Qualification Pack

RSC/Q0626: Operator - Triplex & Gluer Operator (Corrugated Boards)

Brief Job Description

The Triplex and Glue Operator is responsible for operating machines that laminate three-ply corrugated boards and apply adhesives in the corrugated board production line. The role ensures the production of high-strength boards by proper machine calibration, glue application, and quality assurance.

Personal Attributes

The individual should be attentive, safety conscious, and skilled in teamwork to ensure efficient machine operation and high product quality.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [RSC/N0616: Conduct Machine Operation & Setup](#)
2. [RSC/N0617: Preparation of Adhesive and its application](#)
3. [RSC/N0618: Inspecting Quality and Basic Troubleshooting](#)
4. [RSC/N5007: Follow health & safety protocol](#)
5. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

Qualification Pack

RSC/N0616: Conduct Machine Operation & Setup

Description

This NOS covers performing machine setup and operation as per standard operating procedures to ensure optimal performance, product quality, and safety compliance during production.

Scope

The scope covers the following :

- Set up and calibrate the Triplex laminator and glue application machines
- Operate the machines efficiently during production run
- Perform routine machine maintenance and minor troubleshooting

Elements and Performance Criteria

Set up and calibrate the Triplex laminator and glue application machines

To be competent, the user/individual on the job must be able to:

- PC1.** inspect the Triplex laminator and glue application machines to ensure they are clean, functional, and free from defects before starting setup
- PC2.** select and load the correct liner and fluted paper grades according to production specifications
- PC3.** calibrate machine settings such as roller pressure, speed, and temperature based on the type and GSM of the board to be laminated
- PC4.** aligned feed rollers, glue pans, and delivery belts accurately to ensure proper sheet flow and uniform glue application
- PC5.** adjust glue viscosity and roller speed to achieve optimal adhesive spread and bonding strength
- PC6.** perform trial runs and inspect the initial output for defects like misalignment, bubbling, or glue skips, making necessary adjustments
- PC7.** record and document machine settings and calibration parameters for reference and quality control

Operate the machines efficiently during production run

To be competent, the user/individual on the job must be able to:

- PC8.** monitor machine parameters such as speed, pressure, and temperature continuously to ensure consistent production quality
- PC9.** load and feed raw materials (liner and fluted boards) into the machine smoothly without causing jams or misfeeds
- PC10.** detect and respond promptly to any irregularities in the machine operation, such as unusual noises, vibrations, or product defects
- PC11.** adjust machine controls in real-time to correct issues like glue inconsistencies, sheet misalignment, or uneven lamination
- PC12.** maintain uninterrupted workflow by coordinating with upstream and downstream operators to manage material flow and avoid bottlenecks

Qualification Pack

- PC13.** conduct routine checks on output quality during production, including visual inspection and basic measurement of board properties
- PC14.** document production data, machine settings, and any incidents or adjustments made during the run for process traceability

Perform routine machine maintenance and minor troubleshooting

To be competent, the user/individual on the job must be able to:

- PC15.** inspect and clean rollers, glue pans, and feed mechanisms at regular intervals to prevent glue buildup, jamming, or wear and tear
- PC16.** check and refill lubrication points, fluid levels, and consumables as per machine maintenance schedule
- PC17.** identify common faults such as uneven glue spread, roller misalignment, or temperature fluctuations and take corrective actions without halting the machine unnecessarily
- PC18.** tighten loose mechanical parts, replace worn-out rollers or belts, and report major issues to maintenance personnel for further repair
- PC19.** perform preventive checks on electrical connections, safety guards, and sensors to ensure smooth and safe functioning
- PC20.** maintain a daily maintenance log including observations, actions taken, and parts serviced or replaced
- PC21.** use basic hand tools and cleaning agents appropriately during maintenance tasks while ensuring machine safety

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** principles and working of Triplex laminator and glue application machines, including key components and their functions
- KU2.** types, grades, and GSM of liner and fluted papers used in lamination and their effect on machine settings and product quality
- KU3.** standard operating procedures (SOPs) for machine setup, calibration, and operation
- KU4.** techniques for adjusting roller pressure, speed, temperature, and glue viscosity for optimal bonding
- KU5.** common defects such as misalignment, bubbling, or glue skips, and corrective actions to address them
- KU6.** methods for conducting trial runs and inspecting laminated boards for quality compliance
- KU7.** safety practices and lockout/tagout procedures to prevent machine-related accidents
- KU8.** routine maintenance requirements, including lubrication schedules, cleaning methods, and preventive checks
- KU9.** use of basic hand tools, measuring instruments, and cleaning agents safely and effectively
- KU10.** process documentation standards, including recording machine settings, maintenance logs, and production data
- KU11.** communication and coordination protocols with upstream and downstream operators for smooth production flow

Qualification Pack

KU12. basic troubleshooting techniques to identify and rectify minor mechanical, electrical, or operational faults

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret production orders, job sheets, and machine manuals accurately
- GS2.** set up, calibrate, and operate the Triplex laminator and glue application machines as per defined parameters
- GS3.** monitor and control machine operations using gauges, control panels, and sensors
- GS4.** identify production irregularities and take prompt corrective actions to maintain quality standards
- GS5.** conduct visual and physical inspections of laminated boards for alignment, bonding, and surface finish
- GS6.** communicate effectively with supervisors, maintenance staff, and co-workers to ensure seamless workflow
- GS7.** maintain detailed records of setup parameters, production data, and maintenance activities
- GS8.** apply problem-solving and analytical skills to address minor machine faults and operational challenges
- GS9.** follow workplace safety, hygiene, and environmental guidelines during operation and maintenance
- GS10.** manage time efficiently to meet production targets and minimize machine downtime
- GS11.** demonstrate teamwork and adaptability while working in coordinated production environments
- GS12.** uphold discipline, responsibility, and attention to detail to ensure consistent product quality and process efficiency

RSC/N0617: Preparation of Adhesive and its application

Description

This NOS covers preparing adhesive mixtures as per formulation requirements and applying them uniformly on substrates to ensure strong bonding, quality output, and compliance with safety standards.

Scope

The scope covers the following :

- Prepare starch-based or synthetic adhesives
- Apply adhesive uniformly on corrugated sheets

Elements and Performance Criteria

Prepare starch-based or synthetic adhesives

To be competent, the user/individual on the job must be able to:

- PC1.** identify the type of adhesive required (starch-based or synthetic) based on the job card, board grade, and customer specifications
- PC2.** measure and mix raw materials (starch, water, resins, additives) in the correct ratio using manual or semi-automatic mixing equipment
- PC3.** monitor and adjust adhesive viscosity, pH, and temperature during preparation to achieve desired bonding properties
- PC4.** follow safe handling procedures for chemicals and additives used in adhesive preparation, including the use of gloves, goggles, and aprons
- PC5.** ensure the mixing container and tools are clean and free from residue before and after use to prevent contamination
- PC6.** store prepared adhesive in suitable containers, properly labeled, and transferred to glue pans or feed systems as per production schedule
- PC7.** dispose of unused or expired adhesives as per environmental and workplace safety guidelines
- PC8.** record batch details, ingredients, preparation time, and operator initials in the adhesive logbook for traceability and quality assurance

Apply adhesive uniformly on corrugated sheets

To be competent, the user/individual on the job must be able to:

- PC9.** load the prepared adhesive into glue pans or feed systems while ensuring proper level and flow consistency
- PC10.** adjust glue roller gap, speed, and pan position to achieve uniform adhesive application across the sheet surface
- PC11.** monitor glue spread during operation to ensure there are no dry spots, over-gluing, or glue skips that could affect bonding
- PC12.** control adhesive temperature and viscosity during application to suit environmental conditions and material types

Qualification Pack

- PC13.** perform regular visual inspections and touch tests on glued sheets to verify proper coverage and bonding
- PC14.** clean glue rollers and pans at regular intervals during the run to avoid glue buildup and contamination
- PC15.** coordinate with the machine operator to align glue application settings with machine speed and board feed
- PC16.** document adhesive usage, spread parameters, and any observed issues in the process log for quality control and traceability

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** types of adhesives used in corrugation starch based and synthetic and their specific applications
- KU2.** raw materials, composition, and mixing ratios required for preparing different grades of adhesives
- KU3.** methods for measuring and maintaining correct adhesive viscosity, pH, and temperature for optimal bonding
- KU4.** operation and maintenance of manual or semi-automatic adhesive mixing equipment
- KU5.** safe handling, storage, and disposal procedures for chemicals, additives, and adhesives as per safety and environmental norms
- KU6.** importance of equipment cleanliness to prevent contamination during adhesive preparation and application
- KU7.** correct procedures for loading, transferring, and applying adhesives using glue pans and rollers
- KU8.** techniques for achieving uniform glue spread and detecting common defects such as over-gluing or glue skips
- KU9.** effect of environmental conditions (humidity, temperature) on adhesive performance and lamination quality
- KU10.** routine cleaning and preventive maintenance of glue rollers, pans, and feed systems
- KU11.** documentation practices for maintaining adhesive batch records, process parameters, and usage logs
- KU12.** coordination requirements with machine operators and quality control personnel to ensure consistent bonding and production efficiency

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret job cards, adhesive preparation sheets, and production specifications accurately
- GS2.** measure and mix raw materials (starch, water, resins, additives) using weighing and mixing equipment as per defined ratios

Qualification Pack

- GS3.** operate adhesive preparation and application systems efficiently while maintaining safety and quality standards
- GS4.** monitor and control parameters such as viscosity, pH, and temperature during adhesive preparation and application
- GS5.** identify defects like uneven glue spread, over-gluing, or skips, and take corrective actions promptly
- GS6.** communicate effectively with supervisors, quality control staff, and machine operators for synchronized production
- GS7.** maintain detailed batch records, usage logs, and cleaning schedules for process traceability
- GS8.** follow workplace safety procedures, including proper use of PPE while handling chemicals and adhesives
- GS9.** apply problem-solving skills to address minor operational issues in glue preparation and application
- GS10.** manage time effectively to ensure adhesive readiness aligns with production timelines
- GS11.** practice teamwork, discipline, and responsibility to achieve consistent production quality
- GS12.** demonstrate attention to detail to ensure accurate formulation, uniform application, and compliance with quality standards

Qualification Pack

RSC/N0618: Inspecting Quality and Basic Troubleshooting

Description

This NOS covers inspecting product quality at various production stages, identifying defects or deviations, and performing basic troubleshooting to maintain consistent output and process efficiency.

Scope

The scope covers the following :

- Conduct in-process quality checks
- Identify and resolve minor operational issues

Elements and Performance Criteria

Conduct in-process quality checks

To be competent, the user/individual on the job must be able to:

- PC1.** use tools such as GSM cutter, weighing scale, and micrometer to measure the grammage and thickness of the board during production
- PC2.** perform visual inspection to detect common defects like delamination, glue skips, bubbling, edge damage, or misalignment in laminated sheets
- PC3.** carry out basic strength tests such as Ply Bond and Edge Crush Test (ECT) at specified intervals to assess bonding quality
- PC4.** compare production output against job specifications and quality standards to identify deviations early
- PC5.** isolate and report defective material promptly to minimize wastage and avoid further processing of substandard output
- PC6.** maintain records of quality checks performed, test results, and any corrective actions taken for traceability and audit compliance

Identify and resolve minor operational issues

To be competent, the user/individual on the job must be able to:

- PC7.** identify early signs of faults such as glue roller imbalance, uneven adhesive spread, sheet misfeeds, or machine vibrations during production
- PC8.** adjust machine parameters like glue flow, roller pressure, speed, and sheet alignment to correct minor operational issues without stopping production
- PC9.** clean or replace glue pans, rollers, or feeding belts if adhesive buildup or mechanical wear affects performance
- PC10.** escalate recurring or unresolved problems to the maintenance team or supervisor with accurate descriptions of the fault
- PC11.** record all troubleshooting actions taken, including changes in machine settings and outcomes, to support process improvement and reduce future downtime

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** standard operating procedures for in-process and final quality inspection in corrugated board production
- KU2.** use and calibration of quality testing tools such as GSM cutter, micrometer, weighing scale, Ply Bond tester, and ECT machine
- KU3.** common product defects such as delamination, bubbling, glue skips, edge damage, or misalignment and their root causes
- KU4.** methods for conducting visual inspections and physical tests to assess product quality and bonding strength
- KU5.** acceptable quality limits and tolerance levels as per job specifications and industry standards
- KU6.** procedures for documenting and reporting test results, deviations, and corrective actions for traceability
- KU7.** basic machine operating principles related to glue rollers, feed belts, and lamination settings
- KU8.** common operational faults (e.g., uneven glue spread, roller imbalance, sheet misfeeds) and steps to correct them
- KU9.** preventive maintenance practices to minimize machine-related defects and downtime
- KU10.** communication protocols for escalating unresolved or repeated quality and operational issues to maintenance or supervisors
- KU11.** importance of adhering to workplace safety and quality assurance standards during inspection and troubleshooting
- KU12.** record-keeping and data interpretation for process improvement and continuous quality enhancement

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret job cards, production specifications, and quality standards accurately
- GS2.** use measuring instruments such as GSM cutter, micrometer, weighing scale, and testing equipment correctly
- GS3.** conduct visual and physical quality inspections to identify defects and assess bonding strength
- GS4.** analyze test results and compare them against defined quality benchmarks to detect deviations
- GS5.** record inspection data, test outcomes, and corrective actions clearly and systematically
- GS6.** identify and troubleshoot minor machine issues like uneven glue spread, sheet misalignment, or roller imbalance
- GS7.** adjust machine parameters such as speed, pressure, and glue flow to maintain consistent production quality
- GS8.** communicate effectively with machine operators, quality supervisors, and maintenance teams
- GS9.** apply problem-solving and analytical thinking to ensure quick resolution of production issues

Qualification Pack

- GS10.** follow standard safety procedures and use appropriate PPE during inspection and troubleshooting activities
- GS11.** manage time efficiently to conduct inspections without disrupting production workflow
- GS12.** demonstrate attention to detail, accountability, and teamwork to maintain product quality and operational efficiency

RSC/N5007: Follow health & safety protocol

Description

This unit is about maintaining health and safety of self and others at workplace.

Scope

The scope covers the following :

- Maintain a clean and efficient workplace
- Render appropriate emergency procedures
- Maintain standard safety procedures at the workplace
- Participate in safety awareness campaigns
- Understand potential sources of accidents
- Use safety gears to avoid accidents

Elements and Performance Criteria

Maintain a clean and efficient workplace

To be competent, the user/individual on the job must be able to:

- PC1.** undertake basic safety checks before operation of all machinery and equipment and report hazards to the appropriate supervisor
- PC2.** work for which protective clothing or equipment is required is identified and the appropriate protective clothing or equipment is used in performing these duties in accordance with workplace policy
- PC3.** read and understand the hazards of use and contamination mentioned on the labels of chemicals, utilities etc
- PC4.** prior to performing manual handling jobs, risk is assessed and work is carried out according to currently recommended safe practices.
- PC5.** use equipment and materials safely and correctly and return the same to designated storage when not in use
- PC6.** dispose off waste safely and correctly in a designated area
- PC7.** risks to bystanders are recognized and action taken to reduce risk associated with jobs in the workplace
- PC8.** perform work in a manner which minimizes environmental damage
- PC9.** all procedures and work instructions for controlling risk are followed closely
- PC10.** report any accidents, incidents or problems without delay to an appropriate person and take immediate necessary action to reduce further danger

Render appropriate emergency procedures

To be competent, the user/individual on the job must be able to:

- PC11.** follow procedures for dealing with accidents, fires and emergencies, including communicating location and directions to emergency.
- PC12.** follow emergency procedures as per company standards and workplace requirements

Qualification Pack

- PC13.** use emergency equipment in accordance with manufacturers' specifications and workplace requirements
- PC14.** provide treatment appropriate to the patient's injuries in accordance with recognized first aid techniques.
- PC15.** recover (if practical), clean, inspect/test, refurbish, replace and store the first aid equipment as appropriate
- PC16.** dispose off medical waste in accordance with workplace requirements
- PC17.** report details of first aid administered in accordance with work place procedures

Maintain standard safety procedures at the workplace

To be competent, the user/individual on the job must be able to:

- PC18.** comply with general safety procedures
- PC19.** follow standard safety procedures while handling equipment, hazardous material or tool
- PC20.** check parts of the workplace and take preventive actions like spraying and other steps to protect from leakages, water logging, pests, fire, pollution, etc.
- PC21.** ensure no accidents and damages at the workplace, reporting of any breach of company safety procedure
- PC22.** keep the workplace organized, swept, clean and hazard free

Participate in safety awareness campaigns

To be competent, the user/individual on the job must be able to:

- PC23.** attend fire drills and other safety related workshops organized at the workplace
- PC24.** be aware of first aid, evacuation and emergency procedures
- PC25.** be alert of any events and do not be negligent to any safety procedures to be followed

Understand potential sources of accidents

To be competent, the user/individual on the job must be able to:

- PC26.** avoid accidents while using hazardous chemicals, machines, sharp tools and equipment

Use safety gears to avoid accidents

To be competent, the user/individual on the job must be able to:

- PC27.** use safety materials such as protective gear, goggles, caps, shoes, etc.(as applicable with workplace)
- PC28.** handle heavy and hazardous materials with care and using appropriate tools and handling equipment such as trolleys, ladders

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** policies on incentives, delivery standards, and personnel management.
- KU2.** occupational safety and health policy followed
- KU3.** emergency evacuation procedure
- KU4.** medical policy
- KU5.** company laws and acts
- KU6.** the risks to health and safety and the measures to be taken to control those risks in the area of work

Qualification Pack

- KU7.** workplace procedures and requirements for the handling of workplace injuries/illnesses.
- KU8.** basic emergency first aid procedure
- KU9.** local emergency services
- KU10.** reporting on accidents, incidents and problems to appropriate authorities.
- KU11.** how to use machines as per standard operating procedure
- KU12.** how to maintain work area safe and secure
- KU13.** use of hazardous materials, tools and equipments
- KU14.** emergency evacuation and first aid procedures to be followed
- KU15.** personal hygiene and fitness requirements
- KU16.** general duties under the relevant health and safety legislation
- KU17.** what personal protective equipment and clothing should be worn and how it is cared for
- KU18.** the correct and safe way to use materials and equipment required for work
- KU19.** the importance of good housekeeping in the workplace
- KU20.** safe disposal methods for waste
- KU21.** methods for minimizing environmental damage during work

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** record data which are required for record keeping purpose
- GS2.** report problems to the appropriate person in a timely manner
- GS3.** write descriptions and details about incidents in reports
- GS4.** read instruction manuals for hand tools and equipment
- GS5.** read instructions on work orders and procedures
- GS6.** receive instructions and seek advice from superiors
- GS7.** communicate clearly and effectively with others
- GS8.** take a decision for any change/issue based on earlier successes(documented previous history)on similar issues
- GS9.** work out changes in case a new improved machine/equipment is added in the process or any new material/chemical is developed replacing existing one.
- GS10.** make changes in cycle time due to improved process.
- GS11.** use the standard operating procedure or trouble shooting manuals for trouble shooting and other reference documents approved by plant management
- GS12.** consult the peer group and superiors to arrive at a favourable decision.
- GS13.** use of standard available problem solving techniques for decision making
- GS14.** review and analyze the process steps to check on system non adherence andnon conformity
- GS15.** review the current sop and other standards for continuous improvement to facilitate decision making
- GS16.** take a calculated risk with minimum losses
- GS17.** schedule daily activities and drawing up priorities; allocate start times, estimation of completion times and materials, equipment and assistance required for completion.

Qualification Pack

Qualification Pack

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.

Qualification Pack

6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.

7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Minimum Aggregate Passing % at QP Level : 50

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
