MSME/LSS/Q1204: Technical Supervisor - Advanced Footwear Technology

Brief Job Description

Learners gain skills in designing pattern cutting clicking closing lasting making and finishing can work in production quality designing merchandising or start own business able to design assemble and finish shoes

Personal Attributes

Learners gain skills in designing pattern cutting clicking closing lasting making and finishing can work in production quality designing merchandising or start own business able to design assemble and finish shoes

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [MSME/LSS/N1245: OJT- Inplant Training 1](#)
2. [MSME/LSS/N1241: Emerging Technology 1](#)
3. [MSME/LSS/N1240: Footwear Assembling Techniques 1.0](#)
4. [MSME/LSS/N1239: Footwear Assembling Techniques 1](#)
5. [MSME/LSS/N1238: Upper Construction Techniques 2](#)
6. [MSME/LSS/N1237: Material Cutting Techniques 4.0](#)
7. [MSME/LSS/N1236: Material Cutting Techniques 3](#)
8. [MSME/LSS/N1235: Upper Construction Techniques 1](#)
9. [MSME/LSS/N1232: Footwear Materials](#)
10. [MSME/LSS/N1231: Foot Physiology and Footwear Science I](#)
11. [MSME/LSS/N1230: Foot Physiology and Footwear Science](#)
12. [MSME/LSS/N1244: Employability Skills 1](#)
13. [MSME/LSS/N1243: QMS / QT Tools 1](#)
14. [MSME/LSS/N1242: Applied Management 1](#)

Qualification Pack

Qualification Pack (QP) Parameters

Sector	Leather
Sub-Sector	
Occupation	Footwear Designing & Manufacturing 01
Country	India
NSQF Level	5
Credits	40
Aligned to NCO/ISCO/ISIC Code	7536.0100 / Shoemaker
Minimum Educational Qualification & Experience	Completed 3 year diploma after 10th OR Completed 1st year of UG (UG Certificate)
Minimum Level of Education for Training in School	Not Applicable
Pre-Requisite License or Training	NA
Minimum Job Entry Age	18 Years
Last Reviewed On	NA
Next Review Date	08/05/2028
NSQF Approval Date	08/05/2025
Version	1.0
Reference code on NQR	QG-05-LT-04166-2025-V1-MSMETC
NQR Version	1.0

Qualification Pack

MSME/LSS/N1245: OJT- Inplant Training 1

Description

The On-the-Job Training (OJT) under NOS provides learners with practical workplace exposure, enabling them to apply theoretical knowledge in real situations. It helps trainees develop hands-on skills, understand industry practices, follow safety and quality standards, and build confidence to perform effectively in their chosen job role.

Scope

The scope covers the following :

- The On-the-Job Training (OJT) under NOS provides learners with practical workplace exposure, enabling them to apply theoretical knowledge in real situations. It helps trainees develop hands-on skills, understand industry practices, follow safety and quality standards, and build confidence to perform effectively in their chosen job role.

Elements and Performance Criteria

MSME/PDFT/ 10

To be competent, the user/individual on the job must be able to:

PC1. VIVA VOCE

MSME/LSS/N1240: Footwear Assembling Techniques 1.0

Description

Footwear machines shape stitch and finish shoes insoles and soles give comfort and grip adhesives bond parts fix fails by cleaning and pressure cemented making follows lasting sole attach finish QC checks fit bond look

Scope

The scope covers the following :

- Footwear machines shape stitch and finish shoes insoles and soles give comfort and grip adhesives bond parts fix fails by cleaning and pressure cemented making follows lasting sole attach finish QC checks fit bond look

Elements and Performance Criteria

MSME/PDFT/05

To be competent, the user/individual on the job must be able to:

- PC1.** Knowledge of the application of various machinery used in the footwear assembling process for leather and nonleather materials.
- PC2.** Describe about the selection of insole for different assembling techniques of footwear
- PC3.** Grasping the quality assessment of different soling materials based on testing standards
- PC4.** Knowledge on application of suitable adhesive for different materials in upper assembling process
- PC5.**
 - Understanding the various footwear assembling techniques. Composition, characteristics and uses of insole and soling
 - materials for different constructions.
- PC6.** Describe the work flow of full shoe making and quality checking points in footwear assembling Process
- PC7.** Knowledge on footwear finish technique
- PC8.** Learn about machine maintenance, specifications for different articles to attain required quality
- PC9.** Conditioning of upper for assembling process
- PC10.** Demonstrate assembling process manually
- PC11.** Perform post assembling operation
- PC12.** Perform footwear finishing operation
- PC13.** Learn to inspect the footwear
- PC14.** Carry out packaging and presentation techniques

MSME/LSS/N1238: Upper Construction Techniques 2

Description

Pre upper includes cutting skiving marking Upper includes stitching lining trimming Machines used flatbed postbed cylinderbed Adhesives PU rubber Seam types plain lap Hook open closed QC checks stitching finishing

Scope

The scope covers the following :

- Pre upper includes cutting skiving marking Upper includes stitching lining trimming Machines used flatbed postbed cylinderbed Adhesives PU rubber Seam types plain lap Hook open closed QC checks stitching finishing

Elements and Performance Criteria

MSME/PDFT/04

To be competent, the user/individual on the job must be able to:

- PC1.** Interpret the need of preparatory operation before constructing upper
- PC2.** Comprehend the mechanism of stitching operations in upper construction
- PC3.** Describe about various types of stitches and its thread used in the upper making.
- PC4.**
 - Expertise in understating the need and mechanism of sewing and other machines related to upper making process.
 - Knowledge on selection of right needle for different materials in upper construction.
- PC5.** Knowledge on selection of right thread for different materials in upper construction.
- PC6.** Knowledge on selection of suitable adhesive for different materials in upper construction.
- PC7.** Fixing of suitable fasteners on upper
- PC8.**
 - Forecasting the work flow of various styles of upper construction.
 - Quality checking of upper making
- PC9.** Practicing various sewing exercise on various materials
- PC10.** Perform preparatory operations for the upper, both manually and with a machine.
- PC11.** Adjustment of machine for functional efficiency
- PC12.** Develop a range of upper styles based on the learned techniques

MSME/LSS/N1237: Material Cutting Techniques 4.0

Description

Footwear styles formal casual sports Materials leather rubber fabric Defects scars wrinkles Grading by quality Cutting prep marking Principles minimize waste Cutting hand machine QC clicker allowance

Scope

The scope covers the following :

- Footwear styles formal casual sports Materials leather rubber fabric Defects scars wrinkles Grading by quality Cutting prep marking Principles minimize waste Cutting hand machine QC clicker allowance

Elements and Performance Criteria

MSME/PDFT/03

To be competent, the user/individual on the job must be able to:

- PC1.** Comprehend the need of footwear & its types
- PC2.** Understand the materials to be cut for the manufacturing of footwear form upper to bottom parts.
- PC3.** Identify and assess the quality of provided leather based on the defects and usable area
- PC4.** Interpret the usage of various machines used in material cutting. Utility of cutting tools in right manner.
- PC5.**
 - Cutting techniques of various materials according to the required specification. Explain on how to do preparation before
 - cutting. Follow up the nesting of template on the material for effective cutting.
- PC6.** Recognize procedure for the calculation of norms for upper materials
- PC7.** Understand the safety precautions to be followed while cutting material using the machine
- PC8.** Selection of materials depending upon its qualities
- PC9.** Nesting of various styles of shoes components on hides/skins
- PC10.** Nesting of various styles of shoes components on synthetic materials
- PC11.** Practice on marking of template on materials for Hand cutting
- PC12.** Working out costing and determining whether profit or loss
- PC13.** Cutting of various components of footwear using machine
- PC14.** Quality checking of cut components

Qualification Pack

MSME/LSS/N1232: Footwear Materials

Description

After completion of course Student should be able to: Describe about leather manufacturing process Describe about the manufacturing process, properties and performance evaluation of various materials used in Footwear manufacturing Describe shoe finishing materials and its applications Explain about various test methods being used in footwear testing.

Scope

The scope covers the following :

- After completion of course Student should be able to:
- Describe about leather manufacturing process
- Describe about the manufacturing process, properties and performance evaluation of various materials used in Footwear manufacturing
- Describe shoe finishing materials and its applications
- Explain about various test methods being used in footwear testing.

Elements and Performance Criteria

MSME/PDFT/02

To be competent, the user/individual on the job must be able to:

- PC1.** • Provide an overview of the leather manufacturing process, imperfections in leather, and various categories of upper
 - leather along with their chemical and physical characteristics.
- PC2.** • Describe different types of bottoming components and its manufacturing technique, properties and assessment of
 - quality of those materials through standard testing protocols
- PC3.** • Explain the different types of cements and its application method of adhesive of outsole material, selection of cement
 - for different types of outsole materials and test methods to determine the Adhesion strength
- PC4.** Describe different types of non- materials used as various footwear components and its property requirement
- PC5.** Understand the various components used in the footwear
- PC6.** Explain different grinders used in footwear making
- PC7.** Examine the footwear materials and components by physical and chemical testing
- PC8.** Understand the shoe finishing techniques and to know the types of finish and chemical used for shoe finishing.

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>MSME/PDFT/02</i>	100	-	-	-
PC1. Provide an overview of the leather manufacturing process, imperfections in leather, and various categories of upper leather along with their chemical and physical characteristics.	-	-	-	-
PC2. Describe different types of bottoming components and its manufacturing technique, properties and assessment of quality of those materials through standard testing protocols	-	-	-	-
PC3. - Explain the different types of cements and its application method of adhesive of outsole material, selection of cement - for different types of outsole materials and test methods to determine the Adhesion strength	-	-	-	-
PC4. Describe different types of non- materials used as various footwear components and its property requirement	-	-	-	-
PC5. Understand the various components used in the footwear	-	-	-	-
PC6. Explain different grinders used in footwear making	-	-	-	-
PC7. Examine the footwear materials and components by physical and chemical testing	-	-	-	-
PC8. Understand the shoe finishing techniques and to know the types of finish and chemical used for shoe finishing.	-	-	-	-
NOS Total	100	-	-	-

Qualification Pack

MSME/LSS/N1231: Foot Physiology and Footwear Science I

Description

After completion of course Student should be able to: Explain about the physique and composition of foot Explain about dynamics of foot Explain about the different curvature of Foot and its functioning Explain the ossification of foot Describe about the types of sizing system Conversion between two sizing systems Highlight the key dimensions essential for footwear mould. Explain the types of footwear mould Draw, Sketch, generate patterns manually and through shoe design software

Scope

The scope covers the following :

- After completion of course Student should be able to:
- Explain about the physique and composition of foot
- Explain about dynamics of foot
- Explain about the different curvature of Foot and its functioning
- Explain the ossification of foot
- Describe about the types of sizing system
- Conversion between two sizing systems
- Highlight the key dimensions essential for footwear mould.
- Explain the types of footwear mould
- Draw, Sketch, generate patterns manually and through shoe design software

Elements and Performance Criteria

MSME/PDFT/01

To be competent, the user/individual on the job must be able to:

- PC1.** Understanding of physique and composition of foot
- PC2.** Different types of foot joints system and their coordinated functioning while movement
- PC3.** Explain the dynamics of Foot movements at various joining of foot
- PC4.**
 - Functioning of different curvature of Foot and its functioning, different foot troubles and related health problems.
 - Gait analysis for gait correction
- PC5.** Describe ossification and its stages. Foot troubles and precautions to be taken to get protection from foot troubles
- PC6.**
 - Understand the need of different footwear measurement systems and Comparison between sizing systems in terms of
 - SLL and allowances
- PC7.** Selection of mould for footwear manufacturing depending upon the need
- PC8.** How to measure the various parameters of footwear for the improvement in foot fitting
- PC9.**
 - Explain foot comfort relation to the design of uppers, height and shape. Physical properties required for shoe
 - components
- PC10.** Generate the template for footwear production

Qualification Pack

- PC11.** • Understanding the selection of correct fitting footwear and Comfort adjustments with respect to materials, closures,
• cushions, constructions etc
- PC12.** • Masking on the mould of footwear for designing and geometrically flattening the three dimensional designing and
• development of standard working template for various components of footwear
- PC13.** Creation of standard template for various styles of footwear
- PC14.** Improvisation of style using various ornaments and decorative parts
- PC15.** Development of lower part patterns
- PC16.** Springing of template for material economy without effecting style or line
- PC17.** Development of prototypes for assessment of generated template
- PC18.** • Specification procedures for use in production, detailing of style, edge treatments, materials and components used.
• Information and sequence of operations through the whole process
- PC19.** Creation of template for footwear styles using shoe design software

MSME/LSS/N1244: Employability Skills 1

Description

Use computer for daily tasks operate ms office build communication write reports make resumes interact well work in teams overcome barriers follow engineering ethics and human values

Scope

The scope covers the following :

- Use computer for daily tasks operate ms office build communication write reports make resumes interact well work in teams overcome barriers follow engineering ethics and human values

Elements and Performance Criteria

MSME/ES/01

To be competent, the user/individual on the job must be able to:

- PC1.** Explain the major applications of MS Office
- PC2.** Explain the different types of e-commerce
- PC3.** List the benefits of e-commerce for retailers and customers
- PC4.** Discuss how the Digital India campaign will help boost e-commerce in India
- PC5.** Write applications pertaining to various matters.
- PC6.** Explain power of positive attitude and Importance of commitment
- PC7.** Explain motivation and the Ways to motivate oneself and Personal goal setting
- PC8.** Explain the Effective & Level of Communication
- PC9.** Explain communication and Significance of technical communication?
- PC10.** Explain the methods of listening Skills.
- PC11.** Explain the differences between bio-data, CV and Resume.
- PC12.** Explain verbal and non-verbal Communication
- PC13.** Explain how to face an interview
- PC14.** Explain team work, group work, team formation process
- PC15.** How to Minimize the team conflicts
- PC16.** Explain Ethics & values
- PC17.** Explain the concept of entrepreneurship, and entrepreneurship v/s Management
- PC18.** Explain the process of project report preparation for setting up a new business
- PC19.** Explain the role of various schemes and institute for self- employment i.e MSME, DIC, NSIC, SIDBI etc
- PC20.** Role of financial institution to support startup
- PC21.** Discuss the importance of saving money
- PC22.** Discuss the main types of bank accounts
- PC23.** Differentiate between fixed and variable costs
- PC24.** Describe the different types of insurance products

Qualification Pack

PC25. Discuss the main types of electronic funds transfers

MSME/LSS/N1243: QMS / QT Tools 1

Description

Quality means meeting standards lean reduces waste gurus gave quality methods seven qc tools solve issues qms controls process benchmarking compares six sigma cuts defects 5s kaizen improve ems sms manage systems

Scope

The scope covers the following :

- Quality means meeting standards lean reduces waste gurus gave quality methods seven qc tools solve issues qms controls process benchmarking compares six sigma cuts defects 5s kaizen improve ems sms manage systems

Elements and Performance Criteria

MSME/PDFT/08

To be competent, the user/individual on the job must be able to:

- PC1.** Understanding the meaning of quality and benefits of quality
- PC2.** Implement the lean concept to eliminate the wastages in the factory.
- PC3.** Understand the quality improvement approaches
- PC4.** Apply the quality control tools in upper & full shoe making to improve the quality of products.
- PC5.** Monitor the process control involved in all the technological process in upper & full shoe making.
- PC6.** Implement the ISO 9000 to satisfy the customer needs
- PC7.** Application of 5S, Kaizen & Quality circle activities in footwear industry
- PC8.** Create the awareness of the EMS to the all personnel involved in the production
- PC9.** Follow up the safety measures involved in footwear sector.

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
