Qualification Pack

MSME/MES/Q4001: MULTIMEDIA AND ANIMATION ASSOCIATE

Brief Job Description

Learners who attain this qualification can perform Character animation, Game Creation, Visualization in VR, and Special Effects in Film, Tv Shows etc.

Personal Attributes

Learners who attain this qualification can perform Character animation, Game Creation, Visualization in VR, and Special Effects in Film, Tv Shows etc.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [MSME/MES/N4005: Attain Knowledge to Create User Interfaces](#)
2. [MSME/MES/N4004: Gain knowledge to Animate a 3D Character](#)
3. [MSME/MES/N4003: Understand to create 3D Models and Apply Textures](#)
4. [MSME/MES/N4002: Understand FX & Create Motion Graphics](#)
5. [MSME/MES/N4001: Understand FX & Create Motion Graphics](#)
6. [MSME/MES/N4006: Employability Skill 08](#)

Qualification Pack (QP) Parameters

Sector	Media & Entertainment
Sub-Sector	Media and Entertainment
Occupation	Digital Media Creation
Country	India
NSQF Level	4
Credits	20
Aligned to NCO/ISCO/ISIC Code	Multimedia Artist and Animator/Animator

Qualification Pack

Minimum Educational Qualification & Experience	12th grade Pass with NA of experience OR Completed 2nd year of the 3-year diploma after 10 with NA of experience OR Previous relevant Qualification of NSQF Level (NSQF Level 3) with 3 Years of experience
Minimum Level of Education for Training in School	
Pre-Requisite License or Training	NA
Minimum Job Entry Age	17 Years
Last Reviewed On	NA
Next Review Date	30/04/2027
NSQC Approval Date	30/04/2024
Version	1.0
Reference code on NQR	NCVET-QG-04-ME-02421-2024-V1-MSME
NQR Version	1.0

Qualification Pack

MSME/MES/N4005: Attain Knowledge to Create User Interfaces

Description

After completion of course Student should be able to Understand User-Centered Design Embrace the user-centered approach to design, putting user needs and preferences at the forefront of the design process

Scope

The scope covers the following :

- After completion of course Student should be able to Understand User-Centered Design Embrace the user-centered approach to design, putting user needs and preferences at the forefront of the design process

Elements and Performance Criteria

MSME/MAAA/04 Attain Knowledge to Create User Interfaces

To be competent, the user/individual on the job must be able to:

- PC1.** Understand the difference between UX (User Experience) and UI (User Interface).
- PC2.** Successfully download and install Figma to the desktop.
- PC3.** Navigate and utilize the Figma interface/dashboard effectively.
- PC4.** Import Figma files into the Figma application
- PC5.** Demonstrate proficiency in using various tools available in Figma for design purposes.
- PC6.** Utilize the layers panel in Figma for organizing design elements efficiently.
- PC7.** Understand and work with components in Figma
- PC8.** Navigate and utilize the design tab/panel in Figma for design purposes.
- PC9.** Use the text tool and select appropriate fonts for design projects in Figma.
- PC10.** Import and work with images effectively in Figma.
- PC11.** Apply boolean operations effectively in Figma for design purposes.
- PC12.** Use alignment and distribution tools in Figma to arrange design elements accurately
- PC13.** Understand and utilize Figma team libraries for collaborative design projects.
- PC14.** Navigate and utilize the code panel in Figma for design purposes.
- PC15.** Create prototypes within Figma for interactive design demonstrations
- PC16.** Implement horizontal and vertical scrolling features in Figma designs.
- PC17.** Utilize masks effectively in Figma for design purposes.
- PC18.** • Export designs from Figma in various formats such as .JPG, .PNG, .SVG, .PDF, and save projects
• into .fig format
- PC19.** Create mockups in Photoshop for design presentations.
- PC20.** Install and utilize plugins in Figma for enhanced design functionality
- PC21.** Identify and utilize five essential plugins for Figma designers
- PC22.** Understand the concept of wireframing in design.
- PC23.** Create wireframes using Figma effectively.

Qualification Pack

- PC24.** Create wireframes using wireframe.cc effectively
- PC25.** Successfully create a new project and file in Figma
- PC26.** Collaborate in real-time using Figma's team collaboration features

MSME/MES/N4004: Gain knowledge to Animate a 3D Character

Description

Familiarize with the animation interface and its key components, including the graph editor, dope sheet, and motion path.

Scope

The scope covers the following :

- Familiarize with the animation interface and its key components, including the graph editor, dope sheet, and motion path.

Elements and Performance Criteria

MSME/MAAA/03 Gain knowledge to Animate a 3D Character

To be competent, the user/individual on the job must be able to:

- PC1.** Demonstrates proficiency in navigating and utilizing the animation interface
- PC2.** Sets keyframes and manipulates animation curves using the graph editor skillfully.
- PC3.** Uses the dope sheet competently for organizing and editing animation.
- PC4.** Effectively utilizes motion paths, ghosting, and grease pencil tools
- PC5.** Plays blast animations for review and evaluation purposes competently.
- PC6.** Uses animation controls and tools competently.
- PC7.** Sets and edits keyframes skillfully.
- PC8.** Utilizes the graph editor proficiently for precise control over animation curves.
- PC9.** Creates and manipulates motion paths effectively.
- PC10.** Animates cameras and secondary motion skillfully
- PC11.** Plays blast animation sequences for review and evaluation competently.
- PC12.** Demonstrates understanding and application of the principles of animation.
- PC13.**
 - Uses the graph editor, Trax editor, and camera sequencer proficiently for advanced animation workflows.
- PC14.** Utilizes tools such as ATOM, animation layers, and blending techniques skillfully.
- PC15.**
 - Creates various animation sequences competently, including bouncing balls, walk cycles, run cycles, jumps, flight, acrobatic fight scenes, dialogue interaction scenes, and more
- PC16.**
 - Plans and executes complete animations, including facial expressions, paper folding effects, time warps, swinging characters, and utilizes animation tips effectively.

MSME/MES/N4003: Understand to create 3D Models and Apply Textures

Description

Understand the basics of 3D modelling and differentiate between 2D and 3D.

Scope

The scope covers the following :

- Understand the basics of 3D modelling and differentiate between 2D and 3D.

Elements and Performance Criteria

MSME/MAAA/02 Understand to create 3D Models and Apply Textures

To be competent, the user/individual on the job must be able to:

- PC1.** Demonstrates the ability to explain the fundamental concepts of 3D graphics
- PC2.** Identifies and explains the differences between 2D and 3D graphics.
- PC3.** Uses the 3D software interface and its various components competently.
- PC4.** Navigates and customizes the 3D user interface efficiently.
- PC5.** Utilizes different viewports skillfully for effective work.
- PC6.** Selects and manipulates objects in a 3D scene competently.
- PC7.** Uses transformation operations effectively for precise object positioning
- PC8.**
 - Applies pivot points, duplication, and object properties using the channel box and attribute editor skillfully
- PC9.** Demonstrates knowledge of scene organization principles and techniques.
- PC10.** Uses outliner, hierarchies, and groups competently to effectively organize a 3D scene.
- PC11.** Manages object visibility and layering skillfully.
- PC12.** Creates polygonal models competently using primitives and polygonal tools.
- PC13.** Selects polygons effectively and uses soft selection for precise modeling
- PC14.** Creates complex models successfully using polygonal modeling techniques.
- PC15.** Applies combining, separating, and Booleans for polygonal modeling skillfully.
- PC16.** Utilizes references skillfully for precise modeling.
- PC17.** Applies extrude, edge loops, and bevel techniques competently for polygonal modeling.
- PC18.** Uses symmetry and merge weld techniques accurately.
- PC19.** Utilizes mirror geometry, extrude path, and polygonal bridge tools competently.
- PC20.** Uses subdivision surface, crease tool, and smooth proficiently for refining polygon meshes.
- PC21.** Implements edge flow techniques skillfully to enhance mesh topology.
- PC22.**
 - Applies non-linear deformations, lattice, and object history for advanced mesh refinement
 - effectively.
- PC23.** Uses brush interface and sculpting tools skillfully for effective mesh sculpting.
- PC24.** Demonstrates knowledge and understanding of NURBS modeling principles and techniques.
- PC25.** Creates NURBS primitives competently and utilizes NURBS curves.

Qualification Pack

- PC26.** • Applies NURBS modeling techniques such as revolve, loft, open/close, planar, and extrude skillfully.
- PC27.** • Uses tools like isoparms, NURBS curve, curve surface, project curve, trim tool, and converting NURBS to polygons competently
- PC28.** Demonstrates proficiency in using effective modeling tools.
- PC29.** • Demonstrates familiarity with alternative plugins or techniques for advanced modeling tasks.
- PC30.** Creates hard surface models such as cars and trucks skillfully
- PC31.** Creates organic models such as characters or bipeds competently.
- PC32.** Model's animals or quadrupeds skillfully.
- PC33.** Utilizes the UV editor for unwrapping UVs skillfully.
- PC34.** Approaches unwrapping UVs for complex geometry competently.
- PC35.** Successfully unwraps UVs for organic modeling of bipeds and quadrupeds.
- PC36.** Creates and applies shaders, textures, and materials competently

MSME/MES/N4002: Understand FX & Create Motion Graphics

Description

Understand the fundamentals of computer graphics.

Scope

The scope covers the following :

- Understand the fundamentals of computer graphics.

Elements and Performance Criteria

MSME/MAAA/01 Understand FX & Create Motion Graphics

To be competent, the user/individual on the job must be able to:

- PC1.** Define motion graphics and its applications across various industries.
- PC2.** Utilize Adobe After Effects and Cinema 4D for motion graphics creation.
- PC3.** Apply animation principles effectively, including keyframing and visual storytelling.
- PC4.** : Implement workflow optimization strategies and file management techniques.
- PC5.** Employ practical tips and tricks for achieving specific visual effects and animations.
- PC6.** Understand the fundamentals and purpose of motion graphics.
- PC7.** Access and utilize project exercise files for practice.
- PC8.** Create motion graphics projects from scratch with proper setup and configuration.
- PC9.** Familiarize with the interface of motion graphics software and customize workspace.
- PC10.** Recognize the importance of information and preview panels.
- PC11.** Gain insight into project structures and organization within the software.
- PC12.** Create new projects and configure settings accordingly.
- PC13.** Implement auto-save features and prevent data loss.
- PC14.** Import images and other media assets for animations and visual effects.
- PC15.** Create compositions and manage project assets effectively.
- PC16.** Utilize the timeline panel for sequencing and arranging content.
- PC17.** Adjust content duration and align elements for optimal animation.
- PC18.** Understand keyframing basics and manage keyframes for animation control.
- PC19.** Apply interpolation and easing techniques for smooth transitions.
- PC20.** Implement motion blur effects and motion sketch for realistic animations.
- PC21.** Customize text layers and apply animation presets.
- PC22.** Create and edit shape layers, including modifying anchor points and creating masks.
- PC23.** Prepare compositions for export and rendering.

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
