## Qualification Pack

### PSS/N1331: Apply basic health and safety practices for power related work

#### Description

This unit covers health, safety and security for power related work. This includes procedures and practices that candidates need to follow to help maintain a healthy, safe and secure work environment in a power plant, power station/substation or on the field while working on power equipment. It covers responsibilities towards self, others, assets and the environment

#### Scope

This unit/task covers the following:

- Follow workplace health and safety practices
- Follow fire safety practices
- Follow emergencies, rescue and first-aid procedures

#### Elements and Performance Criteria

##### *Follow workplace health and safety practices*

To be competent, the user/individual on the job must be able to:

- PC1.** • use protective clothing/equipment for specific tasks and work conditions  
Protective Clothing  
• leather or asbestos gloves, flame proof aprons, flame proof overalls buttoned to neck, cuff less (without folds) trousers, reinforced footwear, helmets/hard hats, cap and shoulder covers, ear defenders/plugs, safety boots, knee pads, particle masks, glasses/goggles/visor  
equipment: hand and face shields, machine guards, residual current devices, shields, dust sheets, respirator
- PC2.** identify job-site hazards and possible causes of risks/accident at the workplace  
Hazards- electrical hazards; sharp edged and heavy tools; heated metals; oxyfuel and gas cylinders; welding radiation; hazardous surfaces; hazardous substances; physical hazards  
possible causes of risk and accident: physical actions; not following instructions; inattention; sickness and incapacity; health; not taking safety precautions
- PC3.** follow procedures for safe working with electrical equipment  
Safe Working Procedures: tag out/lock out, ptw (permit to work)
- PC4.** follow warning signs while working with electrical systems  
Warning Signs: danger, high voltage area, out of service, etc
- PC5.** use standard safe working practices when working at heights, confined areas and trenches
- PC6.** test any electrical equipment and system using insulated testing devices before touching them
- PC7.** ensure positive isolation of electrical equipment & system as per the given standards
- PC8.** identify any abnormalities in electrical equipment or system installed alarm and/or noticing parameters from gauge/ indicator installed  
Parameters: temperature, pressure, flow and current

## Qualification Pack

- PC9.** follow safe working practices while working in hazardous conditions to ensure the safety of self and others  
Safe Working Practices: using ppe; installing and reading safety signs; handle tools in the correct manner and store and maintain them properly; keep work area clear of clutter; while working with electricity take all electrical precautions; safe lifting and carrying practices; use equipment that is working properly and is well maintained; take due measures for safety while working at heights, etc. take due measures for safety while working in confined spaces or trenches, etc.
- PC10.** use various methods of accident prevention in the work environment  
Methods of Accident Prevention: training in health and safety procedures; using health and safety procedures; use of equipment and working practices; safety notices, advice; instruction from colleagues and supervisors
- PC11.** identify and retrieve general health and safety equipment in the workplace  
General Health and Safety Equipment: fire extinguishers; first aid equipment; safety instruments and clothing etc.
- PC12.** set up and use scaffolds, elevated platforms and ladders safely  
Set up: firm/level base, clip/lash down, leaning at the correct angle, appropriate load as per capacity, etc
- PC13.** inspect scaffolds, elevated platforms and ladders for faults and rectify them  
Faults: corrosion of metal components, deterioration, splits and cracks in timber components, imbalance, loose rungs, missing/ unfixed nuts or bolts, etc.
- PC14.** lift, carry and transport heavy objects & tools safely using correct procedures from storage to the workplace and vice versa
- PC15.** inspect power plant and its equipment routinely for any signs of oil, water and steam leakage
- PC16.** store flammable materials and machine lubricating oil safely and correctly
- PC17.** check that the emission and pollution control devices are working properly in line with environmental policy standards
- PC18.** use good housekeeping practices at all times  
Good Housekeeping Practices: clean/tidy work area, removal/disposal of waste material, protect surfaces
- PC19.** identify common hazard signs displayed in various areas  
Various Areas: chemical containers; equipment; packages; inside buildings; open areas and public spaces, etc.
- PC20.** inform the relevant authorities about any abnormal situation/behavior of any equipment/system without delay

### *Follow fire safety practices*

To be competent, the user/individual on the job must be able to:

- PC21.** use various appropriate fire extinguishers for different types of fires correctly  
Types of Fires: class a, b, c, d and e
- PC22.** use appropriate rescue techniques during fire hazard
- PC23.** maintain good housekeeping in order to prevent fire hazards
- PC24.** use a fire extinguisher correctly in case of fire

### *Follow emergencies, rescue and first-aid procedures*

To be competent, the user/individual on the job must be able to:

- PC25.** administer appropriate first aid to the victims for the relevant injuries  
Injuries: bleeding, burns, choking, electric shock, poisoning etc.
- PC26.** act promptly and appropriately to an accident situation or medical emergency in real or simulated environments

## Qualification Pack

- PC27.** perform and organise loss minimization or rescue activity during an accident in real or simulated environments
- PC28.** administer basic first aid including cpr to the victims of heart or cardiac arrest due to electric shock, before the arrival of emergency services
- PC29.** demonstrate basic emergency procedures during emergency mock drills for better understanding of procedures applied in emergencies  
Emergency Procedures: raising alarm, safe/efficient evacuation, correct ways of escape, correct assembly point, roll call, correct return to work
- PC30.** free an affected person from electrocution safely as per the recommended procedure
- PC31.** move injured people and others to a safe place during emergencies
- PC32.** write an incident report or dictate a report to another person, and send report to the authorized person  
Incident Report Includes Details of: name, date/time of incident, date/time of report, location, environment conditions, persons involved, sequence of events, injuries sustained, damage sustained, actions taken, witnesses, supervisor/manager notified

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

1. names (and job titles if applicable), and where to find, all the people responsible for health and safety in a workplace
2. names and location of documents that refer to health and safety in the workplace
3. names and location of people responsible for health and safety in the workplace
4. documents that refer to health and safety in the workplace  
documents: fire notices, accident reports, safety instructions for equipment and procedures, company notices and documents, legal documents (e.g. government notices)
5. meaning of hazards and risks
6. health and safety hazards commonly present in the work environment and related precautions
7. possible causes of risk, hazard or accident in the workplace and why risk and/or accidents are possible
8. possible causes of risk and accident  
possible causes of risk and accident: physical actions; not following instructions; inattention; sickness and incapacity (such as drunkenness); health hazards (such as untreated injuries and contagious illness); not taking safety precautions
9. methods of accident prevention
10. safe working practices when working with tools and machines
11. safe working practices while working at various hazardous sites
12. where to find all the general health and safety equipment in the workplace
13. various dangers associated with the use of electrical equipment
14. positive isolation of electrical equipment and system
15. safe handling and disposal of hazardous power plant wastes
16. use of emission and pollution control devices and measures taken to control pollution
17. various safety procedures and equipment used to work at heights, trenches and confined places
18. safe working practices specific to working with electrical equipment and system e.g. lock out/tag out, ptw, etc.

## Qualification Pack

19. preventative and remedial actions to be taken in the case of exposure to toxic materialstoxic materials: solvents, flux, lead exposure: ingested, contact with skin, inhaledpreventative action: ventilation, masks, protective clothing/ equipment); remedial action: immediate first aid, report to supervisor
20. importance of using protective clothing/equipment and other insulated work gear while handling electrical system and equipment
21. precautionary measures taken to prevent fire accident
22. various causes of firecauses of fires: heating of metal; spontaneous ignition; sparking; electrical heating; loose fires (smoking, welding, etc.); chemical fires; etc.
23. correct technique(s) of using a fire extinguisher
24. different methods of extinguishing fire
25. different materials used for extinguishing firematerials: sand, water, foam, co2, dry powder
26. emergency rescue techniques applied during a fire hazard
27. various types of safety signs and what they mean
28. appropriate basic first aid treatment relevant to the condition e.g. shock, electrical shock, bleeding, breaks to bones, minor burns, resuscitation, poisoning, eye injuries
29. rescue techniques applied during fire hazards
30. good housekeeping in order to prevent fire hazards
31. correct use of a fire extinguisher
32. how to free a person from electrocution
33. basic techniques of bandaging
34. perform artificial respiration and the cpr process

## Generic Skills (GS)

User/individual on the job needs to know how to:

1. write an accident/ incident report in local language and/or english
2. read and comprehend basic content to read labels, charts, signages
3. read and comprehend basic english to read manuals of operation
4. read an accident/ incident report in local language or english
5. question coworkers appropriately in order to clarify instructions and other issues
6. give clear instructions to coworkers and subordinates
7. remain congenial while discussing and debating issues with co-workers
8. follow appropriate protocols for communication based on situation, hierarchy, organizational culture and practice
9. ask for, provide and receive required assistance where possible to ensure achievement of work-related objectives
10. follow organizational rule-based decision-making process
11. take decisions with systematic course of actions and/or response
12. plan and organize their own work schedule, work area, tools, equipment and materials to maintain decorum and for improved productivity
13. build customer relationships and use customer centric approach

## Qualification Pack

14. think through the problem, evaluate the possible solution(s) and suggest an optimum /best possible solution(s)
15. seek appropriate assistance from other sources to resolve problems
16. report problems that cannot be resolved to the appropriate authority
17. identify cause and effect relations in own area of work
18. work systematically and logically to resolve the issues, identify the cause and anticipate unexpected results
19. critically evaluate the organizational processes to improve them

## Qualification Pack

## Qualification Pack

### PSS/N1336: Working effectively with others

#### Description

This unit covers basic etiquette and competencies that a candidate is required to possess and demonstrate in their behavior and interactions with others at the workplace. These cover areas such as communication etiquette, discipline, listening, handling conflict and grievances.

#### Elements and Performance Criteria

##### *working with others*

To be competent, the user/individual on the job must be able to:

- PC1.** accurately receive information and instructions from the supervisor and fellow workers, getting clarification where required
- PC2.** accurately pass on information to authorized persons who require it and within agreed timescale and confirm its receipt
- PC3.** give information to others clearly, at a pace and in a manner that helps them to understand
- PC4.** display helpful behavior by assisting others in performing tasks in a positive manner, where required and possible
- PC5.** consult with and assist others to maximize effectiveness and efficiency in carrying out tasks
- PC6.** display appropriate communication etiquette while working
- PC7.** display active listening skills while interacting with others at work
- PC8.** use appropriate tone, pitch and language to convey politeness, assertiveness, care and professionalism
- PC9.** demonstrate responsible and disciplined behaviors at the workplace
- PC10.** escalate grievances and problems to appropriate authority as per procedure to resolve them and avoid conflict

#### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** legislation, standards, policies, and procedures followed in the company relevant to own employment and performance conditions
- KU2.** reporting structure, inter-dependent functions, lines and procedures in the work area
- KU3.** relevant people and their responsibilities within the work area
- KU4.** escalation matrix and procedures for reporting work and employment related issues
- KU5.** various categories of people that one is required to communicate and co-ordinate with in the organization
- KU6.** importance of effective communication in the workplace
- KU7.** importance of teamwork in organizational and individual success
- KU8.** various components of effective communication
- KU9.** key elements of active listening
- KU10.** value and importance of active listening and assertive communication

## Qualification Pack

- KU11.** barriers to effective communication
- KU12.** importance of tone and pitch in effective communication
- KU13.** importance of avoiding casual expletives and unpleasant terms while communicating professional circles
- KU14.** how poor communication practices can disturb people, environment and cause problems for the employee, the employer and the customer
- KU15.** importance of ethics for professional success
- KU16.** importance of discipline for professional success
- KU17.** what constitutes disciplined behavior for a working professional
- KU18.** common reasons for interpersonal conflict
- KU19.** importance of developing effective working relationships for professional success
- KU20.** expressing and addressing grievances appropriately and effectively
- KU21.** importance and ways of managing interpersonal conflict effectively

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** note the information communicated by the officer incharge
- GS2.** note down observations (if any) related to the operation/maintenance
- GS3.** read and interpret the process required for different types of manuals
- GS4.** read and interpret the flowchart of all parts of an assembly
- GS5.** read manuals and documents to understand the product-details & how they can be used
- GS6.** discuss task lists, schedules and activities with the colleague/supervisor
- GS7.** effectively communicate with the team members
- GS8.** attentively listen and comprehend the information given by the colleague/supervisor/contractor
- GS9.** communicate clearly with the colleague on the issues faced during query/fault
- GS10.** follow colleague/contractor rule-based decision making process
- GS11.** take decisions with systematic course of actions and/or response
- GS12.** planning and organization of tasks to meet deadlines
- GS13.** build customer relationships and use customer centric approach
- GS14.** seek and comprehend operation related inputs for clarification find ways of modifying difficult operating stages to make it operation friendly
- GS15.** work systematically and logically to resolve the issues and identify causation and anticipate unexpected results. Quick approach and solution towards faults repairing
- GS16.** critically evaluate operation parameters in relation to system normality develop a holistic and comprehensive profile of grid station on segregated discrete processes

### PSS/N2101: Monitor and inspect installation of street lights

#### Description

This unit is about supervision of street light installation and maintenance activities by a street light supervisor.

#### Scope

This unit/ task covers the following:

- Monitor installation of street lights
- Lay the underground cable

#### Elements and Performance Criteria

##### *Monitor installation of street lights*

To be competent, the user/individual on the job must be able to:

- PC1.** check proper functioning of street light installation-pole, junction box(jb), fixture, cable etc. for all lightning devices including led light
- PC2.** ensure correct replacement and retrofit of existing light and street light components with led lights
- PC3.** set the control switch and time for automatic switch off and switch on
- PC4.** ensure safe wiring and connections for erection of led street light fixture
- PC5.** monitor street light supply from distribution transformer during work in progress
- PC6.** ensure correct installation of protection devices such as surge protection device, over voltage protection and voltage fluctuation
- PC7.** test light fixtures for proper functioning prior to installation
- PC8.** organise resources and manage material handling
- PC9.** report any problems to the engineer for timely resolution

##### *Lay the underground cable*

To be competent, the user/individual on the job must be able to:

- PC10.** monitor and inspect the process of laying cable and termination to ensure compliance with quality specifications

To be competent, the user/individual on the job must be able to:

- PC11.** follow the correct process of cable jointing
- PC12.** check the supply connection from cable and ensure proper earthing and load balancing
- PC13.** troubleshoot problems involving underground electrical wiring
- PC14.** report any problems encountered related to the wiring during layout to the engineer for timely resolution

#### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

## Qualification Pack

1. relevant legislation, standards, policies, and procedures followed in the organization relevant to own employment and performance conditions
2. relevant health and safety requirements applicable in the work place
3. own job role and responsibilities, and sources for information pertaining to employment terms, entitlements, job role and responsibilities for the team
4. reporting structure, inter-dependent functions, lines and procedures in the work area
5. how to engage with approved specialists for support in order to resolve incidents and service requests
6. importance of working in a clean and safe environment
7. relevant people and their responsibilities within the work area
8. escalation matrix and procedures for reporting work and employment related issues
9. common electricity terminology and correct interpretation of the same terminology: e.g. current, voltage, resistance, kilowatt (kw), kilowatt hour(kwh)
10. types of led fixture- wattage wise and lumen level wise of street light
11. technical specification of led lights and associated components
12. various type of protection driver/device surge protection, voltage fluctuation, over voltage etc.
13. technical specification and types of fixture viz sodium vapor lamp, cfl, halogen, led, mercury lamp etc.
14. cabling system for led street light
15. types of led street light poles
16. types and height of led street light
17. wattage wise and lumen level wise details of different types of led light
18. wiring diagrams of led street light
19. operational familiarity with tools and tackles
20. control switch and timer of automatic operation
21. operational knowledge of lux meter and multimeter and other testing equipment
22. importance of reporting problems in a timely manner
23. ratings and specifications of cables, fuses, switches and wires
24. street light lift, its structure and operations
25. how to use appropriate judgment and initiative pertaining to work methods and tools
26. how to use technical manuals, blueprints, schematics, diagrams, plans, specifications,
27. cable continuity test, its purpose and process
28. estimated time, material and equipment needed to complete assignments
29. types of underground cable (3 core) for led street light
30. ratings and specifications of cables, fuses, switches and wires
31. application of quality parameters, quality assessment based on physical parameters

## Generic Skills (GS)

User/individual on the job needs to know how to:

1. note the information communicated by the seniors/engineer

## Qualification Pack

2. write observations related to the process, if any
3. read and correctly interpret the process required for various types of operations
4. read and correctly interpret and process flowchart for all operations
5. read manuals and operation documents to correctly interpret equipment operations procedure and guidelines
6. discuss task lists, schedules and activities with the supervisor
7. effectively communicate with the team members
8. communicate clearly with the customer on the issues faced during query/fault
9. make appropriate work-related judgments based on policy and procedures
10. identify complex problems and review related information to develop and evaluate solutions
11. follow organizations rule-based decision-making process
12. plan and organize tasks to meet quantity and quality specifications and targets
13. build customer relationships and use customer centric approach in taking decisions
14. identify problems and review related information to develop and evaluate options and implement solutions
15. monitor problem solving to take corrective action with individuals and organizations
16. analyse problems and changes in conditions, operations, and the environment to solve problems
17. analyse the problems in the equipment to identify root causes
18. collect information and technical data and define process for equipment testing
19. analyse the problem and required actions to resolve them to determine which issues are to be escalated, and to whom
20. critically evaluate operation parameters in relation to product features intended to ensure a match

## Qualification Pack

### Assessment Criteria

| Assessment Criteria for Outcomes                                                                                                                            | Theory Marks | Practical Marks | Project Marks | Viva Marks |

## Qualification Pack

### PSS/N2102: Operate and maintain street lights

#### Description

This unit is about the operation, maintenance and repairing work of street light system.

#### Scope

This unit/task covers the following:

- conduct primary inspection for maintenance
- monitor testing of the system
- perform repairing and replacement

#### Elements and Performance Criteria

##### *Conduct primary inspection for maintenance*

To be competent, the user/individual on the job must be able to:

- PC1.** check the led fixture and its driver for any faults
- PC2.** check all the intersections and joints (junction box) in the wiring/cable
- PC3.** monitor workmen's checking of the on-off switch or mcb for following of correct procedures
- PC4.** check the led light and its component visually
- PC5.** ensure correct process of the conduit, cables and other undergoing devices to perform maintenance work is followed
- PC6.** monitor workmen's checking of the lux level for accuracy, effectiveness and compliances

##### *Monitor testing of the system*

To be competent, the user/individual on the job must be able to:

- PC7.** monitor testing of equipment like tester, multimeter, lux meter, wire, bulb etc. for effectiveness and compliance
- PC8.** monitor the testing of the supply across the on-off switch and across the all joints and intersections
- PC9.** test lamp head by multimeter or tester for checking the continuity of supply
- PC10.** monitor the testing of the fixture and other parts of street light system

##### *Perform repairing and replacement*

To be competent, the user/individual on the job must be able to:

- PC11.** maintain, repair or replace photoelectric control relay and surge protection device for lighting system
- PC12.** monitor troubleshooting and problem-solving activities involving underground electrical wiring for effectiveness and compliances
- PC13.** monitor repairing, replacement or modification of various street light equipment following the organizational and standard procedure
- PC14.** monitor general electrical repair and repair of electronic or electrical devices/equipment to ensure proper functioning of street lights

## Qualification Pack

### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

1. relevant legislation, standards, policies, and procedures followed in the organization relevant to own employment and performance conditions
2. relevant health and safety requirements applicable in the work place
3. own job role and responsibilities and sources for information pertaining to employment terms, entitlements, job role and responsibilities
4. reporting structure, inter-dependent functions, lines and procedures in the work area
5. how to engage with approved specialists for support in order to resolve incidents and service requests
6. relevant people and their responsibilities within the work area
7. escalation matrix and procedures for reporting work and employment related issues
8. common electricity terminology and correct interpretation of the same
9. terminology: e.g. current, voltage, resistance, kilowatt (kw), kilowatt hour(kwh)
10. types of led fixture- wattage wise and lumen level wise of street light
11. technical specification of led lights and associated components
12. various type of protection driver/device surge protection, voltage fluctuation, over voltage etc.
13. cabling system for led street light
14. various types/heights of led street light poles
15. control switch and timer of automatic operation
16. operational knowledge of lux meter and multimeter and other testing equipment
17. electrical and road safety measures
18. how to interpret wiring diagrams
19. importance of reporting problems in a timely manner
20. ratings and specifications of cables, fuses, switches and wires
21. street light lift, its structure and operations
22. use of appropriate judgment and initiative pertaining to work methods and tools
23. technical manuals, blueprints, schematics, diagrams, plans, specifications
24. estimate time, material and equipment needed to complete assignments
25. lux level measurement procedure
26. recommended levels of illumination on various group/type of roads
27. troubleshooting for non-working of fixture
28. troubleshooting of fixture failure
29. importance of working in a clean and safe environment

### Generic Skills (GS)

User/individual on the job needs to know how to:

1. note the information communicated by the seniors/engineer

## Qualification Pack

2. write observations related to the process, if any
3. read and correctly interpret the process required for various types of operations
4. read and correctly interpret and process flowchart for all operations
5. read manuals and operation documents to correctly interpret equipment operations procedure and guidelines
6. discuss task lists, schedules and activities with the supervisor
7. effectively communicate with the team members
8. communicate clearly with the customer on the issues faced during query/fault
9. make appropriate work-related judgments based on policy and procedures
10. identify complex problems and review related information to develop and evaluate solutions
11. follow organizations rule-based decision-making process
12. plan and organize tasks to meet quantity and quality specifications and targets
13. build customer relationships and use customer centric approach in taking decisions
14. identify problems and review related information to develop and evaluate options and implement solutions
15. monitor problem solving to take corrective action with individuals and organizations
16. analyse problems and changes in conditions, operations, and the environment to solve problems
17. analyse the problems in the equipment to identify root causes
18. collect information and technical data and define process for equipment testing
19. analyse the problem and required actions to resolve them to determine which issues are to be escalated, and to whom
20. critically evaluate operation parameters in relation to product features intended to ensure a match

## Qualification Pack

## Assessment Guidelines and Assessment Weightage

### Assessment Guidelines

- 1.Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
4. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
5. In case of successfully passing only certain number of NOSs, the trainee is eligible to take subsequent assessment on the balance NOS's to pass the Qualification Pack.
6. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack

### Minimum Aggregate Passing % at QP Level : 70

## Qualification Pack

**(Please note:** Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

### Glossary

|                                              |                                                                                                                                                                                                                                                                                                  |
|----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Sector</b>                                | Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.                                                                      |
| <b>Sub-sector</b>                            | Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.                                                                                                                                                                                     |
| <b>Occupation</b>                            | Occupation is a set of job roles, which perform similar/ related set of functions in an industry.                                                                                                                                                                                                |
| <b>Job role</b>                              | Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.                                                                                                                                                                                |
| <b>Occupational Standards (OS)</b>           | OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts. |
| <b>Performance Criteria (PC)</b>             | Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.                                                                                                                                                                    |
| <b>National Occupational Standards (NOS)</b> | NOS are occupational standards which apply uniquely in the Indian context.                                                                                                                                                                                                                       |
| <b>Qualifications Pack (QP)</b>              | QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.                                                                                                                       |
| <b>Unit Code</b>                             | Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'                                                                                                                                                                                                        |
| <b>Unit Title</b>                            | Unit title gives a clear overall statement about what the incumbent should be able to do.                                                                                                                                                                                                        |
| <b>Description</b>                           | Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.                                                                                                                   |
| <b>Scope</b>                                 | Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.                                                                                            |

## Qualification Pack

|                                         |                                                                                                                                                                                                                                                                                                                                                                        |
|-----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Knowledge and Understanding (KU)</b> | Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.                                                                                                                                               |
| <b>Organisational Context</b>           | Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.                                                                                                                                                                       |
| <b>Technical Knowledge</b>              | Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.                                                                                                                                                                                                                                                               |
| <b>Core Skills/ Generic Skills (GS)</b> | Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles. |
| <b>Electives</b>                        | Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.                                                                            |
| <b>Options</b>                          | Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.                                                                                                                                                          |
