RSC/Q0628: Corrugator Dry End Machine Operator

Brief Job Description

The Dry End Operator is responsible for operating and monitoring the dry end of the corrugator line, including the slitter scorer, cutoff, and double facer. They perform setup of production jobs via control panels, monitor line speed, board warp, delamination, calliper, and scoring accuracy. The role involves coordinating with the wet end team to maintain board quality and moisture, adjusting board temperature using hot plates, and monitoring steam pressure. Operators must also maintain cleanliness and ensure safe working conditions.

Personal Attributes

The job requires the individual to be physically fit to work for long hours attentive with good observational skills and able to work safely and collaboratively in a fast paced production environment.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [RSC/N0624: Set up and Operate Dry End Corrugator Machines](#)
2. [RSC/N0625: Monitor and Maintain Board Quality at Dry End](#)
3. [RSC/N0626: Perform Preventive Checks and Minor Maintenance of Dry End Machinery](#)
4. [RSC/N0627: Maintain Workplace Safety and Cleanliness](#)
5. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

RSC/N0624: Set up and Operate Dry End Corrugator Machines

Description

This NOS covers the skills and knowledge required to set up and operate dry end corrugator machines, ensuring correct machine settings, smooth production flow, and product quality. It also involves maintaining safety standards, minimizing downtime, and coordinating with team members for continuous line efficiency.

Scope

The scope covers the following :

- Prepare and read job lineups
- Set up machines as per job
- Operate and monitor machine
- Maintain productivity and safety
- Conduct shift-end shutdown and handover
- Ensure quality control during operation

Elements and Performance Criteria

Prepare and read job lineups

To be competent, the user/individual on the job must be able to:

- PC1.** read and interpret production job lineup sheet
- PC2.** identify job parameters like cut length, scoring dimensions, number of ups, board type
- PC3.** verify raw materials required for the job

Set up machines as per job

To be competent, the user/individual on the job must be able to:

- PC4.** select correct job from HMI/control panel
- PC5.** input cut length, scoring dimensions, and job name on the control interface
- PC6.** position splitter blades and scorer wheels manually or using auto control
- PC7.** test-run first sheet and verify alignment and accuracy

Operate and monitor machine

To be competent, the user/individual on the job must be able to:

- PC8.** start machines following SOP
- PC9.** monitor running speed and sheet count
- PC10.** observe output for board defects like misaligned cuts, wrong score positions
- PC11.** adjust machine parameters in case of deviation

Maintain productivity and safety

To be competent, the user/individual on the job must be able to:

- PC12.** ensure machines run at optimal speed for each job
- PC13.** coordinate with stacking area for smooth transition
- PC14.** follow lockout-tagout for minor cleaning or jam removal

Qualification Pack

Conduct shift-end shutdown and handover

To be competent, the user/individual on the job must be able to:

- PC15.** shut down machines as per SOP
- PC16.** clean dust and debris from the operating zone
- PC17.** escalate major deviations to quality head or shift in-charge
- PC18.** log job completion details and machine performance

Ensure quality control during operation

To be competent, the user/individual on the job must be able to:

- PC19.** inspect random boards for scoring quality, correct cut length
- PC20.** escalate abnormal noises or misalignment to technician

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** how to interpret job lineup sheets, board specifications, and production plans
- KU2.** types of corrugated board (flute types, layers) and their job-specific parameters
- KU3.** functions of HMI/control panel for inputting job settings like cut length and scoring
- KU4.** correct positioning and adjustment of slitter blades and scorer wheels
- KU5.** indicators of board quality defects such as wrong score depth or misaligned cutting
- KU6.** procedures for safe machine operation, including lockout tagout protocols
- KU7.** how to optimize machine speed to balance productivity and quality
- KU8.** signals of abnormal machine behavior requiring maintenance or escalation
- KU9.** standard SOPs for shift start-up, shutdown, and cleaning activities
- KU10.** documentation and traceability requirements for production records
- KU11.** coordination protocols with stacking and quality teams during job changeovers
- KU12.** workplace safety guidelines for operating in high-speed machinery zones

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate job requirements and issues clearly with the production and quality team
- GS2.** set up and operate machine controls using digital and manual interfaces
- GS3.** identify and troubleshoot common scoring and cutting defects quickly
- GS4.** organize work to meet shift targets and minimize downtime
- GS5.** follow safety practices and respond calmly during machine jams or emergencies
- GS6.** maintain accurate records and ensure proper handover between shifts
- GS7.** work efficiently with stacking and maintenance teams for smooth workflow
- GS8.** read and update production logs and SOP-related documentation
- GS9.** adapt to different board types, job changes, and speed adjustments
- GS10.** inspect output and take corrective actions to maintain product quality

RSC/N0625: Monitor and Maintain Board Quality at Dry End

Description

This NOS covers the skills and knowledge required to set up, operate, and monitor corrugator dry end machines to achieve accurate cutting, scoring, and board stacking as per job specifications. It includes maintaining product quality, ensuring safe machine handling, and coordinating with the production team for smooth line operations.

Scope

The scope covers the following :

- Monitor board parameters
- Communicate with wet end team
- Control board temperature
- Control warp and quality deviations
- Record and report
- Inspect edge quality and scoring
- Prevent production delays
- Maintain cleanliness

Elements and Performance Criteria

Monitor board parameters

To be competent, the user/individual on the job must be able to:

- PC1.** monitor calliper (thickness) of the board at regular intervals
- PC2.** inspect board for warping, delamination, glue separation
- PC3.** measure board length consistency across output sheets

Communicate with wet end team

To be competent, the user/individual on the job must be able to:

- PC4.** inform wet end operator about excess/low moisture
- PC5.** report signs of poor glue bonding or wet board
- PC6.** coordinate steam pressure concerns with boiler section

Control board temperature

To be competent, the user/individual on the job must be able to:

- PC7.** monitor board temperature near the hot plate
- PC8.** adjust hot plate zone temperature as required
- PC9.** verify temperature feedback from control panel

Control warp and quality deviations

To be competent, the user/individual on the job must be able to:

- PC10.** identify upward/downward warp patterns
- PC11.** change tension or apply warp control settings
- PC12.** ensure straightness of board through double facer output

Qualification Pack

Record and report

To be competent, the user/individual on the job must be able to:

- PC13.** record board test observations in shift log
- PC14.** report trends in quality deviations to supervisor
- PC15.** tag suspect bundles for quality recheck

Inspect edge quality and scoring

To be competent, the user/individual on the job must be able to:

- PC16.** inspect cut and score edges for dusting, tear or misalignment
- PC17.** verify proper spacing between score lines

Prevent production delays

To be competent, the user/individual on the job must be able to:

- PC18.** communicate critical quality defects quickly
- PC19.** maintain buffer sheets for changeovers
- PC20.** support QA team during in-line inspection

Maintain cleanliness

To be competent, the user/individual on the job must be able to:

- PC21.** clean sensors, boards, and belts as per schedule
- PC22.** remove trimmings from inspection zone
- PC23.** report blockage or misfeeding to maintenance
- PC24.** assist in 5S of dry end machine zone

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** read and interpret board specifications such as GSM, calliper, and flute type
- KU2.** identify visual defects like warp, delamination, mis-cut, and glue separation during production
- KU3.** monitor and interpret temperature feedback from hot plate zones and adjust controls accordingly
- KU4.** coordinate effectively with wet end operators regarding moisture and glue bonding issues
- KU5.** recognize the causes of upward and downward warp and apply corrective warp control settings
- KU6.** maintain proper alignment of scoring and cutting by checking edge quality and spacing
- KU7.** follow SOPs for defect reporting, deviation tagging, and buffer sheet handling
- KU8.** use measuring tools such as callipers, rulers, and templates for quality checks
- KU9.** document shift inspection records accurately and share key deviations with supervisors
- KU10.** follow safety guidelines when working near moving belts, hot surfaces, and cutting blades
- KU11.** perform basic cleaning of sensors, belts, and dry end areas to prevent blockages
- KU12.** support in maintaining 5S standards and smooth workflow across the dry end section

Generic Skills (GS)

Qualification Pack

User/individual on the job needs to know how to:

- GS1.** communicate deviations in board quality, moisture levels and temperature to supervisors and wet-end operators promptly
- GS2.** work collaboratively with the production, QA and maintenance team for continuous improvements
- GS3.** read and record production/quality data clearly in shift logs and documentation formats
- GS4.** operate control panels, measurement tools and basic inspection instruments accurately
- GS5.** identify and respond to common machine alarms and basic troubleshooting cues
- GS6.** prioritize tasks to maintain smooth workflow and prevent production delays
- GS7.** follow workplace safety practices while handling hot surfaces and moving parts
- GS8.** maintain cleanliness and 5S discipline in the dry end work zone
- GS9.** manage time efficiently to meet production targets and changeovers
- GS10.** adapt to multiple job requirements and work instructions as per shift needs

RSC/N0626: Perform Preventive Checks and Minor Maintenance of Dry End Machinery

Description

This NOS covers skills and knowledge required to carry out routine preventive checks, minor adjustments, cleaning, and basic maintenance of dry-end corrugator machinery to ensure smooth and efficient production. It also includes timely reporting of abnormalities to minimize breakdowns and maintain safety standards.

Scope

The scope covers the following :

- Perform routine preventive checks
- Identify abnormalities
- Perform basic adjustments
- Conduct tool changes and cleaning
- Record and escalate
- Support emergency stoppage
- Maintain safety and tools

Elements and Performance Criteria

Perform routine preventive checks

To be competent, the user/individual on the job must be able to:

- PC1.** inspect blades, scorers and rollers before job
- PC2.** check lubrication points on slitter scorer/ cutoff
- PC3.** inspect sensor alignment and condition
- PC4.** observe belts, drives, and motors for wear

Identify abnormalities

To be competent, the user/individual on the job must be able to:

- PC5.** identify loose belts, misaligned scorers or worn parts
- PC6.** detect strange noises, jerks, or heating issues
- PC7.** isolate and report critical issues to technician

Perform basic adjustments

To be competent, the user/individual on the job must be able to:

- PC8.** realign scorer blades or cutoff blades if required
- PC9.** adjust roll pressure for scoring or slitting
- PC10.** re-tension belts under supervision

Conduct tool changes and cleaning

To be competent, the user/individual on the job must be able to:

- PC11.** replace dull blades with new ones
- PC12.** clean the dust chute and jammed boards

Qualification Pack

PC13. apply cleaner spray to glue contamination areas

PC14. follow safety protocols while doing maintenance

Record and escalate

To be competent, the user/individual on the job must be able to:

PC15. fill preventive maintenance checklist

PC16. record breakdown time, fix time, actions taken

PC17. tag defective parts for follow-up

PC18. escalate non-functional machine cases to engineer

Support emergency stoppage

To be competent, the user/individual on the job must be able to:

PC19. activate emergency stop in case of jamming/fire

PC20. clear boards manually if ejection fails

PC21. assist technician during emergency repair

PC22. use lockout-tagout before internal access

Maintain safety and tools

To be competent, the user/individual on the job must be able to:

PC23. wear PPE while handling sharp/dangerous parts

PC24. return tools to toolbox after use

PC25. avoid spills or foreign material entry into machine

PC26. label “under maintenance” signs when needed

PC27. maintain safe footpaths and warning signs

PC28. dispose waste and oily cloths properly

PC29. participate in safety toolbox talks

PC30. assist in 5S audits and visual control

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. read and interpret preventive maintenance checklists and machine manuals

KU2. identify functions and critical settings of slitter blades, scorer wheels, cutoff units, sensors, belts, and drives

KU3. recognize early signs of wear, misalignment, noise, overheating, or lubrication failure

KU4. apply basic mechanical adjustments for slitting, scoring, belt tension, and alignment as per SOP

KU5. follow lubrication requirements, intervals, and correct application methods

KU6. replace and handle sharp tools (blades, scorers) safely using correct tools and PPE

KU7. implement lockout tagout procedures and emergency stop protocols during maintenance

KU8. maintain records of preventive checks, tool replacements, and abnormalities

KU9. differentiate between issues that can be fixed at operator level vs. those requiring technician intervention

KU10. manage safe disposal of waste, damaged parts, and oily materials as per 5S and EHS norms

Qualification Pack

KU11. understand fire safety protocols and immediate actions during jamming or overheating

KU12. ensure proper housekeeping, tool storage, and hazard marking in maintenance zones

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate issues clearly to maintenance, quality, and supervisory teams
- GS2.** record preventive actions, breakdown logs, and part replacements accurately
- GS3.** follow safety instructions, hazard signs, and emergency procedures
- GS4.** work efficiently with technicians during repairs and adjustments
- GS5.** use basic hand tools and measuring instruments properly
- GS6.** analyze machine sounds, running behaviour, and output to detect abnormalities early
- GS7.** plan preventive checks without affecting production schedules
- GS8.** collaborate with team members to ensure smooth dry-end operations
- GS9.** apply problem-solving skills during minor maintenance tasks
- GS10.** adhere to SOPs, checklists, and documentation standards

RSC/N0627: Maintain Workplace Safety and Cleanliness

Description

This NOS covers maintaining safe working conditions by following safety protocols, using PPE, and identifying hazards in the workplace. It also includes ensuring machine zones are kept clean, organized, and compliant with 5S and housekeeping standards to support efficient and hazard-free operations.

Scope

The scope covers the following :

- Follow safety protocols
- Maintain cleanliness
- Conduct basic 5S
- Follow reporting procedures

Elements and Performance Criteria

Follow safety protocols

To be competent, the user/individual on the job must be able to:

- PC1.** wear safety shoes, gloves and ear protection
- PC2.** avoid loose clothing and jewelry during machine operation
- PC3.** ensure emergency exits and fire extinguishers are accessible

Maintain cleanliness

To be competent, the user/individual on the job must be able to:

- PC4.** sweep area and remove dust and scraps
- PC5.** segregate paper waste and place in bins
- PC6.** clean oil spills or glue residues using proper methods

Conduct basic 5S

To be competent, the user/individual on the job must be able to:

- PC7.** sort usable and unusable material
- PC8.** set items in their designated places
- PC9.** shine and clean surfaces of machines

Follow reporting procedures

To be competent, the user/individual on the job must be able to:

- PC10.** report any safety hazard to supervisor
- PC11.** fill daily housekeeping checklist
- PC12.** support EHS audits or safety day events

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** interpret workplace safety rules, signage, and hazard symbols
- KU2.** identify common workplace hazards such as loose parts, spills, noise, and fire risks
- KU3.** follow correct usage of PPE like gloves, safety shoes, ear protection, and helmets
- KU4.** maintain clear access to emergency routes, alarms, and firefighting equipment
- KU5.** understand proper waste segregation and disposal practices for board scraps and contaminated materials
- KU6.** apply safe cleaning methods for handling oil, dust, glue residue, and trimmings
- KU7.** follow 5S principles Sort, Set in order, Shine, Standardize, Sustain
- KU8.** ensure tools, materials, and documents are stored in designated locations
- KU9.** maintain clean and obstruction-free pathways around machinery
- KU10.** follow incident and hazard reporting procedures accurately
- KU11.** maintain cleanliness checklists, logs, and documentation for audits
- KU12.** support participation in workplace safety drills, EHS awareness and training programs

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate safety concerns and housekeeping issues clearly to supervisors and team members
- GS2.** follow written SOPs, safety checklists, and audit instructions accurately
- GS3.** work efficiently in a clean and organized environment while minimizing waste
- GS4.** respond promptly to safety warnings, alarms, or hazardous situations
- GS5.** collaborate with maintenance and EHS teams during safety or cleaning tasks
- GS6.** maintain discipline, attention to detail, and situational awareness on the shop floor
- GS7.** document housekeeping and safety compliance as per workplace guidelines

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.

Qualification Pack

6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.

7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Minimum Aggregate Passing % at QP Level : 50

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
