PSS/Q4602: Hydrogen Plant Installation and Maintenance Supervisor

Brief Job Description

The individual in this job role is responsible for supervising and monitoring installation, operation, maintenance, testing and commissioning of the equipment, systems and sub-systems of a Green hydrogen production plant. The individual is also responsible for ensuring quality, material handling, mobilizing resources and coordinating with seniors.

Personal Attributes

The job holder must have an eye for detail as well as the patience and discipline required to carry out detailed and repetitive tasks. The candidate should be able to read and understand technical manuals, instructions and warnings.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)
2. [PSS/N4604: Supervise Installation, Testing and Commissioning of Green Hydrogen Production Plant](#)
3. [PSS/N4606: Supervise Operation and Maintenance of Green Hydrogen Production Plant](#)
4. [PSS/N1336: Working effectively with others](#)
5. [PSS/N1337: Apply Basic Health and Safety Practices for Power Related Work](#)

Qualification Pack

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values - Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e-mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

PSS/N4604: Supervise Installation, Testing and Commissioning of Green Hydrogen Production Plant

Description

This NOS is about planning and organizing resources, supervising the green hydrogen production plant systems installation and testing activities and also maintaining the records and documents related to the same.

Scope

The scope covers the following :

- Plan & organize resources
- Supervise installation, testing and commissioning of green hydrogen plant
- Reporting and documentation

Elements and Performance Criteria

Plan & organize resources

To be competent, the user/individual on the job must be able to:

- PC1.** Obtain schematic diagrams, engineering drawings, diagrams, lay out plans etc. and instructions from engineer/manager
- PC2.** Interpret the Plant Layout including various equipment and material used in a Green hydrogen production facility
- PC3.** Plan manpower and resources on the basis of provided plant layout
- PC4.** Prepare purchase orders for the procurement of tools, machines, raw material etc.
- PC5.** Coordinate with vendors and/or procurement team for timely receipt of tools, machines and raw material required for green hydrogen production system installation
- PC6.** Prepare project execution plan with timelines and milestones for each activity
- PC7.** Assign tasks to team members across the production plant

Supervise installation and commissioning of green hydrogen plant

To be competent, the user/individual on the job must be able to:

- PC8.** Coordinate with vendors and engineer/manager for determining technical specifications and requirements of the green hydrogen plant
- PC9.** Conduct safety checks for gas filling system, electrolyzers, compressors, renewable power supply system, feed water supply and demineralization system, gas separator, transformer and rectifier, instrumentation systems and other equipment as per health, safety and environment (HSE) standards
- PC10.** Supervise installation, commissioning and testing activities of green hydrogen plant to ensure it is conducted as per plan, required standards and quality
- PC11.** Ensure that sparking equipment or devices e.g. MCBs, switches to be installed isolated from the hydrogen production area
- PC12.** Follow key material and safety codes, technology protocols and standards as applicable in Green hydrogen industry

Qualification Pack

- PC13.** Conduct trial run of all the systems and machines installed in the plant to ensure their proper functioning as per the specified standards and requirements
- PC14.** Ensure timely completion of activities as per planned time duration
- PC15.** Ensure safe disposal of waste material is as per organizational SOP
- PC16.** Review the completed tasks and report the status to the relevant authority in the organization

Reporting and documentation

To be competent, the user/individual on the job must be able to:

- PC17.** Prepare completion report as per predefined format and instructions of the organization
- PC18.** Report any deviations in project activities to the concerned authority
- PC19.** File signed contract / sub-contract with each vendor/contractor as per SOP
- PC20.** Record all the transaction like inward/outward, and damage/loss details digitally or manually
- PC21.** Manage all necessary quality records of the project
- PC22.** Conduct internal and external audit periodically and maintain record

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Relevant legislation, standards, policies, and procedures followed in the organization
- KU2.** Importance of using personal protective equipment (PPE) against possible electrical hazards as described in the organizational health and safety guidelines and relevant regulations
- KU3.** Properties and characteristics of Hydrogen
- KU4.** Necessity of green hydrogen in sustainable energy transition
- KU5.** Applications of green hydrogen in industry
- KU6.** Basic concepts of Hydrogen as an energy carrier
- KU7.** Key aspects related to production, storage and transportation of Green Hydrogen
- KU8.** Relevant terms, signs, symbols and other graphical representations and their respective interpretations
- KU9.** Various technology options for production of green hydrogen
- KU10.** Layout and schematic of green hydrogen production plant
- KU11.** Flow diagram of green hydrogen production, conversion and end uses
- KU12.** Functions of the key components and systems i.e. gas filling system, electrolyzers, compressors, renewable power supply system, feed water supply and demineralisation system, gas separator, transformer and rectifier, instrumentation systems, etc.
- KU13.** Types and specifications of equipment and machines used in the plant
- KU14.** Site conditions and how these impact the installation of various systems
- KU15.** Check list for site readiness planning and reports
- KU16.** Tools and equipment used for installation, testing and commissioning process
- KU17.** Installation and operation procedures of equipment and machines used in the plant
- KU18.** How to carry out visual checks of the equipment (such as checking for leaks, security of joints, physical damage)

Qualification Pack

- KU19.** How to recognise installation defects (such as leaks, poor seals, misalignment, ineffective fasteners, foreign object damage, contamination)
- KU20.** How to recognize and report inaccurate work instructions and documentation to designated personnel

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Note the information related to work and processes
- GS2.** Write reports and observations related to work in English/regional language
- GS3.** Read and interpret and process flowchart for all operations
- GS4.** Read symbols, manuals and operation documents to understand the Equipment used into operation
- GS5.** Discuss task lists, schedules and activities with the seniors and team members
- GS6.** Follow organization rule-based decision making process
- GS7.** Take decisions with systematic course of actions and/or response
- GS8.** Plan and organize tasks to meet deadlines
- GS9.** Find ways of modifying difficult operating stages to make it operation friendly
- GS10.** Apply domain information to set and define operation parameters that ensures economy and quality of the product
- GS11.** Analyse the complexity of work to determine if it can be successfully carried out or needs to be referred to a superior/specialist
- GS12.** Recognise a workplace problem and take suitable action to resolve it

PSS/N4606: Supervise Operation and Maintenance of Green Hydrogen Production Plant

Description

This unit is about planning and supervising various tasks for operation and maintenance of hydrogen plant equipment and systems.

Scope

The scope covers the following :

- Manage manpower and implement improvement practices
- Plan and supervise plant operations
- Plan and supervise maintenance activities

Elements and Performance Criteria

Manage manpower and implement improvement practices

To be competent, the user/individual on the job must be able to:

- PC1.** Support Shift In Charge/Process head in finalizing the shift rosters of the manpower based on the production plan
- PC2.** Maintain the information on leaves/in-out time and shift/line overtime of the team and share the information with the concerned authorities as per the organisational procedures
- PC3.** Send inventory requirements to stores and purchase department and follow up with them to ensure the timely receipt of materials (Spares, Consumables, etc.)
- PC4.** Work collaboratively with maintenance, engineering, and production teams to minimize downtime and ensure seamless operations
- PC5.** Ensure optimal resource utilization (man, machine and material) and streamlining of activities within the shift
- PC6.** Identify opportunities for process improvement and implement innovative solutions to enhance plant performance
- PC7.** Conduct regular audits and inspections to ensure compliance with safety and environmental regulations
- PC8.** Track and analyze key performance indicators (KPIs) to measure process performance and identify optimization opportunities
- PC9.** Conduct daily floor meeting/morning meetings/staff meetings to communicate the information such as production targets, new guidelines, new processes etc. to team
- PC10.** Organize training sessions for the operators and technicians to improve their skills and knowledge on new techniques and methods

Plan and supervise plant operations

To be competent, the user/individual on the job must be able to:

- PC11.** Obtain instructions from the manager regarding production targets and planning

Qualification Pack

- PC12.** Prepare plan and schedule to meet the production target and give instructions to the operators and technicians about the processes required to be performed for achieving the same
- PC13.** Ensure that all the tools, equipment and raw materials required for the job are in stock, functioning properly and as per the required quality standards
- PC14.** Support the operators and technicians in setting of the operating parameters as per the work instructions
- PC15.** Provide technical expertise and support to operational teams, assisting in resolving complex operational issues and driving continuous improvement initiatives
- PC16.** Ensure smooth operation of hydrogen production process
- PC17.** Monitor and optimize hydrogen production processes using various tools and technologies to maximize efficiency and cost-effectiveness
- PC18.** Control and monitor the electrolyzer functioning, water purification system, gas purification systems, gas separation systems etc. to maintain the required production quality
- PC19.** Analyze data collected from monitoring systems to identify trends, diagnose problems, and optimize system efficiency
- PC20.** Check production output according to specifications
- PC21.** Adhere to safety protocols and guidelines, industry standards, regulations, and environmental requirements while working on renewable energy systems and green hydrogen facilities
- PC22.** Implement robust standard operating procedures (SOPs) for process control and troubleshooting
- PC23.** Prepare MIS reports to analyse the actual performance with the production target and report the same to manager
- PC24.** Maintain accurate documentation and records of process parameters, incidents, and production activities

Plan and supervise maintenance activities

To be competent, the user/individual on the job must be able to:

- PC25.** Participate in the planning and execution of planned major maintenance activities, such as plant shutdowns
- PC26.** Read the maintenance schedule and plan the time and schedule for maintenance of equipment based on the manufacturer's recommendations
- PC27.** Prepare estimates and bill of quantity for carrying out maintenance activity
- PC28.** Study the critical areas to find out possibilities of impending breakdowns, leakages, failures etc.
- PC29.** Plan and supervise maintenance activities for renewable energy systems and green hydrogen infrastructure
- PC30.** Carry out, organize and supervise routine maintenance activities & rectification of defects in a timely manner
- PC31.** Guide the maintenance team and supervise troubleshooting and repairing activities of faulty or unhealthy equipment
- PC32.** Ensure that all maintenance activities are adequately addressed
- PC33.** Conduct trials of the equipment/system to ensure that maintenance is done properly and equipment /system is functioning properly without any abnormalities

Qualification Pack

- PC34.** Report about maintenance activity done on the equipment and suggest modifications in the maintenance schedule, if required to the superiors
- PC35.** Analyse machine breakdown trends and current maintenance process to identify areas of improvement and corrective actions for improving the same

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Relevant legislation, standards, policies, and procedures followed in the organization
- KU2.** The applicable isolation and lock-off procedures or permit-to-work procedure that applies
- KU3.** How to interpret drawings, process flow diagram, specifications, manufacturers manuals and other documents needed during the production and maintenance process
- KU4.** Documents and reports related to production process
- KU5.** Various process improvement techniques
- KU6.** How to audit gaps and issues in production process and their analysis
- KU7.** Various employee engagement and development practices
- KU8.** Functions of the key components and systems i.e. gas filling system, electrolyzers, compressors, renewable power supply system, feed water supply and demineralisation system, gas separator, transformer and rectifier, instrumentation systems, etc.
- KU9.** Types and specifications of equipment and machines used in the plant
- KU10.** Operation of machinery and equipment being used for the process
- KU11.** Safe startup & shutdown of electrolyzers /compressors /H₂ deoxo etc. as per SOP
- KU12.** Standard operating procedures for green hydrogen production
- KU13.** Organizational procedures for safe handling of hydrogen gas
- KU14.** Use of various testing tools and equipment
- KU15.** Various fault-finding techniques
- KU16.** How to analyse evidence and evaluate possible characteristics and causes of specific faults/problems
- KU17.** How to relate to the previous reports/records of similar fault conditions
- KU18.** How to evaluate the likely risk of running the equipment with the displayed fault, and the effects the fault could have on health and safety, and on the overall process or system
- KU19.** How to carry out visual checks of the equipment/system including checking for leaks, security of joints and physical damage
- KU20.** Corrective actions for common faults and failures in machine and its components
- KU21.** Relevant replacement parts, materials and other items required for the maintenance process
- KU22.** Relevant techniques used to dismantle/assemble integrated equipment i.e. release of pressures/force, proof marking to aid reassembly, plugging exposed pipe/component openings, dealing with soldered joints, screwed, clamped and crimped connections
- KU23.** Importance and process of attaching identification marks/labels to removed components or cables, to assist with reassembly
- KU24.** Applicable methods for checking components are fit for purpose, and the need to replace electronic modules, sensors, transmitters, transducers, electronic boards and other failed items

Qualification Pack

- KU25.** How to resolve the common problems encountered during the maintenance of the equipment/system
- KU26.** The importance of making process improvements by engaging the relevant stakeholders
- KU27.** How to create and update the SOPs, maintenance schedules and plans
- KU28.** Process of carrying out different types of maintenance such as preventive, corrective, predictive and reactive maintenance, and the activities these entail

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Note the information related to work and processes
- GS2.** Write reports and observations related to work in English/regional language
- GS3.** Read and interpret and process flowchart for all operations
- GS4.** Read symbols, manuals and operation documents to understand the Equipment used into operation
- GS5.** Discuss task lists, schedules and activities with the seniors and team members
- GS6.** Follow organization rule-based decision making process
- GS7.** Take decisions with systematic course of actions and/or response
- GS8.** Plan and organize tasks to meet deadlines
- GS9.** Find ways of modifying difficult operating stages to make it operation friendly
- GS10.** Apply domain information to set and define operation parameters that ensures economy and quality of the product
- GS11.** Analyse the complexity of work to determine if it can be successfully carried out or needs to be referred to a superior/specialist
- GS12.** Recognise a workplace problem and take suitable action to resolve it

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Manage manpower and implement improvement practices</i>	8	19	-	-
PC1. Support Shift In Charge/Process head in finalizing the shift rosters of the manpower based on the production plan	1	2	-	-
PC2. Maintain the information on leaves/in-out time and shift/line overtime of the team and share the information with the concerned authorities as per the organisational procedures	1	2	-	-
PC3. Send inventory requirements to stores and purchase department and follow up with them to ensure the timely receipt of materials (Spares, Consumables, etc.)	1	3	-	-
PC4. Work collaboratively with maintenance, engineering, and production teams to minimize downtime and ensure seamless operations	1	3	-	-
PC5. Ensure optimal resource utilization (man, machine and material) and streamlining of activities within the shift	1	2	-	-
PC6. Identify opportunities for process improvement and implement innovative solutions to enhance plant performance	1	2	-	-
PC7. Conduct regular audits and inspections to ensure compliance with safety and environmental regulations	1	2	-	-
PC8. Track and analyze key performance indicators (KPIs) to measure process performance and identify optimization opportunities	1	1	-	-
PC9. Conduct daily floor meeting/morning meetings/staff meetings to communicate the information such as production targets, new guidelines, new processes etc. to team	-	1	-	-
PC10. Organize training sessions for the operators and technicians to improve their skills and knowledge on new techniques and methods	-	1	-	-

Qualification Pack

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Plan and supervise plant operations</i>	13	27	-	-
PC11. Obtain instructions from the manager regarding production targets and planning	1	2	-	-
PC12. Prepare plan and schedule to meet the production target and give instructions to the operators and technicians about the processes required to be performed for achieving the same	1	1	-	-
PC13. Ensure that all the tools, equipment and raw materials required for the job are in stock, functioning properly and as per the required quality standards	1	1	-	-
PC14. Support the operators and technicians in setting of the operating parameters as per the work instructions	1	3	-	-
PC15. Provide technical expertise and support to operational teams, assisting in resolving complex operational issues and driving continuous improvement initiatives	1	3	-	-
PC16. Ensure smooth operation of hydrogen production process	1	1	-	-
PC17. Monitor and optimize hydrogen production processes using various tools and technologies to maximize efficiency and cost-effectiveness	-	2	-	-
PC18. Control and monitor the electrolyzer functioning, water purification system, gas purification systems, gas separation systems etc. to maintain the required production quality	1	2	-	-
PC19. Analyze data collected from monitoring systems to identify trends, diagnose problems, and optimize system efficiency	1	2	-	-
PC20. Check production output according to specifications	1	2	-	-
PC21. Adhere to safety protocols and guidelines, industry standards, regulations, and environmental requirements while working on renewable energy systems and green hydrogen facilities	1	2	-	-

Qualification Pack

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC22. Implement robust standard operating procedures (SOPs) for process control and troubleshooting	1	2	-	-
PC23. Prepare MIS reports to analyse the actual performance with the production target and report the same to manager	1	2	-	-
PC24. Maintain accurate documentation and records of process parameters, incidents, and production activities	1	2	-	-
<i>Plan and supervise maintenance activities</i>	9	24	-	-
PC25. Participate in the planning and execution of planned major maintenance activities, such as plant shutdowns	1	3	-	-
PC26. Read the maintenance schedule and plan the time and schedule for maintenance of equipment based on the manufacturer's recommendations	1	2	-	-
PC27. Prepare estimates and bill of quantity for carrying out maintenance activity	2	2	-	-
PC28. Study the critical areas to find out possibilities of impending breakdowns, leakages, failures etc.	1	3	-	-
PC29. Plan and supervise maintenance activities for renewable energy systems and green hydrogen infrastructure	1	2	-	-
PC30. Carry out, organize and supervise routine maintenance activities & rectification of defects in a timely manner	1	2	-	-
PC31. Guide the maintenance team and supervise troubleshooting and repairing activities of faulty or unhealthy equipment	1	2	-	-
PC32. Ensure that all maintenance activities are adequately addressed	1	2	-	-
PC33. Conduct trials of the equipment/system to ensure that maintenance is done properly and equipment /system is functioning properly without any abnormalities	-	2	-	-

Qualification Pack

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC34. Report about maintenance activity done on the equipment and suggest modifications in the maintenance schedule, if required to the superiors	-	2	-	-
PC35. Analyse machine breakdown trends and current maintenance process to identify areas of improvement and corrective actions for improving the same	-	2	-	-
NOS Total	30	70	-	-

PSS/N1336: Working effectively with others

Description

This unit covers basic practices that improve effectiveness of working with others in an organizational set-up

Scope

The scope covers the following :

- Work effectively with others
- Respect diversity

Elements and Performance Criteria

Work effectively with others

To be competent, the user/individual on the job must be able to:

- PC1.** accept information and instructions from the supervisor and fellow workers and seek clarification when required
- PC2.** pass the information to the persons to all those concerns within agreed timeframe in a manner they can understand and confirm its receipt
- PC3.** help & assist fellow workers in performing their tasks in a positive manner so as to maximize efficiency
- PC4.** use appropriate tone, pitch and language while communicating to convey politeness, assertiveness, care and professionalism
- PC5.** listen attentively and respond appropriately while interacting with others at work
- PC6.** act responsibly and demonstrate disciplined behaviour at the workplace (Disciplined behaviour: Punctuality, completing tasks within agreed timescales, ensuring quality standards, not gossiping and wasting time, honesty, etc.)
- PC7.** escalate grievances and problems to the appropriate authority as per the organizational procedure to resolve them and avoid conflict

Respect diversity

To be competent, the user/individual on the job must be able to:

- PC8.** respect gender diversity in the workplace
- PC9.** use respectful verbal, non-verbal and written communication that is gender, disability and culturally inclusive
- PC10.** communicate with everyone without any personal bias based on gender, disability, caste, religion, colour, sexual orientation and culture
- PC11.** recognize indicators of harassment and discrimination based on gender, disability, caste, religion, colour, sexual orientation and culture at workplace and follow organisational policy for reporting the same

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** legislation, standards, policies, and procedures followed in the company relevant to own employment and performance conditions
- KU2.** reporting structure, inter-dependent functions, lines and procedures in the work area
- KU3.** relevant people and their responsibilities within the work area
- KU4.** escalation matrix and procedures for reporting work and employment related issues
- KU5.** key elements of active listening and assertive communication
- KU6.** importance of teamwork in organizational and individual success
- KU7.** ethics and disciplined behavior for professional success
- KU8.** expressing and addressing grievances appropriately and managing interpersonal conflict effectively
- KU9.** harassment and discrimination based on gender, disability, caste, religion and culture and how to recognize it.
- KU10.** organizational policy/ies for harassment and discrimination

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write clear and legible notes to self, colleagues and seniors to pass messages, keep records, prepare to-do lists, take down instructions
- GS2.** read basic terms and terminologies to accurately interpret work related documents, labels, supervisor instructions in the local language
- GS3.** interact with the supervisor appropriately (correct protocol and manner of speaking) in order to understand the basic requirements of the product, production plans and other associated requirements
- GS4.** display active listening skills while interacting with co-workers and other in the workplace
- GS5.** follow organization's rule-based decision-making process
- GS6.** use appropriate planning to maintain a smooth relationship with fellow team members
- GS7.** meet customer requirements
- GS8.** critically evaluate operation parameters in relation to system normality

PSS/N1337: Apply Basic Health and Safety Practices for Power Related Work

Description

This unit covers health, safety and security for power related work. This includes procedures and practices that candidates need to follow to help maintain a healthy, safe and secure work environment in a power plant, power station/substation or on the field while working on power equipment. It covers responsibilities towards self, others, organizational assets and the environment.

Scope

The scope covers the following :

- Follow workplace health and safety practices
- Follow fire safety practices
- Follow emergencies, rescue and first-aid procedures

Elements and Performance Criteria

Follow workplace health and safety practices

To be competent, the user/individual on the job must be able to:

- PC1.** use protective clothing/equipment for specific tasks and work conditions (Protective clothing: leather or asbestos gloves, flame proof aprons, flame proof overalls buttoned to neck, cuff less (without folds) trousers, reinforced footwear, helmets/hard hats, cap and shoulder covers, ear defenders/plugs, safety boots, knee pads, particle masks, glasses/goggles/visors) (Equipment: hand and face shields, machine guards, residual current devices, shields, dust sheets, respirator)
- PC2.** identify job-site hazards and possible causes of risks/accident at the workplace (Hazards: electrical hazards, sharp edged and heavy tools, heated metals, oxyfuel and gas cylinders, welding radiation, hazardous surfaces, hazardous substances, physical hazards. Possible causes of risk and accident: physical actions, not following instructions, inattention, sickness and incapacity, health, not taking safety precautions)
- PC3.** use standard safe working practices when working at heights, confined areas, trenches and with electrical equipment
- PC4.** follow warning signs and symbols while working with electrical systems (Warning signs: Danger plate, high voltage area, out of service, etc.)
- PC5.** ensure positive isolation of electrical equipment and system as per the given standards
- PC6.** identify any abnormalities in electrical equipment or system viz temperature, pressure, flow of current etc.
- PC7.** use various methods of accident prevention in the work environment (Methods of accident prevention: use of equipment and working practices, safety notices, advice, instruction from colleagues and supervisors)
- PC8.** use proper scaffolds, elevated platforms and ladders for working at height
- PC9.** inspect various tools and plants (T & P) routinely for any signs of oil, water leakages
- PC10.** store flammable materials and machine lubricating oil safely and correctly

Qualification Pack

PC11. check that the emission and pollution control devices are working properly in line with environmental policy standards

PC12. inform the relevant authorities about any abnormal situation/behavior of any equipment/system without delay

Follow fire safety practices

To be competent, the user/individual on the job must be able to:

PC13. use various appropriate fire extinguishers for different types of fires correctly (Types of fires: Class A, B, C, D and E)

PC14. use appropriate rescue techniques during fire hazard

PC15. use good housekeeping practices at all times to avoid accidental fire

Follow emergencies, rescue and first-aid procedures

To be competent, the user/individual on the job must be able to:

PC16. administer appropriate first aid to the victims for the relevant injuries (Injuries: Bleeding, burns, choking, electric shock, poisoning etc.)

PC17. act promptly and appropriately to an accident situation and administer basic first aid including CPR to the victims of cardiac arrest due to electric shock or medical emergency in real

PC18. write an incident report and send the same to the authorized person

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. names (and job titles if applicable) and location of all documents along with the people responsible for health and safety in a workplace

KU2. possible causes of risk and accident: physical actions, not following instructions, inattention, sickness and incapacity (such as drunkenness), health hazards (such as untreated injuries and contagious illness), not taking safety precautions

KU3. safe working practices when working with tools, machines

KU4. positive isolation of electrical equipment and system

KU5. use of emission and pollution control devices and measures taken to control pollution

KU6. preventative and remedial actions to be taken in the case of exposure to toxic materials solvents, flux, lead etc.

KU7. precautionary measures taken to prevent fire accident

KU8. various causes of fire (Causes of fires: heating of metal, spontaneous ignition, sparking, electrical heating, loose fires (smoking, welding, etc.), chemical fires, etc.)

KU9. different materials (sand, water, foam, CO₂, dry powder) used in fire extinguisher and proper method of using it to extinguish fire

KU10. various types of safety signs with their names

KU11. basic first aid treatment relevant to the condition e.g. shock, electrical shock, bleeding, breaks to bones, minor burns, resuscitation, poisoning, eye injuries basic techniques of bandaging

KU12. artificial respiration and the CPR Process

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read & write an accident/ incident report in local language and/or English
- GS2.** read and comprehend basic content to read labels, charts, signages, manuals etc.
- GS3.** question co-workers appropriately and give clear instruction to them and sub ordinates in order to clarify instructions
- GS4.** remain congenial while discussing and debating issues with co-workers
- GS5.** observe appropriate protocols for communication based on situation, hierarchy, organizational culture and practice
- GS6.** plan and organize work schedule, work area, tools, equipment and materials to maintain decorum and for improved productivity
- GS7.** build customer relationships and use customer centric approach
- GS8.** seek assistance from other sources to resolve problem and report problems that cannot be resolved to the appropriate authority

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass 70% aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Compulsory NOS

Qualification Pack

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
