## Qualification Pack

### MSU/MEP/Q0101: Vedic Mathematics Trainer

#### Brief Job Description

A Vedic Mathematics Trainer applies ancient mathematical principles and techniques, enabling precise mental calculations and problem-solving. They adeptly handle arithmetic operations, advanced calculations, fractions, and algebra using Vedic methods. They foster inclusivity by integrating diverse cultural perspectives, encourage technological proficiency, ensure effective online teaching, and promote active learning through interactive tools and virtual experiences.

#### Personal Attributes

A Vedic Maths trainer should possess a strong understanding of mathematical concepts, problem-solving abilities, and an aptitude for teaching. Excellent communication skills, patience, and the ability to simplify complex ideas are crucial. A passion for mental math and enhancing students' numerical abilities is essential. Adaptability, creativity in teaching methods, and a commitment to continuous learning are vital for success in this role, along with a deep respect for traditional Vedic knowledge.

#### Applicable National Occupational Standards (NOS)

##### Compulsory NOS:

1. [MSU/MEP/N0102: Apply Vedic mathematic techniques to enhance mathematical calculation abilities](#)
2. [MSU/MEP/N0103: Teach Vedic mathematics principles and techniques to learners](#)
3. [MSU/MEP/N0101: Implement effective teaching practices](#)
4. [MSU/MEP/N0104: Assess learning outcomes and provide feedback](#)
5. [MSU/MEP/N0105: Integrate digital technology in classrooms](#)
6. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

## Qualification Pack

### MSU/MEP/N0102: Apply Vedic mathematic techniques to enhance mathematical calculation abilities

#### Description

This OS unit is about equipping learners with specialized Vedic Mathematics techniques and encouraging exploration and innovation in the field. By mastering these fundamental techniques, students can effectively apply and advance their problem-solving skills in Vedic Mathematics.

#### Scope

The scope covers the following :

- Apply specialised Vedic mathematics fundamental techniques
- Equip with Specialized Vedic Mathematics Techniques
- Carry out Exploration and Innovation in Vedic Mathematics

#### Elements and Performance Criteria

##### *Apply specialised Vedic mathematics fundamental techniques*

To be competent, the user/individual on the job must be able to:

- PC1.** Apply Vedic Mathematical Sutras as guiding principles for efficient mental calculations, thus simplifying arithmetic operations in daily life
- PC2.** Apply the digit sum technique for rapid mental addition and simplify the calculations
- PC3.** Perform addition, subtraction, multiplication, and division using Vedic methods for precise arithmetic in real-world problems
- PC4.** Demonstrates proficiency by effortlessly adding, subtracting, multiplying, and dividing one-digit numbers at remarkable speed and precision
- PC5.** Solve complex multiplication problems involving multiple digits on both sides
- PC6.** Simplify division calculations by starting with simple one-digit divisors and gradually progress to handling division problems that are close to powers of 10
- PC7.** Demonstrate proficient square-root determination in real-world mathematical scenarios to enhance calculation efficiency
- PC8.** Implement efficient techniques for calculating cubes, and measure their effectiveness in solving various mathematical problems commonly encountered
- PC9.** Apply specific sub-sutras for advanced calculations for simplifying mathematical processes
- PC10.** Use divisibility rules to quickly identify divisors, making problem-solving faster and more accessible
- PC11.** Demonstrate techniques for identifying factors and multiples, and apply them in solving real-world problems
- PC12.** Apply techniques to find square roots mentally, which can be valuable in advanced calculations
- PC13.** Apply advanced cubing techniques to higher-level in mathematical challenges

##### *Equip with Specialized Vedic Mathematics Techniques*

To be competent, the user/individual on the job must be able to:

## Qualification Pack

- PC14.** Apply Vedic fraction techniques to work with fractions effectively in various mathematical contexts
- PC15.** Utilize Vedic mathematics applications in algebraic expressions and equations, enhancing problem-solving skills
- PC16.** Solve geometry problems effectively using Vedic math
- PC17.** Perform trigonometric calculations proficiently using Vedic methods, especially useful in trigonometry courses

### *Carry out Exploration and Innovation in Vedic Mathematics*

To be competent, the user/individual on the job must be able to:

- PC18.** Apply of Vedic techniques in calculus problems efficiently
- PC19.** Gain insights into advanced number theory concepts, which help explore mathematical relationships
- PC20.** Enhance mental calculation skills through regular practice to boost overall mathematical proficiency
- PC21.** Prepare for competitive exams by using Vedic mathematics techniques tailored to these assessments, ensuring success
- PC22.** Foster a culture of continuous learning and research by encouraging the application of Vedic mathematics concepts in daily life and problem-solving endeavors

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** vedic mathematical sutras and their principles
- KU2.** digit sum technique and its applications
- KU3.** vedic methods for addition, subtraction, multiplication, and division
- KU4.** differentiating teaching strategies based on complexity
- KU5.** division techniques, especially with one-digit divisors
- KU6.** expertise in square and cube calculation methods
- KU7.** advanced mathematical sub-sutras
- KU8.** familiarity with divisibility rules and their practical use
- KU9.** factors, multiples, and their applications
- KU10.** mental square root calculations
- KU11.** advanced cubing techniques
- KU12.** vedic fraction techniques and applications
- KU13.** vedic mathematics in algebra and equations
- KU14.** vedic methods to solve geometric problems
- KU15.** advanced trigonometric calculations using Vedic methods
- KU16.** application of Vedic techniques in calculus problem-solving
- KU17.** vedic number theory concepts and their significance
- KU18.** advanced mental calculation techniques
- KU19.** vedic mathematics tailored for competitive exams

## Qualification Pack

**KU20.** inspire exploration and innovation in learners

### MSU/MEP/N0103: Teach Vedic mathematics principles and techniques to learners

#### Description

This OS unit is about evaluating learners' needs and preparing for Vedic Mathematics instruction to foster inclusive and engaging learning environments. It emphasizes tailoring teaching strategies to accommodate diverse needs, ensuring effective participation and engagement in Vedic Math lessons for all students.

#### Scope

The scope covers the following :

- Evaluate Learner's Needs
- Prepare for Vedic Mathematics Instruction
- Promote Inclusive and Engaging Vedic Math Learning Environments

#### Elements and Performance Criteria

##### *Evaluate Learner's Needs*

To be competent, the user/individual on the job must be able to:

- PC1.** Assess learners' preferred styles (visual, auditory, kinesthetic) for Vedic math instruction to tailor teaching methods
- PC2.** Gather insights on preferred engagement methods via discussions and surveys for effective Vedic math learning
- PC3.** Encourage learners to share their past experiences with Vedic mathematics, aiding personalized instruction
- PC4.** Conduct surveys or interviews to gather information about learners' cultural backgrounds and preferences in Vedic math

##### *Prepare for Vedic Mathematics Instruction*

To be competent, the user/individual on the job must be able to:

- PC5.** Share the historical and cultural significance of Vedic mathematics to deepen learners' appreciation and understanding
- PC6.** Invite experts or practitioners of Vedic mathematics from diverse cultural backgrounds to share their experiences and insights
- PC7.** Assign Vedic math projects that explore mathematical concepts within different cultural contexts, encouraging a broader perspective
- PC8.** Discuss cultural interests and experiences to integrate culturally relevant Vedic math examples into instruction
- PC9.** Provide Vedic math instructional materials in multiple languages to accommodate learners from diverse linguistic backgrounds
- PC10.** Include Vedic math problems inspired by different cultures, showcasing their unique mathematical contributions
- PC11.** Organize workshops or sessions where learners explore mathematical concepts through traditional cultural practices

## Qualification Pack

**PC12.** Encourage learners to research and present mathematical practices from their own cultural backgrounds, fostering inclusivity

**PC13.** Assign group projects that require learners to work together, integrating cultural elements into Vedic math

### *Promote Inclusive and Engaging Vedic Math Learning Environments*

To be competent, the user/individual on the job must be able to:

**PC14.** Offer specialized assistive technology and tools to learners with disabilities, ensuring equitable access to Vedic math instruction

**PC15.** Utilize Vedic math learning platforms with built-in accessibility features, such as screen readers and adjustable font sizes

**PC16.** Create mentorship programs where advanced Vedic math learners assist those who may need additional support

**PC17.** Provide Vedic math educators with training in cultural competence to better understand and engage with diverse learners

**PC18.** Host cultural math festivals where learners showcase their cultural mathematical discoveries and innovations

**PC19.** Incorporate cultural artifacts, tools, and instruments into Vedic math instruction to make learning more immersive

**PC20.** Encourage learners to maintain journals documenting their cultural math explorations and experiences

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

**KU1.** Assessment methods for identifying learners' preferred styles

**KU2.** Effective engagement methods through discussions and surveys

**KU3.** Facilitate discussions on learners' past experiences with Vedic mathematics

**KU4.** Conducting surveys and interviews to gather cultural information

**KU5.** Integrating culturally relevant examples into Vedic math instruction

**KU6.** Historical and cultural significance of Vedic mathematics

**KU7.** Invite experts or practitioners from diverse backgrounds

**KU8.** Assigning Vedic math projects within different cultural contexts

**KU9.** Providing instructional materials in multiple languages

**KU10.** Incorporating Vedic math problems inspired by various cultures

**KU11.** Organize workshops exploring mathematical concepts through cultural practices

**KU12.** Fostering inclusivity through learners' research on their own cultural practices

**KU13.** Assigning group projects with cultural integration

**KU14.** Offering assistive technology for learners with disabilities

**KU15.** Utilize accessible Vedic math learning platforms

**KU16.** Creating mentorship programs for learners

**KU17.** Cultural competence for engaging with diverse learners

**KU18.** Host cultural math festivals showcasing learners' discoveries

## Qualification Pack

**KU19.** Incorporating cultural artifacts into instruction

**KU20.** Encouraging learners to maintain cultural math journals

## Qualification Pack

### MSU/MEP/N0101: Implement effective teaching practices

#### Description

This OS unit is about delivering instruction effectively while documenting and maintaining accurate records. It focuses on ensuring clear, impactful teaching and the meticulous upkeep of learner progress and instructional materials.

#### Scope

The scope covers the following :

- Deliver instruction effectively
- Document and maintain records

#### Elements and Performance Criteria

##### *Deliver instruction effectively*

To be competent, the user/individual on the job must be able to:

- PC1.** Implement the devised teaching plan and activities step-by-step
- PC2.** Communicate learning objectives and expectations clearly to students
- PC3.** Deliver engaging and interactive instruction to facilitate student learning and comprehension
- PC4.** Use effective instructional strategies to enhance student engagement and participation
- PC5.** Utilise technology tools and resources to support instructional delivery and enhance student learning experiences
- PC6.** Provide ongoing support to students in a personalised learning setup, utilising effective strategies
- PC7.** Reflect on instructional delivery practices, identify areas for improvement, and adjust optimise student learning outcomes
- PC8.** Establish positive and inclusive classroom
- PC9.** Maintain high professional standards and ethical conduct

##### *Document and maintain records*

To be competent, the user/individual on the job must be able to:

- PC10.** Document the evidence of student learning and display it in class
- PC11.** Facilitate students revisiting the documented evidence of learning to make the learning visible
- PC12.** Document and maintain accurate records of instructional activities, including lesson plans, attendance records, and student performance data

#### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Devised teaching plan and its sequential implementation
- KU2.** Clarity in communicating learning objectives and expectations to students

## Qualification Pack

- KU3.** Delivering engaging and interactive instruction
- KU4.** Effective instructional strategies to enhance student engagement
- KU5.** Familiarity with technology tools and resources for instructional support
- KU6.** Provide personalized support to students
- KU7.** Reflecting on instructional practices and improving them
- KU8.** Establishment of a positive and inclusive classroom environment
- KU9.** Adherence to high professional standards and ethical conduct
- KU10.** Competence in documenting and displaying evidence of student learning
- KU11.** Facilitating students' review of documented evidence
- KU12.** Documenting and maintaining instructional records, including lesson plans, attendance, and performance data

## Qualification Pack

### MSU/MEP/N0104: Assess learning outcomes and provide feedback

#### Description

This OS unit is about designing and administering assessments and implementing a work plan. It emphasizes creating effective evaluations and integrating them into a structured plan for smooth and organized assessment management.

#### Scope

The scope covers the following :

- Design and administer assessments
- Implement a work plan

#### Elements and Performance Criteria

##### *Design and administer assessments*

To be competent, the user/individual on the job must be able to:

- PC1.** Identify the learning objectives and outcomes that need to be assessed for the selected topic
- PC2.** Select and design appropriate formative assessment types that effectively evaluate student learning and provide ongoing feedback (Examples: Quizzes, projects, or presentations)
- PC3.** Develop rubrics and clear marking criteria as specified by the board, examination-conducting agency/body
- PC4.** Design summative assessments to evaluate and measure the learning outcomes and learner achievement at the end of each instructional period or unit
- PC5.** Ensure that the assessments align with the learning objectives, Bloom's taxonomy, syllabus, and examination patterns by seeking feedback
- PC6.** Administer assessments regularly, as planned in the academic calendar

##### *Implement a Work Plan*

To be competent, the user/individual on the job must be able to:

- PC7.** Assess different types of formative and summative assessments in accordance with the assessment rules and procedures
- PC8.** Mark the assessment using rubrics and marking criteria while ensuring accuracy and fairness
- PC9.** Analyse and interpret assessment data to identify areas of strength and improvement. and provide constructive feedback
- PC10.** Provide timely and constructive feedback to support student's growth and learning
- PC11.** Integrate technology to communicate assessment results and progress clearly to learners and parents
- PC12.** Ensure ethical considerations while providing feedback
- PC13.** Facilitate reflective practises encouraging students' self-assessment and metacognition
- PC14.** Record learners' progress in their respective learners' profiles and store the assessment records safely
- PC15.** Recognise and celebrate learners' achievements to motivate and reinforce learning

## Qualification Pack

### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Learning objectives and outcomes for the topic
- KU2.** Formative assessment types for ongoing feedback
- KU3.** Developing rubrics and marking criteria
- KU4.** Designing summative assessments
- KU5.** Alignment with learning objectives, Bloom's taxonomy, and syllabus
- KU6.** Capability to administer assessments according to the academic calendar
- KU7.** Competency in assessing various formative and summative types
- KU8.** Accurate and fair assessment marking
- KU9.** Skill in analyzing and interpreting assessment data
- KU10.** Competence in documenting and displaying evidence of student learning
- KU11.** Providing timely and constructive feedback
- KU12.** Using technology for clear communication of results
- KU13.** Ethical considerations in feedback
- KU14.** Capability to facilitate reflective practices for self-assessment
- KU15.** Maintaining and secure assessment records
- KU16.** Recognition and celebration of learner achievements

### MSU/MEP/N0105: Integrate digital technology in classrooms

#### Description

This OS unit is about integrating smartboards, interactive boards, smart podiums, classroom audio-visual equipment, and lecture recording systems to enhance learning. It focuses on engaging students with digital tools and facilitating effective classroom organization and workflow.

#### Scope

The scope covers the following :

- Integrate smartboards, interactive boards
- Integrate smart podiums
- Integrate classroom audio-visual equipment
- Integrate lecture recording system
- Engage students in learning and using digital tools
- Facilitate Classroom Organisation and Workflow

#### Elements and Performance Criteria

##### *Integrate smartboards, interactive boards*

To be competent, the user/individual on the job must be able to:

- PC1.** Purchase a smart board aligned with your educational needs by analyzing the features, functionalities, and diverse applications of available smart board models
- PC2.** Install and calibrate the smart or interactive board, along with its accessories such as smart pens and styluses
- PC3.** Use and maintain the board and accessories to enhance the impact of teaching and training

##### *Integrate smart podiums*

To be competent, the user/individual on the job must be able to:

- PC4.** Power on and off the smart podium and install the necessary software to connect the smart podium with the computer
- PC5.** Use compatible applications such as Microsoft OneNote, Microsoft Word, PowerPoint, etc
- PC6.** Use a stylus to annotate learning material, along with features like screen capture and screen recording, to effectively save the information
- PC7.** Use and maintain smart podiums to enhance the impact of teaching/ training smart podiums to enhance impact of teaching/ training

##### *Integrate classroom audio-visual equipment*

To be competent, the user/individual on the job must be able to:

- PC8.** Install the projector and audio system, connecting them to the laptop using HDMI cables, USB cables, or Bluetooth
- PC9.** Integrate the systems according to the requirement of teaching material
- PC10.** Show online resources related to the lessons while utilising and maintaining classroom audio-visual equipment to enhance impact of teaching/training

##### *Integrate lecture recording system*

## Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC11.** Set up a camera and microphones to capture lecture delivery
- PC12.** Use in-built recording system applications such as screen capture, Clipchamp, etc. to capture digital information
- PC13.** Download, edit and manage the recorded files as per requirements

### *Engage students in learning and using digital tools*

To be competent, the user/individual on the job must be able to:

- PC14.** Introduce students to digital tools, train them in digital literacy, and promote awareness of data privacy and security
- PC15.** Use digital tools and technology to encourage collaborative activities among students and cater to their different learning styles and abilities
- PC16.** Develop the digital communication skills of students by encouraging them to create and deliver digital presentations
- PC17.** Collect student feedback about their experience with digital lectures, using their input to improve future lessons
- PC18.** Create a shared folder, class blog, web page, or online portfolio for assignments and reminders

### *Facilitate Classroom Organisation and Workflow*

To be competent, the user/individual on the job must be able to:

- PC19.** Find a convenient and secure place to store and charge devices
- PC20.** Collaboratively establish device usage expectations, routines, and digital workflows with students
- PC21.** Create a shared folder, class blog, web page, or online portfolio for assignments and reminders
- PC22.** Connect worldwide for knowledge sharing beyond classrooms and enhance digital tool proficiency and teaching methods through professional development

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Smart board features and functionalities for educational alignment
- KU2.** Smart board installation and calibration, including accessories
- KU3.** Using and maintaining smart board and accessories for effective teaching
- KU4.** Powering on/off smart podiums and installing necessary software
- KU5.** Compatible applications like Microsoft OneNote, Word, and PowerPoint
- KU6.** Capability to administer assessments according to the academic calendar
- KU7.** Using stylus for annotations, screen capture, and recording
- KU8.** Integrating and utilizing smart podiums for teaching
- KU9.** Projector and audio system installation and connectivity
- KU10.** Integrate systems according to teaching requirements
- KU11.** Showcasing online resources and utilizing audio-visual equipment
- KU12.** Setting up cameras and microphones for lecture capture

## Qualification Pack

- KU13.** Recording system applications like screen capture and Clipchamp
- KU14.** Downloading, editing, and managing digital recordings
- KU15.** Digital tools, literacy, and data privacy
- KU16.** Fostering collaborative activities using digital tools
- KU17.** Developing students' digital communication skills
- KU18.** Capability to collect and utilize student feedback on digital lectures
- KU19.** Creating shared digital platforms for assignments and reminders
- KU20.** Device management and charging routines
- KU21.** Establish digital expectations and workflows with students
- KU22.** Global knowledge sharing and professional development

## Assessment Guidelines and Assessment Weightage

### Assessment Guidelines

#### 1. Assessment System Overview:

- Batches assigned to the assessment agencies for conducting the assessment on SIP or email
- Assessment agencies send the assessment confirmation to VTP/TC looping Madhavi Skills University (MSU)
- Assessment agency deploys the ToA-certified Assessor for executing the assessment
- MSU monitors the assessment process & records

#### 2. Testing Environment:

- Check the Assessment location, date and time
- If the batch size is more than 30, then there should be 2 Assessors.
- Check that the allotted time for the candidates to complete Theory & Practical Assessment is correct.

## Qualification Pack

### 3. Assessment Quality Assurance levels/Framework:

- Question bank is created by the Subject Matter Experts (SME) are verified by the other SMEs
- Questions are mapped to the specified assessment criteria
- Assessor must be ToA certified & trainer must be ToT Certified

### 4. Types of evidence or evidence-gathering protocol:

- Time-stamped & geotagged reporting of the assessor from the assessment location
- Centre photographs with signboards and scheme-specific branding

### 5. Method of verification or validation:

- Surprise visit to the assessment location

### 6. Method for assessment documentation, archiving, and access

- Hard and copies of the documents are stored

### On the Job:

1. Each module (which covers the job profile) will be assessed separately.
2. The candidate must score 60% in each module to complete the OJT.
3. Tools of Assessment that will be used for assessing whether the candidate is having desired skills and aptitude are:
  - Videos of Trainees during OJT
  - Portfolio of items produced
  - Viva
  - Demonstrations
4. Assessment of each Module will ensure that the candidate is able to:
  - Perform the skills mentioned in the assessment criteria.
  - Apply underpinning knowledge and understanding to the tasks performed to achieve desired level of competencies
  - Demonstrate behavioral and attitudinal soft skills as mentioned in the assessment criteria.

## Qualification Pack

**Minimum Aggregate Passing % at QP Level : 60**

**(Please note:** Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

## Assessment Weightage

Compulsory NOS

| National Occupational Standards                                                               | Theory Marks | Practical Marks | Project Marks | Viva Marks | Total Marks | Weightage  |

### Glossary

|                                              |                                                                                                                                                                                                                                                                                                  |
|----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Sector</b>                                | Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.                                                                      |
| <b>Sub-sector</b>                            | Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.                                                                                                                                                                                     |
| <b>Occupation</b>                            | Occupation is a set of job roles, which perform similar/ related set of functions in an industry.                                                                                                                                                                                                |
| <b>Job role</b>                              | Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.                                                                                                                                                                                |
| <b>Occupational Standards (OS)</b>           | OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts. |
| <b>Performance Criteria (PC)</b>             | Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.                                                                                                                                                                    |
| <b>National Occupational Standards (NOS)</b> | NOS are occupational standards which apply uniquely in the Indian context.                                                                                                                                                                                                                       |
| <b>Qualifications Pack (QP)</b>              | QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.                                                                                                                       |
| <b>Unit Code</b>                             | Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'                                                                                                                                                                                                        |
| <b>Unit Title</b>                            | Unit title gives a clear overall statement about what the incumbent should be able to do.                                                                                                                                                                                                        |
| <b>Description</b>                           | Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.                                                                                                                   |
| <b>Scope</b>                                 | Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.                                                                                            |

## Qualification Pack

|                                         |                                                                                                                                                                                                                                                                                                                                                                        |
|-----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Knowledge and Understanding (KU)</b> | Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.                                                                                                                                               |
| <b>Organisational Context</b>           | Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.                                                                                                                                                                       |
| <b>Technical Knowledge</b>              | Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.                                                                                                                                                                                                                                                               |
| <b>Core Skills/ Generic Skills (GS)</b> | Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles. |
| <b>Electives</b>                        | Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.                                                                            |
| <b>Options</b>                          | Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.                                                                                                                                                          |
