MES/Q2807: Jr. Digital Film Restoration Artist

Brief Job Description

An individual at this job role is responsible to make clear vision of film by removing dust, image stabilization, de-wrap, de-spot, de-stain the film as well as clean the audio system.

Personal Attributes

Individual at this job role have creative and knowledge of use of computer, manual dust boosting, arranging the film records and manage the records.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [MES/N2849: Analyse applied technology used in digital film restoration](#)
2. [MES/N2850: Carryout manual dust busting and Dust Busting using automation](#)
3. [MES/N2851: Analyse "Undo" Process](#)
4. [MES/N2852: Conduct quality check](#)
5. [MES/N0104: Maintain Workplace Health & Safety](#)
6. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

Qualification Pack (QP) Parameters

Sector	Media & Entertainment
Sub-Sector	Print, Film, Digital
Occupation	Production, Editing, Asset Creation
Country	India
NSQF Level	3
Credits	15
Aligned to NCO/ISCO/ISIC Code	NCO-2015/2654.0400

Qualification Pack

Minimum Educational Qualification & Experience	10th Class OR I.T.I (2 years after class 8th)
Minimum Level of Education for Training in School	
Pre-Requisite License or Training	NA
Minimum Job Entry Age	18 Years
Last Reviewed On	NA
Next Review Date	30/03/2027
NSQC Approval Date	31/03/2022
Version	2.0
Reference code on NQR	2022/ME/MESC/05698
NQR Version	2.0

Remarks:

Nature of qualification is to teach AR/VR developing process, use of application in designing various module (animation, modelling, texturing and gaming) and purpose is to provide job and entrepreneurship/freelance opportunity as AR-VR Developer in M&E Industry. This qualification is for the training purpose for degree courses (university / colleges) as well as for Short Term Course

Qualification Pack

MES/N2849: Analyse applied technology used in digital film restoration

Description

This unit is about use of technology used to restore film and the process followed before digitization, All the processes which are followed before Digitization such as repair, splice joints, Physical cleaning, Ultrasonic cleaning. Analyse and define different types of deterioration

Scope

The scope covers the following :

- Identify and demonstrate the used of technology used to restore film
- Elaborate about the process followed before digitization

Elements and Performance Criteria

Analyse technology for digital film restoration

To be competent, the user/individual on the job must be able to:

- PC1.** Identify the technology used to restore film
- PC2.** Analyse splice Bump defect in a Static shot and in a moving shot
- PC3.** Working Knowledge about rectifying splice
- PC4.** Determine Factors which affect the stabilization of a film like translation rotation and zoom
- PC5.** Analyse Different types of deterioration
- PC6.** Explanation of different terminologies used to define defects – Dust, Scratch, Splice marks, Warp, Stain, Flicker, Gate hair etc

Follow process for before digitization

To be competent, the user/individual on the job must be able to:

- PC7.** Processes followed before Digitization – repair, splice joints, Physical cleaning, Ultrasonic cleaning
- PC8.** Digitization of film and resolution
- PC9.** Concepts of Frames, Shots, Reels, Frame per sec, pixels etc

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** different types of deterioration
- KU2.** working of rectifying splice
- KU3.** Factors which affect the stabilization of a film like translation rotation and zoom
- KU4.** Difference between colour models RGB and HSV
- KU5.** use of clone tool, ROI tools and reference frame concepts
- KU6.** export Restoration report, EDL etc.
- KU7.** visualize a Splice Bump defect in a Static shot and in a moving shot

Qualification Pack

- KU8.** the portions of actual content being removed during the process of Dust busting
- KU9.** relate between file size, bit depth and resolution.
- KU10.** how to use History Brush
- KU11.** different modes that are used to nail down the portions that has to be recovered
- KU12.** safe working practices for own job role
- KU13.** various types of file formatting process
- KU14.** play back software and the navigation Menus
- KU15.** applicable health and safety guidelines.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** restore a project
- GS2.** remove splice mark after fixing warp in an image
- GS3.** to import a project and an annotation
- GS4.** the processes which are followed before Digitization such as repair, splice joints, Physical cleaning, Ultrasonic cleaning
- GS5.** define different types of deterioration
- GS6.** define different terminologies used to define defects such as Dust, Scratch, Splice marks, Warp, Stain, Flicker, Gate hair etc.
- GS7.** define the concepts of Frames, Shots, Reels, Frame per sec, pixels etc
- GS8.** how to deal with:File conversions, File compression and expansion, Transmission of digital files.
- GS9.** foresee technical and creative issues that may arise during production/postproduction and resolve issues proactively.
- GS10.** conflict management and negotiation skills

MES/N2850: Carryout manual dust busting and Dust Busting using automation

Description

This unit is about describing and demonstrating the usage of various tools to carryout dust busting process

Scope

The scope covers the following :

- Carryout dust busting process
- Describe and demonstrate the usage of various tools

Elements and Performance Criteria

Carryout dust busting process

To be competent, the user/individual on the job must be able to:

- PC1.** Remove splice mark after fixing warp in an image.
- PC2.** Apply repair filter to all channels, working with sensitivity.
- PC3.** Using Clone tool to rectify moving defects using reference frame concepts, use ROI tools to restrict movements
- PC4.** Understanding of colour model RGB Vs HSV
- PC5.** Extract grains from input, de-grain & re-grain as required
- PC6.** Restoring a project.
- PC7.** Importing a project, Importing an annotation.

Describe and Demonstrate usage of various tools

To be competent, the user/individual on the job must be able to:

- PC8.** Visualizing a Splice Bump defect in a Static shot and in a moving shot.
- PC9.** Various Correction mode e.g vertical, horizontal D warp, translation D warp
- PC10.** Capability to work with ROI.
- PC11.** Using traditional touch up methods to remove splice mark after fixing warp in an image.
- PC12.** Visualizing a Splice Bump defect in a Static shot and in a moving shot.
- PC13.** Exporting Restoration report, EDL etc.
- PC14.** Extract grains from input, de-grain & re-grain as required.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** different types of deterioration
- KU2.** working of rectifying splice
- KU3.** Factors which affect the stabilization of a film like translation rotation and zoom

Qualification Pack

- KU4.** Difference between colour models RGB and HSV
- KU5.** use of clone tool, ROI tools and reference frame concepts
- KU6.** export Restoration report, EDL etc.

MES/N2851: Analyse "Undo" Process

Description

This unit covers demonstrate ways to nail down the portions that has to be recovered using different modes

Scope

The scope covers the following :

- Describe and demonstrate the 'Undo' Process

Elements and Performance Criteria

Demonstrate the "Undo" Process

To be competent, the user/individual on the job must be able to:

- PC1.** Identify the portions of actual content being removed during the process of Dust busting
- PC2.** Using the difference mode nail down the portions that has to be recovered
- PC3.** Use History Brush and recover the lost content
- PC4.** Bring back original content by performing "undo process" in case the content gets removed in the dust removal process

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** different types of deterioration
- KU2.** working of rectifying splice
- KU3.** Factors which affect the stabilization of a film like translation rotation and zoom
- KU4.** Difference between colour models RGB and HSV
- KU5.** use of clone tool, ROI tools and reference frame concepts
- KU6.** export Restoration report, EDL etc.
- KU7.** visualize a Splice Bump defect in a Static shot and in a moving shot

MES/N2852: Conduct quality check

Description

This unit covers various types of file formatting process and various tools to rectify detects and demonstrate various ways to format files

Scope

The scope covers the following :

- Demonstrate ways to use various tools to rectify detects
- Discuss and demonstrate various ways to format files

Elements and Performance Criteria

Use various tools to rectify defects

To be competent, the user/individual on the job must be able to:

- PC1.** File formats File naming / Renaming / Number padding
- PC2.** Understanding of spatial and temporal concepts
- PC3.** Folder structures and choosing the path for saving the content
- PC4.** Understanding Aspect ratio, bit depth, resolution
- PC5.** Understanding content play back software and the navigation Menus
- PC6.** Importing source content and output for comparison
- PC7.** Use short keys for comparing the source and output

Demonstrate ways to format files

To be competent, the user/individual on the job must be able to:

- PC8.** Working with annotated files for defect correction
- PC9.** Working with Exin Paint tool to rectify defects with less radius
- PC10.** Working with Clone tool to rectify defects with larger radius using reference frame concep
- PC11.** Usage of line scratch tools to rectify vertical and horizontal lines
- PC12.** Working with Exin Paint tool to rectify defects with less radius

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** different types of deterioration
- KU2.** working of rectifying splice
- KU3.** Factors which affect the stabilization of a film like translation rotation and zoom
- KU4.** Difference between colour models RGB and HSV
- KU5.** use of clone tool, ROI tools and reference frame concepts

MES/N0104: Maintain Workplace Health & Safety

Description

This OS unit is about contributing towards maintaining a healthy, safe and secure working environment

Elements and Performance Criteria

Understanding the health, safety and security risks prevalent in the workplace

To be competent, the user/individual on the job must be able to:

- PC1.** understand and comply with the organizations current health, safety and security policies and procedures
- PC2.** understand the safe working practices pertaining to own occupation
- PC3.** understand the government norms and policies relating to health and safety including emergency procedures for illness, accidents, fires or others which may involve evacuation of the premises
- PC4.** participate in organization health and safety knowledge sessions and drills

Knowing the people responsible for health and safety and the resources available

To be competent, the user/individual on the job must be able to:

- PC5.** identify the people responsible for health and safety in the workplace, including those to contact in case of an emergency
- PC6.** identify security signals e.g. fire alarms and places such as staircases, fire warden stations, first aid and medical rooms

Identifying and reporting risks

To be competent, the user/individual on the job must be able to:

- PC7.** identify aspects of your workplace that could cause potential risk to own and others health and safety
- PC8.** ensure own personal health and safety, and that of others in the workplace through precautionary measures
- PC9.** identify and recommend opportunities for improving health, safety, and security to the designated person
- PC10.** report any hazards outside the individuals authority to the relevant person in line with organizational procedures and warn other people who may be affected

Complying with procedures in the event of an emergency

To be competent, the user/individual on the job must be able to:

- PC11.** follow organizations emergency procedures for accidents, fires or any other natural calamity in case of a hazard
- PC12.** identify and correct risks like illness, accidents, fires or any other natural calamity safely and within the limits of individuals authority

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** Organizations norms and policies relating to health and safety
- KU2.** Government norms and policies regarding health and safety and related emergency procedures
- KU3.** Limits of authority while dealing with risks/ hazards
- KU4.** The importance of maintaining high standards of health and safety at a workplace
- KU5.** The different types of health and safety hazards in a workplace
- KU6.** Safe working practices for own job role
- KU7.** Evacuation procedures and other arrangements for handling risks
- KU8.** Names and contact numbers of people responsible for health and safety in a workplace
- KU9.** How to summon medical assistance and the emergency services, where necessary
- KU10.** Vendors or manufacturers instructions for maintaining health and safety while using equipment, systems and/or machines

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** how to write and provide feedback regarding health and safety to the concerned people
- GS2.** how to write and highlight potential risks or report a hazard to the concerned people
- GS3.** read instructions, policies, procedures and norms relating to health and safety
- GS4.** highlight potential risks and report hazards to the designated people
- GS5.** listen and communicate information with all anyone concerned or affected
- GS6.** make decisions on a suitable course of action or plan
- GS7.** plan and organize people and resources to deal with risks/ hazards that lie within the scope of ones individual authority
- GS8.** apply problem solving approaches in different situations
- GS9.** understand hazards that fall within the scope of individual authority and report all hazards that may supersede ones authority
- GS10.** apply balanced judgments in different situations
- GS11.** How to write and provide feedback regarding health and safety to the concerned people
- GS12.** How to write and highlight potential risks or report a hazard to the concerned people
- GS13.** Read instructions, policies, procedures and norms relating to health and safety
- GS14.** Highlight potential risks and report hazards to the designated people
- GS15.** Listen and communicate information with all anyone concerned or affected
- GS16.** Make decisions on a suitable course of action or plan
- GS17.** Plan and organize people and resources to deal with risks/ hazards that lie within the scope of ones individual authority
- GS18.** Apply problem solving approaches in different situations
- GS19.** build and maintain positive and effective relationships with colleges and customers
- GS20.** analyze data and activities
- GS21.** Understand hazards that fall within the scope of individual authority and report all hazards that may supersede ones authority

Qualification Pack

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/training center based on this criterion.
6. To pass the Qualification Pack, every trainee should score a minimum of 70% of aggregate marks to successfully clear the assessment.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
