MES/Q0522: Industrial Design Technology - Indiaskills Worldskills

Brief Job Description

Industrial design technology is the creation of a product designed for mass consumption. It must succeed in both form (appearance) and function, and promote efficient manufacture. It must be technically feasible to produce, and meet a genuine need in the marketplace, at an acceptable price.

Personal Attributes

The individual in this role must be creative with high degree of professional responsibility and timeliness with deadlines. He/she in this role has to be open-minded, willing to try new things and comfortable taking advice from unexpected sources. Individual must not be colour blind at any stage.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

MES/N0571: Work organization and management- Worldskills

Description

Work organization and management" involves overseeing tasks, processes, and resources within an organization to ensure efficiency and productivity. Responsibilities include planning, organizing, delegating tasks, and monitoring progress to achieve organizational goals effectively

Scope

The scope covers the following :

- Work organization and management offers a broad scope for individuals to streamline processes, optimize resources, and drive productivity within organizations. Responsibilities include planning, organizing, delegating tasks, and monitoring progress to ensure efficiency and goal attainment

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

PC1. Apply safe working methods personally and for others

PC2. Select and keep to efficient and effective work methods and habits

PC3. Estimate time requirements for each phase of the design process, and create timelines

PC4. Select and use appropriate planning and management tools

PC5. Maintain orderly and secure work areas

PC6. Maintain work records as required and helpful

PC7. Minimize distractions that impact on own effectiveness and efficiency

PC8. Respond positively to formal and informal opportunities to learn and update knowledge and expertise

MES/N0572: Market research and ideas formation-Worldskills

Description

Market Research and Ideas Formation in short involves analyzing market data to understand trends and consumer behavior, then using this insight to develop innovative strategies for business success.

Scope

The scope covers the following :

- Market Research and Ideas Formation involves gathering and analyzing data to understand market trends and consumer behavior. It includes generating innovative ideas and strategies based on research findings to address business challenges and seize opportunities. Professionals in this field contribute to informed decision-making and creative problem-solving to drive organizational success.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Receive and mentally process information and requests
- PC2.** Participate in new market research and product planning
- PC3.** Participate in new market research and product planning
- PC4.** Review the relationship of potential new products to the organization's product range and plans
- PC5.** Investigate the potential need and benefit of new products and product lines using suitable research methods
- PC6.** Draw conclusions from the market research
- PC7.** Maintain records of the market research and thinking process

MES/N0573: The design process- Worldskills

Description

The design process involves creating visual solutions to meet specific needs or solve problems through a systematic approach.

Scope

The scope covers the following :

- The scope of the design process includes identifying objectives, conducting research, generating ideas, developing concepts, refining designs, and delivering final solutions across various mediums such as print, digital, and multimedia.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

PC1. Conduct research into trends in design

PC2. Conceive or receive a design idea

PC3. Through market research and consultation, create, realize, and evaluate design concepts for manufacturing

PC4. Evaluate the feasibility of design ideas, relative to • Appearance • Safety • Function, • Serviceability • Budget • Production methods and costs • Market characteristics

PC5. Modify and refine design ideas, based on the above factors

PC6. Complete the design process within the parameters of the business or commission

MES/N0574: Drawing, illustration, and graphic- Worldskills

Description

Drawing, illustration, and graphic design involve the creation of visual content using various artistic techniques and digital tools to convey ideas, messages, or concepts.

Scope

The scope covers the following :

- The scope of drawing, illustration, and graphic design includes creating illustrations for print and digital media, designing logos, layouts, and branding materials, and producing artwork for advertising, marketing, publishing, and entertainment industries. These occupations require creativity, technical skills, and an understanding of visual communication principles to effectively communicate messages and engage audiences.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Explore ways of articulating design ideas visually
- PC2.** Prepare sketches, iteratively, exploring options and results
- PC3.** implement decisions regarding colour, visual materials' properties, and composition
- PC4.** Create • detailed drawings • illustrations • artwork or blueprints
- PC5.** use drafting instruments and tools
- PC6.** use CAD software
- PC7.** Draft, lay out, and specify technical devices, plants and equipment
- PC8.** Update sketches, drawings, and documentation as development proceeds
- PC9.** maintain document control throughout the design process.

Qualification Pack

MES/N0575: Materials science and engineering- Worldskills

Description

Materials science and engineering involves studying the properties, structure, and behavior of materials to develop new materials or improve existing ones for various applications.

Scope

The scope covers the following :

- The scope of materials science and engineering includes researching, designing, testing, and manufacturing materials such as metals, polymers, ceramics, and composites for industries such as aerospace, automotive, electronics, healthcare, and construction. This field encompasses a wide range of disciplines, including metallurgy, polymer science, biomaterials, and nanotechnology, and plays a crucial role in advancing technology and addressing global challenges such as sustainability and renewable energy.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Consult with engineers and/or other knowledge sources to plan tests and prototypes
- PC2.** Select and specify machines and tools for prototyping
- PC3.** Identify and apply relevant procedures and regulations to the testing and prototyping process
- PC4.** Determine the purposes, range and scope of tests and prototypes
- PC5.** Put in place measures to ensure the validity of information and data collected
- PC6.** Conduct tests and prototyping
- PC7.** Collect planned information and data for analysis
- PC8.** Review the implications of the analysis for • The manufacturing process, and outcomes, and • the selection and use of materials.

MES/N0576: The development process- WorldSkills

Description

The development process involves the systematic creation, refinement, and implementation of products, services, or systems to meet specific goals or objectives.

Scope

The scope covers the following :

- The scope of the development process encompasses various stages, including conceptualization, design, prototyping, testing, production, and deployment. It applies to a wide range of fields, such as product development, software development, project management, and business process improvement. The process involves interdisciplinary collaboration, critical thinking, problem-solving, and iterative refinement to ensure the successful delivery of high-quality and innovative solutions.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Research production specifications, costs, production materials, and manufacturing methods
- PC2.** Provide cost estimates and itemized production requirements
- PC3.** Build models, patterns, or templates
- PC4.** Fabricate models or samples in a range of materials, using hand and power tools
- PC5.** Monitor processes, materials, and surroundings to detect or assess problems
- PC6.** Collect and process information by compiling, categorizing, calculating, and verifying information and data
- PC7.** Select and use suitable and robust testing equipment, tools, methods, and techniques
- PC8.** Analyse and evaluate information to determine compliance with standards
- PC9.** Determine time, costs, resources, or materials needed for production
- PC10.** Present designs and reports to clients or managers for approval
- PC11.** Raise and discuss the needs for and benefits of modification
- PC12.** Techniques for optimizing manufacture and distribution
- PC13.** Review, adapt, and provide documentation, detailed instructions/specifications, or drawings, for fabrication, construction, assembly, modification, maintenance and use

MES/N0577: Implementation- Worldskills

Description

Implementation refers to the process of putting plans, strategies, or projects into action to achieve specific goals or objectives.

Scope

The scope covers the following :

- The scope of implementation includes translating ideas or concepts into tangible actions, deploying resources, executing plans, and monitoring progress to ensure successful outcomes. It applies to various domains such as project management, business strategy execution, software development, policy implementation, and organizational change management. Implementation involves coordinating activities, managing stakeholders, overcoming challenges, and adapting strategies as needed to effectively execute plans and achieve desired results.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

PC1. Develop industrial standards and regulatory guidelines

PC2. Check the relationship of the product to the organization's business strategy and plan

PC3. Develop promotional strategies or plans for the product

PC4. Develop artistic or design concepts for decoration, exhibition, or commercial purposes

PC5. Design graphic material for use as ornamentation, illustration, advertising, and packaging

PC6. Present evaluation reports, including • Handling and safety • Market appeal • Production efficiency • Distribution. • Use • Maintenance.

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

Assessment System Overview:

Batches assigned to the assessment agencies for conducting the assessment on SDMS/SIP or email

Assessment agencies send the assessment confirmation to VTP/TC looping SSC

Assessment agency deploys the ToA certified Assessor for executing the assessment

SSC monitors the assessment process & records

Testing Environment:

Confirm that the centre is available at the same address as mentioned on SDMS or SIP

Check the duration of the training.

Check the Assessment Start and End time to be as 10 a.m. and 5 p.m.

Qualification Pack

If the batch size is more than 30, then there should be 2 Assessors.

Check that the allotted time to the candidates to complete Theory & Practical Assessment is correct.

Check the mode of assessment—Online (TAB/Computer) or Offline (OMR/PP).

Confirm the number of TABs on the ground are correct to execute the Assessment smoothly.

Check the availability of the Lab Equipment for the particular Job Role.

Assessment Quality Assurance levels / Framework:

Question papers created by the Subject Matter Experts (SME)

Question papers created by the SME verified by the other subject Matter Experts

Questions are mapped with NOS and PC

Question papers are prepared considering that level 1 to 3 is for the unskilled & semi-skilled individuals, and level 4 and above are for the skilled, supervisor & higher management.

Assessor must be ToA certified & trainer must be ToT Certified

Assessment agency must follow the assessment guidelines to conduct the assessment.

Types of evidence or evidence-gathering protocol:

Time-stamped & geotagged reporting of the assessor from assessment location

Centre photographs with signboards and scheme specific branding

Biometric or manual attendance sheet (stamped by TP) of the trainees during the training period

Time-stamped & geotagged assessment (Theory + Viva + Practical) photographs & videos

Method of verification or validation:

Surprise visit to the assessment location

Random audit of the batch

Random audit of any candidate

Method for assessment documentation, archiving, and access

Qualification Pack

Hard copies of the documents are stored

Soft copies of the documents & photographs of the assessment are uploaded / accessed from Cloud Storage

Soft copies of the documents & photographs of the assessment are stored in the Hard Drives

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.
Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.

Qualification Pack

Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
National Occupational Standard	NOS define the measurable performance outcomes required from an individual engaged in a particular task. They list down what an individual performing that task should know and also do.
Qualification	A formal outcome of an assessment and validation process which is obtained when a competent body determines that an individual has achieved learning outcomes to given standards
Qualification File	A Qualification File is a template designed to capture necessary information of a Qualification from the perspective of NSQF compliance. The Qualification File will be normally submitted by the awarding body for the qualification
Sector	A grouping of professional activities on the basis of their main economic function, product, service or technology.
Long Term Training	Long-term skilling means any vocational training program undertaken for a year and above. https://ncvet.gov.in/sites/default/files/NCVET.pdf
National Occupational Standard	NOS define the measurable performance outcomes required from an individual engaged in a particular task. They list down what an individual performing that task should know and also do
Qualification	A formal outcome of an assessment and validation process which is obtained when a competent body determines that an individual has achieved learning outcomes to given standards

Qualification Pack

Qualification File	A Qualification File is a template designed to capture necessary information of a Qualification from the perspective of NSQF compliance. The Qualification File will be normally submitted by the awarding body for the qualification.
