RSC/Q2401: Rubber Product-Quality Assurance Supervisor

Brief Job Description

The Rubber Product - Quality Assurance Supervisor is responsible for developing, implementing, and supervising quality assurance systems across all stages of rubber product manufacturing. The role involves preparing QA plans, supervising inspection and testing, monitoring compliance with product specifications and process standards, and ensuring calibration and upkeep of quality instruments. The supervisor acts as a link between production teams, testing labs, and management to ensure that the finished products meet customer and regulatory requirements.

Personal Attributes

The role requires strong technical knowledge, problem-solving skills, and leadership ability in a dynamic manufacturing environment.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [RSC/N2402: Develop and implement quality assurance plans](#)
2. [RSC/N5019: Supervise inspection and testing activities](#)
3. [RSC/N5020: Monitor product and process compliance](#)
4. [RSC/N5021: Ensure calibration and maintenance of QA instruments](#)
5. [RSC/N5007: Follow health & safety protocol](#)
6. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

RSC/N2402: Develop and implement quality assurance plans

Description

This NOS is about preparing, developing, and implementing quality assurance (QA) plans for rubber products, ensuring alignment with customer requirements, standards, and organizational objectives.

Scope

The scope covers the following :

- Understand customer and standard requirements
- Prepare QA plans
- Implement QA plans
- Ensure compliance

Elements and Performance Criteria

Understand customer and standard requirements

To be competent, the user/individual on the job must be able to:

- PC1.** identify customer specifications for rubber products from job sheets or purchase orders
- PC2.** interpret relevant ISI, ASTM, BIS, and ISO standards for rubber products
- PC3.** compare customer requirements with organizational quality policies
- PC4.** list out statutory and regulatory compliances relevant to rubber QA
- PC5.** discuss past customer complaints and feedback for corrective planning

Prepare QA plans

To be competent, the user/individual on the job must be able to:

- PC6.** develop a QA checklist for raw material, in-process, and final product inspection
- PC7.** define sampling plans for quality inspection as per standards
- PC8.** select suitable test methods for physical, mechanical, and chemical parameters
- PC9.** plan documentation formats for recording inspection results
- PC10.** schedule QA activities in line with production timelines

Implement QA plans

To be competent, the user/individual on the job must be able to:

- PC11.** demonstrate setting up QA schedules in coordination with production
- PC12.** apply QA checklists during production and testing
- PC13.** ensure usage of standard reference materials for calibration
- PC14.** carry out root cause analysis planning for potential defects
- PC15.** revise QA plans as per feedback from higher management or auditors

Ensure compliance

To be competent, the user/individual on the job must be able to:

- PC16.** verify whether QA plans adhere to ISO 9001 and other QMS standards
- PC17.** conduct internal audits on QA processes

Qualification Pack

PC18. ensure traceability of batches from raw material to finished products

PC19. update QA plans after changes in process, materials, or design

PC20. prepare QA reports for management review meetings

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** basic principles of quality assurance and control
- KU2.** types of defects in rubber products and their causes
- KU3.** key customer specifications in rubber industry (tensile strength, hardness, elongation, etc.)
- KU4.** BIS, ASTM, ISO, and other relevant standards for rubber products
- KU5.** importance of QA in export markets
- KU6.** documentation and reporting requirements in QA
- KU7.** elements of ISO 9001 QMS
- KU8.** relevance of Six Sigma and Lean principles in QA
- KU9.** statistical quality control (SQC) basics
- KU10.** sampling plans and acceptance quality level (AQL)
- KU11.** methods of visual inspection and measurement
- KU12.** properties of raw rubber, additives, and compounds
- KU13.** safety considerations in QA testing
- KU14.** calibration principles and traceability
- KU15.** internal audit procedures
- KU16.** corrective and preventive actions (CAPA)
- KU17.** batch traceability concepts
- KU18.** customer complaint management
- KU19.** cost of quality (COQ) principles
- KU20.** ethical and sustainable QA practices
- KU21.** overview of digital QA systems (ERP, SPC software)
- KU22.** problem-solving tools (Ishikawa, 5 Whys, Pareto)
- KU23.** importance of teamwork in QA
- KU24.** role of QA in environmental compliance
- KU25.** QA documentation formats
- KU26.** management review process
- KU27.** industry case studies on QA failures
- KU28.** differences between QA and QC
- KU29.** data analysis techniques in QA
- KU30.** merging technologies in QA (AI, sensors)
- KU31.** risk-based QA planning
- KU32.** customer-oriented quality planning
- KU33.** link between QA and productivity

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret technical standards and QA guidelines
- GS2.** write inspection reports and QA documentation
- GS3.** communicate QA plans and corrective actions to production teams
- GS4.** communicate QA plans and corrective actions to production teams
- GS5.** use basic computer applications for documentation and reporting
- GS6.** work with teams to implement QA practices consistently
- GS7.** practice ethical and sustainable approaches in quality assurance

RSC/N5019: Supervise inspection and testing activities

Description

This NOS is about supervising the inspection and testing of rubber products to ensure compliance with specifications at all stages of production.

Scope

The scope covers the following :

- Plan inspection and testing
- Supervise testing activities
- Review inspection results

Elements and Performance Criteria

Plan inspection and testing

To be competent, the user/individual on the job must be able to:

- PC1.** identify inspection stages (raw material, in-process, final)
- PC2.** allocate manpower for inspection activities
- PC3.** decide test frequency based on product and standards
- PC4.** set up inspection checkpoints in production line

Supervise testing activities

To be competent, the user/individual on the job must be able to:

- PC5.** demonstrate the use of tensile testing machines for rubber samples
- PC6.** show hardness measurement using durometer
- PC7.** carry out density and specific gravity checks
- PC8.** conduct visual and dimensional checks
- PC9.** perform aging and weathering tests
- PC10.** monitor curing cycle records
- PC11.** oversee sampling methods during production
- PC12.** check records of physical and chemical testing
- PC13.** ensure safety procedures during testing

Review inspection results

To be competent, the user/individual on the job must be able to:

- PC14.** collect test results and compare with standards
- PC15.** identify deviations from specifications
- PC16.** classify products as accepted, rework, or rejected
- PC17.** escalate deviations to production supervisor
- PC18.** prepare inspection summary reports

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** types of inspection methods (incoming, in-process, final)
- KU2.** principles of destructive and non-destructive testing
- KU3.** rubber product tests - tensile, elongation, hardness, compression set
- KU4.** sampling techniques
- KU5.** dimensional accuracy requirements in rubber parts
- KU6.** visual inspection parameters
- KU7.** use of measuring instruments in QA
- KU8.** curing cycle and vulcanization checks
- KU9.** chemical testing methods for rubber
- KU10.** safety in laboratory and testing
- KU11.** reporting formats in testing
- KU12.** role of supervisor in inspection
- KU13.** calibration of test instruments
- KU14.** compliance to BIS/ASTM test methods
- KU15.** data recording and analysis
- KU16.** importance of impartiality in inspection
- KU17.** relevance of traceability in inspection records
- KU18.** role of QA lab in certification

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read test standards and specifications
- GS2.** record and review test results accurately
- GS3.** communicate test deviations promptly to production and QA head
- GS4.** apply analytical ability to interpret test results
- GS5.** ensure discipline and safety while supervising testing operations

Qualification Pack

RSC/N5020: Monitor product and process compliance

Description

This NOS is about monitoring both product quality and process parameters to ensure compliance with QA plans and industry standards.

Scope

The scope covers the following :

- Monitor process compliance
- Monitor product compliance

Elements and Performance Criteria

Monitor process compliance

To be competent, the user/individual on the job must be able to:

- PC1.** check production process parameters against set values
- PC2.** verify curing cycle records for each batch
- PC3.** ensure mixing and compounding ratios are maintained
- PC4.** validate machine settings against SOPs
- PC5.** ensure operators follow work instructions
- PC6.** monitor environmental conditions (temperature, humidity)
- PC7.** check raw material handling and storage practices
- PC8.** ensure adherence to FIFO for raw material usage
- PC9.** review SPC charts for process variations
- PC10.** initiate corrective action for deviations

Monitor product compliance

To be competent, the user/individual on the job must be able to:

- PC11.** compare test results with specifications
- PC12.** classify products based on compliance levels.
- PC13.** carry out 100% inspection for critical parts
- PC14.** verify labelling and batch coding
- PC15.** confirm packing quality as per requirements
- PC16.** ensure rejection is documented and segregated
- PC17.** escalate critical non-conformities
- PC18.** support external audit inspections
- PC19.** prepare compliance reports
- PC20.** discuss compliance issues in QA meetings

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** process parameters in mixing, extrusion, molding, and curing
- KU2.** importance of compliance to process SOPs
- KU3.** SPC and control charts
- KU4.** concepts of process capability (Cp, Cpk)
- KU5.** defect classification in rubber products
- KU6.** non-conformity management.
- KU7.** significance of curing cycle control
- KU8.** FIFO and inventory management for quality
- KU9.** work instructions and SOP formats
- KU10.** relevance of machine calibration in compliance
- KU11.** QA audits and compliance checks
- KU12.** packaging and labelling compliance
- KU13.** regulatory compliance for rubber products
- KU14.** product certification schemes (ISI, CE)
- KU15.** customer-specific compliance needs
- KU16.** data analysis for compliance monitoring
- KU17.** documentation for compliance
- KU18.** importance of environmental compliance
- KU19.** role of compliance in export
- KU20.** sampling for compliance checks
- KU21.** ISO 14001 and EMS linkages
- KU22.** defect analysis and Pareto charting
- KU23.** CAPA methods for compliance issues
- KU24.** role of compliance in continuous improvement
- KU25.** sustainability and compliance
- KU26.** supplier quality compliance
- KU27.** cross-functional coordination in compliance
- KU28.** role of management in compliance
- KU29.** difference between product and process compliance
- KU30.** documentation required during audits
- KU31.** examples of non-compliance in rubber industry.
- KU32.** monitoring digital dashboards.
- KU33.** customer complaint link to compliance
- KU34.** ethics in compliance monitoring

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** interpret product specifications and compliance documents
- GS2.** prepare compliance checklists and reports
- GS3.** communicate non-conformities and corrective actions
- GS4.** apply problem-solving skills for CAPA
- GS5.** ensure team discipline in compliance monitoring activities

RSC/N5021: Ensure calibration and maintenance of QA instruments

Description

This NOS is about ensuring periodic calibration, upkeep, and maintenance of QA laboratory instruments.

Scope

The scope covers the following :

- Plan calibration
- Carry out maintenance
- Ensure traceability and compliance

Elements and Performance Criteria

Plan calibration

To be competent, the user/individual on the job must be able to:

- PC1.** prepare calibration schedules for all QA instruments
- PC2.** identify NABL/authorized agencies for calibration
- PC3.** ensure calibration stickers and certificates are updated
- PC4.** maintain calibration records

Carry out maintenance

To be competent, the user/individual on the job must be able to:

- PC5.** demonstrate cleaning of durometers, gauges, and testers
- PC6.** ensure proper storage of measuring devices
- PC7.** apply preventive maintenance schedules
- PC8.** arrange servicing of instruments as per manuals
- PC9.** replace worn-out parts/accessories
- PC10.** report malfunction to higher authorities

Ensure traceability and compliance

To be competent, the user/individual on the job must be able to:

- PC11.** verify instruments against master reference standards
- PC12.** ensure measurement traceability to national/international standards
- PC13.** prepare reports of calibration status
- PC14.** assist auditors in calibration verification
- PC15.** escalate repeated instrument failures

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** principles of calibration

Qualification Pack

- KU2.** importance of measurement traceability
- KU3.** NABL standards for calibration
- KU4.** types of QA instruments in rubber testing
- KU5.** preventive maintenance methods
- KU6.** calibration intervals and schedules
- KU7.** documentation in calibration
- KU8.** handling of precision instruments
- KU9.** authorized calibration agencies
- KU10.** compliance requirements for audits
- KU11.** basics of uncertainty in measurement
- KU12.** digital calibration records

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read calibration certificates and schedules
- GS2.** maintain instrument logs and records
- GS3.** communicate calibration and maintenance requirements to QA staff
- GS4.** demonstrate accuracy and responsibility in handling instruments
- GS5.** practice safe and sustainable instrument management

Qualification Pack

Assessment Criteria

RSC/N5007: Follow health & safety protocol

Description

This unit is about maintaining health and safety of self and others at workplace.

Scope

The scope covers the following :

- Maintain a clean and efficient workplace
- Render appropriate emergency procedures
- Maintain standard safety procedures at the workplace
- Participate in safety awareness campaigns
- Understand potential sources of accidents
- Use safety gears to avoid accidents

Elements and Performance Criteria

Maintain a clean and efficient workplace

To be competent, the user/individual on the job must be able to:

- PC1.** undertake basic safety checks before operation of all machinery and equipment and report hazards to the appropriate supervisor
- PC2.** work for which protective clothing or equipment is required is identified and the appropriate protective clothing or equipment is used in performing these duties in accordance with workplace policy
- PC3.** read and understand the hazards of use and contamination mentioned on the labels of chemicals, utilities etc
- PC4.** prior to performing manual handling jobs, risk is assessed and work is carried out according to currently recommended safe practices.
- PC5.** use equipment and materials safely and correctly and return the same to designated storage when not in use
- PC6.** dispose off waste safely and correctly in a designated area
- PC7.** risks to bystanders are recognized and action taken to reduce risk associated with jobs in the workplace
- PC8.** perform work in a manner which minimizes environmental damage
- PC9.** all procedures and work instructions for controlling risk are followed closely
- PC10.** report any accidents, incidents or problems without delay to an appropriate person and take immediate necessary action to reduce further danger

Render appropriate emergency procedures

To be competent, the user/individual on the job must be able to:

- PC11.** follow procedures for dealing with accidents, fires and emergencies, including communicating location and directions to emergency.
- PC12.** follow emergency procedures as per company standards and workplace requirements

Qualification Pack

- PC13.** use emergency equipment in accordance with manufacturers' specifications and workplace requirements
- PC14.** provide treatment appropriate to the patient's injuries in accordance with recognized first aid techniques.
- PC15.** recover (if practical), clean, inspect/test, refurbish, replace and store the first aid equipment as appropriate
- PC16.** dispose off medical waste in accordance with workplace requirements
- PC17.** report details of first aid administered in accordance with work place procedures

Maintain standard safety procedures at the workplace

To be competent, the user/individual on the job must be able to:

- PC18.** comply with general safety procedures
- PC19.** follow standard safety procedures while handling equipment, hazardous material or tool
- PC20.** check parts of the workplace and take preventive actions like spraying and other steps to protect from leakages, water logging, pests, fire, pollution, etc.
- PC21.** ensure no accidents and damages at the workplace, reporting of any breach of company safety procedure
- PC22.** keep the workplace organized, swept, clean and hazard free

Participate in safety awareness campaigns

To be competent, the user/individual on the job must be able to:

- PC23.** attend fire drills and other safety related workshops organized at the workplace
- PC24.** be aware of first aid, evacuation and emergency procedures
- PC25.** be alert of any events and do not be negligent to any safety procedures to be followed

Understand potential sources of accidents

To be competent, the user/individual on the job must be able to:

- PC26.** avoid accidents while using hazardous chemicals, machines, sharp tools and equipment

Use safety gears to avoid accidents

To be competent, the user/individual on the job must be able to:

- PC27.** use safety materials such as protective gear, goggles, caps, shoes, etc.(as applicable with workplace)
- PC28.** handle heavy and hazardous materials with care and using appropriate tools and handling equipment such as trolleys, ladders

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** policies on incentives, delivery standards, and personnel management.
- KU2.** occupational safety and health policy followed
- KU3.** emergency evacuation procedure
- KU4.** medical policy
- KU5.** company laws and acts
- KU6.** the risks to health and safety and the measures to be taken to control those risks in the area of work

Qualification Pack

- KU7.** workplace procedures and requirements for the handling of workplace injuries/illnesses.
- KU8.** basic emergency first aid procedure
- KU9.** local emergency services
- KU10.** reporting on accidents, incidents and problems to appropriate authorities.
- KU11.** how to use machines as per standard operating procedure
- KU12.** how to maintain work area safe and secure
- KU13.** use of hazardous materials, tools and equipments
- KU14.** emergency evacuation and first aid procedures to be followed
- KU15.** personal hygiene and fitness requirements
- KU16.** general duties under the relevant health and safety legislation
- KU17.** what personal protective equipment and clothing should be worn and how it is cared for
- KU18.** the correct and safe way to use materials and equipment required for work
- KU19.** the importance of good housekeeping in the workplace
- KU20.** safe disposal methods for waste
- KU21.** methods for minimizing environmental damage during work

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** record data which are required for record keeping purpose
- GS2.** report problems to the appropriate person in a timely manner
- GS3.** write descriptions and details about incidents in reports
- GS4.** read instruction manuals for hand tools and equipment
- GS5.** read instructions on work orders and procedures
- GS6.** receive instructions and seek advice from superiors
- GS7.** communicate clearly and effectively with others
- GS8.** take a decision for any change/issue based on earlier successes(documented previous history)on similar issues
- GS9.** work out changes in case a new improved machine/equipment is added in the process or any new material/chemical is developed replacing existing one.
- GS10.** make changes in cycle time due to improved process.
- GS11.** use the standard operating procedure or trouble shooting manuals for trouble shooting and other reference documents approved by plant management
- GS12.** consult the peer group and superiors to arrive at a favourable decision.
- GS13.** use of standard available problem solving techniques for decision making
- GS14.** review and analyze the process steps to check on system non adherence andnon conformity
- GS15.** review the current sop and other standards for continuous improvement to facilitate decision making
- GS16.** take a calculated risk with minimum losses
- GS17.** schedule daily activities and drawing up priorities; allocate start times, estimation of completion times and materials, equipment and assistance required for completion.

Qualification Pack

- GS18.** match customer needs/specification by adjusting the processing conditions (interact with customer in case any clarification required)
- GS19.** ensure that performance of his action/operation/activity does not lead to any divergence from the specified quality of the final product as required by the customer.
- GS20.** complete the assigned task in timely manner so that the final product is delivered in the timeline given by the customer.
- GS21.** communicate effectively to the superior/customer for any delay in supplies to the clients.
- GS22.** work towards fulfilling the customers requirement as per their demand.
- GS23.** in case of any complaint, ensure its timely resolution if the problem is emanating at his level
- GS24.** communicate effectively to the superior/customer for any delay in resolving the problem faced by the customer.
- GS25.** maintain good/cordial relation with customers.
- GS26.** work on the feedback received from customer regarding the product.
- GS27.** use first aid treatment in case of any injury/accident.
- GS28.** monitor and maintain the condition of tools and equipment
- GS29.** assess situation & identify appropriate control measures
- GS30.** act, communicate and report in emergency situation

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e-mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
