PSS/Q1704: Water Treatment Operator - Thermal Power Plant

Brief Job Description

The individual in this job role operates a variety of plant equipment in a waste water/raw water treatment plant and also assists the maintenance team. The individual is responsible for ensuring timely upkeep of systems and equipment that remove pollutants from wastewater and performing related work, as required.

Personal Attributes

The individual must be physically and mentally fit to perform various activities at a water treatment plant. Patience, ability to work in coordination with co-workers and inspecting the work in detail are other important attributes required for this job role.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [PSS/N1331: Apply basic health and safety practices for power related work](#)
2. [PSS/N1336: Working effectively with others](#)
3. [PSS/N1705: Perform operations of water treatment plant](#)

PSS/N1331: Apply basic health and safety practices for power related work

Description

This unit covers health, safety and security for power related work. This includes procedures and practices that candidates need to follow to help maintain a healthy, safe and secure work environment in a power plant, power station/substation or on the field while working on power equipment. It covers responsibilities towards self, others, assets and the environment

Scope

This unit/task covers the following:

- Follow workplace health and safety practices
- Follow fire safety practices
- Follow emergencies, rescue and first-aid procedures

Elements and Performance Criteria

Follow workplace health and safety practices

To be competent, the user/individual on the job must be able to:

- PC1.** • use protective clothing/equipment for specific tasks and work conditions
Protective Clothing
• leather or asbestos gloves, flame proof aprons, flame proof overalls buttoned to neck, cuff less (without folds) trousers, reinforced footwear, helmets/hard hats, cap and shoulder covers, ear defenders/plugs, safety boots, knee pads, particle masks, glasses/goggles/visor
equipment: hand and face shields, machine guards, residual current devices, shields, dust sheets, respirator
- PC2.** identify job-site hazards and possible causes of risks/accident at the workplace
Hazards- electrical hazards; sharp edged and heavy tools; heated metals; oxyfuel and gas cylinders; welding radiation; hazardous surfaces; hazardous substances; physical hazards
possible causes of risk and accident: physical actions; not following instructions; inattention; sickness and incapacity; health; not taking safety precautions
- PC3.** follow procedures for safe working with electrical equipment
Safe Working Procedures: tag out/lock out, ptw (permit to work)
- PC4.** follow warning signs while working with electrical systems
Warning Signs: danger, high voltage area, out of service, etc
- PC5.** use standard safe working practices when working at heights, confined areas and trenches
- PC6.** test any electrical equipment and system using insulated testing devices before touching them
- PC7.** ensure positive isolation of electrical equipment & system as per the given standards
- PC8.** identify any abnormalities in electrical equipment or system installed alarm and/or noticing parameters from gauge/ indicator installed
Parameters: temperature, pressure, flow and current

Qualification Pack

- PC9.** follow safe working practices while working in hazardous conditions to ensure the safety of self and others
Safe Working Practices: using ppe; installing and reading safety signs; handle tools in the correct manner and store and maintain them properly; keep work area clear of clutter; while working with electricity take all electrical precautions; safe lifting and carrying practices; use equipment that is working properly and is well maintained; take due measures for safety while working at heights, etc. take due measures for safety while working in confined spaces or trenches, etc.
- PC10.** use various methods of accident prevention in the work environment
Methods of Accident Prevention: training in health and safety procedures; using health and safety procedures; use of equipment and working practices; safety notices, advice; instruction from colleagues and supervisors
- PC11.** identify and retrieve general health and safety equipment in the workplace
General Health and Safety Equipment: fire extinguishers; first aid equipment; safety instruments and clothing etc.
- PC12.** set up and use scaffolds, elevated platforms and ladders safely
Set up: firm/level base, clip/lash down, leaning at the correct angle, appropriate load as per capacity, etc
- PC13.** inspect scaffolds, elevated platforms and ladders for faults and rectify them
Faults: corrosion of metal components, deterioration, splits and cracks in timber components, imbalance, loose rungs, missing/ unfixed nuts or bolts, etc.
- PC14.** lift, carry and transport heavy objects & tools safely using correct procedures from storage to the workplace and vice versa
- PC15.** inspect power plant and its equipment routinely for any signs of oil, water and steam leakage
- PC16.** store flammable materials and machine lubricating oil safely and correctly
- PC17.** check that the emission and pollution control devices are working properly in line with environmental policy standards
- PC18.** use good housekeeping practices at all times
Good Housekeeping Practices: clean/tidy work area, removal/disposal of waste material, protect surfaces
- PC19.** identify common hazard signs displayed in various areas
Various Areas: chemical containers; equipment; packages; inside buildings; open areas and public spaces, etc.
- PC20.** inform the relevant authorities about any abnormal situation/behavior of any equipment/system without delay

Follow fire safety practices

To be competent, the user/individual on the job must be able to:

- PC21.** use various appropriate fire extinguishers for different types of fires correctly
Types of Fires: class a, b, c, d and e
- PC22.** use appropriate rescue techniques during fire hazard
- PC23.** maintain good housekeeping in order to prevent fire hazards
- PC24.** use a fire extinguisher correctly in case of fire

Follow emergencies, rescue and first-aid procedures

To be competent, the user/individual on the job must be able to:

- PC25.** administer appropriate first aid to the victims for the relevant injuries
Injuries: bleeding, burns, choking, electric shock, poisoning etc.
- PC26.** act promptly and appropriately to an accident situation or medical emergency in real or simulated environments

Qualification Pack

- PC27.** perform and organise loss minimization or rescue activity during an accident in real or simulated environments
- PC28.** administer basic first aid including cpr to the victims of heart or cardiac arrest due to electric shock, before the arrival of emergency services
- PC29.** demonstrate basic emergency procedures during emergency mock drills for better understanding of procedures applied in emergencies
Emergency Procedures: raising alarm, safe/efficient evacuation, correct ways of escape, correct assembly point, roll call, correct return to work
- PC30.** free an affected person from electrocution safely as per the recommended procedure
- PC31.** move injured people and others to a safe place during emergencies
- PC32.** write an incident report or dictate a report to another person, and send report to the authorized person
Incident Report Includes Details of: name, date/time of incident, date/time of report, location, environment conditions, persons involved, sequence of events, injuries sustained, damage sustained, actions taken, witnesses, supervisor/manager notified

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

1. names (and job titles if applicable), and where to find, all the people responsible for health and safety in a workplace
2. names and location of documents that refer to health and safety in the workplace
3. names and location of people responsible for health and safety in the workplace
4. documents that refer to health and safety in the workplace
documents: fire notices, accident reports, safety instructions for equipment and procedures, company notices and documents, legal documents (e.g. government notices)
5. meaning of hazards and risks
6. health and safety hazards commonly present in the work environment and related precautions
7. possible causes of risk, hazard or accident in the workplace and why risk and/or accidents are possible
8. possible causes of risk and accident
possible causes of risk and accident: physical actions; not following instructions; inattention; sickness and incapacity (such as drunkenness); health hazards (such as untreated injuries and contagious illness); not taking safety precautions
9. methods of accident prevention
10. safe working practices when working with tools and machines
11. safe working practices while working at various hazardous sites
12. where to find all the general health and safety equipment in the workplace
13. various dangers associated with the use of electrical equipment
14. positive isolation of electrical equipment and system
15. safe handling and disposal of hazardous power plant wastes
16. use of emission and pollution control devices and measures taken to control pollution
17. various safety procedures and equipment used to work at heights, trenches and confined places
18. safe working practices specific to working with electrical equipment and system e.g. lock out/tag out, ptw, etc.

Qualification Pack

19. preventative and remedial actions to be taken in the case of exposure to toxic materialstoxic materials: solvents, flux, lead exposure: ingested, contact with skin, inhaledpreventative action: ventilation, masks, protective clothing/ equipment); remedial action: immediate first aid, report to supervisor
20. importance of using protective clothing/equipment and other insulated work gear while handling electrical system and equipment
21. precautionary measures taken to prevent fire accident
22. various causes of firecauses of fires: heating of metal; spontaneous ignition; sparking; electrical heating; loose fires (smoking, welding, etc.); chemical fires; etc.
23. correct technique(s) of using a fire extinguisher
24. different methods of extinguishing fire
25. different materials used for extinguishing firematerials: sand, water, foam, co2, dry powder
26. emergency rescue techniques applied during a fire hazard
27. various types of safety signs and what they mean
28. appropriate basic first aid treatment relevant to the condition e.g. shock, electrical shock, bleeding, breaks to bones, minor burns, resuscitation, poisoning, eye injuries
29. rescue techniques applied during fire hazards
30. good housekeeping in order to prevent fire hazards
31. correct use of a fire extinguisher
32. how to free a person from electrocution
33. basic techniques of bandaging
34. perform artificial respiration and the cpr process

Generic Skills (GS)

User/individual on the job needs to know how to:

1. write an accident/ incident report in local language and/or english
2. read and comprehend basic content to read labels, charts, signages
3. read and comprehend basic english to read manuals of operation
4. read an accident/ incident report in local language or english
5. question coworkers appropriately in order to clarify instructions and other issues
6. give clear instructions to coworkers and subordinates
7. remain congenial while discussing and debating issues with co-workers
8. follow appropriate protocols for communication based on situation, hierarchy, organizational culture and practice
9. ask for, provide and receive required assistance where possible to ensure achievement of work-related objectives
10. follow organizational rule-based decision-making process
11. take decisions with systematic course of actions and/or response
12. plan and organize their own work schedule, work area, tools, equipment and materials to maintain decorum and for improved productivity
13. build customer relationships and use customer centric approach

Qualification Pack

14. think through the problem, evaluate the possible solution(s) and suggest an optimum /best possible solution(s)
15. seek appropriate assistance from other sources to resolve problems
16. report problems that cannot be resolved to the appropriate authority
17. identify cause and effect relations in own area of work
18. work systematically and logically to resolve the issues, identify the cause and anticipate unexpected results
19. critically evaluate the organizational processes to improve them

Qualification Pack

PSS/N1336: Working effectively with others

Description

This unit covers basic etiquette and competencies that a candidate is required to possess and demonstrate in their behavior and interactions with others at the workplace. These cover areas such as communication etiquette, discipline, listening, handling conflict and grievances.

Elements and Performance Criteria

working with others

To be competent, the user/individual on the job must be able to:

- PC1.** accurately receive information and instructions from the supervisor and fellow workers, getting clarification where required
- PC2.** accurately pass on information to authorized persons who require it and within agreed timescale and confirm its receipt
- PC3.** give information to others clearly, at a pace and in a manner that helps them to understand
- PC4.** display helpful behavior by assisting others in performing tasks in a positive manner, where required and possible
- PC5.** consult with and assist others to maximize effectiveness and efficiency in carrying out tasks
- PC6.** display appropriate communication etiquette while working
- PC7.** display active listening skills while interacting with others at work
- PC8.** use appropriate tone, pitch and language to convey politeness, assertiveness, care and professionalism
- PC9.** demonstrate responsible and disciplined behaviors at the workplace
- PC10.** escalate grievances and problems to appropriate authority as per procedure to resolve them and avoid conflict

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** legislation, standards, policies, and procedures followed in the company relevant to own employment and performance conditions
- KU2.** reporting structure, inter-dependent functions, lines and procedures in the work area
- KU3.** relevant people and their responsibilities within the work area
- KU4.** escalation matrix and procedures for reporting work and employment related issues
- KU5.** various categories of people that one is required to communicate and co-ordinate with in the organization
- KU6.** importance of effective communication in the workplace
- KU7.** importance of teamwork in organizational and individual success
- KU8.** various components of effective communication
- KU9.** key elements of active listening
- KU10.** value and importance of active listening and assertive communication

Qualification Pack

- KU11.** barriers to effective communication
- KU12.** importance of tone and pitch in effective communication
- KU13.** importance of avoiding casual expletives and unpleasant terms while communicating professional circles
- KU14.** how poor communication practices can disturb people, environment and cause problems for the employee, the employer and the customer
- KU15.** importance of ethics for professional success
- KU16.** importance of discipline for professional success
- KU17.** what constitutes disciplined behavior for a working professional
- KU18.** common reasons for interpersonal conflict
- KU19.** importance of developing effective working relationships for professional success
- KU20.** expressing and addressing grievances appropriately and effectively
- KU21.** importance and ways of managing interpersonal conflict effectively

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** note the information communicated by the officer incharge
- GS2.** note down observations (if any) related to the operation/maintenance
- GS3.** read and interpret the process required for different types of manuals
- GS4.** read and interpret the flowchart of all parts of an assembly
- GS5.** read manuals and documents to understand the product-details & how they can be used
- GS6.** discuss task lists, schedules and activities with the colleague/supervisor
- GS7.** effectively communicate with the team members
- GS8.** attentively listen and comprehend the information given by the colleague/supervisor/contractor
- GS9.** communicate clearly with the colleague on the issues faced during query/fault
- GS10.** follow colleague/contractor rule-based decision making process
- GS11.** take decisions with systematic course of actions and/or response
- GS12.** planning and organization of tasks to meet deadlines
- GS13.** build customer relationships and use customer centric approach
- GS14.** seek and comprehend operation related inputs for clarification find ways of modifying difficult operating stages to make it operation friendly
- GS15.** work systematically and logically to resolve the issues and identify causation and anticipate unexpected results. Quick approach and solution towards faults repairing
- GS16.** critically evaluate operation parameters in relation to system normality develop a holistic and comprehensive profile of grid station on segregated discrete processes

Qualification Pack

PSS/N1705: Perform operations of water treatment plant

Description

This unit is about various activities performed by an operator at a water treatment plant to ensure effective water treatment.

Scope

This unit/ task covers the following:

- Operate all equipment of water treatment plant
- Perform post-operation and inspection activities

Elements and Performance Criteria

Perform operations of water treatment plant

To be competent, the user/individual on the job must be able to:

- PC1.** operate all equipment in the water treatment plant viz. valves, flash mixer, clariflocculator, filter bed, sump, demineralized water plant etc.
- PC2.** carry out operations of filtering and chemical treatment equipment to purify and clarify water, dispose of sewage etc., for production of demineralized water (dm)
- PC3.** monitor operating conditions, record instruments and gauges reading /operation data in the daily log sheets and maintain records
- PC4.**
 - carry out timely maintenance of the water treatment plant systems and its equipments
 - filters, tanks, gauges, pump, and valves etc.
- PC5.** monitor process and equipment for removal of dissolved undissolved, physical and organic impurities causing temporary hardness and permanent hardness
- PC6.** ensure pre-treatment of water through various type of equipment installed viz. peripheral clariflocculator and associated equipment filter bed viz. gravity filter beds, pressure filter beds etc.
- PC7.** operate the ion exchangers viz. anion exchanger, cation exchanger and mixed bed exchanger
- PC8.** ensure availability of chemicals used in water treatment plant and for neutralization of waste water
- PC9.** operate pumps, valves etc. for implying/ cleaning process of sludge tank
- PC10.** identify/ notice sounds, in leakages in pumps, faults in valves, filter beds etc.
- PC11.** take necessary precaution about hazards of chemicals used in water treatment plant and maintain the work area as per procedure and operation specification
- PC12.** conduct regular inspections and record reading and findings accurately/ clearly in required ledgers, forms and formats, log books as per required and approved procedures as per instructions
- PC13.** ensure the work area is in a safe and tidy condition on completion of the job/ inspection and testing activities

Qualification Pack

- PC14.** monitor the problems and keep the relevant people informed about progress or any delays in resolving the problem, and take guidance from relevant people
- PC15.** refer unresolved job-related problems to appropriate personnel for support
- PC16.** identify potential safety hazards, including fire, chlorine leakage or explosive hazards and take immediate action to correct the hazard, ensuring the safety of working personnel and report the situation to relevant personnel on site

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

1. relevant legislation, standards, policies, and procedures followed in the organization relevant to own employment and performance conditions
2. relevant health and safety requirements applicable in the work place
3. own job role and responsibilities and sources for information pertaining to employment terms, entitlements, job role and responsibilities
4. how to engage with specialists for support in order to resolve incidents and service requests
5. importance of working in a clean environment and safe practices and procedures
6. reporting structure, inter-dependent functions, lines and procedures in the work area
7. relevant people and their responsibilities within the work area
8. escalation matrix and procedures for reporting work and employment
9. types of filter bed Types of filter bed: Gravity filter beds, pressure filter beds etc
10. types of ion exchanger Ion exchangers: Anion exchanger, cation exchanger and mixed bed exchanger
11. water sampling and testing techniques, inspection procedures
12. chemical (cationic, anionic & mixed) and physical impurities (ph, turbidity) present in water
13. operations of various units in a water treatment system such as dm, pt, cwt, chlorination system and et plants
14. chemicals used in plant (chlorine, pac), process of sedimentation and
15. desludging carried out in clariflocculator tank
16. types of clariflocculator tank: peripheral & central turbine
17. types of filters used in a water treatment plant Filter types: gravity filter beds, pressure filter beds etc.
18. regular and periodic inspection for unusual sound in pumps, leakages in pipes, soil in filter beds, back wash of filter beds
19. process of de-mineralization (dm) carried out in a dm plant
20. types of ion exchangers used in a dm plant Types of ion exchangers: Cation exchanger, anion exchanger, mixed exchanger
21. mechanical, plumbing, heating and electrical systems
22. water plant operation and maintenance including pumps, valves, chemical treatment systems, etc.
23. water and sewer distribution and collection systems including pipes, water mains, manholes, hydrants, etc.

Qualification Pack

24. specific health and safety precautions which must be taken when carrying out water treatment plant equipments inspection work
25. operating guidelines and ensure that plant operations are in compliance with them
26. tools and equipment used in testing, repair and maintenance such as pliers, screwdriver, wrench set, hammer, drilling machine, measuring tape, tommy bar, (discharge rod), leakage current monitoring kit
27. isolation of system during emergency situations and steps to be taken
28. importance of leaving the work area and equipment in a safe and clean condition on completion of the repair and maintenance activities
29. importance of reporting problems in a timely manner
30. personal protective equipment (ppe) and clothing that must be worn during the inspection, repair and maintenance activity and from where can it be obtained
31. how to work on a computer

Generic Skills (GS)

User/individual on the job needs to know how to:

1. communicate effectively with other operators and plant personnel and write the information communicated by the in-charge of work
2. write about the technical problems and other conditions of site accurately
3. note testing repair observations and critical points
4. prepare and fill up all technical forms and data as per guidelines and format
5. read and correctly interpret written sentences and paragraphs
6. execute written instructions and relay instructions to follow-on shifts when multishift operations are used
7. read and correctly interpret units of metric system for all measurements
8. read and correctly interpret the process required for performing work
9. read and correctly interpret the rules and methods from policy and procedure documents
10. reading equipment manuals and understanding the equipment operation and process requirement
11. communicate clearly with team and other staff members
12. execute written instructions and relay instructions to follow-on shifts when multishift operations are used
13. discuss task lists, schedules and activities
14. make appropriate work-related judgments based on policy and procedures
15. identify complex problems and review related information to develop and evaluate solutions
16. follow organizations rule-based decision-making process
17. plan and organize tasks to meet quantity and quality specifications and targets
18. build customer relationships and use customer centric approach in taking decisions
19. identify problems and review related information to develop and evaluate options and implement solutions
20. monitor problem solving to take corrective action with individuals and organizations

Qualification Pack

21. analyse problems and changes in conditions, operations, and the environment to solve problems
22. analyse the problems in the equipment to identify root causes
23. collect information and technical data and define process for equipment testing
24. analyse the problem and required actions to resolve them to determine which issues are to be escalated, and to whom
25. develop holistic and comprehensive profile of products based on segregated discrete process stages
26. critically evaluate operation parameters in relation to product features intended to ensure a match

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Perform operations of water treatment plant</i>	30	70	-	-
PC1. operate all equipment in the water treatment plant viz. valves, flash mixer, clariflocculator, filter bed, sump, demineralized water plant etc.	3	6	-	-
PC2. carry out operations of filtering and chemical treatment equipment to purify and clarify water, dispose of sewage etc., for production of demineralized water (dm)	3	6	-	-
PC3. monitor operating conditions, record instruments and gauges reading /operation data in the daily log sheets and maintain records	2	4	-	-
PC4. • carry out timely maintenance of the water treatment plant systems and its equipments • filters, tanks, gauges, pump, and valves etc.	2	6	-	-
PC5. monitor process and equipment for removal of dissolved undissolved, physical and organic impurities causing temporary hardness and permanent hardness	2	5	-	-
PC6. ensure pre-treatment of water through various type of equipment installed viz. peripheral clariflocculator and associated equipment filter bed viz. gravity filter beds, pressure filter beds etc.	1	3	-	-
PC7. operate the ion exchangers viz. anion exchanger, cation exchanger and mixed bed exchanger	2	5	-	-
PC8. ensure availability of chemicals used in water treatment plant and for neutralization of waste water	1	3	-	-
PC9. operate pumps, valves etc. for implying/ cleaning process of sludge tank	2	5	-	-
PC10. identify/ notice sounds, in leakages in pumps, faults in valves, filter beds etc.	1	3	-	-

Qualification Pack

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC11. take necessary precaution about hazards of chemicals used in water treatment plant and maintain the work area as per procedure and operation specification	2	4	-	-
PC12. conduct regular inspections and record reading and findings accurately/ clearly in required ledgers, forms and formats, log books as per required and approved procedures as per instructions	2	6	-	-
PC13. ensure the work area is in a safe and tidy condition on completion of the job/ inspection and testing activities	1	3	-	-
PC14. monitor the problems and keep the relevant people informed about progress or any delays in resolving the problem, and take guidance from relevant people	2	4	-	-
PC15. refer unresolved job-related problems to appropriate personnel for support	2	3	-	-
PC16. identify potential safety hazards, including fire, chlorine leakage or explosive hazards and take immediate action to correct the hazard, ensuring the safety of working personnel and report the situation to relevant personnel on site	2	4	-	-
NOS Total	30	70	-	-

Qualification Pack

National Occupational Standards (NOS) Parameters

NOS Code	PSS/N1705
NOS Name	Perform operations of water treatment plant
Sector	Power
Sub-Sector	Generation
Occupation	Operation & Maintenance - Generation
NSQF Level	4
Credits	TBD
Version	1.0
Last Reviewed Date	11/03/2019
Next Review Date	11/03/2023
NSQC Clearance Date	22/08/2019

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

- 1.Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
4. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
5. In case of successfully passing only certain number of NOSs, the trainee is eligible to take subsequent assessment on the balance NOS's to pass the Qualification Pack.
6. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

Qualification Pack

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Compulsory NOS

National Occupational Standards	Theory Marks	Practical Marks	Project Marks	Viva Marks	Total Marks	Weightage
PSS/N1331.Apply basic health and safety practices for power related work	30	70	-	-	100	15
PSS/N1336.Working effectively with others	30	70	-	-	100	5
PSS/N1705.Perform operations of water treatment plant	30	70	-	-	100	80
Total	90	210	-	-	300	100

Qualification Pack

Acronyms

NOS	National Occupational Standard(s)
NSQF	National Skills Qualifications Framework
QP	Qualifications Pack
TVET	Technical and Vocational Education and Training
CPR	Cardiopulmonary Resuscitation
PPE	Personal Protective Equipment
DM	Demineralization
DO	Dissolved Oxygen
PT	Physical Treatment
CWT	Centralized Waste Treatment
ET	Effluent Treatment
PAC	Poly-Aluminium Chloride

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
