MES/Q2511: Digital 3D Game Art- Indiaskills Worldskills

Brief Job Description

Individuals at this job are responsible for creating computer generated models (characters, machines, props, objects etc.) for animation under close supervision of a senior.

Personal Attributes

This job requires the individual to create various types of models using modelling software and tools such as Maya, 3D Studio Max etc. The individual must also have a good understanding of the human anatomy, skeleton structure, joints, facial muscles, expressions etc. The individual must be well-versed with the principles and techniques of 3D modelling and animation.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [MES/N2546: Work organization and management - Worldskills](#)
2. [MES/N2547: Communication and interpersonal skills- Worldskills](#)
3. [MES/N2548: Concept Art- Worldskills](#)
4. [MES/N2549: 3D Modelling- Worldskills](#)
5. [MES/N2550: UV Unwrapping- Worldskills](#)
6. [MES/N2551: Texturing- Worldskills](#)
7. [MES/N2552: Rigging and Animation- Worldskills](#)
8. [MES/N2553: Technical Art and Game Engine- Worldskills](#)

Qualification Pack

MES/N2546: Work organization and management - Worldskills

Description

Work organization and management involves structuring tasks, resources, and processes to optimize efficiency, productivity, and performance within an organization.

Scope

The scope covers the following :

- The scope of work organization and management encompasses designing workflows, allocating responsibilities, coordinating activities, and overseeing operations to meet organizational objectives. It includes elements such as strategic planning, resource allocation, task delegation, workflow optimization, performance monitoring, and continuous improvement. Work organization and management apply across various industries and sectors, including business, manufacturing, healthcare, education, and government, aiming to enhance organizational effectiveness, employee engagement, and customer satisfaction.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Conform to professional standards at all times
- PC2.** Take responsibility for all production processes
- PC3.** Set-up and maintain file structures and naming conventions
- PC4.** Manage workload under pressure and within time constraints
- PC5.** Recover from setbacks
- PC6.** Communicate and work with others for the common benefit

Qualification Pack

MES/N2547: Communication and interpersonal skills- Worldskills

Description

Communication and interpersonal skills refer to the ability to convey information effectively and interact positively with others in various personal and professional contexts.

Scope

The scope covers the following :

- These skills encompass verbal and nonverbal communication, active listening, empathy, conflict resolution, and relationship-building. They are essential in both individual and team settings, facilitating clear exchange of ideas, fostering collaboration, and building trust. Communication and interpersonal skills are relevant across diverse domains, including business, education, healthcare, and social services, contributing to successful interactions, effective leadership, and positive outcomes.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Listen, reflect, and respond positively and constructively to feedback from stakeholders
- PC2.** Adhere to game design briefs and technical guidelines, transforming them into sustainable deliverables (as defined in the asset list), and then present the outcomes to stakeholders
- PC3.** Professionally present creative ideas or concepts
- PC4.** Manage effective verbal, and written communications with stakeholders
- PC5.** Reflect on and respond appropriately to questions and ideas from stakeholders

MES/N2548: Concept Art- Worldskills

Description

Concept art involves creating visual representations of ideas, characters, environments, or objects for various creative projects such as films, video games, animations, or illustrations. It serves as a preliminary stage in the design process, helping to convey the overall look, feel, and style of the final product. Concept artists use various techniques, including sketches, digital painting, and 3D modeling, to bring concepts to life and provide visual direction for the project's development team.

Scope

The scope covers the following :

- The scope of concept art involves creating visual representations of ideas, characters, environments, or objects for creative projects like films, video games, animations, or illustrations. It serves as a preliminary stage in the design process, helping to convey the overall look, feel, and style of the final product, using techniques such as sketches, digital painting, and 3D modeling.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

PC1. Use imagination and inspiration to generate original visuals

PC2. Conform to the defined art style, colours, and themes

PC3. Digitally paint to demonstrate form, line, shading, perspective, proportion, light, and shadow

PC4. Use digital techniques to produce appropriate effects and make efficient use of time

PC5. Choose appropriate software to paint concept art pieces in with maximum production in the swiftest time

PC6. Review and select each piece of concept art to inform the look of finished 3D models

Qualification Pack

MES/N2549: 3D Modelling- Worldskills

Description

3D modeling entails crafting digital representations of objects, characters, environments, or scenes using software. It's widely used across industries like animation, gaming, architecture, and product design to visualize concepts or create final products. Modelers manipulate virtual objects to achieve desired shapes, textures, and animations for realistic and immersive experiences.

Scope

The scope covers the following :

- The scope of 3D modeling involves creating digital representations of objects, characters, environments, or scenes using specialized software. It is used in various industries, including animation, gaming, architecture, product design, and visual effects, to visualize concepts, prototypes, or final products. 3D modelers manipulate virtual objects to achieve desired shapes, textures, and animations, providing a realistic and immersive experience for viewers or users.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Use innovative and optimization techniques on the 3D game models to ensure the scalability and sustainability of the game production
- PC2.** Select appropriate 3D modelling software to begin models, e.g. 3DS Max or Maya for hard surface modelling, or a sculpting tool for organic sculpts
- PC3.** Utilize skills in sculpting, edge modelling, or box modelling to produce the basic form of models
- PC4.** Use tools and modifiers to create further details on models
- PC5.** Constantly review models from all angles to determine refinements, improvements, and additional detail

Qualification Pack

MES/N2550: UV Unwrapping- Worldskills

Description

UV unwrapping is the process of flattening a 3D model's surface into a 2D representation, like unwrapping the surface of a globe into a map. This step is crucial for applying textures or images accurately onto the model in computer graphics, animation, and game development. It involves creating a UV map, which serves as a guide for texture placement, ensuring that textures adhere correctly to the model's surface when rendered.

Scope

The scope covers the following :

- The scope of UV unwrapping involves flattening the surface of a 3D model into a 2D representation, known as a UV map. This process is essential for accurately applying textures or images onto the model in computer graphics, animation, and game development, ensuring that textures adhere correctly to the model's surface when rendered.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Use innovative and optimization techniques on the UVs to increase productivity of the game production
- PC2.** Use UV unwrapping tools to project maps on to all the surfaces of 3D assets
- PC3.** Separate surfaces into appropriate shells to flatten over the UV space
- PC4.** Organize shells to make the most of space
- PC5.** Group shells with similar colours together
- PC6.** Export UV coordinates to texture tools or painting software
- PC7.** Bake UV from 3D assets

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
	2	6	-	2
PC1. Use innovative and optimization techniques on the UVs to increase productivity of the game production	-	1	-	1

MES/N2551: Texturing- Worldskills

Description

exturing is the process of adding surface detail, color, and texture to 3D models to enhance their realism and visual appeal. It involves applying images or procedural techniques to simulate various materials like wood, metal, or fabric. Texturing is essential in industries such as animation, gaming, architecture, and product design to create lifelike and immersive environments.

Scope

The scope covers the following :

- The scope of texturing involves applying surface detail, color, and texture to 3D models to enhance realism and visual appeal. This process is essential in various industries, including animation, gaming, architecture, and product design, to create lifelike and immersive environments. Texturing techniques include painting directly onto models, applying pre-made textures, or using procedural methods to generate textures programmatically.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Use innovative and optimisation techniques on the game textures to ensure the scalability and sustainability of the game production
- PC2.** Select appropriate software to produce textures and materials
- PC3.** Paint a variety of physical materials and adapt to the art style set out in the brief (e.g. hand-painted and/or PBR)
- PC4.** Paint or engineer specular maps for controlling shine and glossiness of surfaces
- PC5.** Paint opacity maps, as required, to handle complex objects or sections of assets
- PC6.** Export a variety of maps (normal, specular, ambient occlusion etc) from appropriate pieces of software and import into the preferred 3D software

Qualification Pack

MES/N2552: Rigging and Animation- Worldskills

Description

Rigging involves creating a digital skeleton for a 3D model, enabling realistic movement, while animation brings the model to life by creating movement sequences. These processes are essential for creating dynamic visual content in industries like film, gaming, and advertising.

Scope

The scope covers the following :

- Rigging involves creating a digital skeleton within a 3D model, enabling it to move realistically. Animation involves bringing these rigged models to life through movement sequences. Together, they form the backbone of creating dynamic visual content in industries such as film, gaming, and advertising.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Create an appropriate bone structure to form a working rig for the in-game asset
- PC2.** Set up a parent child structure for FK or IK chain
- PC3.** Skin the mesh and paint how the bones influence the 3D model
- PC4.** Set simple animation keys to test the motion of the asset in an engine

Qualification Pack

MES/N2553: Technical Art and Game Engine- Worldskills

Description

Technical art involves optimizing performance and implementing visual effects in game development, bridging the gap between art and technology. Game engines are software frameworks used to build and run games, providing tools for rendering graphics, physics, audio, and scripting. They work together to create immersive gaming experiences, balancing artistic vision with technical constraints.

Scope

The scope covers the following :

- Technical art involves bridging the gap between art and technology in game development, focusing on optimizing performance, creating tools, and implementing visual effects. Game engines are software frameworks used to build and run games, providing tools for rendering graphics, physics, audio, and scripting. Together, they form the foundation for creating immersive gaming experiences, balancing artistic vision with technical constraints.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Conduct performance testing and performance tuning of game assets
- PC2.** Choose and use a renderer, pose the object, and select appropriate lighting and settings to highlight the best qualities of the asset
- PC3.** Export 3D models and rig/animation into a game engine
- PC4.** Select an appropriate game engine and stress test the asset for model, UV, and deformation errors

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Assessment System Overview:

- Batches assigned to the assessment agencies for conducting the assessment on SDMS/SIP or email
- Assessment agencies send the assessment confirmation to VTP/TC looping SSC
- Assessment agency deploys the ToA certified Assessor for executing the assessment
- SSC monitors the assessment process & records

2. Testing Environment:

- Confirm that the centre is available at the same address as mentioned on SDMS or SIP
- Check the duration of the training.
- Check the Assessment Start and End time to be as 10 a.m. and 5 p.m.

Qualification Pack

- If the batch size is more than 30, then there should be 2 Assessors.
- Check that the allotted time to the candidates to complete Theory & Practical Assessment is correct.
- Check the mode of assessment—Online (TAB/Computer) or Offline (OMR/PP).
- Confirm the number of TABs on the ground are correct to execute the Assessment smoothly.
- Check the availability of the Lab Equipment for the particular Job Role.

3. Assessment Quality Assurance levels / Framework:

- Question papers created by the Subject Matter Experts (SME)
- Question papers created by the SME verified by the other subject Matter Experts
- Questions are mapped with NOS and PC
- Question papers are prepared considering that level 1 to 3 is for the unskilled & semi-skilled individuals, and level 4 and above are for the skilled, supervisor & higher management.
- Assessor must be ToA certified & trainer must be ToT Certified
- Assessment agency must follow the assessment guidelines to conduct the assessment.

4. Types of evidence or evidence-gathering protocol:

- Time-stamped & geotagged reporting of the assessor from assessment location
- Centre photographs with signboards and scheme specific branding
- Biometric or manual attendance sheet (stamped by TP) of the trainees during the training period
- Time-stamped & geotagged assessment (Theory + Viva + Practical) photographs & videos

5. Method of verification or validation:

- Surprise visit to the assessment location
- Random audit of the batch
- Random audit of any candidate

6. Method for assessment documentation, archiving, and access

Qualification Pack

- Hard copies of the documents are stored
- Soft copies of the documents & photographs of the assessment are uploaded / accessed from Cloud Storage
- Soft copies of the documents & photographs of the assessment are stored in the Hard Drives

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.
Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.

Qualification Pack

Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
National Occupational Standard	NOS define the measurable performance outcomes required from an individual engaged in a particular task. They list down what an individual performing that task should know and also do.
Qualification	Qualification A formal outcome of an assessment and validation process which is obtained when a competent body determines that an individual has achieved learning outcomes to given standards
Qualification File	A Qualification File is a template designed to capture necessary information of a Qualification from the perspective of NSQF compliance. The Qualification File will be normally submitted by the awarding body for the qualification.
Sector	A grouping of professional activities on the basis of their main economic function, product, service or technology.
Long Term Training	Long-term skilling means any vocational training program undertaken for a year and above. https://ncvet.gov.in/sites/default/files/NCVET.pdf
