Qualification Pack

PSS/Q1703: Coal Handling Operator - Thermal Power Plant

Brief Job Description

The individual in the job role manages various coal handling plant operations and monitoring of equipment in the plant and takes appropriate actions to ensure safe, efficient and reliable operation of the systems. Also, the operator takes decisions related to the day to day operation of coal unloading, coal storage, coal transport through conveyor belts and jobs related to coal management including coal crushing.

Personal Attributes

The individual must be physically and mentally fit to undertake laborious activities, as necessary. The individual should be good at interpersonal skills as well, to coordinate with internal and external personnel. The candidate should not be allergic to dust and coal fumes.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [PSS/N1331: Apply basic health and safety practices for power related work](#)
2. [PSS/N1336: Working effectively with others](#)
3. [PSS/N1704: Perform operations of coal handling plant](#)

Qualification Pack

PSS/N1331: Apply basic health and safety practices for power related work

Description

This unit covers health, safety and security for power related work. This includes procedures and practices that candidates need to follow to help maintain a healthy, safe and secure work environment in a power plant, power station/substation or on the field while working on power equipment. It covers responsibilities towards self, others, assets and the environment

Scope

This unit/task covers the following:

- Follow workplace health and safety practices
- Follow fire safety practices
- Follow emergencies, rescue and first-aid procedures

Elements and Performance Criteria

Follow workplace health and safety practices

To be competent, the user/individual on the job must be able to:

- PC1.** • use protective clothing/equipment for specific tasks and work conditions
Protective Clothing
• leather or asbestos gloves, flame proof aprons, flame proof overalls buttoned to neck, cuff less (without folds) trousers, reinforced footwear, helmets/hard hats, cap and shoulder covers, ear defenders/plugs, safety boots, knee pads, particle masks, glasses/goggles/visor
equipment: hand and face shields, machine guards, residual current devices, shields, dust sheets, respirator
- PC2.** identify job-site hazards and possible causes of risks/accident at the workplace
Hazards- electrical hazards; sharp edged and heavy tools; heated metals; oxyfuel and gas cylinders; welding radiation; hazardous surfaces; hazardous substances; physical hazards possible causes of risk and accident: physical actions; not following instructions; inattention; sickness and incapacity; health; not taking safety precautions
- PC3.** follow procedures for safe working with electrical equipment
Safe Working Procedures: tag out/lock out, ptw (permit to work)
- PC4.** follow warning signs while working with electrical systems
Warning Signs: danger, high voltage area, out of service, etc
- PC5.** use standard safe working practices when working at heights, confined areas and trenches
- PC6.** test any electrical equipment and system using insulated testing devices before touching them
- PC7.** ensure positive isolation of electrical equipment & system as per the given standards
- PC8.** identify any abnormalities in electrical equipment or system installed alarm and/or noticing parameters from gauge/ indicator installed
Parameters: temperature, pressure, flow and current

Qualification Pack

- PC9.** follow safe working practices while working in hazardous conditions to ensure the safety of self and others
Safe Working Practices: using ppe; installing and reading safety signs; handle tools in the correct manner and store and maintain them properly; keep work area clear of clutter; while working with electricity take all electrical precautions; safe lifting and carrying practices; use equipment that is working properly and is well maintained; take due measures for safety while working at heights, etc. take due measures for safety while working in confined spaces or trenches, etc.
- PC10.** use various methods of accident prevention in the work environment
Methods of Accident Prevention: training in health and safety procedures; using health and safety procedures; use of equipment and working practices; safety notices, advice; instruction from colleagues and supervisors
- PC11.** identify and retrieve general health and safety equipment in the workplace
General Health and Safety Equipment: fire extinguishers; first aid equipment; safety instruments and clothing etc.
- PC12.** set up and use scaffolds, elevated platforms and ladders safely
Set up: firm/level base, clip/lash down, leaning at the correct angle, appropriate load as per capacity, etc
- PC13.** inspect scaffolds, elevated platforms and ladders for faults and rectify them
Faults: corrosion of metal components, deterioration, splits and cracks in timber components, imbalance, loose rungs, missing/ unfixed nuts or bolts, etc.
- PC14.** lift, carry and transport heavy objects & tools safely using correct procedures from storage to the workplace and vice versa
- PC15.** inspect power plant and its equipment routinely for any signs of oil, water and steam leakage
- PC16.** store flammable materials and machine lubricating oil safely and correctly
- PC17.** check that the emission and pollution control devices are working properly in line with environmental policy standards
- PC18.** use good housekeeping practices at all times
Good Housekeeping Practices: clean/tidy work area, removal/disposal of waste material, protect surfaces
- PC19.** identify common hazard signs displayed in various areas
Various Areas: chemical containers; equipment; packages; inside buildings; open areas and public spaces, etc.
- PC20.** inform the relevant authorities about any abnormal situation/behavior of any equipment/system without delay

Follow fire safety practices

To be competent, the user/individual on the job must be able to:

- PC21.** use various appropriate fire extinguishers for different types of fires correctly
Types of Fires: class a, b, c, d and e
- PC22.** use appropriate rescue techniques during fire hazard
- PC23.** maintain good housekeeping in order to prevent fire hazards
- PC24.** use a fire extinguisher correctly in case of fire

Follow emergencies, rescue and first-aid procedures

To be competent, the user/individual on the job must be able to:

- PC25.** administer appropriate first aid to the victims for the relevant injuries
Injuries: bleeding, burns, choking, electric shock, poisoning etc.
- PC26.** act promptly and appropriately to an accident situation or medical emergency in real or simulated environments

Qualification Pack

- PC27.** perform and organise loss minimization or rescue activity during an accident in real or simulated environments
- PC28.** administer basic first aid including cpr to the victims of heart or cardiac arrest due to electric shock, before the arrival of emergency services
- PC29.** demonstrate basic emergency procedures during emergency mock drills for better understanding of procedures applied in emergencies
Emergency Procedures: raising alarm, safe/efficient evacuation, correct ways of escape, correct assembly point, roll call, correct return to work
- PC30.** free an affected person from electrocution safely as per the recommended procedure
- PC31.** move injured people and others to a safe place during emergencies
- PC32.** write an incident report or dictate a report to another person, and send report to the authorized person
Incident Report Includes Details of: name, date/time of incident, date/time of report, location, environment conditions, persons involved, sequence of events, injuries sustained, damage sustained, actions taken, witnesses, supervisor/manager notified

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

1. names (and job titles if applicable), and where to find, all the people responsible for health and safety in a workplace
2. names and location of documents that refer to health and safety in the workplace
3. names and location of people responsible for health and safety in the workplace
4. documents that refer to health and safety in the workplace
documents: fire notices, accident reports, safety instructions for equipment and procedures, company notices and documents, legal documents (e.g. government notices)
5. meaning of hazards and risks
6. health and safety hazards commonly present in the work environment and related precautions
7. possible causes of risk, hazard or accident in the workplace and why risk and/or accidents are possible
8. possible causes of risk and accident
possible causes of risk and accident: physical actions; not following instructions; inattention; sickness and incapacity (such as drunkenness); health hazards (such as untreated injuries and contagious illness); not taking safety precautions
9. methods of accident prevention
10. safe working practices when working with tools and machines
11. safe working practices while working at various hazardous sites
12. where to find all the general health and safety equipment in the workplace
13. various dangers associated with the use of electrical equipment
14. positive isolation of electrical equipment and system
15. safe handling and disposal of hazardous power plant wastes
16. use of emission and pollution control devices and measures taken to control pollution
17. various safety procedures and equipment used to work at heights, trenches and confined places
18. safe working practices specific to working with electrical equipment and system e.g. lock out/tag out, ptw, etc.

Qualification Pack

19. preventative and remedial actions to be taken in the case of exposure to toxic material/toxic materials: solvents, flux, lead exposure: ingested, contact with skin, inhaled/preventative action: ventilation, masks, protective clothing/ equipment); remedial action: immediate first aid, report to supervisor
20. importance of using protective clothing/equipment and other insulated work gear while handling electrical system and equipment
21. precautionary measures taken to prevent fire accident
22. various causes of fire/causes of fires: heating of metal; spontaneous ignition; sparking; electrical heating; loose fires (smoking, welding, etc.); chemical fires; etc.
23. correct technique(s) of using a fire extinguisher
24. different methods of extinguishing fire
25. different materials used for extinguishing fire/materials: sand, water, foam, CO₂, dry powder
26. emergency rescue techniques applied during a fire hazard
27. various types of safety signs and what they mean
28. appropriate basic first aid treatment relevant to the condition e.g. shock, electrical shock, bleeding, breaks to bones, minor burns, resuscitation, poisoning, eye injuries
29. rescue techniques applied during fire hazards
30. good housekeeping in order to prevent fire hazards
31. correct use of a fire extinguisher
32. how to free a person from electrocution
33. basic techniques of bandaging
34. perform artificial respiration and the CPR process

Generic Skills (GS)

User/individual on the job needs to know how to:

1. write an accident/ incident report in local language and/or English
2. read and comprehend basic content to read labels, charts, signages
3. read and comprehend basic English to read manuals of operation
4. read an accident/ incident report in local language or English
5. question coworkers appropriately in order to clarify instructions and other issues
6. give clear instructions to coworkers and subordinates
7. remain congenial while discussing and debating issues with co-workers
8. follow appropriate protocols for communication based on situation, hierarchy, organizational culture and practice
9. ask for, provide and receive required assistance where possible to ensure achievement of work-related objectives
10. follow organizational rule-based decision-making process
11. take decisions with systematic course of actions and/or response
12. plan and organize their own work schedule, work area, tools, equipment and materials to maintain decorum and for improved productivity
13. build customer relationships and use customer centric approach

Qualification Pack

14. think through the problem, evaluate the possible solution(s) and suggest an optimum /best possible solution(s)
15. seek appropriate assistance from other sources to resolve problems
16. report problems that cannot be resolved to the appropriate authority
17. identify cause and effect relations in own area of work
18. work systematically and logically to resolve the issues, identify the cause and anticipate unexpected results
19. critically evaluate the organizational processes to improve them

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Follow workplace health and safety practices</i>	19	43	-	-
PC1. - use protective clothing/equipment for specific tasks and work conditions - Protective Clothing - leather or asbestos gloves, flame proof aprons, flame proof overalls buttoned to neck, cuff less (without folds) trousers, reinforced footwear, helmets/hard hats, cap and shoulder covers, ear defenders/plugs, safety boots, knee pads, particle masks, glasses/goggles/visor - equipment: hand and face shields, machine guards, residual current devices, shields, dust sheets, respirator	1	2	-	-
PC2. identify job-site hazards and possible causes of risks/accident at the workplace Hazards-electrical hazards; sharp edged and heavy tools; heated metals; oxyfuel and gas cylinders; welding radiation; hazardous surfaces; hazardous substances; physical hazards possible causes of risk and accident: physical actions; not following instructions; inattention; sickness and incapacity; health; not taking safety precautions	1	2	-	-

PSS/N1336: Working effectively with others

Description

This unit covers basic etiquette and competencies that a candidate is required to possess and demonstrate in their behavior and interactions with others at the workplace. These cover areas such as communication etiquette, discipline, listening, handling conflict and grievances.

Elements and Performance Criteria

working with others

To be competent, the user/individual on the job must be able to:

- PC1.** accurately receive information and instructions from the supervisor and fellow workers, getting clarification where required
- PC2.** accurately pass on information to authorized persons who require it and within agreed timescale and confirm its receipt
- PC3.** give information to others clearly, at a pace and in a manner that helps them to understand
- PC4.** display helpful behavior by assisting others in performing tasks in a positive manner, where required and possible
- PC5.** consult with and assist others to maximize effectiveness and efficiency in carrying out tasks
- PC6.** display appropriate communication etiquette while working
- PC7.** display active listening skills while interacting with others at work
- PC8.** use appropriate tone, pitch and language to convey politeness, assertiveness, care and professionalism
- PC9.** demonstrate responsible and disciplined behaviors at the workplace
- PC10.** escalate grievances and problems to appropriate authority as per procedure to resolve them and avoid conflict

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** legislation, standards, policies, and procedures followed in the company relevant to own employment and performance conditions
- KU2.** reporting structure, inter-dependent functions, lines and procedures in the work area
- KU3.** relevant people and their responsibilities within the work area
- KU4.** escalation matrix and procedures for reporting work and employment related issues
- KU5.** various categories of people that one is required to communicate and co-ordinate with in the organization
- KU6.** importance of effective communication in the workplace
- KU7.** importance of teamwork in organizational and individual success
- KU8.** various components of effective communication
- KU9.** key elements of active listening
- KU10.** value and importance of active listening and assertive communication

Qualification Pack

- KU11.** barriers to effective communication
- KU12.** importance of tone and pitch in effective communication
- KU13.** importance of avoiding casual expletives and unpleasant terms while communicating professional circles
- KU14.** how poor communication practices can disturb people, environment and cause problems for the employee, the employer and the customer
- KU15.** importance of ethics for professional success
- KU16.** importance of discipline for professional success
- KU17.** what constitutes disciplined behavior for a working professional
- KU18.** common reasons for interpersonal conflict
- KU19.** importance of developing effective working relationships for professional success
- KU20.** expressing and addressing grievances appropriately and effectively
- KU21.** importance and ways of managing interpersonal conflict effectively

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** note the information communicated by the officer incharge
- GS2.** note down observations (if any) related to the operation/maintenance
- GS3.** read and interpret the process required for different types of manuals
- GS4.** read and interpret the flowchart of all parts of an assembly
- GS5.** read manuals and documents to understand the product-details & how they can be used
- GS6.** discuss task lists, schedules and activities with the colleague/supervisor
- GS7.** effectively communicate with the team members
- GS8.** attentively listen and comprehend the information given by the colleague/supervisor/contractor
- GS9.** communicate clearly with the colleague on the issues faced during query/fault
- GS10.** follow colleague/contractor rule-based decision making process
- GS11.** take decisions with systematic course of actions and/or response
- GS12.** planning and organization of tasks to meet deadlines
- GS13.** build customer relationships and use customer centric approach
- GS14.** seek and comprehend operation related inputs for clarification find ways of modifying difficult operating stages to make it operation friendly
- GS15.** work systematically and logically to resolve the issues and identify causation and anticipate unexpected results. Quick approach and solution towards faults repairing
- GS16.** critically evaluate operation parameters in relation to system normality develop a holistic and comprehensive profile of grid station on segregated discrete processes

Qualification Pack

PSS/N1704: Perform operations of coal handling plant

Description

This unit is about the competencies required for carrying out various operational activities at a coal handling plant in a safe manner.

Scope

This unit/ task covers the following:

- unload coal
- crush and store coal
- perform various operations related activities

Elements and Performance Criteria

Unload coal

To be competent, the user/individual on the job must be able to:

- PC1.** unload coal using the appropriate equipment such as merry go round and wagon tippler
- PC2.** ensure that there is no wastage of coal while loading and unloading it in merry go round, transportation assemblies and related equipment
- PC3.** reclaim and stockpile coal supplies as required
- PC4.** secure release of rail wagons carrying coal by coordinating with railways personnel
- PC5.** use belt weigher to gauge the mass of coal
- PC6.** operate coal sampler to collect coal for sampling
- PC7.** remove unwanted particulates and objects from the coal

Crush and store coal

To be competent, the user/individual on the job must be able to:

- PC8.** monitor the size of crushed coal and quantum of coal being crushed to ensure smooth operations of coal crushing plant
- PC9.** monitor the supporting equipment of coal crushing plant for proper functioning
- PC10.** remove the choking of coal from hopper using appropriate methods
- PC11.** ensure smooth functioning of conveyor belts by continuous monitoring and escalate any issues encountered during monitoring to the maintenance team
- PC12.** compact coal by using dozers and minimize dust by sprinkling water on the stored coal
- PC13.** apply necessary precautions to prevent fires and extinguish small fires safely in the coal storage area
- PC14.** monitor coal bunkers and the storage bins constantly for overheated coal to prevent spontaneous combustion
- PC15.** monitor operation of stacker and ensure coal is stacked in an optimum and safe way
- PC16.** operate the dust removal and suppression system for smooth functioning of the plant

Perform various operations related activities

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC17.** maintain accurate daily records of coal received and unloaded
- PC18.** record details of inspection accurately and clearly in the specified formats
- PC19.** oil and grease pulleys to protect them from rusting
- PC20.** monitor functioning of rollers, crushers, gearboxes and chutes for any faults
- PC21.** monitor the operation of various equipment for common faults and take corrective action, when required such as vertical, horizontal and positive displacement pumps, dust removal and suppression system etc.
- PC22.** install and start sump pump in the coal yard
- PC23.** identify problems that are not within one's own capability or limits of authority and seek support from authorized persons for resolving the same

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

1. relevant legislation, standards, policies, and procedures followed in the organization relevant to own employment and performance conditions
2. relevant health and safety requirements applicable in the work place
3. own job role and responsibilities and sources for information pertaining to employment terms, entitlements, job role and responsibilities
4. reporting structure, inter-dependent functions, lines and procedures in the work area
5. how to engage with approved specialists for support in order to resolve incidents and service requests
6. importance of working in a clean environment, safe practices and procedures
7. relevant people and their responsibilities within the work area
8. escalation matrix and procedures for reporting work and employment related issues
9. coal unloading systems viz wagon tippler and merry go round system, principle of unloading systems, use of unloading systems and related aspects
10. coal crushing technology, type of coal crushers, single stage crushing, primary and secondary crushing, rotatory breakers, roll crushers
11. fire management in coal yard, techniques of fire management in coal yard viz. dry fog water system, hose pipe water system
12. various protection mechanism for coal transportation viz. Belt sway switch, pull chord switch, zero speed switch etc.
13. operations of equipment such as conveyors, crushers, dozers and loaders
14. key tools and tackles Key tools and tackles: Belts, rollers, pulley, gear box, shoot repair, crusher, hammers, greasing requirement, vulcanization, coal stacking and reclamation, belt tripper etc.
15. functioning and clutches monitoring parameters of gear boxes, fluid couplings, clutches
16. key components of conveyor belts: magnetic separators (OBMS & ILMS), belt sways, pull chord switches & zero speed switch
17. operation of crushing system in plant single stage crushing or two stage crushing, and type of crushers used in plant

Qualification Pack

18. operation of key equipment such as wagon tipplers, beetle chargers, conveyor belts, apron feeders, ring granulator, vibrating screens, stacker reclaimers etc.
19. tools used in operation of the coal processing equipment and machinery.
20. tools and equipment used in testing, repair and maintenance: Tools and equipment: Pulverization system, rotary parts, valves, bearing and their alignment
21. measurement of parameter reading and its applications
22. regular and periodic inspection
23. circumstances which may require ad-hoc inspections
24. importance of ensuring that tools and equipment are suitable, well maintained, calibrated and operating effectively
25. working principles and operations of alignment rollers bulldozers, gravity rollers, coal reclaimers, monitoring of dust control etc.
26. coal to electricity cycle
27. heat value/calorific value of coal, coal sizing etc.
28. basics of electricity
29. principles and practices of electrical safety
30. common electricity terminology and its correct interpretation Common electricity terminology: Current, Voltage, Resistance, Inductance, Capacitance, Kilovolt ampere (kVA), Kilowatt (kw), active power, Kilowatt hour (kwh), Power factor
31. correct postures for performing various activities in a coal handling plant
32. methods and parameters to check quality of line components against required quality standards methods Methods: Visual inspection, binoculars, measuring tape, use of instruments
33. personal protective equipment (PPE) and clothing PPE: Safety helmet, safety glove, safety shoe, climbing harness, lanyard and tool belt (when climbing), earth rod (discharge rod), safety rope that must be worn during inspection, repair and maintenance activity and from where can it be obtained

Generic Skills (GS)

User/individual on the job needs to know how to:

1. communicate effectively with other operators and plant personnel and write the information communicated by the in-charge of work
2. prepare written instructions and relay instructions to follow-on shifts when multishift operations are used
3. write accurately about the technical problems and condition of the site
4. note testing repair observations and critical points
5. prepare and fill in all technical forms and data as per guidelines and format
6. read and correctly interpret written sentences and paragraphs
7. read and correctly interpret metric system units for all measurements
8. read and correctly interpret the rules and methods in standard operating procedure documents
9. read and correctly interpret equipment manuals to identify operational details and specifications
10. communicate clearly with team and other staff members

Qualification Pack

11. discuss task lists, schedules and activities
12. interact with the junior engineer to clarify instructions and doubts
13. communicate clearly with team and other staff members
14. discuss task lists, schedules and activities
15. interact with the junior engineer to clarify instructions and doubts
16. plan and organize tasks to meet quantity and quality specifications and targets
17. build customer relationships and use customer centric approach in taking decisions
18. identify problems and review related information to develop and evaluate options and implement solutions
19. monitor problem solving to take corrective action with individuals and organizations
20. analyse problems and changes in conditions, operations, and the environment to solve problems
21. analyse the problems in the equipment to identify root causes
22. collect information and technical data and define process for equipment testing
23. analyse the problem and required actions to resolve them to determine which issues are to be escalated, and to whom
24. develop holistic and comprehensive profile of products based on segregated discrete process stages
25. critically evaluate operation parameters in relation to product features intended to ensure a match

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Unload coal</i>	7	19	-	-
PC1. unload coal using the appropriate equipment such as merry go round and wagon tippler	1	2	-	-
PC2. ensure that there is no wastage of coal while loading and unloading it in merry go round, transportation assemblies and related equipment	1	3	-	-
PC3. reclaim and stockpile coal supplies as required	1	3	-	-
PC4. secure release of rail wagons carrying coal by coordinating with railways personnel	1	3	-	-
PC5. use belt weigher to gauge the mass of coal	1	2	-	-
PC6. operate coal sampler to collect coal for sampling	1	3	-	-
PC7. remove unwanted particulates and objects from the coal	1	3	-	-
<i>Crush and store coal</i>	13	31	-	-
PC8. monitor the size of crushed coal and quantum of coal being crushed to ensure smooth operations of coal crushing plant	2	3	-	-
PC9. monitor the supporting equipment of coal crushing plant for proper functioning	2	4	-	-
PC10. remove the choking of coal from hopper using appropriate methods	1	4	-	-
PC11. ensure smooth functioning of conveyor belts by continuous monitoring and escalate any issues encountered during monitoring to the maintenance team	1	3	-	-
PC12. compact coal by using dozers and minimize dust by sprinkling water on the stored coal	1	3	-	-

Qualification Pack

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC13. apply necessary precautions to prevent fires and extinguish small fires safely in the coal storage area	1	4	-	-
PC14. monitor coal bunkers and the storage bins constantly for overheated coal to prevent spontaneous combustion	2	4	-	-
PC15. monitor operation of stacker and ensure coal is stacked in an optimum and safe way	1	3	-	-
PC16. operate the dust removal and suppression system for smooth functioning of the plant	2	3	-	-
<i>Perform various operations related activities</i>	10	20	-	-
PC17. maintain accurate daily records of coal received and unloaded	2	2	-	-
PC18. record details of inspection accurately and clearly in the specified formats	2	3	-	-
PC19. oil and grease pulleys to protect them from rusting	2	2	-	-
PC20. monitor functioning of rollers, crushers, gearboxes and chutes for any faults	1	2	-	-
PC21. monitor the operation of various equipment for common faults and take corrective action, when required such as vertical, horizontal and positive displacement pumps, dust removal and suppression system etc.	1	4	-	-
PC22. install and start sump pump in the coal yard	1	4	-	-
PC23. identify problems that are not within one's own capability or limits of authority and seek support from authorized persons for resolving the same	1	3	-	-
NOS Total	30	70	-	-

Qualification Pack

National Occupational Standards (NOS) Parameters

NOS Code	PSS/N1704
NOS Name	Perform operations of coal handling plant
Sector	Power
Sub-Sector	Generation
Occupation	Operation & Maintenance - Generation
NSQF Level	4
Credits	TBD
Version	1.0
Last Reviewed Date	11/03/2019
Next Review Date	11/03/2023
NSQC Clearance Date	22/08/2019

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

- 1.Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
4. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
5. In case of successfully passing only certain number of NOSs, the trainee is eligible to take subsequent assessment on the balance NOS's to pass the Qualification Pack.
6. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

Qualification Pack

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Compulsory NOS

National Occupational Standards	Theory Marks	Practical Marks	Project Marks	Viva Marks	Total Marks	Weightage
PSS/N1331.Apply basic health and safety practices for power related work	30	70	-	-	100	15
PSS/N1336.Working effectively with others	30	70	-	-	100	5
PSS/N1704.Perform operations of coal handling plant	30	70	-	-	100	80
Total	90	210	-	-	300	100

Qualification Pack

Acronyms

NOS	National Occupational Standard(s)
NSQF	National Skills Qualifications Framework
QP	Qualifications Pack
TVET	Technical and Vocational Education and Training
OBMS	Over Band Magnetic Separator
ILMS	Inline Belt Magnetic Separator
CPR	Cardiopulmonary Resuscitation
PTW	Permit To Work
PPE	Personal Protective Equipment

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
