plan including timelines, tools, and templates for conducting the assessment, and revise based on stakeholder feedback.
- PC15.** Communicate the purpose, scope, and methodology of the assessment clearly to the individuals being assessed.
- PC16.** Apply the approved diagnostic process to gather accurate data on skills, knowledge, and attitude gaps.
- PC17.** Analyze the gathered data to identify gaps against the target performance outcomes.
- PC18.** Present preliminary findings to individuals and stakeholders to validate and refine assessment results.
- PC19.** Finalize and prioritize individual training and development needs based on the validated diagnostic findings.

Design and develop competency-based assessment tools and processes

To be competent, the user/individual on the job must be able to:

- PC20.** Apply age- and learner-appropriate principles while designing assessments for different target groups, including children and adults, ensuring alignment with their cognitive, emotional, and developmental needs.
- PC21.** Select and incorporate suitable assessment tools and methods such as portfolios, role plays, observation checklists, and real-world performance tasks to effectively capture competency across learning contexts.
- PC22.** Identify the target candidates, purpose, and context of assessment, considering compliance requirements, candidate needs, and available resources such as budget, location, timelines, and assessors.
- PC23.** Obtain and interpret relevant competencies, occupational standards, and documentation required for designing assessment tools, in consultation with subject matter experts and stakeholders.
- PC24.** Define assessment criteria and determine appropriate methods, evidence types, and volume required to verify competence, aligned with rules of evidence and principles of assessment.
- PC25.** Prepare a comprehensive assessment plan detailing the criteria, sequence, tools, resources, roles and responsibilities, documentation, and reporting arrangements.
- PC26.** Share assessment design with competent authorities (e.g., SMEs, clients, assessors) for review, and incorporate valid recommendations to improve design quality.
- PC27.** Review and interpret the finalised assessment plan to identify or update existing tools and ensure alignment with the specified competencies, criteria, and evidence requirements.
- PC28.** Modify or enhance existing assessment tools based on usability analysis and new design specifications.
- PC29.** Select appropriate assessment methods and develop new tools and specific activities that align with the planned evidence requirements and assessment context.

Qualification Pack

- PC30.** Define clear and inclusive instructions and procedures for assessors and candidates, ensuring appropriate language, accessibility, and clarity for diverse learners.
- PC31.** Address policy and system requirements for assessment tools, including version control, storage, retrieval, and review protocols.
- PC32.** Draft various types of assessment items using sound assessment principles and contextual relevance.
- PC33.** Review and trial the draft assessment tools using defined evaluation criteria to validate their content, usability, and effectiveness.
- PC34.** Gather feedback from relevant stakeholders, analyze trial results, and make final amendments to improve the tools.
- PC35.** Document assessment specifications and format the final tools as per organizational and system policies for proper archiving and future use.

Evaluate assessment effectiveness and assessor performance to ensure quality and consistency in assessment processes

To be competent, the user/individual on the job must be able to:

- PC36.** Establish standard parameters for assessment effectiveness and identify required data sources such as student feedback, assessment results, observations, and audit reports.
- PC37.** Collect and store assessment-related information in compliance with privacy and documentation policies, including any relevant insights beyond the initial evaluation plan.
- PC38.** Analyze collected data to evaluate assessment tools, design, processes, and decisions, and cross-check findings using multiple evaluation sources.
- PC39.** Draw conclusions on assessment effectiveness and document areas of strength and those needing improvement, along with suggested enhancements.
- PC40.** Obtain and share assessor-related occupational standards and performance criteria, clarifying any queries.
- PC41.** Coordinate with administration and assessors to finalize the sample observation schedule and collect assessment timelines.
- PC42.** Conduct observation visits or remote evaluations to review pre-assessments, during-assessment, and post-assessment tasks performed by assessors.
- PC43.** Evaluate assessor performance using defined indicators such as adherence to process, quality of evidence, decision-making, turnaround time, and stakeholder feedback.
- PC44.** Validate field observations with assessors' post-session and identify individual development needs based on observed performance and collected data.
- PC45.** Document assessor performance evaluations and improvement areas in the prescribed formats.
- PC46.** Select assessment samples for review, ensuring coverage of all assessors, centers, borderline results, and problematic cases.
- PC47.** Independently review assessor decisions and evidence against pre-defined performance standards and assessment rules.
- PC48.** Identify inconsistencies or deviations in decisions, consult with assessors where required, and suggest changes where decisions are found to be incorrect.
- PC49.** Document the evaluation results and recommendations, submit reports within the agreed timelines, and communicate improvement suggestions to stakeholders

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** Core principles of assessment validity, reliability, fairness, sufficiency, authenticity, flexibility and their application in designing and evaluating assessments.
- KU2.** Structure and purpose of assessment plans, including assessment objectives, criteria, tools, timing, methods, and evidence requirements.
- KU3.** Kirkpatrick's Four Levels of Evaluation and techniques to define indicators, collect data, and measure training effectiveness at each level.
- KU4.** Different types of assessment methods (quizzes, observation, practical tasks, case studies, portfolios, projects) and criteria for matching them to learning outcomes and competency levels.
- KU5.** Diagnostic assessment principles, including performance indicators, gap analysis, stakeholder engagement, and data gathering tools.
- KU6.** Competency standards, occupational standards, and rules of evidence required to design competency-based assessments.
- KU7.** Tools and methodologies for designing assessment items such as checklists, rating scales, rubrics, observation sheets, oral questions, and scenario-based tasks.
- KU8.** Approaches to developing clear instructions, assessment templates, project plans, and documentation that support assessors and diverse learner groups.
- KU9.** Quality assurance requirements for assessment tools including validation, usability testing, stakeholder review, version control, storage, documentation, and compliance with organisational policies.
- KU10.** Techniques for evaluating assessor performance using defined indicators (process adherence, judgment quality, evidence sufficiency, timeliness, feedback) and methods for conducting field observations.
- KU11.** Methods for reviewing assessment samples, verifying assessor decisions against standards, identifying inconsistencies, and recommending corrective actions.
- KU12.** Approaches for analysing assessment data, triangulating information, compiling findings, and documenting recommendations for improving assessments and training effectiveness.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read, interpret, and extract relevant information from all work related documentation
- GS2.** Know the common words, signs, and set phrases consistently used within the work environment
- GS3.** Communicate clearly and effectively with client staff and team members
- GS4.** Listen carefully to all instructions and ensure they are followed precisely
- GS5.** Always demonstrate courtesy and professionalism to customers and all external contacts
- GS6.** Plan day-to-day tasks strategically to maximize productivity and proactively prepare checklists for quick reference
- GS7.** Be punctual and prioritize work according to agreed schedules

Qualification Pack

- GS8.** Identify various approaches to problem resolution, weigh their pros and cons, then select and implement the optimal, cost-effective solution, and review the solution at various stages for necessary course correction

MEP/N9912: Apply principles of professional practice at the workplace

Description

This unit deals in detail with the application of principles of professional practice like professional image, professional competence, discipline, ethics and work effectiveness.

Scope

The scope covers the following :

- Maintain a professional image and behaviour
- Maintain and enhance professional competence
- Work in a disciplined and ethical manner
- Work effectively with all stakeholders

Elements and Performance Criteria

Maintain a professional image and behaviour

To be competent, the user/individual on the job must be able to:

- PC1.** display appropriate professional appearance for the workplace
- PC2.** interact with team members, clients, vendors, visitors and other stakeholders in a Professional manner

Maintain and enhance professional competence

To be competent, the user/individual on the job must be able to:

- PC3.** develop personal and professional goals and objectives
- PC4.** identify strengths and weaknesses in relation to goals and objectives
- PC5.** evaluate own capacity to meet goals and objectives
- PC6.** determine personal development needs to perform role as per desired standards
- PC7.** develop a professional development plan to enhance professional capabilities
- PC8.** document a professional practice plan designed to support the achievement of goals
- PC9.** select and implement development opportunities to support continuous learning and maintain currency of professional practice
- PC10.** research developments and trends impacting on professional practice and integrate information into work performance
- PC11.** seek feedback on performance from others and incorporate it to improve

Work in a disciplined and ethical manner

To be competent, the user/individual on the job must be able to:

- PC12.** perform tasks to the required workplace standard
- PC13.** protect the rights of the client and organisation when delivering services
- PC14.** recognise potential ethical issues in the workplace and discuss with an appropriate person
- PC15.** recognise unethical conduct and report to an appropriate person
- PC16.** operate within an agreed ethical code of practice

Qualification Pack

PC17. maintain confidentiality as per the organisational guidelines

Work effectively with all stakeholders

To be competent, the user/individual on the job must be able to:

PC18. identify and obtain clarity regarding organisational, team and own goals

PC19. prioritise tasks at work as per organisational, team and own goals

PC20. plan to meet team performance targets and standards

PC21. monitor own and team performance as per agreed plan

PC22. share all relevant information with stakeholders in agreed formats and as per agreed timelines

PC23. work collaboratively with colleagues through sharing information and ideas and working together on agreed outcomes

PC24. recognise, avoid and/or address any conflict of interest

PC25. recognize and respond to inappropriate behaviour towards self or others in a professional manner and as per organisational policy (Inappropriate behaviour: violence, inappropriate language, verbal or physical abuse or bullying, insensitive verbal or physical behaviour in terms of cultural, racial, disability and gender-based insensitivities, dominant or overbearing behaviour, disruptive behaviour, non-compliance with safety instructions, unethical behaviour)

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. organisations HR systems, policies and procedures

KU2. organizational hierarchy and escalation matrix

KU3. organisational health safety and environment

KU4. work area inspection procedures and practices

KU5. importance of displaying professional appearance behaviour at all times

KU6. importance of developing personal and professional goals and objectives

KU7. importance of identifying strengths and weaknesses in relation to goals and objectives

KU8. how to identify strengths and weaknesses and evaluate own capacity to meet goals and objectives

KU9. how to determine personal development needs

- PC18.** communicate and behave appropriately with all genders and PwD
- PC19.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC20.** identify and select reliable institutions for various financial products and services such as bank account, debit and credit cards, loans, insurance etc.
- PC21.** carry out offline and online financial transactions, safely and securely, using various methods and check the entries in the passbook
- PC22.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC23.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC24.** operate digital devices and use their features and applications securely and safely
- PC25.** carry out basic internet operations by connecting to the internet safely and securely, using the mobile data or other available networks through Bluetooth, Wi-Fi, etc.
- PC26.** display responsible online behaviour while using various social media platforms

Qualification Pack

- PC27.** create a personal email account, send and process received messages as per requirement
- PC28.** carry out basic procedures in documents, spreadsheets and presentations using respective and appropriate applications
- PC29.** utilize virtual collaboration tools to work effectively

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC30.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC31.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC32.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC33.** identify different types of customers and ways to communicate with them
- PC34.** identify and respond to customer requests and needs in a professional manner
- PC35.** use appropriate tools to collect customer feedback
- PC36.** follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

- PC37.** create a professional Curriculum vitae (Résumé)
- PC38.** search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively
- PC39.** apply to identified job openings using offline /online methods as per requirement
- PC40.** answer questions politely, with clarity and confidence, during recruitment and selection
- PC41.** identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** need for employability skills and different learning and employability related portals
- KU2.** various constitutional and personal values
- KU3.** different environmentally sustainable practices and their importance
- KU4.** Twenty first (21st) century skills and their importance
- KU5.** how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up
- KU6.** importance of career development and setting long- and short-term goals
- KU7.** about effective communication
- KU8.** POSH Act
- KU9.** Gender sensitivity and inclusivity
- KU10.** different types of financial institutes, products, and services

Qualification Pack

- KU11.** components of salary and how to compute income and expenditure
- KU12.** importance of maintaining safety and security in offline and online financial transactions
- KU13.** different legal rights and laws
- KU14.** different types of digital devices and the procedure to operate them safely and securely
- KU15.** how to create and operate an e- mail account
- KU16.** use applications such as word processors, spreadsheets etc.
- KU17.** how to identify business opportunities
- KU18.** types and needs of customers
- KU19.** how to apply for a job and prepare for an interview
- KU20.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and write different types of documents/instructions/correspondence in English and other languages
- GS2.** communicate effectively using appropriate language in formal and informal settings
- GS3.** behave politely and appropriately with all to maintain effective work relationship
- GS4.** how to work in a virtual mode, using various technological platforms
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
4. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
5. In case of successfully passing only certain number of NOSs, the trainee is eligible to take subsequent assessment on the balance NOS's to pass the Qualification Pack.
6. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

Qualification Pack

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
