RSC/Q0627: Corrugator Line Incharge

Brief Job Description

The Corrugator Line Incharge oversees daily operations of the corrugator line ensuring efficient and safe machine performance, meeting production targets, maintaining product quality, leading shift operators, implementing quality controls, planning schedules, and keeping accurate production records.

Personal Attributes

The job requires the individual to be physically fit to work for long hours, have good observational skills, maintain team coordination, and ensure quality and safety on the production line.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [RSC/N0619: Plan, Schedule and Supervise Corrugator Line Operations](#)
2. [RSC/N0620: Implement Quality and Safety Control on Line](#)
3. [RSC/N0621: Maintain Line Efficiency and Manage Process Improvement](#)
4. [RSC/N0622: Ensure Effective Communication and Team Coordination](#)
5. [RSC/N0623: Manage Documentation and Assist in Audits](#)
6. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

Qualification Pack

RSC/N0619: Plan, Schedule and Supervise Corrugator Line Operations

Description

This NOS covers planning and scheduling corrugator line activities, allocating resources, and supervising operations to ensure optimal productivity, quality output, and adherence to safety and production standards.

Scope

The scope covers the following :

- Interpret production requirements and plan operations
- Allocate manpower and ensure setup readiness
- Monitor production and performance
- Coordinate and report operations
- Enforce standards and process compliance

Elements and Performance Criteria

Interpret production requirements and plan operations

To be competent, the user/individual on the job must be able to:

- PC1.** interpret daily production schedules, job cards, and customer delivery timelines
- PC2.** assess material availability including paper reels, adhesives, and additives
- PC3.** prepare a production plan aligning with shift capacity and deadlines
- PC4.** coordinate with stores and logistics for just-in-time material supply
- PC5.** evaluate job changeover requirements and downtime impact

Allocate manpower and ensure setup readiness

To be competent, the user/individual on the job must be able to:

- PC6.** assign machine operators and helpers based on skill levels and job complexity
- PC7.** verify machine readiness including alignment, temperature, and glue settings
- PC8.** cross-check that the job loaded matches approved board specifications
- PC9.** ensure sample board is produced and approved before full run
- PC10.** inspect previous job clean-up and shift handover records

Monitor production and performance

To be competent, the user/individual on the job must be able to:

- PC11.** monitor corrugator line speed and evaluate efficiency during the shift
- PC12.** identify and respond to production delays or unplanned stoppages
- PC13.** maintain a record of hourly output and compare against targets
- PC14.** guide team members during troubleshooting of line imbalances
- PC15.** ensure WIP and finished board movement is smooth and timely

Coordinate and report operations

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC16.** communicate production updates to upstream and downstream teams
- PC17.** record shift-wise production, wastage, and downtime data
- PC18.** prepare and submit shift summary reports to supervisors
- PC19.** participate in daily line review meetings and escalate issues as needed
- PC20.** conduct shift debrief and document pending tasks for next shift

Enforce standards and process compliance

To be competent, the user/individual on the job must be able to:

- PC21.** ensure operators follow SOPs and job-specific work instructions
- PC22.** verify machine parameters comply with board specifications
- PC23.** monitor operator performance and provide real-time feedback
- PC24.** ensure compliance with 5S, housekeeping, and safety rules on the line

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the overall corrugation process flow, including machine sequence, material inputs, and output parameters
- KU2.** methods for interpreting daily production schedules, job cards, and customer requirements
- KU3.** principles of production planning, resource allocation, and shift scheduling for optimal efficiency
- KU4.** types, grades, and specifications of paper reels, adhesives, and additives used in corrugation
- KU5.** procedures for coordinating with stores, maintenance, and logistics teams for uninterrupted operations
- KU6.** setup and calibration requirements for corrugator machines, including temperature, glue settings, and alignment
- KU7.** techniques for monitoring production speed, efficiency, and quality throughout the shift
- KU8.** common causes of production delays, line imbalances, and downtime, and methods to minimize them
- KU9.** documentation procedures for recording production data, wastage, and performance metrics
- KU10.** standards and procedures for enforcing process compliance, including SOPs, 5S, and safety regulations
- KU11.** communication and leadership practices for managing machine operators and helpers effectively
- KU12.** importance of maintaining coordination between upstream (raw material preparation) and downstream (finishing/packing) operations for smooth workflow

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret job cards, production schedules, and customer delivery requirements accurately
- GS2.** plan and organize corrugator line operations to meet production targets and timelines

Qualification Pack

- GS3.** Allocate manpower effectively based on skill levels, machine type, and job complexity
- GS4.** monitor production parameters, efficiency, and quality, and take corrective actions when deviations occur
- GS5.** coordinate with stores, maintenance, and logistics teams for smooth material and workflow management
- GS6.** maintain detailed production records, including output, downtime, and wastage data
- GS7.** communicate clearly with team members, supervisors, and cross-functional departments
- GS8.** lead and motivate the production team to ensure discipline, teamwork, and consistent performance
- GS9.** apply analytical and problem-solving skills to identify and resolve operational issues quickly
- GS10.** ensure adherence to safety, quality, and housekeeping standards across the production line
- GS11.** manage time efficiently to balance multiple tasks such as planning, supervision, and reporting
- GS12.** demonstrate accountability, leadership, and decision-making skills to achieve continuous improvement and production excellence

RSC/N0620: Implement Quality and Safety Control on Line

Description

This NOS covers implementing quality and safety control measures on the corrugator line to ensure products meet defined standards while maintaining a safe, compliant, and efficient working environment.

Scope

The scope covers the following :

- Ensure quality standards are enforced
- Support quality troubleshooting and improvement
- Monitor safety and enforce compliance
- Record and report quality/safety performance

Elements and Performance Criteria

Ensure quality standards are enforced

To be competent, the user/individual on the job must be able to:

- PC1.** understand customer specifications and define critical quality parameters
- PC2.** ensure QC checkpoints are active at wet-end, dry-end, and exit
- PC3.** verify first board sample against job specs (GSM, calliper, flute integrity)
- PC4.** ensure regular inspection of board warp, delamination, glue bonding
- PC5.** guide operators to respond to real-time quality alerts
- PC6.** review in-process inspection records and sampling reports

Support quality troubleshooting and improvement

To be competent, the user/individual on the job must be able to:

- PC7.** identify repeat quality issues and initiate preliminary root cause analysis
- PC8.** document quality non-conformances and coordinate with QC for resolution
- PC9.** review machine parameters for potential quality deviations
- PC10.** recommend changes in run conditions to improve board quality
- PC11.** provide inputs to quality team for improving test plans or specifications
- PC12.** conduct follow-up reviews on previous quality issues

Monitor safety and enforce compliance

To be competent, the user/individual on the job must be able to:

- PC13.** check that all team members are using required PPE and safety tools
- PC14.** verify interlocks, guards, alarms, and emergency stop systems before production
- PC15.** conduct safety toolbox talks and pre-shift safety briefings
- PC16.** intervene in case of unsafe practices or behavior on shop floor
- PC17.** monitor hot plate and steam pressure zones for overheating risks
- PC18.** ensure chemicals (glue/additives) are stored and handled safely

Record and report quality/safety performance

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC19.** maintain daily QC records, safety checklists, and deviation logs
- PC20.** ensure documentation of incidents, near misses, and unsafe conditions
- PC21.** coordinate with maintenance and EHS team for closure of safety findings
- PC22.** present shift-wise quality and safety performance in review meetings
- PC23.** support internal or customer audits with relevant data
- PC24.** drive quality awareness and safety culture among team members

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** customer and product specifications, including key quality parameters such as GSM, caliper, flute integrity, and bonding strength
- KU2.** quality checkpoints and inspection procedures across the corrugator line (wet-end, dry-end, and exit)
- KU3.** common board defects like warp, delamination, and glue inconsistencies, along with their root causes
- KU4.** methods for conducting in-process inspections, sampling, and first-board verification
- KU5.** techniques for identifying recurring quality issues and initiating preliminary root cause analysis
- KU6.** procedures for documenting non-conformances, deviations, and corrective actions as per quality management systems
- KU7.** safe handling and storage practices for adhesives, chemicals, and materials used on the production line
- KU8.** importance and functioning of machine interlocks, guards, emergency stops, and alarm systems
- KU9.** workplace safety regulations, PPE requirements, and procedures for preventing accidents and injuries
- KU10.** protocols for conducting safety briefings, toolbox talks, and enforcing compliance on the shop floor
- KU11.** record-keeping standards for maintaining QC reports, safety checklists, and deviation logs
- KU12.** coordination and communication processes with quality control, maintenance, and EHS teams for effective issue resolution and continuous improvement

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret customer specifications, job sheets, and quality standards accurately
- GS2.** conduct visual and physical quality inspections at different stages of the corrugator line
- GS3.** identify defects such as warp, delamination, or bonding issues and take prompt corrective actions
- GS4.** monitor and record key process parameters affecting board quality and product consistency

Qualification Pack

- GS5.** perform preliminary root cause analysis and coordinate with the QC team for issue resolution
- GS6.** maintain accurate and timely documentation of quality checks, deviations, and corrective actions
- GS7.** ensure team compliance with safety norms, use of PPE, and safe work practices
- GS8.** conduct and participate in safety briefings, toolbox talks, and on-floor awareness sessions
- GS9.** communicate effectively with production, QC, and maintenance teams for smooth coordination
- GS10.** respond quickly to quality and safety alerts while minimizing production disruption
- GS11.** analyze production data to identify trends and recommend process improvements
- GS12.** demonstrate leadership, accountability, and attention to detail to uphold quality and safety standards consistently

RSC/N0621: Maintain Line Efficiency and Manage Process Improvement

Description

This NOS covers monitoring and optimizing corrugator line efficiency through process analysis, waste reduction, and continuous improvement initiatives to achieve higher productivity and consistent product quality.

Scope

The scope covers the following :

- Monitor efficiency and analyze performance
- Implement process improvement projects
- Lead standardization and capability building
- Coordinate reviews and continuous improvement
- Support change management and team coaching

Elements and Performance Criteria

Monitor efficiency and analyze performance

To be competent, the user/individual on the job must be able to:

- PC1.** track overall equipment effectiveness (OEE), uptime, and losses
- PC2.** study trends of repeated breakdowns or quality failures
- PC3.** collect data from MIS, downtime logs, and production reports
- PC4.** coordinate with maintenance to understand recurring issues
- PC5.** evaluate current machine speed, wastage, and cost data

Implement process improvement projects

To be competent, the user/individual on the job must be able to:

- PC6.** identify areas for line optimization or speed improvement
- PC7.** plan and execute minor kaizen or improvement projects
- PC8.** validate improvement results with data and team feedback
- PC9.** document changes made in SOPs or settings
- PC10.** circulate best practices among operators and supervisors

Lead standardization and capability building

To be competent, the user/individual on the job must be able to:

- PC11.** standardize new methods across all shifts and operators
- PC12.** prepare operator training schedules and review skill gaps
- PC13.** track implementation of process audits and findings
- PC14.** support introduction of new board types or SKUs on line
- PC15.** update line capability documents with revised settings

Coordinate reviews and continuous improvement

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC16.** lead shift-level performance review meetings
- PC17.** support internal benchmarking and best practice exchange
- PC18.** escalate issues that require process re-design
- PC19.** prepare monthly summary of improvements and outcomes
- PC20.** engage with R&D or design team for technical trials

Support change management and team coaching

To be competent, the user/individual on the job must be able to:

- PC21.** guide team during transition to new process or material
- PC22.** mentor team members on documentation and analysis
- PC23.** review operator suggestions and reward feasible ideas
- PC24.** conduct internal audits of compliance and line data
- PC25.** ensure data integrity in reports, charts, and dashboards
- PC26.** track deviations from standard process during trials
- PC27.** follow-up on improvement actions post-review
- PC28.** evaluate training effectiveness of operators
- PC29.** ensure alignment of line performance with overall KPIs
- PC30.** document learnings and prepare improvement summary

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** key performance indicators (KPIs) such as Overall Equipment Effectiveness (OEE), uptime, efficiency, and wastage
- KU2.** methods for collecting, analyzing, and interpreting production data from MIS, downtime logs, and quality reports
- KU3.** common causes of productivity loss, machine downtime, and process variation in corrugation operations
- KU4.** techniques for conducting root cause analysis, Pareto analysis, and trend studies to identify recurring issues
- KU5.** principles of Lean Manufacturing, Kaizen, and continuous improvement tools used in process optimization
- KU6.** standard operating procedures (SOPs) and how to modify or update them after process changes
- KU7.** procedures for planning, implementing, and validating improvement projects using data-based evidence
- KU8.** communication and coordination practices for working with maintenance, quality, and production teams
- KU9.** methods for standardizing best practices and ensuring uniform process adoption across shifts
- KU10.** documentation and reporting formats for process audits, improvement summaries, and review meetings
- KU11.** basics of cost analysis, productivity metrics, and performance benchmarking

Qualification Pack

- KU12.** training and capability-building techniques to upskill operators and enhance team performance
- KU13.** change management principles to ensure smooth transition during process or material upgrades
- KU14.** procedures for conducting internal audits, maintaining data integrity, and ensuring compliance with organizational KPIs
- KU15.** collaboration methods with R&D and design teams for product trials, testing, and technical evaluation

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** monitor and analyze production data to assess line efficiency, downtime, and waste level
- GS2.** use tools such as MIS reports, dashboards, and performance charts to track key process indicators
- GS3.** identify process bottlenecks and initiate corrective or preventive actions to improve productivity
- GS4.** plan and implement small-scale improvement (Kaizen) or optimization projects effectively
- GS5.** apply root cause analysis and data-driven problem-solving techniques to recurring operational issues
- GS6.** coordinate with production, maintenance, and quality teams to align efficiency goals and corrective actions
- GS7.** standardize improved methods and update SOPs to ensure consistent process adoption
- GS8.** train and mentor operators on new procedures, best practices, and process control methods
- GS9.** conduct and participate in performance review meetings and communicate findings clearly
- GS10.** prepare detailed reports, charts, and summaries of process improvements and efficiency gains
- GS11.** utilize leadership, analytical, and decision-making skills to drive continuous improvement initiatives
- GS12.** demonstrate teamwork, adaptability, and a proactive approach toward achieving organizational KPIs

RSC/N0622: Ensure Effective Communication and Team Coordination

Description

This NOS covers skills required to ensure clear communication, effective teamwork, and coordination among team members to achieve production targets and maintain a harmonious work environment as per organizational standards.

Scope

The scope covers the following :

- Communicate production updates and issues effectively
- Coordinate with internal departments and support functions
- Support team motivation and conflict resolution

Elements and Performance Criteria

Communicate production updates and issues effectively

To be competent, the user/individual on the job must be able to:

- PC1.** communicate shift targets, priorities, and expected challenges during team briefings
- PC2.** report production status and quality deviations to supervisors clearly and promptly
- PC3.** maintain written and verbal logs to ensure clarity in job handover
- PC4.** escalate unresolved issues to concerned departments with supporting data

Coordinate with internal departments and support functions

To be competent, the user/individual on the job must be able to:

- PC5.** liaise with maintenance team for preventive and breakdown interventions
- PC6.** coordinate with quality control personnel for inspection and approval
- PC7.** follow up with store and logistics for material movement and dispatch support
- PC8.** inform HR or admin in case of manpower availability or shift-related issues

Support team motivation and conflict resolution

To be competent, the user/individual on the job must be able to:

- PC9.** encourage team members to participate in problem-solving and suggestions
- PC10.** listen to operator concerns and try to resolve them or escalate constructively
- PC11.** acknowledge and appreciate good performance or improvement initiatives
- PC12.** guide new operators in understanding team roles and production expectations

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** interpret production plans, shift targets, and priorities to communicate them effectively to the team

Qualification Pack

- KU2.** apply appropriate communication methods (verbal, written, digital) for sharing updates and issues clearly
- KU3.** understand the organizational reporting hierarchy and escalation procedures for timely issue resolution
- KU4.** maintain accurate shift and production records to ensure smooth job handover
- KU5.** coordinate effectively with maintenance, quality, logistics, and HR teams for uninterrupted operations
- KU6.** identify the importance of preventive maintenance and quality checks in maintaining process continuity
- KU7.** recognize the impact of poor communication or coordination on production efficiency and quality
- KU8.** demonstrate interpersonal and listening skills to handle team concerns professionally
- KU9.** apply basic conflict resolution and motivation techniques to maintain team morale
- KU10.** understand organizational policies regarding performance feedback and team recognition
- KU11.** support new operators in understanding workflow, safety protocols, and production expectations
- KU12.** promote a culture of openness, teamwork, and continuous improvement in communication practice

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate clearly and confidently with team members, supervisors, and other departments
- GS2.** use digital tools, reports, and communication logs to share production updates effectively
- GS3.** plan and conduct team briefings to align members with shift goals and priorities
- GS4.** coordinate with maintenance, quality, and logistics teams to resolve issues promptly
- GS5.** escalate technical or manpower-related concerns to the concerned department with supporting data
- GS6.** motivate team members through positive feedback and constructive guidance
- GS7.** listen actively to team concerns and mediate conflicts in a professional manner
- GS8.** support and mentor new operators to ensure smooth integration into the team
- GS9.** manage time effectively to balance communication, supervision, and production activities
- GS10.** demonstrate leadership, adaptability, and accountability in a dynamic production environment

RSC/N0623: Manage Documentation and Assist in Audits

Description

This NOS ensures accurate maintenance of production and quality records, and assist during internal and external audits to ensure compliance with organizational and regulatory standards.

Scope

The scope covers the following :

- Maintain operational and quality records
- Prepare data for internal and external reporting
- Assist during audits and compliance checks

Elements and Performance Criteria

Maintain operational and quality records

To be competent, the user/individual on the job must be able to:

- PC1.** ensure timely and accurate filling of production logs and shift reports
- PC2.** verify that machine setting sheets are updated and filed correctly
- PC3.** maintain traceability documents for each job produced
- PC4.** review quality inspection records for completeness and legibility

Prepare data for internal and external reporting

To be competent, the user/individual on the job must be able to:

- PC5.** compile shift-wise summaries for weekly and monthly reviews
- PC6.** extract and present downtime, quality loss, and performance charts
- PC7.** coordinate with MIS team or supervisors for data consolidation
- PC8.** submit operator training and attendance records on schedule

Assist during audits and compliance checks

To be competent, the user/individual on the job must be able to:

- PC9.** present required documentation during internal/external audits
- PC10.** support audit queries by providing necessary backup documents
- PC11.** ensure files and records are organized and easily retrievable
- PC12.** record and follow up on audit observations till closure

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** importance of maintaining accurate and up-to-date production and quality records
- KU2.** types of production logs, shift reports, and documentation formats used in the plant
- KU3.** procedures for updating and verifying machine setting sheets and traceability records

Qualification Pack

- KU4.** methods for reviewing inspection and quality check reports for accuracy and completeness
- KU5.** how to compile, summarize, and interpret production and downtime data for management review
- KU6.** basics of data presentation in charts, MIS reports, and performance dashboards
- KU7.** internal reporting protocols and timelines for submission of operational data
- KU8.** documentation requirements during internal and external audits
- KU9.** how to organize and retrieve files and records for audit and compliance checks
- KU10.** process of addressing and closing audit observations effectively
- KU11.** company policies and standards related to document control and record retention
- KU12.** confidentiality and data integrity requirements while handling operational records

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate clearly and professionally with team members, supervisors, and auditors
- GS2.** use digital tools or ERP systems for data entry, record maintenance, and report generation
- GS3.** analyze and interpret production and quality data for decision-making
- GS4.** plan and prioritize documentation tasks to meet audit and reporting timelines
- GS5.** ensure accuracy, completeness, and consistency in all records and logs
- GS6.** handle confidential information responsibly and maintain data integrity
- GS7.** coordinate effectively with cross-functional teams during audits and reviews
- GS8.** identify and correct documentation errors or discrepancies proactively
- GS9.** maintain organized filing systems (physical and digital) for quick retrieval
- GS10.** prepare summaries, charts, and dashboards for performance reporting
- GS11.** adhere to company protocols and industry standards for documentation and compliance
- GS12.** support continuous improvement in documentation and audit readiness processes

Qualification Pack

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e-mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.

Qualification Pack

6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.

7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
