MSME/LSS/Q1201: Jr. Technician- Footwear Design & Production

Brief Job Description

To create multi skilled workers/ operators for pattern cutting and various shoe manufacturing operations and to develop supervisory capacity for quality and timely production of different types of Footwear

Personal Attributes

To create multi skilled workers/ operators for pattern cutting and various shoe manufacturing operations and to develop supervisory capacity for quality and timely production of different types of Footwear

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [MSME/LSS/N1206: Quality Control](#)
2. [MSME/LSS/N1205: Basic Lasting & Making Technology](#)
3. [MSME/LSS/N1204: Basic Closing Technology To supervise the production process in closing department and knowledge about different constructions and latest machines.](#)
4. [MSME/LSS/N1203: Basic Closing Technology To supervise the production process in closing department and knowledge about different constructions and latest machines.](#)
5. [MSME/LSS/N1202: Basic Clicking Technology](#)
6. [MSME/LSS/N1201: Basic Designing and Pattern Cutting](#)
7. [MSME/LSS/N1207: Employability skills](#)

MSME/LSS/N1206: Quality Control

Description

After completion of course Student should be able to Describe the concept of quality in footwear technology

Scope

The scope covers the following :

- After completion of course Student should be able to
- Describe the concept of quality in footwear technology

Elements and Performance Criteria

Quality Control To understand the concept of Quality control and various check points in different section of footwear production.

To be competent, the user/individual on the job must be able to:

- | | |
|-------------|---|
| PC1. | Meaning of Quality , Different Point of Views of Quality |
| PC2. | Total Quality Control of Footwear , Specification, |
| PC3. | <ul style="list-style-type: none">• Quality Control in clicking Section, Various Check Points Checking of Dies with the pattern supplies• Clicking to inspects & Mark the size, lot no, on each clicked components.• Clicked components are finally inspected by quality controllers/ supervise |
| PC4. | <ul style="list-style-type: none">• Quality Control in Closing Section• Sample of each operation is hanged on the machines.• Strictly follow buyer's customer's specification.• In process inspection by the supervisor and group leader.• Final inspection by the quality controller. |
| PC5. | <ul style="list-style-type: none">• Quality control in bottom and finishing section.• In process inspection by supervisors.• Proper handling of lasted upper in various process/ Operation.• If any fault found in the initial stage, sent back for rework.• Final inspection by quality control. |

MSME/LSS/N1205: Basic Lasting & Making Technology

Description

After completion of course Student should be able to Explain the concept of lasting

Scope

The scope covers the following :

- After completion of course Student should be able to
- Explain the concept of lasting

Elements and Performance Criteria

Basic Lasting & Making Technology To supervise the production process of different construction in lasting/bottom department using latest technology.

To be competent, the user/individual on the job must be able to:

- | | |
|--------------|---|
| PC1. | <ul style="list-style-type: none">• Types and uses of toe-puffs and stiffeners. Identification of methods of attachments |
| PC2. | Methods of conditioning uppers and components. |
| PC3. | <ul style="list-style-type: none">• Apply Lasting principles and methods of application. Plan Lasting and bottoming systems for different types of construction in general use |
| PC4. | <ul style="list-style-type: none">• Perform Heeling processes, including heel building and heel finishing, covering Systems and methods of heel attachment. |
| PC5. | <ul style="list-style-type: none">• Various Systems of transportation and track management. Discuss combined lasting system. |
| PC6. | <ul style="list-style-type: none">• Discuss theory and practice of head setting - moist and dry head effects on. Materials and adhesive |
| PC7. | <ul style="list-style-type: none">• Use of hot-melt adhesive in lasting and bottoming. Discuss Lasting faults and effects upon subsequent operations. |
| PC8. | <ul style="list-style-type: none">• List correct techniques for sole attachment. Elaborate Composition, characteristics and uses of insole and soling materials for different constructions. |
| PC9. | <ul style="list-style-type: none">• Discuss Machine cutting direct/caster and planet, rounding operations. Plan preparation of cut stock and bottom components including pre finishing and assembly of pre-fabricated and Louis heel bottom units |
| PC10. | <ul style="list-style-type: none">• Assembly and storage of lasts and components. Discuss Standardization of components. |
| PC11. | Practice Multiple thicknesses cutting of components |
| PC12. | Identify Pre-molded shank, insole assemblies. Use confirming equipment's. |
| PC13. | <ul style="list-style-type: none">• Practice Departmental management. Plan Control of components and raw materials, Fitting up to ticket requirements. |
| PC14. | <ul style="list-style-type: none">• Procedure and processes for various soling and heating materials and units.• Practice methods of attaching Top- piecing and types and characteristics of material available. |

Qualification Pack

- PC15.**
- Discuss objective and methods of finishing - types and functions of machines and equipment used. Finishing processes for both leather and non-leather soles and heels. Effects of faults in preceding operations on the finishing processes. Selection of appropriate processes.
- PC16.**
- Comparisons between various finishing systems - pre - finishing vs finishing on the shoe. Cutters, irons, adhesives, inks, stains, waxes and finishes used. Decorative treatments and rendering. Discuss Statutory requirements concerning general, fire; mechanical and electrical
 - safe working conditions will be emphasized.
- PC17.**
- Analyze functions and processes of the shoe room, their importance to sales appeal. Shoe room operations and techniques - socking, cleaning, repairing, dressing, top spraying, trim attaching, quarter reforming, irons, inspection procedures, boxing etc., for leather and non - leather materials. Machine adjustments
- PC18.**
- Discuss Fault identification, diagnoses of cause and defects in work.
 - Applications of, decorative treatments, e.g. antique, shadow spray etc. final examination and inspection procedures - quality control packing and presentation techniques" storage of boxed footwear to prevent ageing".
- PC19.**
- Recognize statutory requirements: general, fire, mechanical and electrical safe working conditions in relation to the above.

MSME/LSS/N1204: Basic Closing Technology To supervise the production process in closing department and knowledge about different constructions and latest machines.

Description

After completion of course Student should be able to Forecast the design and marketing trends.

Scope

The scope covers the following :

- After completion of course Student should be able to
- Forecast the design and marketing trends.

Elements and Performance Criteria

Basic Closing Technology To supervise the production process in closing department and knowledge about different constructions and latest machines.

To be competent, the user/individual on the job must be able to:

- | | |
|-------------|---|
| PC1. | Discuss basic types and specialist stitching machines |
| PC2. | <ul style="list-style-type: none">• Elaborate operational sequence for Skiving, backing, stitch marking, perforation, folding and ancillary machinery like for basic styles. |
| PC3. | <ul style="list-style-type: none">• Different methods of upper reinforcements, edge and decorative treatments.• Various types of seams. Welding treatment for upper assembly, decoration and ornaments. |
| PC4. | <ul style="list-style-type: none">• Classification of Needles and threads: Types, sizes, selection, classification, relationship, application to Work. |
| PC5. | Identify Automatic and semi-automatic equipment for upper processing. |
| PC6. | Discuss Upper shaping by forming equipment/blocking machine |
| PC7. | <ul style="list-style-type: none">• Plan departmental management of work loading like types and advantages of transporter systems, Random and final inspection. |
| PC8. | <ul style="list-style-type: none">• Closing Practical:• Discuss different types of stitching and Non-stitching machine available.• Various techniques of handcrafts and the use of Machines for similar operations, use and in the use of adjustments necessary to functional efficiency.• Practice making of "basic styles of men's and women's footwear" |

MSME/LSS/N1202: Basic Clicking Technology

Description

After completion of course Student should be able to: Cut the material by machinery technology as well as traditional handmade technology.

Scope

The scope covers the following :

- After completion of course Student should be able to:
- Cut the material by machinery technology as well as traditional handmade technology.

Elements and Performance Criteria

Basic Clicking Technology To possess knowledge about different materials used in clicking section and concepts of clicking with the use of latest technology.

To be competent, the user/individual on the job must be able to:

- PC1.** Discuss upper components (upper, lining, reinforcement).
- PC2.**
 - Different Materials used in footwear upper making man-made materials, leather
 - (basic characteristics),
- PC3.** Identify Hand cutting and related tools and equipment
- PC4.** Discuss Machine cutting and related equipment and dies.
- PC5.** Illustrate various material waste and causes.
- PC6.**
 - Define Pattern layout on plain materials, Pattern layout on patterned materials
 - and Pattern layout on fabric materials.
- PC7.** Discuss Characteristics of leather from the view point of the upper cutting
- PC8.**
 - Brief leather material quality variations in relation to different parts of the skin/
 - hide (stretch - resistance - color - grain - texture).
- PC9.**
 - List upper components specific quality requirement {vamp - quarters - insideoutside etc.)
 - To understand defects marking up. Identify leather grading, Leather sorting, Leather store and storage. Discuss Hand cutting pattern storage, Size making (figure and codes). Importance of rational and economic cutting as required to product cost. Describe economic aspect of hand clicking as compared with press clicking. Importance of light in the clicking room. Apply Quality control applied for upperclicking
- PC10.**
 - Discuss Safety precautions applied to upper clicking
 - Identify correct storage of leather.
 - List of fabrics in general use for linings and the cutting system
 - need.a. Press cutting equipment b. Compare swing beam and
 - traveling head presses c. Other cutting method, Laser, water jet,
 - reciprocating knife. d. Types of knife comparisons
- PC11.** Discuss Cutting allowance and clicking cost sheet.

MSME/LSS/N1201: Basic Designing and Pattern Cutting

Description

After completion of course Student should be able to Forecast the design and marketing trends

Scope

The scope covers the following :

- After completion of course Student should be able to
- Forecast the design and marketing trends

Elements and Performance Criteria

NOS/ Module - Basic Designing and Pattern Cutting Identify customer's requirement and create Conceptual footwear Design and cut the patterns accordingly.

To be competent, the user/individual on the job must be able to:

- PC1.**
- Discuss Fashion Considerations like
 - Line: its effect on footwear design, upper and bottom proportion and balance
 - Shape: The creation of difference last unit silhouettes to emphasis or
 - understate design modes.
 - Colour: The psychological effect of colour and the importance of the creation
 - of seasonal colour ranges.
 - Pattern: The effect of surface pattern detailing and modeling on man - made
 - or leather upper materials, and on unit design.
 - Texture: The effect that surface texture can have o
- PC2.**
- Concepts of Foot and Last :
 - Discuss Styles and designs of last, covering men's, women, and children and
 - shoes, sandals and boots.
 - Classification of last based on different criteria's.
 - Different sizing systems and relation between foot and last.
 - To understand selection of Last.
- PC3.**
- Discuss pattern cutting Techniques:
 - List Variety of last covering and forme taking methods. Paper, tapes,
 - vacuum forme, slotted/ crumpled paper.
 - Discuss Designing on the 3 dimensional shape of the last or vacuum forme,
 - geometrically designing on the flat 2 dimensional, mean forme shapes.
 - Understand the Production of a working standard (compatible to
 - construction allowances) and sectional patterns for outside and linings
- PC4.**
- Production of Patterns of different styles:
 - Apply knowledge and techniques to produce working standards for the
 - main styles of men, women, and children.
 - Work in Court, Oxford, Gibson, and Monk, One, two and three bar straps,
 - trainer, gusset, casual and slip-on taking into account modern production
 - methods, techniques and processes.

Qualification Pack

- PC5.**
- Trims and Accessories Design: Develop footwear's by using buckles, bows, straps, elastics, Velcro, saddles,
 - collars, eyelets, laces, padding, ski- hooks, sliders and fittings for functional and
 - decorative purposes.
- PC6.**
- Production of Bottom Stock Patterns:
 - Develop bottom patterns and its use in the production of the insole, sock
 - and sole pattern for various construction like cemented, veldschoen, welted
 - California, slip lasted, sandal skeletons for strap designs, Louis flat, knock -
 - on and wedge heel sole pattern heel cover pattern for wedge Louis and
 - knock-on.
- PC7.**
- Specialized Pattern Cutting Techniques :
 - Illustrate Springing/Grading techniques for economy look and fit over and
 - under - recorded pattern shapes.
 - Appreciation of pattern interlock without effecting style or line
- PC8.**
- Design/Style Specification: Illustrate Specification procedures for use in production, detailing of style,
 - edge treatments, materials and components used, colors, last and
 - constructions, information and sequence for uppers and bottom stock
 - processes, finishing and shoe room treatments.

MSME/LSS/N1207: Employability skills

Description

This NOS unit is about carrying out operations about learners applying basic and advanced Employability Skills concepts in real life situations to become a successful 21st century professional

Scope

The scope covers the following :

- The scope covers the following:
- plan and prepare advance employability skills activities
- carry out the work to plan and prepare the learners to build key knowledge and skills for career
- development in the 21st century using advanced employability skills
- documenting the record

Elements and Performance Criteria

Employability skills To understand of basic skills of Employability and con

To be competent, the user/individual on the job must be able to:

- PC1.** Explain the major applications of MS Office
- PC2.** Explain the different types of e-commerce
- PC3.** List the benefits of e-commerce for retailers and customers
- PC4.** Discuss how the Digital India campaign will help boost e-commerce in India
- PC5.** Write applications pertaining to various matters.
- PC6.** Explain power of positive attitude and Importance of commitment
- PC7.** Explain motivation and the Ways to motivate oneself and Personal goal setting
- PC8.** Explain the Effective & Level of Communication
- PC9.** Explain communication and Significance of technical communication.
- PC10.** Explain the methods of listening Skills.
- PC11.** Explain the differences between bio-data, CV and Resume
- PC12.** Explain verbal and non-verbal Communication
- PC13.** Explain how to face an interview
- PC14.** Explain team work, group work, team formation process
- PC15.** How to Minimize the team conflicts
- PC16.** Explain Ethics & values
- PC17.**
 - Explain the concept of entrepreneurship, and entrepreneurship v/s Management
- PC18.** Explain the process of project report preparation for setting up a new business
- PC19.**
 - Explain the role of various schemes and institute for self- employment i.e MSME, DIC, NSIC, SIDBI etc,
- PC20.** Role of financial institution to support startup

Qualification Pack

- PC21.** Discuss the importance of saving money
- PC22.** Discuss the main types of bank accounts
- PC23.** Differentiate between fixed and variable costs
- PC24.** Describe the different types of insurance products
- PC25.** Discuss the main types of electronic funds transfers

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
