Qualification Pack

RSC/Q0625: Operator - Wet End Single Facer (Corrugated Boards)

Brief Job Description

Operate and monitor the wet end and single facer machine to produce corrugated boards as per specified quality standards. Ensure continuous material feed, proper bonding, and in-process quality checks to maintain consistent board strength and flute formation.

Personal Attributes

The individual should be attentive, disciplined, and safety-conscious while operating machinery. They should have mechanical aptitude, good observation skills, and the ability to work collaboratively and responsibly in a production environment.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [RSC/N0614: Perform Machine Setup and Material Loading for Wet-End Operation](#)
2. [RSC/N0615: Conduct Single Facer Machine Operation and In-process Quality Monitoring](#)
3. [RSC/N5004: Carry out problem identification and escalation](#)
4. [RSC/N5007: Follow health & safety protocol](#)
5. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

Qualification Pack

RSC/N0614: Perform Machine Setup and Material Loading for Wet-End Operation

Description

Prepare and set up wet-end machinery according to operational specifications. Load raw materials accurately to ensure smooth production and maintain process quality.

Scope

The scope covers the following :

- Prepare and align the liner and medium (fluting) paper reels
- Set and calibrate machine parameters
- Conduct pre-start machine inspection and dry run

Elements and Performance Criteria

Prepare and align the liner and medium (fluting) paper reels

To be competent, the user/individual on the job must be able to:

- PC1.** identify the correct type, size, and GSM of liner and fluting paper reels as per the job order or production plan
- PC2.** use mechanical or hydraulic reel handling equipment to safely lift and load the paper reels onto the unwind stand
- PC3.** check for physical defects in the paper reels such as tears, creases, or moisture patches before loading
- PC4.** align the liner and medium paper accurately over the guide rollers and feed pathways to ensure smooth entry into the single facer unit
- PC5.** adjust reel brakers and tension controls to maintain consistent web tension during unwinding and feeding
- PC6.** ensure correct paper orientation and threading to match flute direction and bonding alignment
- PC7.** verify that paper reels are locked and secured properly to avoid misfeed or displacement during operation
- PC8.** record reel usage details (paper type, roll number, and weight) in the shift log or production register

Set and calibrate machine parameters

To be competent, the user/individual on the job must be able to:

- PC9.** interpret job sheet or production schedule to identify required board grade, flute type, and glue specifications for the production run
- PC10.** set the flute roll and preheater temperature based on the paper GSM, moisture content, and bonding requirements
- PC11.** adjust nip roller and pressure roll settings to ensure proper contact between the flute and liner without crushing the board

Qualification Pack

- PC12.** calibrate the glue applicator roller to control glue film thickness and uniform spread across the fluting tips
- PC13.** verify the adhesive viscosity and glue temperature, and adjust the application settings accordingly
- PC14.** confirm alignment and engagement of pressure roll and glue roll as per the defined flute profile (A, B, C, etc.)
- PC15.** test run the machine in idle mode (without paper) to verify parameter settings and detect abnormal noise, vibrations, or leakage
- PC16.** record all setup parameters and settings in the machine logbook for traceability and future reference

Conduct pre-start machine inspection and dry run

To be competent, the user/individual on the job must be able to:

- PC17.** inspect the single facer machine components including rollers, belts, glue pans, and steam pipes for any visible wear, damage, or obstructions
- PC18.** ensure all safety guards, interlocks, and emergency stop buttons are functional and accessible before initiating machine operations
- PC19.** verify the readiness of utility systems such as steam supply, glue circulation, and air pressure to ensure they are within operational range
- PC20.** check the alignment of loaded paper reels and proper threading over guide rollers to prevent feeding issues during start-up
- PC21.** conduct a dry run (machine run without paper) to observe roller movement, motor function, adhesive roller rotation, and detect unusual noises or vibrations
- PC22.** report any abnormalities or deviations identified during inspection or dry run to the supervisor or maintenance team for immediate corrective action

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** different types, sizes, and GSM of liner and fluting (medium) paper reels and their application in production
- KU2.** importance of selecting the correct paper reels as per job order, production plan, and board specifications
- KU3.** safe handling procedures for lifting and loading paper reels using mechanical or hydraulic equipment
- KU4.** methods to inspect paper reels for defects such as tears, creases, or moisture patches before use
- KU5.** techniques for accurate alignment of liner and medium paper over guide rollers and feed pathways
- KU6.** correct paper orientation and threading to match flute direction and ensure proper bonding
- KU7.** machine parameters including flute roll temperature, preheater settings, nip and pressure roller adjustments, and their effect on board quality
- KU8.** calibration of glue applicator rollers, control of glue viscosity, temperature, and uniform application across fluting tips
- KU9.** different flute profiles (A, B, C, etc.) and their impact on pressure roll and glue roll alignment

Qualification Pack

- KU10.** pre-start inspection procedures for single facer machine components, including rollers, belts, glue pans, and steam pipes
- KU11.** functionality and importance of safety guards, interlocks, emergency stop buttons, and utility systems (steam, glue, air) before machine operation
- KU12.** process of conducting a dry run to detect abnormal noise, vibration, or leakage and ensure smooth machine operation
- KU13.** rand maintaining machine setup parameters, paper reel details, and production logs for traceability
- KU14.** procedures to identify and report abnormalities or deviations to supervisors or maintenance personnel for corrective action

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret job sheets, production schedules, and machine manuals accurately
- GS2.** communicate effectively with team members, supervisors, and maintenance personnel
- GS3.** follow standard operating procedures (SOPs) and organizational safety guidelines
- GS4.** record operational data, reel details, and machine setup parameters clearly in logbooks or digital systems
- GS5.** apply basic arithmetic and measurement skills to verify paper GSM, reel width, and tension settings
- GS6.** identify and respond promptly to machine faults, abnormal sounds, or operational deviations
- GS7.** use appropriate tools and equipment safely during machine setup and maintenance checks
- GS8.** work effectively as part of a production team to ensure coordinated machine startup and smooth workflow
- GS9.** maintain cleanliness and orderliness of the work area to prevent accidents and material contamination
- GS10.** apply problem-solving skills to troubleshoot minor mechanical or process-related issues
- GS11.** follow time management and prioritization techniques to complete setup activities efficiently
- GS12.** demonstrate awareness of environmental and energy conservation practices within the plant

Qualification Pack

Qualification Pack

RSC/N0615: Conduct Single Facer Machine Operation and In-process Quality Monitoring

Description

Operate and control the single facer machine as per defined production parameters. Monitor and maintain in-process quality standards to ensure proper flute formation, bonding, and board consistency

Scope

The scope covers the following :

- Operate the single facer machine during live production
- Monitor and control key process parameters
- Perform in-process quality checks

Elements and Performance Criteria

Operate the single facer machine during live production

To be competent, the user/individual on the job must be able to:

- PC1.** ensure continuous and smooth feeding of fluting and liner paper into the single facer unit without reel displacement or paper misalignment
- PC2.** operate the machine at the prescribed speed and pressure, maintaining optimal flute formation and consistent bonding quality
- PC3.** regulate adhesive flow and roller engagement to ensure even glue application on fluted tips during production
- PC4.** monitor flute profile and bonding visually and physically at intervals to confirm proper adhesion and avoid delamination
- PC5.** detect signs of improper bonding, glue skips, or liner shifting, and make immediate adjustments or alert the supervisor
- PC6.** maintain coordination with adhesive preparation and corrugation control teams to adjust inputs based on machine response or job changeovers

Monitor and control key process parameters

To be competent, the user/individual on the job must be able to:

- PC7.** monitor steam pressure and flute roll temperature to ensure proper heat transfer for effective corrugation of medium paper
- PC8.** adjust machine speed based on paper type, moisture content, and bonding behavior to ensure consistent flute formation
- PC9.** observe glue application consistency and regulate adhesive flow to avoid over-gluing, skips, or uneven bonding
- PC10.** check nip pressure settings regularly to ensure sufficient contact between the liner and fluted paper without crushing
- PC11.** use control panel indicators or gauges to track real-time process values and make timely adjustments as required

Qualification Pack

- PC12.** record key process parameters (e.g., temperature, pressure, speed) in the production log at defined intervals
- PC13.** identify unusual process fluctuations such as glue foaming, temperature drop, or paper warp and report immediately
- PC14.** ensure that all monitored parameters align with job card specifications and quality standards throughout the shift

Perform in-process quality checks

To be competent, the user/individual on the job must be able to:

- PC15.** visually inspect the flute profile for proper shape, height, and uniformity during machine operation
- PC16.** check bonding between liner and fluting using manual methods (e.g., peel test) at periodic intervals to assess adhesion strength
- PC17.** identify common quality defects such as delamination, warping, glue skips, and liner misalignment during the run
- PC18.** monitor paper tracking and ensure that liners and medium are correctly aligned throughout the width of the board
- PC19.** take immediate corrective actions (e.g., adjust glue flow, roller pressure, or paper tension) or inform the supervisor when defects are detected
- PC20.** record quality check observations and corrective actions taken in the in-process quality checklist or production log

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** working principles and components of the single facer machine, including flute rolls, preheaters, and pressure rolls
- KU2.** types and characteristics of liner and fluting paper used in corrugation and their effect on bonding quality
- KU3.** correct procedures for continuous feeding and alignment of liner and medium paper to avoid misfeed or displacement
- KU4.** relationship between machine speed, steam pressure, flute roll temperature, and flute formation quality
- KU5.** adhesive application process, including control of glue viscosity, temperature, and flow for uniform bonding
- KU6.** common in-process defects such as delamination, glue skips, flute crushing, and liner shifting, and methods to identify and correct them
- KU7.** use of control panel indicators, gauges, and manual checks to monitor process parameters such as temperature, pressure, and speed
- KU8.** standard methods for in-process quality inspection, including visual checks and manual peel or bonding strength tests
- KU9.** recording and documentation of process parameters and quality observations in production logs or checklist
- KU10.** coordination requirements with adhesive preparation and corrugation control teams for maintaining production quality

Qualification Pack

- KU11.** importance of adhering to job card specifications, production schedules, and defined quality standards
- KU12.** workplace safety practices, emergency protocols, and proper handling of steam, glue, and moving machine parts during operation

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret job sheets, process charts, and machine operation manuals accurately
- GS2.** communicate effectively with team members, supervisors, and maintenance personnel for coordinated production
- GS3.** record process parameters, quality observations, and corrective actions clearly in logbooks or digital systems
- GS4.** apply basic mathematical and measurement skills to check paper GSM, flute height, temperature, and pressure readings
- GS5.** Identify and respond promptly to process deviations such as temperature drop, glue foaming, or paper misalignment
- GS6.** operate control panels, gauges, and monitoring systems safely and efficiently during production
- GS7.** follow standard operating procedures (SOPs), safety rules, and organizational quality standards
- GS8.** use hand tools and testing instruments carefully for in-process checks and adjustments
- GS9.** work collaboratively with adhesive preparation, corrugation, and finishing teams to maintain consistent board quality
- GS10.** demonstrate problem-solving and decision-making skills to handle minor machine or quality issues independently
- GS11.** maintain workplace hygiene, equipment cleanliness, and follow 5S practices to ensure safe and efficient operations
- GS12.** manage time effectively to complete assigned production runs and quality checks within schedule

RSC/N5004: Carry out problem identification and escalation

Description

This unit is about problem identification and escalation.

Scope

The scope covers the following :

- Conduct in-process quality checks
- Identify and resolve minor operational issues

Elements and Performance Criteria

Conduct in-process quality checks

To be competent, the user/individual on the job must be able to:

- PC1.** use tools such as GSM cutter, weighing scale, and micrometer to measure the grammage and thickness of the board during production
- PC2.** Perform visual inspection to detect common defects like delamination, glue skips, bubbling, edge damage, or misalignment in laminated sheets
- PC3.** carry out basic strength tests such as Ply Bond and Edge Crush Test (ECT) at specified intervals to assess bonding quality
- PC4.** compare production output against job specifications and quality standards to identify deviations early
- PC5.** isolate and report defective material promptly to minimize wastage and avoid further processing of substandard output
- PC6.** Maintain records of quality checks performed, test results, and any corrective actions taken for traceability and audit compliance

Identify and resolve minor operational issues

To be competent, the user/individual on the job must be able to:

- PC7.** identify early signs of faults such as glue roller imbalance, uneven adhesive spread, sheet misfeeds, or machine vibrations during production
- PC8.** adjust machine parameters like glue flow, roller pressure, speed, and sheet alignment to correct minor operational issues without stopping production
- PC9.** clean or replace glue pans, rollers, or feeding belts if adhesive buildup or mechanical wear affects performance
- PC10.** escalate recurring or unresolved problems to the maintenance team or supervisor with accurate descriptions of the fault
- PC11.** record all troubleshooting actions taken, including changes in machine settings and outcomes, to support process improvement and reduce future downtime

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** importance of learning proper procedures and techniques
- KU2.** implications of not following the organisational requirement for approval, for undertaking the specific tasks
- KU3.** importance of completing the activities as per the schedule
- KU4.** implications of not following the defined procedures/work instructions
- KU5.** importance of teamwork
- KU6.** health, safety and environment guidelines, legislation and regulations as applicable
- KU7.** actions to be taken in case of non-conformity to behavioural standards of the organisation
- KU8.** impact of poor practices on the individuals and organisation's performance
- KU9.** importance of optimal utilisation of resources
- KU10.** importance of providing feedback for improvement
- KU11.** importance of indigenous knowledge for evolving/adopting operation specific practices
- KU12.** rectification/solution of problems/conflicts for the smooth functioning of the organisation
- KU13.** importance of documentation/reporting as per guidelines and procedures
- KU14.** knowledge of dos and don'ts (company's HR instructions)
- KU15.** importance of attending troubleshooting processes
- KU16.** importance of subject learning/ training
- KU17.** importance of product and its application
- KU18.** indicators of problems
- KU19.** working of the equipment and accessories (if applicable)
- KU20.** impact of operations on the user and equipment (if applicable)
- KU21.** impact of operations on the final product (if applicable)
- KU22.** effect of not rectifying the identified problems
- KU23.** reasons for the occurrence of previous problems
- KU24.** measures and steps that had been taken previously to address the problems
- KU25.** possible solutions for various problems
- KU26.** correct methods for carrying out corrective actions, outlined for each problem
- KU27.** impact of not carrying out the corrective actions
- KU28.** documentation procedures for recording such problems, as per company norms
- KU29.** escalation matrix for reporting problems
- KU30.** escalation matrix for reporting unresolved problems
- KU31.** time frame within which, each problem needs to be escalated
- KU32.** manner in which each problem needs to be escalated

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** construct simple sentences and express ideas clearly through written communication
- GS2.** fill up appropriate technical forms, process charts, activity logs in the required format of the company

Qualification Pack

- GS3.** write simple letters, emails, etc.
- GS4.** perform functional mathematical operations, including the application of basic mathematical principles, such as numbers and space, and techniques such as estimation and approximation, for practical purposes
- GS5.** read and understand manuals, health and safety instructions, memos, reports, job cards, etc.
- GS6.** read images, graphs, diagrams
- GS7.** understand the various coding systems as per company norms
- GS8.** express statements, opinions or information clearly so that others can hear and understand
- GS9.** respond appropriately to any queries
- GS10.** communicate with supervisor
- GS11.** communicate with upstream and downstream teams
- GS12.** work in a team and other behavioural skills required to support the small group activities (Quality Circle, Cross Functional Team, and Suggestion Scheme)
- GS13.** practice honesty with respect to company property and time
- GS14.** communicate with people in a specific form and manner and use language that is open and respectful
- GS15.** resolve difficulties in relationship with colleagues, or get help from an appropriate person, in a way that preserves goodwill and trust
- GS16.** take responsibility for completing one's own work assignment
- GS17.** take the initiative to enhance/learn skills in ones' area of work
- GS18.** have the capacity to learn from experience in a range of settings and scenarios and the capacity to reflect on and analyse one's learning
- GS19.** be open to new ways of doing things
- GS20.** have the capacity to envisage and articulate personal goals; to develop strategies and take action to achieve them
- GS21.** avoid absenteeism
- GS22.** act objectively, rather than impulsively or emotionally when faced with difficult/stressful or emotional situations
- GS23.** work in a disciplined factory environment
- GS24.** be punctual
- GS25.** take decisions for any change/issue based on earlier successes (documented in the previous history) on similar issues
- GS26.** work out changes in case a new, improved machine/equipment, when added in the process or any new material/chemical is developed replacing the existing one
- GS27.** make changes in cycle time due to an improved process
- GS28.** use the standard operating procedure or troubleshooting manuals for troubleshooting and other reference documents approved by plant management
- GS29.** consult the peer group and superiors to arrive at a favourable decision
- GS30.** use of standards available for problem-solving techniques for decision-making
- GS31.** review and analyse the process steps to check on system non-adherence and non-conformity
- GS32.** review the current SOP and other standards for continuous improvement to facilitate decision making

Qualification Pack

- GS33.** take calculated risks with minimum losses
- GS34.** seek clarification on problems from others
- GS35.** apply problem-solving approaches in different situations
- GS36.** refer anomalies to the line manager
- GS37.** match customer needs/specification by adjusting the processing conditions (interact with customers in case any clarification is required)
- GS38.** ensure that performance of his action/operation/activity does not lead to any divergence from the specified quality of the final product as required by the customer
- GS39.** complete the assigned task on time so that the final product is delivered in the timeline given by the customer
- GS40.** communicate effectively to the superiors/customers for any delay in supplies to the clients
- GS41.** work towards fulfilling the customer's requirement as per their demand
- GS42.** ensure its timely resolution if the problem is emanating at his level in case of any complaint
- GS43.** communicate effectively to the superior/customer for any delay in resolving the problem faced by the customer
- GS44.** maintain good/cordial relation with customers
- GS45.** work on the feedback received from the customer regarding the product
- GS46.** interpret quality for sheet
- GS47.** suggest improvements (if any) in process/product/materials, based on results and experience a for proper collection of waste material
- GS48.** proper collection of waste material
- GS49.** identify defects in the material and communicate it at the earliest and suggest improvements (if any) in process/material, based on experience
- GS50.** diagnose common problems in the machine based on visual inspection, sound, temperature, etc.
- GS51.** suggest improvements (if any) in the process based on experience
- GS52.** seek clarification on problems from others
- GS53.** apply problem-solving approaches in different situations
- GS54.** refer anomalies to the line manager

Qualification Pack

RSC/N5007: Follow health & safety protocol

Description

This unit is about maintaining health and safety of self and others at workplace.

Scope

The scope covers the following :

- Maintain a clean and efficient workplace
- Render appropriate emergency procedures
- Maintain standard safety procedures at the workplace
- Participate in safety awareness campaigns
- Understand potential sources of accidents
- Use safety gears to avoid accidents

Elements and Performance Criteria

Maintain a clean and efficient workplace

To be competent, the user/individual on the job must be able to:

- PC1.** undertake basic safety checks before operation of all machinery and equipment and report hazards to the appropriate supervisor
- PC2.** work for which protective clothing or equipment is required is identified and the appropriate protective clothing or equipment is used in performing these duties in accordance with workplace policy
- PC3.** read and understand the hazards of use and contamination mentioned on the labels of chemicals, utilities etc
- PC4.** prior to performing manual handling jobs, risk is assessed and work is carried out according to currently recommended safe practices.
- PC5.** use equipment and materials safely and correctly and return the same to designated storage when not in use
- PC6.** dispose off waste safely and correctly in a designated area
- PC7.** risks to bystanders are recognized and action taken to reduce risk associated with jobs in the workplace
- PC8.** perform work in a manner which minimizes environmental damage
- PC9.** all procedures and work instructions for controlling risk are followed closely
- PC10.** report any accidents, incidents or problems without delay to an appropriate person and take immediate necessary action to reduce further danger

Render appropriate emergency procedures

To be competent, the user/individual on the job must be able to:

- PC11.** follow procedures for dealing with accidents, fires and emergencies, including communicating location and directions to emergency.
- PC12.** follow emergency procedures as per company standards and workplace requirements

Qualification Pack

- PC13.** use emergency equipment in accordance with manufacturers' specifications and workplace requirements
- PC14.** provide treatment appropriate to the patient's injuries in accordance with recognized first aid techniques.
- PC15.** recover (if practical), clean, inspect/test, refurbish, replace and store the first aid equipment as appropriate
- PC16.** dispose off medical waste in accordance with workplace requirements
- PC17.** report details of first aid administered in accordance with work place procedures

Maintain standard safety procedures at the workplace

To be competent, the user/individual on the job must be able to:

- PC18.** comply with general safety procedures
- PC19.** follow standard safety procedures while handling equipment, hazardous material or tool
- PC20.** check parts of the workplace and take preventive actions like spraying and other steps to protect from leakages, water logging, pests, fire, pollution, etc.
- PC21.** ensure no accidents and damages at the workplace, reporting of any breach of company safety procedure
- PC22.** keep the workplace organized, swept, clean and hazard free

Participate in safety awareness campaigns

To be competent, the user/individual on the job must be able to:

- PC23.** attend fire drills and other safety related workshops organized at the workplace
- PC24.** be aware of first aid, evacuation and emergency procedures
- PC25.** be alert of any events and do not be negligent to any safety procedures to be followed

Understand potential sources of accidents

To be competent, the user/individual on the job must be able to:

- PC26.** avoid accidents while using hazardous chemicals, machines, sharp tools and equipment

Use safety gears to avoid accidents

To be competent, the user/individual on the job must be able to:

- PC27.** use safety materials such as protective gear, goggles, caps, shoes, etc.(as applicable with workplace)
- PC28.** handle heavy and hazardous materials with care and using appropriate tools and handling equipment such as trolleys, ladders

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** policies on incentives, delivery standards, and personnel management.
- KU2.** occupational safety and health policy followed
- KU3.** emergency evacuation procedure
- KU4.** medical policy
- KU5.** company laws and acts
- KU6.** the risks to health and safety and the measures to be taken to control those risks in the area of work

Qualification Pack

- KU7.** workplace procedures and requirements for the handling of workplace injuries/illnesses.
- KU8.** basic emergency first aid procedure
- KU9.** local emergency services
- KU10.** reporting on accidents, incidents and problems to appropriate authorities.
- KU11.** how to use machines as per standard operating procedure
- KU12.** how to maintain work area safe and secure
- KU13.** use of hazardous materials, tools and equipments
- KU14.** emergency evacuation and first aid procedures to be followed
- KU15.** personal hygiene and fitness requirements
- KU16.** general duties under the relevant health and safety legislation
- KU17.** what personal protective equipment and clothing should be worn and how it is cared for
- KU18.** the correct and safe way to use materials and equipment required for work
- KU19.** the importance of good housekeeping in the workplace
- KU20.** safe disposal methods for waste
- KU21.** methods for minimizing environmental damage during work

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** record data which are required for record keeping purpose
- GS2.** report problems to the appropriate person in a timely manner
- GS3.** write descriptions and details about incidents in reports
- GS4.** read instruction manuals for hand tools and equipment
- GS5.** read instructions on work orders and procedures
- GS6.** receive instructions and seek advice from superiors
- GS7.** communicate clearly and effectively with others
- GS8.** take a decision for any change/issue based on earlier successes(documented previous history)on similar issues
- GS9.** work out changes in case a new improved machine/equipment is added in the process or any new material/chemical is developed replacing existing one.
- GS10.** make changes in cycle time due to improved process.
- GS11.** use the standard operating procedure or trouble shooting manuals for trouble shooting and other reference documents approved by plant management
- GS12.** consult the peer group and superiors to arrive at a favourable decision.
- GS13.** use of standard available problem solving techniques for decision making
- GS14.** review and analyze the process steps to check on system non adherence andnon conformity
- GS15.** review the current sop and other standards for continuous improvement to facilitate decision making
- GS16.** take a calculated risk with minimum losses
- GS17.** schedule daily activities and drawing up priorities; allocate start times, estimation of completion times and materials, equipment and assistance required for completion.

Qualification Pack

- GS18.** match customer needs/specification by adjusting the processing conditions (interact with customer in case any clarification required)
- GS19.** ensure that performance of his action/operation/activity does not lead to any divergence from the specified quality of the final product as required by the customer.
- GS20.** complete the assigned task in timely manner so that the final product is delivered in the timeline given by the customer.
- GS21.** communicate effectively to the superior/customer for any delay in supplies to the clients.
- GS22.** work towards fulfilling the customers requirement as per their demand.
- GS23.** in case of any complaint, ensure its timely resolution if the problem is emanating at his level
- GS24.** communicate effectively to the superior/customer for any delay in resolving the problem faced by the customer.
- GS25.** maintain good/cordial relation with customers.
- GS26.** work on the feedback received from customer regarding the product.
- GS27.** use first aid treatment in case of any injury/accident.
- GS28.** monitor and maintain the condition of tools and equipment
- GS29.** assess situation & identify appropriate control measures
- GS30.** act, communicate and report in emergency situation

Qualification Pack

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.

Qualification Pack

6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.

7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
