RSC/Q0731: Material Handling and Storage Assistant (Rubber & Polymer)

Brief Job Description

A Material Handling and Storage Assistant (Rubber & Polymer) is responsible for supporting production by handling, sorting, and storing raw materials, chemicals, and finished products. The individual applies safety and environmental guidelines while managing rubber and polymer materials, maintains stock records, and ensures timely movement of materials to and from storage areas to meet production requirements.

Personal Attributes

The individual should be attentive to detail, physically fit, and able to work in a plant/warehouse environment. They must possess alertness, discipline, and adherence to safety standards while handling rubber, polymers, and chemicals. The role requires basic communication skills, teamwork, time management, and the ability to follow instructions accurately to ensure smooth material movement and storage.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [RSC/N1621: Prepare to receive and inspect incoming materials](#)
2. [RSC/N1622: Perform storage and stacking activities](#)
3. [RSC/N1623: Carry out material handling equipment operations](#)
4. [RSC/N5007: Follow health & safety protocol](#)
5. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

Qualification Pack

RSC/N1621: Prepare to receive and inspect incoming materials

Description

This NOS involves checking documentation, identifying materials, and arranging tools or equipment required for inspection. It ensures readiness to receive, verify, and handle materials as per safety and quality standards in rubber and polymer industries.

Scope

The scope covers the following :

- Check delivery documents for material match
- Arrange tools and safety gear
- Confirm storage and unloading

Elements and Performance Criteria

Understanding Documentation and Material Verification

To be competent, the user/individual on the job must be able to:

- PC1.** identify and verify the accompanying documents such as purchase orders, invoices, delivery challans, and material safety data sheets (MSDS) for incoming materials
- PC2.** check and match the details on the documentation with the actual material received including quantity, material code, batch number, and supplier information
- PC3.** ensure that all materials are labelled properly and match the specifications mentioned in the documentation and the purchase order
- PC4.** report any mismatch or missing documentation to the supervisor or relevant authority as per the organization's standard operating procedure (SOP)
- PC5.** record the receipt of materials accurately in manual registers or digital inventory systems as instructed
- PC6.** segregate and place materials in the designated inspection area until quality checks are completed
- PC7.** maintain proper documentation of accepted and rejected materials for traceability and audit purposes
- PC8.** follow the company's procedures for handling, checking, and documentation of incoming materials in compliance with safety and quality guidelines

Performing Visual and Dimensional Inspection

To be competent, the user/individual on the job must be able to:

- PC9.** perform visual inspection of incoming materials for any physical damage, contamination, incorrect labeling, or packaging defects
- PC10.** identify surface defects such as cracks, discoloration, warping, or deformation using standard visual inspection methods
- PC11.** use appropriate measuring instruments like vernier calipers, measuring tapes, gauges, or scales to check dimensional accuracy of the materials

Qualification Pack

- PC12.** compare the measured dimensions with the specifications provided in the purchase order or technical drawing
- PC13.** ensure all inspection tools and instruments are calibrated and function correctly before use
- PC14.** document the inspection results in the inspection checklist or quality control register as per organizational protocol
- PC15.** report any non-conformity or deviations from quality standards to the department concerned or quality supervisor
- PC16.** follow standard procedures for accepting or rejecting materials based on inspection outcomes and escalate issues when required

Handling Non-Conformities and Reporting

To be competent, the user/individual on the job must be able to:

- PC17.** identify deviations in materials from the required specifications, such as physical defects, incorrect quantity, or wrong type
- PC18.** tag and isolate non-conforming materials in a designated quarantine or rejection area to avoid mix-up with approved materials
- PC19.** document the details of non-conforming materials including supplier name, batch number, type of defect, and inspection outcome in the standard reporting format
- PC20.** notify the supervisor or quality assurance personnel regarding the discrepancies found during inspection
- PC21.** coordinate with the purchase or quality team for decisions related to rejection, replacement, or corrective actions for non-conforming materials
- PC22.** follow standard operating procedures (SOPs) for handling rejected goods as per company policy and safety guidelines
- PC23.** ensure accurate entry of non-conformance records in physical or digital systems for future traceability and audit purposes
- PC24.** support root cause analysis or supplier communication, if required, by providing detailed and timely reports on material discrepancies

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the importance of preparing for receiving and inspecting incoming materials
- KU2.** different types of rubber and polymer materials commonly handled
- KU3.** how to read and verify delivery challans, invoices, and purchase orders
- KU4.** the procedure for matching material details with order specifications
- KU5.** common discrepancies in material delivery and how to identify them
- KU6.** the types and uses of tools, equipment, and personal protective equipment (PPE) required for inspection
- KU7.** safety practices and workplace protocols related to material handling and inspection
- KU8.** how to identify and report damaged, incorrect, or missing items
- KU9.** the layout of the storage area and methods for organizing materials
- KU10.** communication procedures to confirm unloading and storage instructions with the supervisor
- KU11.** the importance of maintaining cleanliness and orderliness in the inspection area

Qualification Pack

- KU12.** procedures for recording and documenting material receipts
- KU13.** risks and hazards associated with handling rubber and polymer materials
- KU14.** company policies and standard operating procedures for receiving and storing materials
- KU15.** basic environmental regulations related to the storage of rubber and polymer products

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret delivery challans, invoices, and purchase orders accurately
- GS2.** communicate effectively with supervisors and team members regarding material receipt
- GS3.** follow safety procedures while handling inspection tools and equipment
- GS4.** use appropriate personal protective equipment (PPE) during inspection activities
- GS5.** organize tools and inspection gear in a safe and accessible manner
- GS6.** identify and report discrepancies in delivered materials promptly
- GS7.** plan and prepare the inspection area before material arrival
- GS8.** follow verbal and written instructions related to unloading and storage
- GS9.** coordinate with team members during material handling tasks
- GS10.** maintain accurate records of material receipt and inspection
- GS11.** adapt quickly to changes in material types or inspection requirements
- GS12.** use basic arithmetic to verify quantities of received materials
- GS13.** manage time effectively to complete inspection tasks promptly
- GS14.** respond calmly and appropriately in case of safety incidents or emergencies
- GS15.** practice cleanliness and orderliness during all inspection and handling tasks

RSC/N1622: Perform storage and stacking activities

Description

This NOS covers the competencies required to systematically store and stack materials in designated locations while ensuring safety, accessibility, and inventory accuracy. It includes organizing materials based on type, size, and usage frequency, and following standard procedures to prevent damage or contamination.

Scope

The scope covers the following :

- Understand and Identify Storage Requirements
- Perform Organized Stacking and Labeling Activities
- Maintain Inventory Documentation and Clean Storage Environment

Elements and Performance Criteria

Understand and Identify Storage Requirements

To be competent, the user/individual on the job must be able to:

- PC1.** identify different types of rubber and polymer materials and their specific storage needs, such as temperature control, moisture protection, and segregation
- PC2.** understand and explain material compatibility and the importance of storing hazardous materials separately to avoid contamination or reactions
- PC3.** state the storage guidelines for perishable or sensitive materials based on batch number, expiry date, or shelf life
- PC4.** recognize and point out the designated storage zones (e.g., raw material zone, finished goods zone, quarantine area) as per workplace layout and material classification
- PC5.** list out and define the requirements for racking systems, pallets, and storage containers suitable for different types of rubber and polymer products
- PC6.** prepare and maintain basic storage checklists to ensure correct stacking, placement, and compliance with safety regulations
- PC7.** discuss the role of FIFO (First-In-First-Out) or FEFO (First-Expiry-First-Out) principles in maintaining material quality during storage
- PC8.** summarize the effects of improper storage on material degradation, waste, or safety hazards, and elaborate on preventive actions

Perform Organized Stacking and Labeling Activities

To be competent, the user/individual on the job must be able to:

- PC9.** perform systematic stacking of rubber and polymer materials using appropriate tools and equipment, ensuring stability and safety
- PC10.** ensure that materials are stacked as per designated categories such as type, grade, batch number, and production/expiry date
- PC11.** label stacked items clearly with relevant information including material code, lot number, quantity, and hazard symbols if applicable

Qualification Pack

- PC12.** verify that all labels are legible, intact, and comply with organizational and safety standards
- PC13.** follow workplace procedures for color-coding or tagging materials to facilitate easy identification and retrieval
- PC14.** organize stacked materials in such a way that FIFO/FEFO principles are maintained to prevent material expiry or wastage
- PC15.** handle materials carefully during stacking to prevent damage, contamination, or deformation of rubber/polymer items
- PC16.** document stacking and labeling activities accurately in logbooks or digital inventory systems for traceability and auditing

Maintain Inventory Documentation and Clean Storage Environment

To be competent, the user/individual on the job must be able to:

- PC17.** record the receipt, movement, and issuance of rubber and polymer materials in physical logbooks or digital inventory systems accurately and promptly
- PC18.** verify material quantities and storage locations against inventory records to maintain up-to-date stock accuracy
- PC19.** update stock registers, bin cards, and inventory software as per the organization's standard operating procedures
- PC20.** flag discrepancies in stock levels or documentation to the supervisor or inventory control team for corrective action
- PC21.** follow housekeeping schedules to ensure the cleanliness of storage areas, aisles, and material handling zones
- PC22.** dispose of unwanted packaging material, spillage, or scrap rubber/polymer safely, following environmental and safety norms
- PC23.** inspect storage racks, shelves, pallets, and containers regularly to ensure they are clean, undamaged, and fit for use
- PC24.** comply with safety and hygiene protocols including use of PPE while performing documentation and cleaning activities

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the types of rubber and polymer materials handled in the workplace
- KU2.** the correct way to store different materials to avoid damage or spoilage
- KU3.** the meaning of storage labels, barcodes, and material tags
- KU4.** how to safely use racks, pallets, and containers for stacking materials
- KU5.** the importance of storing materials based on size, type, and usage
- KU6.** how to keep materials in order of use, like FIFO (First In First Out)
- KU7.** how to identify damaged, expired, or wrongly placed materials
- KU8.** the basic rules for lifting, carrying, and stacking materials safely
- KU9.** how to handle materials that are hazardous, heavy, or fragile
- KU10.** the working of tools and equipment like trolleys or forklifts used in storage
- KU11.** how to follow the company's safety and storage procedures

Qualification Pack

- KU12.** the importance of cleanliness and organization in the storage area
- KU13.** how to fill or update material stock records or checklists
- KU14.** what to do in case of accidents, spills, or fire in the storage area
- KU15.** how to communicate with supervisors or team members about storage work

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and understand labels, tags, and basic storage instructions
- GS2.** follow written or spoken instructions related to storing materials
- GS3.** communicate clearly with team members and supervisors
- GS4.** handle materials carefully to avoid breakage or wastage
- GS5.** use hand tools and lifting equipment like trolleys and pallet jacks safely
- GS6.** stack materials properly to avoid falling or tilting
- GS7.** record stock movement and maintain simple inventory sheets
- GS8.** identify and report any damaged or misplaced materials
- GS9.** plan and organize storage space to use it effectively
- GS10.** work as part of a team and support others in storage activities
- GS11.** manage time and complete tasks within given deadlines
- GS12.** stay alert and follow safety procedures during storage work
- GS13.** solve basic problems like space shortage or material mismatch
- GS14.** keep the storage area clean and organized
- GS15.** adapt to new tools, methods, or changes in storage processes

Qualification Pack

RSC/N1623: Carry out material handling equipment operations

Description

This NOS outlines the skills and knowledge required to operate material handling equipment such as forklifts, pallet jacks, and trolleys safely and efficiently. It includes loading, unloading, moving, and placing materials as per work instructions while following safety standards and equipment maintenance protocols.

Scope

The scope covers the following :

- Understand and Identify Types of Material Handling Equipment (MHE)
- Perform Pre-Operational Checks and Safe Operation of MHE
- Support Smooth and Timely Material Movement Across Work Areas

Elements and Performance Criteria

Understand and Identify Types of Material Handling Equipment (MHE)

To be competent, the user/individual on the job must be able to:

- PC1.** identify different types of material handling equipment such as pallet trucks, forklifts, hand trolleys, conveyor belts, and cranes used in rubber and polymer operations
- PC2.** explain the primary functions, capabilities, and limitations of various MHE relevant to movement and storage of raw materials, compounds, and finished rubber products
- PC3.** classify MHE based on manual, semi-automatic, and automatic operations and their suitability for specific handling tasks
- PC4.** state the importance of choosing the right MHE based on material type, weight, dimensions, and handling frequency
- PC5.** differentiate between MHE used for vertical movement (like hoists or forklifts) and horizontal movement (like pallet jacks or trolleys)
- PC6.** describe the ergonomic and safety features to look for while operating or assisting with MHE
- PC7.** point out risks associated with incorrect equipment selection, such as product damage, operator injury, or workflow disruption
- PC8.** list out basic maintenance and operational indicators for commonly used MHE (e.g., brake condition, wheel alignment, battery status, etc.)

Perform Pre-Operational Checks and Safe Operation of MHE

To be competent, the user/individual on the job must be able to:

- PC9.** perform pre-operational visual checks of material handling equipment (MHE) such as brakes, wheels, controls, levers, lights, and safety guards before use
- PC10.** check and confirm fluid levels (oil, battery water, hydraulic fluid, etc.) and ensure MHE is fueled or charged adequately before operation
- PC11.** identify and report any damages, malfunctions, or abnormalities in MHE to the supervisor as per standard operating procedures (SOPs)
- PC12.** ensure that safety equipment such as horns, mirrors, seat belts, and warning signs are functioning properly before starting the MHE

Qualification Pack

- PC13.** operate MHE safely as per manufacturer's guidelines and company safety protocols, avoiding abrupt movements, overloading, or unsafe turns
- PC14.** maintain correct posture and follow ergonomic handling practices while using or assisting with MHE to prevent injuries
- PC15.** follow prescribed speed limits, designated movement routes, and loading/unloading procedures to ensure safe operation in the plant or warehouse
- PC16.** demonstrate understanding of emergency stop procedures and MHE shutdown in case of malfunction or hazard

Support Smooth and Timely Material Movement Across Work Areas

To be competent, the user/individual on the job must be able to:

- PC17.** identify the materials to be moved based on instructions received from supervisors, job orders, or process plans
- PC18.** plan the route and timing for material movement to avoid congestion and ensure timely availability at designated locations within the plant or warehouse
- PC19.** coordinate with production, quality and storage teams to prioritize movement based on urgency and production timelines
- PC20.** use appropriate MHE (such as hand trolleys, forklifts, or pallet jacks) for moving rubber sheets, additives, chemical drums, or finished goods efficiently
- PC21.** ensure materials are moved without damage, contamination, or spillage, following standard operating procedures (SOPs) and safety norms
- PC22.** monitor and manage delays or interruptions during material movement, and report issues to the supervisor promptly
- PC23.** maintain cleanliness and organization of pathways and handling zones to enable unhindered movement across departments
- PC24.** document material movement activities accurately in logbooks, tags, or digital systems, if applicable, as per organizational protocol

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the different types of material handling equipment used like forklifts, pallet jacks, and trolleys
- KU2.** the basic working and operating procedures of each equipment
- KU3.** the safety signs, symbols, and guidelines related to equipment operation
- KU4.** the correct way to load, move, and unload materials using equipment
- KU5.** the weight limits and capacity of each equipment
- KU6.** how to inspect equipment before and after use for damage or faults
- KU7.** the importance of wearing safety gear while operating equipment
- KU8.** how to follow standard operating procedures (SOPs) while handling materials
- KU9.** the risks of improper use of equipment and how to avoid accidents
- KU10.** the correct paths/routes to use inside the storage or plant area
- KU11.** how to park and secure equipment after use
- KU12.** the steps to take in case of equipment failure or emergency

Qualification Pack

- KU13.** how to report any damage or issues with the equipment to the supervisor
- KU14.** the types of rubber and polymer materials that need careful handling
- KU15.** the importance of keeping equipment clean and in good condition

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** operate equipment like forklifts, trolleys, and pallet jacks safely and correctly
- GS2.** follow work instructions and standard procedures while handling materials
- GS3.** read and understand equipment manuals, warning labels, and safety signs
- GS4.** identify basic faults or issues in the equipment and report them
- GS5.** communicate clearly with team members and supervisors during operations
- GS6.** load and unload materials properly to avoid damage or accidents
- GS7.** plan the movement path of materials inside the storage or factory area
- GS8.** maintain balance and stability while lifting or moving materials
- GS9.** record equipment usage or report problems in simple formats
- GS10.** follow emergency procedures in case of fire, spillage, or equipment failure
- GS11.** work as part of a team and assist others during material handling tasks
- GS12.** stay alert and focused while operating heavy or moving equipment
- GS13.** manage time effectively and complete tasks as per schedule
- GS14.** follow cleanliness and maintenance routines for equipment
- GS15.** adapt to new equipment or technology used in material handling operations

Qualification Pack

Qualification Pack

RSC/N5007: Follow health & safety protocol

Description

This unit is about maintaining health and safety of self and others at workplace.

Scope

The scope covers the following :

- Maintain a clean and efficient workplace
- Render appropriate emergency procedures
- Maintain standard safety procedures at the workplace
- Participate in safety awareness campaigns
- Understand potential sources of accidents
- Use safety gears to avoid accidents

Elements and Performance Criteria

Maintain a clean and efficient workplace

To be competent, the user/individual on the job must be able to:

- PC1.** undertake basic safety checks before operation of all machinery and equipment and report hazards to the appropriate supervisor
- PC2.** work for which protective clothing or equipment is required is identified and the appropriate protective clothing or equipment is used in performing these duties in accordance with workplace policy
- PC3.** read and understand the hazards of use and contamination mentioned on the labels of chemicals, utilities etc
- PC4.** prior to performing manual handling jobs, risk is assessed and work is carried out according to currently recommended safe practices.
- PC5.** use equipment and materials safely and correctly and return the same to designated storage when not in use
- PC6.** dispose off waste safely and correctly in a designated area
- PC7.** risks to bystanders are recognized and action taken to reduce risk associated with jobs in the workplace
- PC8.** perform work in a manner which minimizes environmental damage
- PC9.** all procedures and work instructions for controlling risk are followed closely
- PC10.** report any accidents, incidents or problems without delay to an appropriate person and take immediate necessary action to reduce further danger

Render appropriate emergency procedures

To be competent, the user/individual on the job must be able to:

- PC11.** follow procedures for dealing with accidents, fires and emergencies, including communicating location and directions to emergency.
- PC12.** follow emergency procedures as per company standards and workplace requirements

Qualification Pack

- PC13.** use emergency equipment in accordance with manufacturers' specifications and workplace requirements
- PC14.** provide treatment appropriate to the patient's injuries in accordance with recognized first aid techniques.
- PC15.** recover (if practical), clean, inspect/test, refurbish, replace and store the first aid equipment as appropriate
- PC16.** dispose off medical waste in accordance with workplace requirements
- PC17.** report details of first aid administered in accordance with work place procedures

Maintain standard safety procedures at the workplace

To be competent, the user/individual on the job must be able to:

- PC18.** comply with general safety procedures
- PC19.** follow standard safety procedures while handling equipment, hazardous material or tool
- PC20.** check parts of the workplace and take preventive actions like spraying and other steps to protect from leakages, water logging, pests, fire, pollution, etc.
- PC21.** ensure no accidents and damages at the workplace, reporting of any breach of company safety procedure
- PC22.** keep the workplace organized, swept, clean and hazard free

Participate in safety awareness campaigns

To be competent, the user/individual on the job must be able to:

- PC23.** attend fire drills and other safety related workshops organized at the workplace
- PC24.** be aware of first aid, evacuation and emergency procedures
- PC25.** be alert of any events and do not be negligent to any safety procedures to be followed

Understand potential sources of accidents

To be competent, the user/individual on the job must be able to:

- PC26.** avoid accidents while using hazardous chemicals, machines, sharp tools and equipment

Use safety gears to avoid accidents

To be competent, the user/individual on the job must be able to:

- PC27.** use safety materials such as protective gear, goggles, caps, shoes, etc.(as applicable with workplace)
- PC28.** handle heavy and hazardous materials with care and using appropriate tools and handling equipment such as trolleys, ladders

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** policies on incentives, delivery standards, and personnel management.
- KU2.** occupational safety and health policy followed
- KU3.** emergency evacuation procedure
- KU4.** medical policy
- KU5.** company laws and acts
- KU6.** the risks to health and safety and the measures to be taken to control those risks in the area of work

Qualification Pack

- KU7.** workplace procedures and requirements for the handling of workplace injuries/illnesses.
- KU8.** basic emergency first aid procedure
- KU9.** local emergency services
- KU10.** reporting on accidents, incidents and problems to appropriate authorities.
- KU11.** how to use machines as per standard operating procedure
- KU12.** how to maintain work area safe and secure
- KU13.** use of hazardous materials, tools and equipments
- KU14.** emergency evacuation and first aid procedures to be followed
- KU15.** personal hygiene and fitness requirements
- KU16.** general duties under the relevant health and safety legislation
- KU17.** what personal protective equipment and clothing should be worn and how it is cared for
- KU18.** the correct and safe way to use materials and equipment required for work
- KU19.** the importance of good housekeeping in the workplace
- KU20.** safe disposal methods for waste
- KU21.** methods for minimizing environmental damage during work

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** record data which are required for record keeping purpose
- GS2.** report problems to the appropriate person in a timely manner
- GS3.** write descriptions and details about incidents in reports
- GS4.** read instruction manuals for hand tools and equipment
- GS5.** read instructions on work orders and procedures
- GS6.** receive instructions and seek advice from superiors
- GS7.** communicate clearly and effectively with others
- GS8.** take a decision for any change/issue based on earlier successes(documented previous history)on similar issues
- GS9.** work out changes in case a new improved machine/equipment is added in the process or any new material/chemical is developed replacing existing one.
- GS10.** make changes in cycle time due to improved process.
- GS11.** use the standard operating procedure or trouble shooting manuals for trouble shooting and other reference documents approved by plant management
- GS12.** consult the peer group and superiors to arrive at a favourable decision.
- GS13.** use of standard available problem solving techniques for decision making
- GS14.** review and analyze the process steps to check on system non adherence andnon conformity
- GS15.** review the current sop and other standards for continuous improvement to facilitate decision making
- GS16.** take a calculated risk with minimum losses
- GS17.** schedule daily activities and drawing up priorities; allocate start times, estimation of completion times and materials, equipment and assistance required for completion.

Qualification Pack

- GS18.** match customer needs/specification by adjusting the processing conditions (interact with customer in case any clarification required)
- GS19.** ensure that performance of his action/operation/activity does not lead to any divergence from the specified quality of the final product as required by the customer.
- GS20.** complete the assigned task in timely manner so that the final product is delivered in the timeline given by the customer.
- GS21.** communicate effectively to the superior/customer for any delay in supplies to the clients.
- GS22.** work towards fulfilling the customers requirement as per their demand.
- GS23.** in case of any complaint, ensure its timely resolution if the problem is emanating at his level
- GS24.** communicate effectively to the superior/customer for any delay in resolving the problem faced by the customer.
- GS25.** maintain good/cordial relation with customers.
- GS26.** work on the feedback received from customer regarding the product.
- GS27.** use first aid treatment in case of any injury/accident.
- GS28.** monitor and maintain the condition of tools and equipment
- GS29.** assess situation & identify appropriate control measures
- GS30.** act, communicate and report in emergency situation

Qualification Pack

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.

Qualification Pack

6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass 50% aggregate for the QP.

7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
