PSS/Q2419: Bijli Mistry

Brief Job Description

The incumbent in the job is responsible for maintenance services on a diverse range of services, including LV electrical distribution equipment, General & Emergency Lighting, LV power, Motors, Pumps, Domestic Appliances and Control Systems. The role of the Bijli Mistry is to undertake both planned and reactive maintenance and repair tasks across the range of electrical building services, plant and equipment across and to be able to undertake their electrical work effectively.

Personal Attributes

The individual must be physically fit, attentive to detail, and capable of working in both indoor and outdoor environments. They should demonstrate strong problem-solving skills, technical aptitude, and the ability to perform tasks safely under minimal supervision. Good communication skills, teamwork, a customer-oriented approach, and a strong sense of responsibility and discipline are essential for ensuring efficient maintenance and repair services.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [PSS/N1336: Working effectively with others](#)
2. [PSS/N2418: Carry out power supply installation and maintenance](#)
3. [PSS/N2419: Install, repair, and maintenance of household electrical gadgets including solar panels and solar water pumps](#)
4. [PSS/N2420: Carry out installation and maintenance of street lighting system](#)
5. [PSS/N2421: Operation and Maintenance of Diesel Generator Set](#)
6. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)
7. [PSS/N1337: Apply Basic Health and Safety Practices for Power Related Work](#)

PSS/N1336: Working effectively with others

Description

This unit covers basic practices that improve effectiveness of working with others in an organizational set-up

Scope

The scope covers the following :

- Work effectively with others
- Respect diversity

Elements and Performance Criteria

Work effectively with others

To be competent, the user/individual on the job must be able to:

- PC1.** accept information and instructions from the supervisor and fellow workers and seek clarification when required
- PC2.** pass the information to the persons to all those concerns within agreed timeframe in a manner they can understand and confirm its receipt
- PC3.** help & assist fellow workers in performing their tasks in a positive manner so as to maximize efficiency
- PC4.** use appropriate tone, pitch and language while communicating to convey politeness, assertiveness, care and professionalism
- PC5.** listen attentively and respond appropriately while interacting with others at work
- PC6.** act responsibly and demonstrate disciplined behaviour at the workplace (Disciplined behaviour: Punctuality, completing tasks within agreed timescales, ensuring quality standards, not gossiping and wasting time, honesty, etc.)
- PC7.** escalate grievances and problems to the appropriate authority as per the organizational procedure to resolve them and avoid conflict

Respect diversity

To be competent, the user/individual on the job must be able to:

- PC8.** respect gender diversity in the workplace
- PC9.** use respectful verbal, non-verbal and written communication that is gender, disability and culturally inclusive
- PC10.** communicate with everyone without any personal bias based on gender, disability, caste, religion, colour, sexual orientation and culture
- PC11.** recognize indicators of harassment and discrimination based on gender, disability, caste, religion, colour, sexual orientation and culture at workplace and follow organisational policy for reporting the same

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** legislation, standards, policies, and procedures followed in the company relevant to own employment and performance conditions
- KU2.** reporting structure, inter-dependent functions, lines and procedures in the work area
- KU3.** relevant people and their responsibilities within the work area
- KU4.** escalation matrix and procedures for reporting work and employment related issues
- KU5.** key elements of active listening and assertive communication
- KU6.** importance of teamwork in organizational and individual success
- KU7.** ethics and disciplined behavior for professional success
- KU8.** expressing and addressing grievances appropriately and managing interpersonal conflict effectively
- KU9.** harassment and discrimination based on gender, disability, caste, religion and culture and how to recognize it.
- KU10.** organizational policy/ies for harassment and discrimination

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write clear and legible notes to self, colleagues and seniors to pass messages, keep records, prepare to-do lists, take down instructions
- GS2.** read basic terms and terminologies to accurately interpret work related documents, labels, supervisor instructions in the local language
- GS3.** interact with the supervisor appropriately (correct protocol and manner of speaking) in order to understand the basic requirements of the product, production plans and other associated requirements
- GS4.** display active listening skills while interacting with co-workers and other in the workplace
- GS5.** follow organization's rule-based decision-making process
- GS6.** use appropriate planning to maintain a smooth relationship with fellow team members
- GS7.** meet customer requirements
- GS8.** critically evaluate operation parameters in relation to system normality

PSS/N2418: Carry out power supply installation and maintenance

Description

This module provides the skills and knowledge to install, inspect, and maintain household electrical power supply systems. It includes basic electrical principles, wiring methods, use of protective devices, troubleshooting common faults, and ensuring safety and cleanliness in the work environment.

Scope

The scope covers the following :

- The scope covers installation, inspection, troubleshooting, and maintenance of household electrical power supply systems while ensuring proper safety practices.

Elements and Performance Criteria

Basic concepts of electricity

To be competent, the user/individual on the job must be able to:

- PC1.** Explain basic electrical terms such as voltage, current, resistance, power, and energy with practical relevance to household wiring
- PC2.** Interpret electrical symbols, wiring diagrams, and single-line diagrams
- PC3.** Identify types of electrical supply systems (single-phase, three-phase) and their applications
- PC4.** Explain the significance of earthing, neutral, and phase in an electrical circuit
- PC5.** Calculate simple electrical parameters using Ohm's law and basic formulae

Household power supply installation

To be competent, the user/individual on the job must be able to:

- PC6.** Identify and arrange devices, tools, and equipment required for installation
- PC7.** Select appropriate rating and current-carrying capacity wires, cables, fuse, switches, sockets, MCBs, ELCBs as per requirements
- PC8.** Lay conduit pipe concealed and open wiring, batten, casing-capping, and temporary cleat wiring
- PC9.** Ensure correct selection of protective devices against electric shock and overload
- PC10.** Implement methods of protection from external influences (switchgear, warning signs, danger notices)

Maintenance and troubleshooting

To be competent, the user/individual on the job must be able to:

- PC11.** Inspect and locate faults such as blown fuse, Miniature Circuit Breaker/ Residual Current Device trip, short circuit location
- PC12.** Check for open circuit, overheated switches, sockets, loose contacts, or overloads
- PC13.** Ensure equal load distribution in three-phase wiring in large premises
- PC14.** Check polarity to ensure all switches are connected in phase conductors
- PC15.** Repair or replace faulty parts using correct procedures
- PC16.** Ensure work area is clean and safe after job completion

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Basic electrical terms such as voltage, current, resistance, power, and energy, and their practical application in household wiring.
- KU2.** Electrical symbols, wiring diagrams, and single-line diagrams used in installation and maintenance work.
- KU3.** Types of electrical supply systems (single-phase, three-phase) and their specific applications.
- KU4.** The role and importance of earthing, neutral, and phase conductors in an electrical circuit.
- KU5.** Methods to calculate basic electrical parameters using Ohms law and relevant formulae.
- KU6.** Types, ratings, and applications of wires, cables, fuses, switches, sockets, MCBs, and ELCBs.
- KU7.** Procedures for laying conduit pipe wiring (concealed, open), batten, casing-capping, and temporary cleat wiring.
- KU8.** Selection and application of protective devices to prevent electric shock and overload.
- KU9.** Measures for protection against external influences such as weather, mechanical impact, or accidental contact, including the use of switchgear, warning signs, and danger notices.
- KU10.** Techniques for inspecting and diagnosing faults such as blown fuses, tripped MCB/RCD, short circuits, or open circuits.
- KU11.** Identification of issues like overheated switches, loose contacts, and overload conditions.
- KU12.** Principles of load balancing in three-phase wiring to ensure even distribution.
- KU13.** Procedures for checking polarity and ensuring switches are connected in phase conductors.
- KU14.** Correct repair and replacement methods for faulty components in the power supply system.
- KU15.** Safe handling and use of tools, instruments, and personal protective equipment during installation and maintenance.
- KU16.** Workplace safety practices, including cleaning and restoring the work area after task completion.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Communicate clearly with supervisors, team members, and customers regarding work requirements and progress.
- GS2.** Listen attentively to instructions, technical guidance, and safety briefings.
- GS3.** Work cooperatively with team members during installation, testing, and maintenance tasks.
- GS4.** Identify and report common issues or irregularities in electrical systems promptly.
- GS5.** Handle electrical tools, instruments, and equipment carefully to prevent damage or injury.
- GS6.** Follow structured procedures and adapt to new tasks or technologies as required.
- GS7.** Manage time effectively to complete tasks within agreed schedules.
- GS8.** Remain alert to potential hazards, ensuring personal and workplace safety at all times.
- GS9.** Keep updated with new electrical practices, standards, and tools relevant to the job role.

Qualification Pack

GS10. Maintain determination to resolve faults and complete tasks despite technical challenges.

PSS/N2419: Install, repair, and maintenance of household electrical gadgets including solar panels and solar water pumps

Description

This NOS involves installing, repairing, and maintaining household electrical gadgets, solar panels, and solar water pumps, including site preparation, wiring, safety checks, preventive maintenance, fault repair, testing, and basic troubleshooting as per standards.

Scope

The scope covers the following :

- Installation, repair, and maintenance of household electrical gadgets ensuring safety, reliability, and efficiency.

Elements and Performance Criteria

Installation of household electrical gadgets

To be competent, the user/individual on the job must be able to:

- PC1.** Identify, select, and verify specifications of household gadgets including lights, fans, heaters, mixer grinders, microwave ovens, electric kettles, induction cooktops, toasters, sandwich makers, washing machines, inverters, coolers, doorbells, Motors etc. as per customer/site requirement
- PC2.** Prepare installation site ensuring safety clearances, wiring arrangement, and compliance with standards
- PC3.** Install household gadgets using correct tools, mounting techniques, and wiring methods
- PC4.** Connect household gadgets to supply system following correct wiring diagrams and load ratings
- PC5.** Ensure protective devices (MCB, RCCB, fuses) and earthing are installed and tested
- PC6.** Test the household gadget for safe operation and record installation details

Repair and Maintenance of Electrical Household Gadgets

To be competent, the user/individual on the job must be able to:

- PC7.** Perform preventive maintenance such as cleaning, lubrication, tightening, and inspection of household gadgets
- PC8.** Diagnose common faults such as wiring issues, component failure, overheating, or short circuits
- PC9.** Repair or replace defective parts like switches, wiring, terminals, motors, heating elements, control boards
- PC10.** Test repaired gadgets for functionality, insulation resistance, and safety compliance
- PC11.** Maintain accurate records of repairs, replacements, and maintenance schedules

Installation & Maintenance of Solar Panels and Solar Water Pumps

To be competent, the user/individual on the job must be able to:

- PC12.** Identify specifications, type, and capacity of solar panels/solar water pumps for site requirements

Qualification Pack

- PC13.** Select suitable location, tilt, and orientation for optimal performance
- PC14.** Install and connect solar panels/pumps to controllers, inverters, or direct supply systems
- PC15.** Verify system earthing/grounding and perform insulation resistance tests
- PC16.** Conduct basic troubleshooting and maintenance to ensure reliable performance

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** workplace procedures and guidelines for installation repair and maintenance of electrical household gadgets solar panels and solar water pump
- KU2.** roles and responsibilities of team members and reporting structure
- KU3.** documentation requirements such as job sheets, service reports, and maintenance records
- KU4.** organizational safety, quality, and environmental policies related to electrical work
- KU5.** basic electrical concepts: current, voltage, resistance, power, energy, and load calculation
- KU6.** specifications, ratings, and applications of common household gadgets (lights, fans, heaters, mixer grinders, microwave ovens, washing machines, inverters, motors, etc.)
- KU7.** functioning, installation requirements, and protection devices (MCB, RCCB, fuses, earthing)
- KU8.** common faults and troubleshooting methods in household gadgets
- KU9.** safe use of hand tools, power tools, and measuring instruments (multimeter, megger, clamp meter, etc.)
- KU10.** preventive and corrective maintenance practices for electrical gadgets
- KU11.** solar energy basics, components of solar PV systems, and solar water pumping systems
- KU12.** site selection, orientation, and tilt requirements for solar panels
- KU13.** wiring, connection, and protection requirements for solar installations
- KU14.** procedures for inspection, testing, and commissioning of solar panels and solar water pumps
- KU15.** safety precautions while handling live circuits, rotating machines, heating appliances, and solar equipment
- KU16.** relevant Indian standards, codes of practice, and regulatory guidelines related to household electrical and solar panels and solar water pumps

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret installation manuals, wiring diagrams, and technical specifications
- GS2.** fill job sheets, maintenance logs, and service reports accurately
- GS3.** communicate effectively with customers, supervisors, and team members regarding work requirements and progress
- GS4.** explain the operation and safe usage of household gadgets and solar systems to end users
- GS5.** plan and organize work tasks to complete installation and maintenance within time limits
- GS6.** take decisions on selection of tools, materials, and methods during troubleshooting

Qualification Pack

- GS7.** identify problems such as incorrect wiring, faulty components, or low solar output and apply suitable solutions
- GS8.** work collaboratively with other technicians, electricians, and helpers at the site
- GS9.** demonstrate responsibility towards safety, energy conservation, and environmental sustainability
- GS10.** maintain attention to detail while performing wiring, connections, and testing
- GS11.** adapt to new technologies and continuously learn about upgraded gadgets and solar panels and solar water pumps

PSS/N2420: Carry out installation and maintenance of street lighting system

Description

This NOS involves installing, repairing, and maintaining household electrical gadgets, solar panels, and solar water pumps, including site preparation, wiring, safety checks, preventive maintenance, fault repair, testing, and basic troubleshooting as per standards.

Scope

The scope covers the following :

- Install maintain and repair street lighting safely and as per standards

Elements and Performance Criteria

Installation of street lighting

To be competent, the user/individual on the job must be able to:

- PC1.** Identify type of street lighting poles, luminaires, and control gear
- PC2.** Prepare site and foundation for pole erection
- PC3.** Erect poles and mount luminaires at appropriate height and angle
- PC4.** Connect street lighting fixtures to supply system through junction boxes and control circuits
- PC5.** Install control devices such as timers, photocells, and contactors

Maintenance of street lighting

To be competent, the user/individual on the job must be able to:

- PC6.** Inspect and replace faulty lamps, ballasts, ignitors, and starters
- PC7.** Check and repair wiring, connectors, and junction boxes
- PC8.** Test operation of control devices and adjust settings for optimal performance
- PC9.** Clean luminaires and replace damaged covers or reflectors
- PC10.** Maintain records of maintenance and repair work

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Types of street lighting poles, luminaires, and associated control gear used in different environments.
- KU2.** Procedures for site preparation, marking, and creating foundations for pole erection.
- KU3.** Methods for safe pole erection and correct mounting of luminaires at the specified height and angle.
- KU4.** Wiring techniques for connecting street lighting fixtures through junction boxes and control circuits.
- KU5.** Installation and functioning of control devices such as timers, photocells, and contactors.

Qualification Pack

- KU6.** Common faults in lamps, ballasts, ignitors, and starters, and correct replacement procedures.
- KU7.** Techniques for repairing wiring, connectors, and junction boxes to restore reliable operation.
- KU8.** Testing methods for control devices and adjusting settings to achieve optimal performance.
- KU9.** Cleaning procedures for luminaires and replacement of damaged covers or reflectors.
- KU10.** Safe use of tools, lifting equipment, and personal protective gear during installation and maintenance.
- KU11.** Workplace safety requirements for working at height, near live lines, and in public spaces.
- KU12.** Documentation practices for recording installation, inspection, and repair work as per organizational standards.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Communicate clearly with supervisors, team members, and clients to understand requirements and report work status.
- GS2.** Interpret and follow work instructions, safety procedures, and technical guidelines with minimal supervision.
- GS3.** Coordinate with co-workers to execute installation and maintenance tasks efficiently and safely.
- GS4.** Detect, diagnose, and report common faults in street lighting systems and suggest corrective measures.
- GS5.** Operate and maintain tools, testing instruments, and lifting equipment safely, ensuring accuracy in work.
- GS6.** Adapt to new tools, technologies, and updated procedures related to street lighting systems.
- GS7.** Plan and organize tasks to meet quality standards and complete them within defined timelines.
- GS8.** Remain vigilant about workplace hazards, especially when working at height, in public areas, or near live electrical lines.
- GS9.** Upgrade own knowledge and skills through continuous learning in line with industry practices and standards.
- GS10.** Demonstrate persistence, attention to detail, and problem-solving abilities to complete work with quality and safety.

PSS/N2421: Operation and Maintenance of Diesel Generator Set

Description

This unit is about operating, monitoring, and performing routine maintenance of diesel generator (DG) sets to ensure safe and reliable backup power supply. It covers pre-operation checks, starting/stopping procedures, monitoring performance, carrying out minor maintenance, and ensuring adherence to safety and environmental norms.

Scope

The scope covers the following :

- DG set operation, maintenance, troubleshooting, and safety compliance.

Elements and Performance Criteria

Pre-operation checks of DG set

To be competent, the user/individual on the job must be able to:

- PC1.** check fuel, coolant, lubricating oil, and battery status before starting DG set
- PC2.** inspect belts, wiring, exhaust, and connections for visible faults/leakages
- PC3.** ensure earthing, load connection, and safety devices are in place
- PC4.** record pre-start checklist as per standard procedure

Safe operation and monitoring of DG set

To be competent, the user/individual on the job must be able to:

- PC5.** follow correct procedure to start and stop DG set
- PC6.** monitor load, voltage, frequency, and oil pressure during operation
- PC7.** identify abnormal sounds, vibrations, smoke, or overheating and respond appropriately
- PC8.** ensure DG set operates within permissible parameters and report deviations

Routine maintenance and basic troubleshooting

To be competent, the user/individual on the job must be able to:

- PC9.** perform routine maintenance such as cleaning filters, tightening connections, and topping up fluids
- PC10.** check and replace consumables (oil, filters, coolant) as per schedule
- PC11.** carry out minor repairs and adjustments (belt tension, battery connection)
- PC12.** escalate unresolved technical faults to higher authority/service technician

Adherence to safety, health, and environmental norms

To be competent, the user/individual on the job must be able to:

- PC13.** follow workplace safety procedures while operating DG set
- PC14.** handle fuel and lubricants safely to avoid spillage/fire hazard
- PC15.** ensure proper ventilation and exhaust arrangement during operation
- PC16.** follow environmental norms for noise and emission control

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** workplace procedures for operating and maintaining DG sets
- KU2.** safety guidelines, reporting structure, and emergency protocols
- KU3.** documentation and reporting requirements for DG operation and maintenance
- KU4.** basic principle of working of DG set and its components
- KU5.** types of fuel, lubricants, and coolants used in DG sets
- KU6.** indicators of normal and abnormal operation (noise, vibration, emissions, overheating)
- KU7.** routine maintenance schedule and procedures for DG set
- KU8.** common electrical/mechanical faults in DG set and their remedies
- KU9.** safe handling, storage, and disposal of fuel, oil, and used parts
- KU10.** applicable environmental regulations on DG set usage

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read operation manuals, log sheets, and checklist formats
- GS2.** record operational data and maintenance details in logbook
- GS3.** communicate with supervisors and team members regarding DG set operation/faults
- GS4.** make basic decisions on handling abnormal DG conditions
- GS5.** complete assigned tasks efficiently within time limits
- GS6.** work effectively with colleagues in routine maintenance tasks
- GS7.** apply problem-solving skills in minor DG troubleshooting
- GS8.** demonstrate responsibility towards safety and environment

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Pre-operation checks of DG set</i>	5	12	-	-
PC1. check fuel, coolant, lubricating oil, and battery status before starting DG set	2	4	-	-
PC2. inspect belts, wiring, exhaust, and connections for visible faults/leakages	1	3	-	-
PC3. ensure earthing, load connection, and safety devices are in place	1	3	-	-
PC4. record pre-start checklist as per standard procedure	1	2	-	-
<i>Safe operation and monitoring of DG set</i>	8	19	-	-
PC5. follow correct procedure to start and stop DG set	2	5	-	-
PC6. monitor load, voltage, frequency, and oil pressure during operation	2	5	-	-
PC7. identify abnormal sounds, vibrations, smoke, or overheating and respond appropriately	2	5	-	-
PC8. ensure DG set operates within permissible parameters and report deviations	2	4	-	-
<i>Routine maintenance and basic troubleshooting</i>	8	19	-	-
PC9. perform routine maintenance such as cleaning filters, tightening connections, and topping up fluids	2	5	-	-
PC10. check and replace consumables (oil, filters, coolant) as per schedule	2	5	-	-
PC11. carry out minor repairs and adjustments (belt tension, battery connection)	2	5	-	-
PC12. escalate unresolved technical faults to higher authority/service technician	2	4	-	-
<i>Adherence to safety, health, and environmental norms</i>	9	20	-	-

Qualification Pack

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC13. follow workplace safety procedures while operating DG set	2	5	-	-
PC14. handle fuel and lubricants safely to avoid spillage/fire hazard	2	5	-	-
PC15. ensure proper ventilation and exhaust arrangement during operation	2	5	-	-
PC16. follow environmental norms for noise and emission control	3	5	-	-
NOS Total	30	70	-	-

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

PSS/N1337: Apply Basic Health and Safety Practices for Power Related Work

Description

This unit covers health, safety and security for power related work. This includes procedures and practices that candidates need to follow to help maintain a healthy, safe and secure work environment in a power plant, power station/substation or on the field while working on power equipment. It covers responsibilities towards self, others, organizational assets and the environment.

Scope

The scope covers the following :

- Follow workplace health and safety practices
- Follow fire safety practices
- Follow emergencies, rescue and first-aid procedures

Elements and Performance Criteria

Follow workplace health and safety practices

To be competent, the user/individual on the job must be able to:

- PC1.** use protective clothing/equipment for specific tasks and work conditions (Protective clothing: leather or asbestos gloves, flame proof aprons, flame proof overalls buttoned to neck, cuff less (without folds) trousers, reinforced footwear, helmets/hard hats, cap and shoulder covers, ear defenders/plugs, safety boots, knee pads, particle masks, glasses/goggles/visors) (Equipment: hand and face shields, machine guards, residual current devices, shields, dust sheets, respirator)
- PC2.** identify job-site hazards and possible causes of risks/accident at the workplace (Hazards: electrical hazards, sharp edged and heavy tools, heated metals, oxyfuel and gas cylinders, welding radiation, hazardous surfaces, hazardous substances, physical hazards. Possible causes of risk and accident: physical actions, not following instructions, inattention, sickness and incapacity, health, not taking safety precautions)
- PC3.** use standard safe working practices when working at heights, confined areas, trenches and with electrical equipment
- PC4.** follow warning signs and symbols while working with electrical systems (Warning signs: Danger plate, high voltage area, out of service, etc.)
- PC5.** ensure positive isolation of electrical equipment and system as per the given standards
- PC6.** identify any abnormalities in electrical equipment or system viz temperature, pressure, flow of current etc.
- PC7.** use various methods of accident prevention in the work environment (Methods of accident prevention: use of equipment and working practices, safety notices, advice, instruction from colleagues and supervisors)
- PC8.** use proper scaffolds, elevated platforms and ladders for working at height
- PC9.** inspect various tools and plants (T & P) routinely for any signs of oil, water leakages
- PC10.** store flammable materials and machine lubricating oil safely and correctly

Qualification Pack

PC11. check that the emission and pollution control devices are working properly in line with environmental policy standards

PC12. inform the relevant authorities about any abnormal situation/behavior of any equipment/system without delay

Follow fire safety practices

To be competent, the user/individual on the job must be able to:

PC13. use various appropriate fire extinguishers for different types of fires correctly (Types of fires: Class A, B, C, D and E)

PC14. use appropriate rescue techniques during fire hazard

PC15. use good housekeeping practices at all times to avoid accidental fire

Follow emergencies, rescue and first-aid procedures

To be competent, the user/individual on the job must be able to:

PC16. administer appropriate first aid to the victims for the relevant injuries (Injuries: Bleeding, burns, choking, electric shock, poisoning etc.)

PC17. act promptly and appropriately to an accident situation and administer basic first aid including CPR to the victims of cardiac arrest due to electric shock or medical emergency in real

PC18. write an incident report and send the same to the authorized person

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. names (and job titles if applicable) and location of all documents along with the people responsible for health and safety in a workplace

KU2. possible causes of risk and accident: physical actions, not following instructions, inattention, sickness and incapacity (such as drunkenness), health hazards (such as untreated injuries and contagious illness), not taking safety precautions

KU3. safe working practices when working with tools, machines

KU4. positive isolation of electrical equipment and system

KU5. use of emission and pollution control devices and measures taken to control pollution

KU6. preventative and remedial actions to be taken in the case of exposure to toxic materials solvents, flux, lead etc.

KU7. precautionary measures taken to prevent fire accident

KU8. various causes of fire (Causes of fires: heating of metal, spontaneous ignition, sparking, electrical heating, loose fires (smoking, welding, etc.), chemical fires, etc.)

KU9. different materials (sand, water, foam, CO₂, dry powder) used in fire extinguisher and proper method of using it to extinguish fire

KU10. various types of safety signs with their names

KU11. basic first aid treatment relevant to the condition e.g. shock, electrical shock, bleeding, breaks to bones, minor burns, resuscitation, poisoning, eye injuries basic techniques of bandaging

KU12. artificial respiration and the CPR Process

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read & write an accident/ incident report in local language and/or English
- GS2.** read and comprehend basic content to read labels, charts, signages, manuals etc.
- GS3.** question co-workers appropriately and give clear instruction to them and sub ordinates in order to clarify instructions
- GS4.** remain congenial while discussing and debating issues with co-workers
- GS5.** observe appropriate protocols for communication based on situation, hierarchy, organizational culture and practice
- GS6.** plan and organize work schedule, work area, tools, equipment and materials to maintain decorum and for improved productivity
- GS7.** build customer relationships and use customer centric approach
- GS8.** seek assistance from other sources to resolve problem and report problems that cannot be resolved to the appropriate authority

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass 70% aggregate for the QP.

Qualification Pack

7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Qualification Pack

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
