RSC/Q0629: Corrugated Process Quality Control Inspector

Brief Job Description

The Corrugator Process Quality Control Inspector ensures the quality of corrugated board by conducting paper and board testing, approving first samples, monitoring production parameters, identifying defects, and maintaining inspection records. The role also involves coordinating with production for corrective actions and ensuring proper stacking, palletization, and workplace safety.

Personal Attributes

The individual should be physically fit to work on the shop floor for long hours, with strong observation skills and attention to detail. They must be disciplined, safety-conscious, and possess good communication and problem-solving abilities to coordinate effectively with cross-functional teams.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

Qualification Pack

RSC/N0628: Perform Quality Inspection and Testing of Corrugated Board

Description

This NOS covers performing in-process and final quality inspection of corrugated boards by using measurement tools and standard test methods. It also includes identifying defects, recording results, and ensuring compliance with customer specifications and quality standards.

Scope

The scope covers the following :

- Prepare for quality inspection
- Perform basic paper testing
- Perform corrugated board testing
- Conduct in-process inspection and first part approval
- Record deviations and communicate
- Ensure safety and good housekeeping during inspection

Elements and Performance Criteria

Prepare for quality inspection

To be competent, the user/individual on the job must be able to:

- PC1.** identify the job specification sheet and quality control checklist for each corrugation job
- PC2.** interpret customer or internal specifications related to board properties
- PC3.** verify the availability and calibration status of quality testing instruments
- PC4.** prepare and label the required number of board samples from the lot for testing

Perform basic paper testing

To be competent, the user/individual on the job must be able to:

- PC5.** measure GSM (grammage) of paper using GSM tester
- PC6.** evaluate moisture content of paper using moisture meter
- PC7.** inspect visual parameters such as shade, cleanliness, and consistency of paper
- PC8.** document paper test values and compare them with permissible limits

Perform corrugated board testing

To be competent, the user/individual on the job must be able to:

- PC9.** assess board GSM and thickness using appropriate gauges
- PC10.** check board compression strength using BCT/RCT test setup
- PC11.** evaluate board moisture content as per standard procedures
- PC12.** perform bursting strength or puncture resistance test on board samples
- PC13.** inspect bonding between liners and flutes for delamination and uniformity
- PC14.** record board test results accurately in QC logbook

Conduct in-process inspection and first part approval

To be competent, the user/individual on the job must be able to:

Qualification Pack

PC15. evaluate the first output sample from the board line for conformity to all quality parameters

PC16. approve or reject the first part sample based on inspection results and quality norms

PC17. communicate approval status to the production supervisor and log results

PC18. conduct periodic checks during production and identify any quality drift

Record deviations and communicate

To be competent, the user/individual on the job must be able to:

PC19. identify and document any deviations from standard parameters

PC20. classify defects as minor, major, or critical based on quality policy

PC21. escalate major deviations to quality head or shift in-charge

Ensure safety and good housekeeping during inspection

To be competent, the user/individual on the job must be able to:

PC22. follow safe sampling and handling procedures for board and paper

PC23. maintain cleanliness and orderliness in the inspection workstation

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. how to read and interpret job specification sheets, quality norms, and QC checklists for corrugated board

KU2. the key board quality parameters such as GSM, moisture, caliper (thickness), compression strength, bursting strength, and bonding

KU3. the purpose, function, and correct usage of testing instruments like GSM tester, micrometer, moisture meter, BCT/RCT machine, and bursting strength tester

KU4. standard procedures for sample preparation, labeling, conditioning, and handling before testing

KU5. tolerance limits, acceptance criteria, and deviation classifications (minor/major/critical) for paper and board quality

KU6. common board defects such as warping, delamination, glue skip, uneven flute bonding, shade variation, and their likely causes

KU7. the steps to perform in-process quality checks, first part approval, and periodic inspection during production

KU8. the correct method to document test results clearly, accurately, and in line with QC documentation standards

KU9. how to compare inspection results against specifications and decide on acceptance or rejection

KU10. the escalation matrix for reporting non-conformities and deviations to supervisors or quality heads

KU11. basic safety and PPE requirements for handling cutters, samples, testing instruments, and sharp edges

KU12. housekeeping standards for maintaining an organized, contamination-free, and safe inspection area

KU13. the importance of calibration of instruments and how to verify calibration status before testing

Qualification Pack

- KU14.** quality data traceability requirements and the need for maintaining proper and complete QC record
- KU15.** the importance of continuous monitoring to identify quality drift and prevent defective board production

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate inspection results, deviations, and approval status clearly to production and quality teams
- GS2.** record test data accurately and maintain QC logs and documentation for traceability
- GS3.** use basic digital tools, QC software, or log sheets for entering test results and inspection records
- GS4.** follow standard testing procedures, safety rules, and good laboratory/inspection practices
- GS5.** coordinate with production operators and supervisors to address quality issues promptly
- GS6.** manage time effectively to conduct periodic checks without disrupting production flow
- GS7.** adapt to changing customer requirements, new test methods, or revised quality standards
- GS8.** apply problem-solving and analytical skills to identify trends in defects or quality variation
- GS9.** work as a team with production, quality, and maintenance personnel to maintain quality consistency
- GS10.** maintain a clean, safe, and organized inspection area as per 5S workplace standards

RSC/N0629: Monitor and Control Corrugated Board Line Process Parameters

Description

This NOS covers monitoring and controlling key process parameters of the corrugated board production line to ensure consistent board quality and smooth operations. It includes making necessary adjustments to moisture, temperature, speed, and tension settings to maintain product standards and minimize defects.

Scope

The scope covers the following :

- Monitor key board line parameters
- Implementation of safety program
- Perform corrective actions and process adjustments
- Conduct stage-wise inspection on board line
- Communicate process issues and support operators
- Document process monitoring results
- Ensure safe and standard operating practices

Elements and Performance Criteria

Monitor key board line parameters

To be competent, the user/individual on the job must be able to:

- PC1.** track and record real-time process parameters such as glue temperature, board temperature, and moisture
- PC2.** observe liner and flute alignment visually and through instruments
- PC3.** monitor glue application for uniformity and proper bonding
- PC4.** check that flute formation is consistent and not crushed or misaligned

Implementation of safety program

To be competent, the user/individual on the job must be able to:

- PC5.** analyze parameter trends using process charts and past data
- PC6.** identify variations beyond tolerance limits and their impact on board quality
- PC7.** determine likely root causes for deviations (e.g., pressure, tension, glue issues)
- PC8.** categorize the deviations as process-related or material-related

Perform corrective actions and process adjustments

To be competent, the user/individual on the job must be able to:

- PC9.** coordinate with machine operators to adjust heat, pressure, or glue settings
- PC10.** initiate flushing or cleaning cycles if glue flow is inconsistent
- PC11.** assist in adjusting roll settings or pre-heaters to stabilize board properties
- PC12.** verify impact of corrective actions on output quality

Conduct stage-wise inspection on board line

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC13.** conduct sample checks at each major board line stage (single facer, double backer, etc.)
- PC14.** ensure proper application of adhesive between liners and flutes
- PC15.** monitor joint strength and edge quality of ongoing production
- PC16.** collect and test intermediate board samples for real-time quality check

Communicate process issues and support operators

To be competent, the user/individual on the job must be able to:

- PC17.** report process anomalies to line supervisor or maintenance team
- PC18.** provide feedback to operators for quality enhancement
- PC19.** support changeover process by reviewing control parameters of new job
- PC20.** assist in training operators on process parameter importance

Document process monitoring results

To be competent, the user/individual on the job must be able to:

- PC21.** update process control sheets and logbooks as per shift schedule
- PC22.** maintain traceability of process parameter changes and impacts
- PC23.** document any out-of-spec process incident and its resolution
- PC24.** prepare shift-wise summary reports on quality-related process metrics

Ensure safe and standard operating practices

To be competent, the user/individual on the job must be able to:

- PC25.** wear appropriate PPE while working near heated/glue zones
- PC26.** avoid touching running rolls or applying water on hot surfaces
- PC27.** follow standard instructions while collecting board samples from board line
- PC28.** maintain safe access to glue tanks, control panels, and test zones
- PC29.** keep measuring and monitoring instruments clean and calibrated
- PC30.** participate in 5S and safety audits related to process inspection zones

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** basic structure and functioning of a corrugated board line, including single facer, double backer, pre-heaters, and glue unit
- KU2.** types of liners, flutes, adhesives and their properties, and how they influence board strength and quality
- KU3.** key process parameters (temperature, pressure, moisture, speed, tension, and glue viscosity) and their permissible tolerance limits
- KU4.** methods for measuring and interpreting process data, including reading gauges, sensors, control panels, and trend charts
- KU5.** common process deviations and quality defects (e.g., delamination, warped board, crushed flute, edge cracks) and their likely root causes
- KU6.** standard corrective actions for parameter deviations, such as adjusting heat, pressure, glue flow, or roll settings

Qualification Pack

- KU7.** procedures for sample collection, testing, and inspection at different stages of board production
- KU8.** documentation practices for recording process parameters, deviations, and shift-wise inspection findings in logbooks and control sheets
- KU9.** communication protocols to escalate critical process issues to supervisors, maintenance, and operators
- KU10.** safety risks associated with glue units, heated surfaces, and moving rolls, and the required PPE and safe handling procedures
- KU11.** basic maintenance and calibration requirements of testing/monitoring instruments used for process quality checks

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret job sheets, process charts, and control parameters for different board specifications
- GS2.** use measurement instruments and testing tools for monitoring temperature, moisture, and board strength
- GS3.** identify early signs of process deviation or defects by observing board appearance and parameter trends
- GS4.** analyze data and parameter trends to make logical decisions for process corrections
- GS5.** communicate effectively with operators, supervisors, and maintenance teams to report issues and support corrective actions
- GS6.** work collaboratively with the production team to maintain consistent board quality across shifts.
- GS7.** follow standard operating procedures (SOPs), 5S, and safety guidelines during monitoring and inspection
- GS8.** prioritize tasks and manage time efficiently to conduct checks across all stages of the board line
- GS9.** maintain accurate and timely records in logbooks, control sheets, and digital systems
- GS10.** use basic digital tools or applications for data logging, reporting, and tracking quality metrics
- GS11.** adapt to changes in board specifications or process parameters during job changeovers
- GS12.** provide basic training and guidance to operators on the significance of process control for quality output

RSC/N0630: Conduct Quality Control Documentation, Material Disposition & RCA

Description

This NOS involves documenting quality control results, managing non-conforming materials, and conducting root cause analysis (RCA) to prevent recurring quality issues. It focuses on defect classification, corrective actions, and adherence to quality standards.

Scope

The scope covers the following :

- Manage inspection documentation
- Handle defect identification and segregation
- Conduct Root Cause Analysis (RCA)
- Coordinate for resolution and release
- Maintain quality dashboards and review data
- Contribute to continuous improvement
- Follow safety and compliance during documentation

Elements and Performance Criteria

Manage inspection documentation

To be competent, the user/individual on the job must be able to:

- PC1.** record QC data in designated formats, registers, or ERP
- PC2.** ensure test reports are complete, legible, and properly stored
- PC3.** label inspected lots with identification tags and inspection status
- PC4.** generate daily inspection summary reports for review

Handle defect identification and segregation

To be competent, the user/individual on the job must be able to:

- PC5.** inspect finished board/pallets for visual or measured non-conformities
- PC6.** segregate defective material and mark with appropriate defect tags
- PC7.** record nature of defect, lot number, and shift details on hold tags
- PC8.** communicate defective lot details to concerned department for decision

Conduct Root Cause Analysis (RCA)

To be competent, the user/individual on the job must be able to:

- PC9.** identify repetitive defects and initiate RCA process
- PC10.** collect and present evidence (samples, parameters, records) for RCA meetings
- PC11.** use 5 Why, Fishbone, or Pareto methods to analyze root cause
- PC12.** suggest possible corrective and preventive actions (CAPA)

Coordinate for resolution and release

To be competent, the user/individual on the job must be able to:

- PC13.** follow up with production and maintenance teams for timely defect resolution

Qualification Pack

- PC14.** verify reworked or corrected material before final clearance
- PC15.** support QA in preparing closure documentation for NC issues
- PC16.** escalate unresolved quality issues to higher authority

Maintain quality dashboards and review data

To be competent, the user/individual on the job must be able to:

- PC17.** prepare graphs or summary reports for defect trends
- PC18.** review past quality records for audit readiness
- PC19.** compile shift/month-wise data for management reports
- PC20.** maintain customer complaint records and resolutions

Contribute to continuous improvement

To be competent, the user/individual on the job must be able to:

- PC21.** suggest improvements in test frequency or methods based on defect trends
- PC22.** recommend training needs for operators based on common quality lapses
- PC23.** participate in quality audits and suggest preventive measures
- PC24.** support implementation of quality SOP revisions

Follow safety and compliance during documentation

To be competent, the user/individual on the job must be able to:

- PC25.** use computers or registers safely, avoiding clutter and confusion
- PC26.** store documents in designated folders, both digital and physical
- PC27.** keep hold area organized to avoid material mix-up
- PC28.** comply with documentation retention timelines
- PC29.** label and maintain instrument calibration records properly
- PC30.** handle confidential quality reports responsibly

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** quality control procedures, sampling plans, and inspection standards followed in the organization
- KU2.** types of defects, non-conformities, and rejection criteria for the product/material inspected
- KU3.** documentation formats, QC registers, ERP or digital systems used for recording inspection data and material status
- KU4.** traceability requirements for maintaining lot-wise, batch-wise, and shift-wise records of inspected materials
- KU5.** procedures for non-conforming material disposition, including segregation, tagging, hold, rework, re-inspection, and rejection
- KU6.** root cause analysis (RCA) tools and techniques, such as 5 Why, Fishbone Diagram, Pareto charts, and CAPA methodology
- KU7.** procedures for escalation of unresolved quality issues and coordination with production, maintenance, and QA teams

Qualification Pack

- KU8.** methods for preparing quality reports, dashboards, trend charts, and inspection summaries for review and audits
- KU9.** internal and external audit requirements, documentation retention norms, and compliance obligations
- KU10.** calibration requirements and record maintenance for measuring and testing instruments
- KU11.** importance of data accuracy, confidentiality, document control, and safe storage of physical and digital quality records
- KU12.** health, safety, and 5S practices to prevent mix-ups, ensure orderly documentation, and maintain an organized hold area

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret QC checklists, work orders, inspection reports, and SOPs accurately
- GS2.** use measuring instruments, testing tools, and digital systems/ERP for recording and tracking QC data
- GS3.** identify defects and non-conformities through visual inspection and measurement techniques
- GS4.** analyze defect patterns and quality trends using charts, graphs, or statistical tools
- GS5.** apply RCA methods such as 5 Why, Fishbone, and Pareto to identify root causes of recurring issues
- GS6.** communicate inspection results and defect details clearly to production, QA, and management teams
- GS7.** coordinate effectively with cross-functional teams for timely defect resolution and material disposition
- GS8.** prepare clear and concise QC summaries, dashboards, and audit-ready records
- GS9.** follow documentation control processes for accurate entry, safe storage, and retrieval of QC records
- GS10.** maintain confidentiality, discipline, and adherence to timelines while handling quality documents and reports
- GS11.** demonstrate problem-solving and decision-making skills for defect handling and corrective actions
- GS12.** participate in audits, reviews, and continuous improvement activities to enhance the quality management system

RSC/N0631: Apply Palletization and Stacking Techniques for Safe Handling

Description

This NOS covers the skills required to apply correct palletization and stacking techniques for safe material handling, storage, and movement. It includes ensuring load stability, using proper stacking patterns, and adhering to safety and handling standards

Scope

The scope covers the following :

- Prepare for palletization
- Perform pallet stacking and loading
- Inspect and label finished pallets
- Ensure safety in material handling

Elements and Performance Criteria

Prepare for palletization

To be competent, the user/individual on the job must be able to:

- PC1.** check that the pallet is clean, undamaged, and suitable for the board size and weight
- PC2.** identify the stacking method as per board size, GSM, and number of bundles
- PC3.** verify that pallet identifiers such as job code and QC status tags are available

Perform pallet stacking and loading

To be competent, the user/individual on the job must be able to:

- PC4.** align bundles on pallet using correct stacking pattern (column or interlocking)
- PC5.** maintain height limits and load balance during stacking
- PC6.** ensure corner guards and edge protectors are used where applicable
- PC7.** apply shrink wrap or strapping securely to stabilize the stack

Inspect and label finished pallets

To be competent, the user/individual on the job must be able to:

- PC8.** inspect the completed pallet stack for alignment, overhang, or instability
- PC9.** affix QC-approved or hold tag on each pallet based on inspection status
- PC10.** record details such as pallet number, shift, and product code on the label

Ensure safety in material handling

To be competent, the user/individual on the job must be able to:

- PC11.** follow safe lifting and movement practices while handling bundles and pallets
- PC12.** report and remove any unsafe condition from stacking or loading area

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** types of pallets (wooden, plastic, metal) and their suitability based on load, size, and product type
- KU2.** palletization and stacking methods such as column, interlocking, and mixed patterns, and when each method should be applied
- KU3.** board specifications (size, GSM, bundle count, weight) and how they influence pallet stacking configuration
- KU4.** load distribution principles to ensure stability, balance, and prevention of pallet collapse or product damage
- KU5.** use of corner guards, edge protectors, shrink wrap, and strapping materials to secure and protect palletized loads
- KU6.** labelling and identification requirements for pallet tags, QC status, product code, shift details, and traceability
- KU7.** inspection parameters for checking pallet condition, stack alignment, overhang, and safety compliance
- KU8.** safe manual handling and ergonomics practices to prevent strain or injury while lifting, moving, or stacking
- KU9.** hazards and risks in palletization and stacking areas and the methods to eliminate or report unsafe conditions
- KU10.** SOPs and organizational guidelines for pallet preparation, stacking, labelling, and storage movement
- KU11.** proper use of handling equipment such as hand trolleys, pallet jacks, or forklifts, as applicable
- KU12.** importance of cleanliness, 5S, and safe housekeeping to maintain clutter-free, safe palletization zones

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret job sheets, palletization instructions, and labeling requirements
- GS2.** measure and verify board dimensions, bundle count, and load weight before stacking
- GS3.** apply suitable stacking patterns to maintain pallet stability and optimize space
- GS4.** use pallet securing materials and tools such as strapping, shrink wrapping, or edge protectors effectively
- GS5.** identify signs of improper stacking or unsafe load conditions and take corrective action
- GS6.** maintain accurate records and labeling for pallet identification, QC status, and traceability
- GS7.** communicate with QC, production, and warehouse teams for smooth pallet movement and storage
- GS8.** follow safe material handling and ergonomic practices to avoid injury while lifting or stacking
- GS9.** use basic material handling equipment such as trolleys or pallet jacks safely, if required
- GS10.** maintain cleanliness and orderly arrangement in stacking and palletization areas
- GS11.** adhere to safety guidelines and report hazards immediately in the work area
- GS12.** work collaboratively with team members to ensure efficient and safe palletization operations

Qualification Pack

Assessment Criteria

RSC/N0632: Maintain Workplace Safety and 5S in Quality Inspection Areas

Description

This NOS covers maintaining workplace safety, hygiene, and 5S practices in quality inspection areas to ensure a clean, hazard-free, and efficient work environment. It includes adherence to safety standards, proper use of PPE, and continuous improvement through 5S implementation.

Scope

The scope covers the following :

- Follow safety procedures during inspection
- Maintain 5S practices in QC area
- Sustain cleanliness and orderliness

Elements and Performance Criteria

Follow safety procedures during inspection

To be competent, the user/individual on the job must be able to:

- PC1.** wear required personal protective equipment (PPE) during testing and sampling
- PC2.** handle cutters, paper rolls, glue-coated boards and testing instruments safely
- PC3.** follow lockout-tagout or restricted access protocols where applicable
- PC4.** report unsafe equipment, spills, or hazards to the supervisor

Maintain 5S practices in QC area

To be competent, the user/individual on the job must be able to:

- PC5.** sort and dispose of paper trimmings, defective samples, and used test specimens properly
- PC6.** set testing tools, tags, and documentation files in designated places
- PC7.** shine the work area by cleaning sample tables, instruments, and floors regularly
- PC8.** standardize test report formats, QC labels, and tagging procedures

Sustain cleanliness and orderliness

To be competent, the user/individual on the job must be able to:

- PC9.** conduct daily checklist-based housekeeping in QC zone
- PC10.** participate in 5S audits and display QC board area scorecards
- PC11.** suggest improvements in layout or storage for better efficiency
- PC12.** maintain a clutter-free, organized, and compliant testing environment

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** workplace safety guidelines, PPE requirements, and hazard control measures applicable to QC and testing areas

Qualification Pack

- KU2.** safe handling procedures for cutters, rolls, glue-coated boards, chemicals, and testing instruments to avoid injuries or contamination
- KU3.** FiveS principles (Sort, Set in Order, Shine, Standardize, Sustain) and their relevance in maintaining an efficient and clean inspection environment
- KU4.** waste disposal methods for paper scraps, defective samples, and test residues in compliance with organizational practices
- KU5.** standardized formats for QC reports, labels, tags, and documentation filing to ensure consistency and traceability
- KU6.** procedures for reporting hazards, unsafe conditions, equipment malfunction, and housekeeping issues to the concerned authority
- KU7.** importance of regular housekeeping, 5S audits, and visual management tools to sustain cleanliness and orderliness
- KU8.** emergency response and basic first-aid practices relevant to inspection zones

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** follow safety instructions and PPE protocols while performing inspection and testing activities
- GS2.** identify potential hazards, unsafe conditions, and non-compliance in the QC area and take appropriate action
- GS3.** handle tools, testing instruments, and board samples safely and correctly to avoid accidents or damage
- GS4.** apply fiveS methods to organize tools, documents, and workstations for maximum efficiency and cleanliness
- GS5.** maintain accurate and neat documentation, tags, and labels in a standardized manner
- GS6.** communicate safety concerns, housekeeping needs, and improvement suggestions clearly to supervisors and team members
- GS7.** participate actively in 5S audits, safety drills, and improvement initiatives to enhance workplace standards
- GS8.** work collaboratively with the QC and production teams to sustain a safe, clean, and orderly inspection environment

Qualification Pack

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.

Qualification Pack

6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.

7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Qualification Pack

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
