RSC/Q6401: Processing Assistant - TSR (Technically Specified Rubber)

Brief Job Description

The Processing Assistant TSR supports the production of Technically Specified Rubber by assisting in shredding, washing, drying, sieving, baling, and packing operations. The role ensures process efficiency, quality compliance, workplace safety, and proper documentation under the supervision of senior operators.

Personal Attributes

The individual in this job should have good physique to handle heavy machinery and amenable to discipline and must have good sense of neatness and cleanliness.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [RSC/N1013: Assist in preparation of raw material for TSR Processing](#)
2. [RSC/N1015: Support in shredding and washing operations](#)
3. [RSC/N1017: Perform drying, sieving, baling and packing of finished rubber](#)
4. [RSC/N5629: Follow safety, environmental and hygiene practices](#)
5. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

RSC/N1013: Assist in preparation of raw material for TSR Processing

Description

This NOS covers the competencies required to support the preparation of raw material for Technically Specified Rubber (TSR) production. It includes collection, cleaning, sorting, chopping, weighing, and safe handling of raw rubber to ensure quality feedstock for subsequent processing stages.

Scope

The scope covers the following :

- Support in raw material preparation for TSR production
- Assist in maintaining process readiness

Elements and Performance Criteria

Support in raw material preparation for TSR production

To be competent, the user/individual on the job must be able to:

- PC1.** identify and collect field latex, cup lumps, and other raw materials as per standard guidelines
- PC2.** assist in cleaning, chopping or cutting raw rubber lumps to the required size for processing
- PC3.** carry out sorting and removal of foreign matter, stones, and wood maintain quality
- PC4.** follow standard procedures for blending and homogenizing raw material before processing
- PC5.** ensure uniformity and readiness of raw material for subsequent TSR operations
- PC6.** apply correct methods for weighing and measuring raw rubber before processing
- PC7.** demonstrate safe storage practices of collected raw material to prevent contamination and deterioration
- PC8.** conduct visual checks to recognize moisture content or spoilage in raw rubber
- PC9.** assist in documenting batch details, including raw material source, quantity, and preparation status
- PC10.** ensure traceability of raw materials by labeling and tagging as per organizational requirements

Assist in maintaining process readiness

To be competent, the user/individual on the job must be able to:

- PC11.** prepare workstations, tools, and machinery required for raw material preparation
- PC12.** assist in safe loading/unloading and transfer of raw materials to designated areas
- PC13.** maintain the cleanliness or orderliness of the work area in compliance with safety and environmental norms
- PC14.** report raw material inconsistency or equipment malfunction to the supervisor
- PC15.** follow prescribed health, safety and PPR guidelines during all preparation activities
- PC16.** perform basic cleaning of work area, tools, and containers before raw material transfer
- PC17.** arrange required utilities such as water, electricity, and air supply for uninterrupted processing

Qualification Pack

- PC18.** check and confirm the availability of safety equipment like gloves, boots, masks, and first aid kit
- PC19.** apply proper labeling and identification for prepared batches before sending
- PC20.** maintain records of preparation and readiness activities as per standard operating procedures (SOPs)

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** basics of natural rubber and its properties relevant to TSR production
- KU2.** types of raw rubber materials and their quality parameters
- KU3.** importance of cleaning, sorting, and removing contaminants before processing
- KU4.** moisture content and spoilage indicators in raw rubber
- KU5.** proper weighing and measuring techniques for raw material batches
- KU6.** safe handling, transport, and storage practices to prevent contamination
- KU7.** documentation and record-keeping requirements for batch traceability
- KU8.** tools, containers, and cleaning methods used in preparation
- KU9.** importance of utilities like water, electricity, and air in preparation activities
- KU10.** workplace health, hygiene, and safety protocols
- KU11.** SOPs related to labeling, tagging, and identification of raw materials
- KU12.** waste disposal methods and environmental considerations during preparation

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate clearly with supervisors and co-workers about preparation tasks
- GS2.** read and interpret basic instructions, signs, and labels
- GS3.** follow standard checklists and SOPs accurately
- GS4.** work as part of a team to support batch preparation
- GS5.** use simple documentation methods (logbooks, forms, or digital entry)
- GS6.** practice basic numeracy for weighing and measuring raw material
- GS7.** demonstrate cleaning and sorting of raw rubber materials
- GS8.** apply correct weighing and measuring techniques
- GS9.** identify contaminants, spoiled material, or improper storage conditions
- GS10.** arrange tools, containers, and utilities required for processing
- GS11.** use labeling and tagging methods for traceability of batches
- GS12.** ensure readiness of the work area and compliance with safety protocols

RSC/N1015: Support in shredding and washing operations

Description

This NOS covers assisting in the shredding and washing processes of field coagulum or cup lumps for the production of Technically Specified Rubber (TSR). It includes tasks such as operating and monitoring shredding and washing equipment, ensuring uniform cleaning, maintaining safety, and supporting waste management in compliance with environmental standards.

Scope

The scope covers the following :

- Assist in Shredding Operations
- Support in Washing Activities
- Maintain Process Hygiene and Safety

Elements and Performance Criteria

Assist in Shredding Operations

To be competent, the user/individual on the job must be able to:

- PC1.** identify and arrange new rubber for shredding as per instructions
- PC2.** assist in feeding raw rubber lumps into the shredding machine safely
- PC3.** monitor machine functioning during shredding to avoid jamming and overloading
- PC4.** recognize uneven shredding or irregular sizes and report to the operator
- PC5.** apply basic adjustments such as aligning material flow to ensure uniform shredding
- PC6.** collect shredded material and transfer to the designated washing area
- PC7.** follow proper housekeeping practices around shredding equipment
- PC8.** ensure adherence to machine safety protocols, including use of PPE
- PC9.** maintain a log of material fed and shredded as per batch records
- PC10.** support preventive maintenance by assisting in cleaning and lubrication of the machine

Support in Washing Activities

To be competent, the user/individual on the job must be able to:

- PC11.** prepare washing equipment and ensure adequate supply of clean water
- PC12.** load shredded rubber into washing tanks or conveyors as instructed
- PC13.** monitor washing process to ensure effective removal of dirt and impurities
- PC14.** adjust water flow and temperature under supervision for consistent washing
- PC15.** identify improperly washed material and repeat the process as needed
- PC16.** collect and drain washed rubber for further processing
- PC17.** record washing parameters such as water usage, duration, and batch size
- PC18.** ensure safe disposal or recycling of used water as per environmental guidelines
- PC19.** follow hygiene and safety practices to prevent slips, contamination, and hazards

Maintain Process Hygiene and Safety

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC20.** ensure that housekeeping equipment and supplies are stored and maintained as per company standards
- PC21.** ensure that, on completion of the work, the area is left clean and dry as per the requirements
- PC22.** ensure that the equipment, materials, and personal protective equipment that were used are returned to their respective places in an appropriate manner
- PC23.** ensure appropriate disposal of the waste garnered from the cleaning activity
- PC24.** ensure that all necessary supplies or consumables are replenished as per the requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the Standard Operating Procedures (SOPs) and workflow of TSR (Technically Specified Rubber) processing in the organization
- KU2.** roles, responsibilities, and reporting hierarchy within the processing unit
- KU3.** company policies for occupational health, safety, and environmental (SHE) compliance
- KU4.** record-keeping and documentation requirements for material handling, machine operation, and washing processes
- KU5.** waste management and water recycling guidelines applicable to rubber processing
- KU6.** importance of teamwork and coordination with machine operators and supervisors to ensure smooth operations
- KU7.** different types of raw rubber (field coagulum, cup lumps) and their suitability for shredding
- KU8.** functioning and operational principles of shredding and washing machines
- KU9.** common machine issues such as jamming, overloading, or uneven shredding and their indicators
- KU10.** basic adjustments that can be safely performed to ensure uniform shredding and effective washing
- KU11.** water supply management, including flow rate, temperature control, and quality for rubber washing
- KU12.** methods for monitoring washing effectiveness and identifying incompletely washed material
- KU13.** cleaning, lubrication, and preventive maintenance practices for shredding and washing equipment
- KU14.** use of personal protective equipment (PPE) and adherence to machine safety protocols
- KU15.** housekeeping practices for equipment, tools, and work areas to prevent contamination and hazards
- KU16.** safe disposal or recycling of waste water and other cleaning residues as per environmental and company standards
- KU17.** documentation of process parameters such as batch size, water usage, washing duration, and shredded material logs
- KU18.** importance of hygiene and safe handling of rubber to maintain product quality and avoid workplace hazards

Generic Skills (GS)

Qualification Pack

User/individual on the job needs to know how to:

- GS1.** communicate effectively with supervisors, operators, and team members regarding process issues, machine status, or safety concerns
- GS2.** read, understand, and follow written instructions, SOPs, and process documentation related to TSR processing
- GS3.** maintain accurate records of materials processed, washing parameters, and batch logs
- GS4.** observe and report deviations from standard operating procedures or quality standards
- GS5.** apply basic numerical skills for recording quantities, measurements, and process parameters
- GS6.** identify, sort, and arrange raw rubber lumps for shredding according to instructions
- GS7.** assist in feeding raw rubber into shredding and washing machines safely and efficiently
- GS8.** monitor equipment during shredding and washing operations to detect issues like jamming, uneven shredding, or ineffective washing
- GS9.** apply basic adjustments under supervision to ensure uniform shredding and consistent washing
- GS10.** collect, transfer, and handle shredded and washed rubber without contamination or spillage
- GS11.** support preventive maintenance activities, such as cleaning and lubrication of equipment
- GS12.** follow proper hygiene, housekeeping, and safety practices in the processing area, including safe disposal of waste and used water
- GS13.** use PPE correctly and adhere to machine safety protocols at all times
- GS14.** replenish supplies and consumables, and ensure all equipment, tools, and materials are returned to designated locations after use
- GS15.** adapt to process changes, machine updates, or workflow modifications while maintaining product quality and workplace safety

RSC/N1017: Perform drying, sieving, baling and packing of finished rubber

Description

This NOS covers supporting the drying, sieving, baling, and packing of finished TSR or processed rubber. The individual is required to monitor and carry out operations, ensure quality and uniformity, maintain hygiene and safety standards, and document process parameters for efficient handling and storage of finished rubber.

Scope

The scope covers the following :

- Conduct rubber finishing operations
- Perform quality and safety compliance in rubber finishing

Elements and Performance Criteria

Conduct rubber finishing operations

To be competent, the user/individual on the job must be able to:

- PC1.** identify and list out finished rubber batches for drying, sieving, baling, and packing
- PC2.** demonstrate, perform, and carry out drying operations while ensuring required moisture content
- PC3.** apply sieving methods to separate impurities and achieve uniform particle size
- PC4.** conduct and perform baling operations according to standard specifications
- PC5.** show, display, and apply correct packing techniques for safe storage and shipment
- PC6.** recognize deviations in quality or process and report them to the supervisor
- PC7.** develop good housekeeping and hygiene practices in the work area
- PC8.** document and record process parameters, batch details, and operational observations

Perform quality and safety compliance in rubber finishing

To be competent, the user/individual on the job must be able to:

- PC9.** understand quality requirements for finished rubber and ensure compliance during drying, sieving, baling, and packing
- PC10.** explain, define, and elaborate on standard operating procedures (SOPs) for handling rubber
- PC11.** identify potential hazards and develop safe working practices
- PC12.** discuss and summarize process outcomes to maintain quality standards
- PC13.** point out, state, and mention corrective actions in case of process deviations
- PC14.** show, display, and demonstrate correct use of PPE and safety equipment
- PC15.** perform and carry out material handling efficiently while maintaining workplace safety
- PC16.** conduct inspections to verify that drying, sieving, baling, and packing operations meet required standards

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** the standard operating procedures (SOPs) for drying, sieving, baling, and packing of TSR/processed rubber
- KU2.** quality parameters for finished rubber, including moisture content, particle size, and uniformity
- KU3.** functioning and operational principles of drying, sieving, and baling equipment
- KU4.** techniques for effective sieving to remove impurities and achieve uniform particle size
- KU5.** proper methods of packing rubber to prevent damage during storage or shipment
- KU6.** importance of housekeeping and hygiene in the processing and packing areas
- KU7.** use and importance of personal protective equipment (PPE) during operations
- KU8.** safe handling and storage practices for finished rubber
- KU9.** documentation and record-keeping requirements for batches, process parameters, and quality checks
- KU10.** potential hazards and safety measures in drying, sieving, baling, and packing operations
- KU11.** waste management and disposal practices for by-products or contaminated materials
- KU12.** importance of reporting deviations in quality, equipment performance, or safety to supervisors

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively with supervisors and team members regarding process issues or deviations
- GS2.** read, understand, and follow instructions, SOPs, and process documentation
- GS3.** maintain accurate records of batch details, drying parameters, sieving results, and packing information
- GS4.** observe and report deviations from quality standards or safety protocols
- GS5.** apply basic numerical skills for measuring quantities, moisture content, and batch sizes
- GS6.** identify, sort, and prepare finished rubber for drying, sieving, baling, and packing
- GS7.** demonstrate, perform, and carry out drying operations while ensuring desired moisture levels
- GS8.** apply sieving techniques to remove impurities and achieve uniform particle size
- GS9.** conduct and perform baling and packing operations according to specifications
- GS10.** ensure hygiene, housekeeping, and workplace safety during all operations
- GS11.** recognize and report deviations in quality or process to the supervisor
- GS12.** display correct use of personal protective equipment (PPE) and safety devices
- GS13.** develop and implement safe material handling practices
- GS14.** perform documentation, batch reporting, and record-keeping accurately
- GS15.** adapt to process changes or equipment updates while maintaining quality and safety standards

RSC/N5629: Follow safety, environmental and hygiene practices

Description

This NOS involves adopting safety practices, using protective equipment, maintaining personal hygiene, and following environmentally sustainable practices in the nursery.

Scope

The scope covers the following :

- Follow health and safety procedures
- Maintain hygiene and cleanliness
- Practice environmental sustainability

Elements and Performance Criteria

Follow health and safety procedures

To be competent, the user/individual on the job must be able to:

- PC1.** wear basic protective equipment such as gloves and boots
- PC2.** use tools and materials safely under guidance
- PC3.** follow safety instructions while handling fertilizers and pesticides
- PC4.** store tools and agrochemicals in designated places

Maintain hygiene and cleanliness

To be competent, the user/individual on the job must be able to:

- PC5.** wash hands and maintain personal hygiene before and after work
- PC6.** keep nursery pathways and surroundings clean
- PC7.** dispose of nursery waste safely

Practice environmental sustainability

To be competent, the user/individual on the job must be able to:

- PC8.** avoid wastage of water during irrigation
- PC9.** follow eco-friendly practices such as use of organic manure
- PC10.** segregate biodegradable and non-biodegradable waste

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** importance of personal safety and protective gear
- KU2.** hazards related to improper handling of tools and agrochemicals
- KU3.** hygiene practices to prevent infections and diseases
- KU4.** safe methods of disposing waste
- KU5.** importance of water conservation and eco-friendly practices

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** follow verbal safety instructions
- GS2.** recognize basic safety and hygiene signs
- GS3.** report unsafe conditions or accidents to supervisors
- GS4.** practice responsible use of water and materials
- GS5.** show discipline in maintaining cleanliness and order

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 50

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Compulsory NOS

National Occupational Standards	Theory Marks	Practical Marks	Project Marks	Viva Marks	Total Marks	Weightage

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
