RSC/Q3601: Tyre Fitter-Servicing and Maintenance

Brief Job Description

A Tyre Fitter-Servicing and Maintenance is responsible for fitting different types of tyres (new/used/replacement) to the rim. Tyre fitment can be made as a part of service sector (manufacturing of automobile /or in the market) or in-house in the tyre manufacturing plant for testing such as plunger and wheel testing. Also, he is responsible for carrying out proper tyre inflation and maintenance.

Personal Attributes

This job requires the individual to be a good observer and demonstrate spontaneity in resolving the different repairing issues. He should be careful and strict in adhering to the specified norms. He should be active and energetic. He should be able to work independently under the guidance of supervisor. As a good learner, he should be willing to learn efficient ways to perform his work. He should be disciplined, focused and comfortable in performing laborious work.

Qualification Pack

RSC/N3601: Prepare Material, Tools and Machine and Inspect Tyre for Servicing/Maintenance

Description

This unit covers the competencies required to prepare the workplace, tools, and machines, and to carry out tyre and rim inspection before undertaking servicing and maintenance.

Scope

The scope covers the following :

- Prepare Tools, Equipment and Work Area
- Inspect Tyres and Rims
- Document inspection results

Elements and Performance Criteria

Prepare tools, equipment, and work area

To be competent, the user/individual on the job must be able to:

- PC1.** check and confirm work instructions, job card, and customer request
- PC2.** collect and arrange required tools, equipment, and consumables
- PC3.** verify availability of semi-automatic tyre changer, wheel spanner, jack, and safety stands
- PC4.** ensure tools are calibrated and safe for use
- PC5.** prepare the vehicle by securing it on jack or lift
- PC6.** follow safety precautions like PPE, gloves, and eye protection

Inspect tyres and rims

To be competent, the user/individual on the job must be able to:

- PC7.** identify tyre type, size, and rim specifications as per the vehicle model
- PC8.** inspect tyres visually for tread wear, cuts, bulges, cracks, or uneven wear patterns
- PC9.** check tyre pressure levels before removing
- PC10.** verify wheel nut torque condition before loosening
- PC11.** inspect rim for bends, cracks, rust, or deformation
- PC12.** check for valve leakage or damage

Document inspection results

To be competent, the user/individual on the job must be able to:

- PC13.** segregate tyres requiring servicing, replacement, or disposal
- PC14.** record tyre condition and observations in job sheet
- PC15.** ensure compliance with manufacturer guidelines while inspecting tyres

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** types of tyres - radial, bias, tubeless, tube-type
- KU2.** tyre sizes, markings, and load/speed ratings
- KU3.** common tyre wear patterns and their causes
- KU4.** rim types and compatibility with tyres
- KU5.** functions of tools like tyre changer, bead breaker, jack, and torque wrench
- KU6.** safe lifting techniques for vehicles
- KU7.** importance of correct air pressure and its effects on performance
- KU8.** common damages and defects in tyres and rims
- KU9.** workplace safety procedures and PPE usage
- KU10.** importance of documentation and job sheet recording

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret job cards and tyre specifications
- GS2.** communicate tyre condition and issues to supervisor or customer
- GS3.** plan and organize tools for smooth servicing workflow
- GS4.** use digital tyre pressure gauge and inflator
- GS5.** apply problem-solving skills to identify defects in tyres/rims
- GS6.** maintain a neat and safe workplace as per 5S standards

Qualification Pack

RSC/N3602: Undertake tyre servicing/maintenance using upgraded tools

Description

This unit covers the competencies required to remove, fit, rotate, balance, and repair tyres using upgraded and semi-automated tools, ensuring quality and safety standards.

Scope

The scope covers the following :

- Remove tyre and rim assembly
- Fit and mount tyre
- Rotate, balance, and repair tyres
- Ensure service quality and safety

Elements and Performance Criteria

Remove tyre and rim assembly

To be competent, the user/individual on the job must be able to:

- PC1.** loosen wheel nuts using a cross spanner or pneumatic wrench
- PC2.** loosen wheel nuts using a cross spanner or pneumatic wrench
- PC3.** remove wheel assembly carefully to avoid damage
- PC4.** deflate tyre before dismantling
- PC5.** operate bead breaker to separate tyre from rim

Fit and mount tyre

To be competent, the user/individual on the job must be able to:

- PC6.** clean rim surface before mounting tyre
- PC7.** apply tyre paste/lubricant to bead area
- PC8.** mount tyre on rim using semi-automatic tyre changer
- PC9.** ensure correct tyre orientation (directional/inside-outside type)
- PC10.** ensure correct tyre orientation (directional/inside-outside type)
- PC11.** check for proper bead seating on the rim

Rotate, balance, and repair tyres

To be competent, the user/individual on the job must be able to:

- PC12.** follow recommended tyre rotation patterns (front-to-rear, cross, etc.)
- PC13.** perform wheel balancing using computerized wheel balancer
- PC14.** apply weights at appropriate points for balancing correction
- PC15.** carry out puncture repairs using plug/patch kits
- PC16.** carry out puncture repairs using plug/patch kits
- PC17.** test repaired tyre for air leakage

Ensure service quality and safety

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC18.** use torque wrench to tighten wheel nuts as per specifications
- PC19.** ensure uniform air pressure across all tyres
- PC20.** dispose of damaged tubes/tyres as per waste disposal norms
- PC21.** maintain tools and equipment after service

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** step-by-step tyre removal and fitting process
- KU2.** step-by-step tyre removal and fitting process
- KU3.** correct use of semi-automatic tyre changer and pneumatic tools
- KU4.** recommended tyre rotation patterns for different vehicles
- KU5.** basics of wheel balancing and consequences of imbalance
- KU6.** repair methods - plug, patch, combination repairs
- KU7.** recommended inflation pressures for two-wheelers, cars, and LCVs
- KU8.** safety precautions in tyre fitting operations
- KU9.** handling and disposal of damaged tyres and tubes
- KU10.** maintenance requirements for upgraded tools and equipment

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** follow written and verbal instructions for tyre servicing tasks
- GS2.** interact politely with customers and clarify doubts on tyre life
- GS3.** use upgraded tools such as pneumatic wrenches, tyre changers, and balancers
- GS4.** work systematically to avoid delays in servicing
- GS5.** identify causes of premature tyre wear during servicing
- GS6.** ensure proper documentation of services provided

RSC/N3608: Perform post tyre servicing/ maintenance activities using automated tools

Description

This NOS covers the skills and knowledge required to perform post tyre servicing and maintenance activities using automated tools. It involves carrying out post-servicing checks, ensuring correct finishing of tyres and wheels, documenting the service performed, and maintaining workplace safety and cleanliness. The individual is responsible for verifying tyre quality, balancing, alignment, and recording results to ensure customer satisfaction and compliance with industry standards.

Scope

The scope covers the following :

- Carry out post-servicing checks
- Complete finishing and documentation tasks

Elements and Performance Criteria

Carry out post-servicing checks

To be competent, the user/individual on the job must be able to:

- PC1.** verify tyre pressure using digital gauges and ensure it matches manufacturer specifications
- PC2.** check wheel balancing status with automated balancers to confirm smooth rotation
- PC3.** inspect tread depth and wear patterns using electronic testers to ensure compliance with safety standards
- PC4.** perform leak detection tests with automated equipment to identify and address air or fluid leaks
- PC5.** ensure correct torque of wheel nuts using calibrated torque wrenches or automated tools
- PC6.** confirm alignment settings through computerized alignment systems to prevent uneven wear
- PC7.** record and report inspection results in digital or manual formats for traceability and customer assurance

Complete finishing and documentation tasks

To be competent, the user/individual on the job must be able to:

- PC8.** clean the serviced tyre and wheel assembly using approved tools and materials to ensure proper finishing
- PC9.** apply protective coatings or treatments (if required) to extend tyre life and maintain appearance
- PC10.** dispose of used materials, waste, and lubricants as per safety and environmental guidelines
- PC11.** update service records manually or digitally to document completed maintenance activities
- PC12.** tag or label tyres (if applicable) for identification, warranty, or customer tracking
- PC13.** communicate final service details to the supervisor or customer clearly and accurately

Qualification Pack

PC14. ensure workplace tidiness by returning tools, equipment, and machines to their designated places

PC15. ADSFASDF

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** tyre pressure standards, manufacturer specifications, and the use of digital pressure gauges
- KU2.** procedures for checking wheel balancing with automated balancers
- KU3.** methods of inspecting tread depth and wear patterns using electronic testers
- KU4.** common causes of air leaks and techniques for leak detection using automated tools
- KU5.** importance of correct torque application and safe use of torque wrenches
- KU6.** basics of wheel alignment parameters and computerized alignment system
- KU7.** documentation practices for recording inspection results and customer assurance
- KU8.** methods for cleaning and finishing tyre and wheel assemblies after servicing
- KU9.** protective coatings/treatments and their role in tyre preservation
- KU10.** environmental and safety guidelines for waste disposal (tyre chips, lubricants, materials)
- KU11.** service documentation practices (manual/digital) and importance of traceability
- KU12.** procedures for tagging/labeling tyres for warranty or tracking
- KU13.** workplace housekeeping practices, including 5S, for tool and equipment management
- KU14.** effective communication methods for sharing service details with supervisors or customers

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** demonstrate accurate tyre pressure verification using automated gauges
- GS2.** apply balancing checks with computerized balancers to ensure smooth wheel function
- GS3.** perform tread depth inspections and identify uneven wear
- GS4.** conduct leak tests using automated detectors to ensure safety
- GS5.** ensure proper torque application using calibrated torque tools
- GS6.** record and summarise results clearly in service reports
- GS7.** carry out cleaning and finishing tasks to deliver ready-to-use tyres
- GS8.** apply protective coatings or treatments when specified
- GS9.** dispose of waste responsibly following safety and environmental norms
- GS10.** update service records accurately in manual or digital systems
- GS11.** tag or label tyres correctly for identification or warranty tracking
- GS12.** maintain housekeeping standards by organizing tools and restoring work areas
- GS13.** communicate service completion effectively with customers or supervisors

RSC/N5007: Follow health & safety protocol

Description

This unit is about maintaining health and safety of self and others at workplace.

Scope

The scope covers the following :

- Maintain a clean and efficient workplace
- Render appropriate emergency procedures
- Maintain standard safety procedures at the workplace
- Participate in safety awareness campaigns
- Understand potential sources of accidents
- Use safety gears to avoid accidents

Elements and Performance Criteria

Maintain a clean and efficient workplace

To be competent, the user/individual on the job must be able to:

- PC1.** undertake basic safety checks before operation of all machinery and equipment and report hazards to the appropriate supervisor
- PC2.** work for which protective clothing or equipment is required is identified and the appropriate protective clothing or equipment is used in performing these duties in accordance with workplace policy
- PC3.** read and understand the hazards of use and contamination mentioned on the labels of chemicals, utilities etc
- PC4.** prior to performing manual handling jobs, risk is assessed and work is carried out according to currently recommended safe practices.
- PC5.** use equipment and materials safely and correctly and return the same to designated storage when not in use
- PC6.** dispose off waste safely and correctly in a designated area
- PC7.** risks to bystanders are recognized and action taken to reduce risk associated with jobs in the workplace
- PC8.** perform work in a manner which minimizes environmental damage
- PC9.** all procedures and work instructions for controlling risk are followed closely
- PC10.** report any accidents, incidents or problems without delay to an appropriate person and take immediate necessary action to reduce further danger

Render appropriate emergency procedures

To be competent, the user/individual on the job must be able to:

- PC11.** follow procedures for dealing with accidents, fires and emergencies, including communicating location and directions to emergency.
- PC12.** follow emergency procedures as per company standards and workplace requirements

Qualification Pack

- PC13.** use emergency equipment in accordance with manufacturers' specifications and workplace requirements
- PC14.** provide treatment appropriate to the patient's injuries in accordance with recognized first aid techniques.
- PC15.** recover (if practical), clean, inspect/test, refurbish, replace and store the first aid equipment as appropriate
- PC16.** dispose off medical waste in accordance with workplace requirements
- PC17.** report details of first aid administered in accordance with work place procedures

Maintain standard safety procedures at the workplace

To be competent, the user/individual on the job must be able to:

- PC18.** comply with general safety procedures
- PC19.** follow standard safety procedures while handling equipment, hazardous material or tool
- PC20.** check parts of the workplace and take preventive actions like spraying and other steps to protect from leakages, water logging, pests, fire, pollution, etc.
- PC21.** ensure no accidents and damages at the workplace, reporting of any breach of company safety procedure
- PC22.** keep the workplace organized, swept, clean and hazard free

Participate in safety awareness campaigns

To be competent, the user/individual on the job must be able to:

- PC23.** attend fire drills and other safety related workshops organized at the workplace
- PC24.** be aware of first aid, evacuation and emergency procedures
- PC25.** be alert of any events and do not be negligent to any safety procedures to be followed

Understand potential sources of accidents

To be competent, the user/individual on the job must be able to:

- PC26.** avoid accidents while using hazardous chemicals, machines, sharp tools and equipment

Use safety gears to avoid accidents

To be competent, the user/individual on the job must be able to:

- PC27.** use safety materials such as protective gear, goggles, caps, shoes, etc.(as applicable with workplace)
- PC28.** handle heavy and hazardous materials with care and using appropriate tools and handling equipment such as trolleys, ladders

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** policies on incentives, delivery standards, and personnel management.
- KU2.** occupational safety and health policy followed
- KU3.** emergency evacuation procedure
- KU4.** medical policy
- KU5.** company laws and acts
- KU6.** the risks to health and safety and the measures to be taken to control those risks in the area of work

Qualification Pack

- KU7.** workplace procedures and requirements for the handling of workplace injuries/illnesses.
- KU8.** basic emergency first aid procedure
- KU9.** local emergency services
- KU10.** reporting on accidents, incidents and problems to appropriate authorities.
- KU11.** how to use machines as per standard operating procedure
- KU12.** how to maintain work area safe and secure
- KU13.** use of hazardous materials, tools and equipments
- KU14.** emergency evacuation and first aid procedures to be followed
- KU15.** personal hygiene and fitness requirements
- KU16.** general duties under the relevant health and safety legislation
- KU17.** what personal protective equipment and clothing should be worn and how it is cared for
- KU18.** the correct and safe way to use materials and equipment required for work
- KU19.** the importance of good housekeeping in the workplace
- KU20.** safe disposal methods for waste
- KU21.** methods for minimizing environmental damage during work

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** record data which are required for record keeping purpose
- GS2.** report problems to the appropriate person in a timely manner
- GS3.** write descriptions and details about incidents in reports
- GS4.** read instruction manuals for hand tools and equipment
- GS5.** read instructions on work orders and procedures
- GS6.** receive instructions and seek advice from superiors
- GS7.** communicate clearly and effectively with others
- GS8.** take a decision for any change/issue based on earlier successes(documented previous history)on similar issues
- GS9.** work out changes in case a new improved machine/equipment is added in the process or any new material/chemical is developed replacing existing one.
- GS10.** make changes in cycle time due to improved process.
- GS11.** use the standard operating procedure or trouble shooting manuals for trouble shooting and other reference documents approved by plant management
- GS12.** consult the peer group and superiors to arrive at a favourable decision.
- GS13.** use of standard available problem solving techniques for decision making
- GS14.** review and analyze the process steps to check on system non adherence andnon conformity
- GS15.** review the current sop and other standards for continuous improvement to facilitate decision making
- GS16.** take a calculated risk with minimum losses
- GS17.** schedule daily activities and drawing up priorities; allocate start times, estimation of completion times and materials, equipment and assistance required for completion.

Qualification Pack

- GS18.** match customer needs/specification by adjusting the processing conditions (interact with customer in case any clarification required)
- GS19.** ensure that performance of his action/operation/activity does not lead to any divergence from the specified quality of the final product as required by the customer.
- GS20.** complete the assigned task in timely manner so that the final product is delivered in the timeline given by the customer.
- GS21.** communicate effectively to the superior/customer for any delay in supplies to the clients.
- GS22.** work towards fulfilling the customers requirement as per their demand.
- GS23.** in case of any complaint, ensure its timely resolution if the problem is emanating at his level
- GS24.** communicate effectively to the superior/customer for any delay in resolving the problem faced by the customer.
- GS25.** maintain good/cordial relation with customers.
- GS26.** work on the feedback received from customer regarding the product.
- GS27.** use first aid treatment in case of any injury/accident.
- GS28.** monitor and maintain the condition of tools and equipment
- GS29.** assess situation & identify appropriate control measures
- GS30.** act, communicate and report in emergency situation

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 50

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
