RSC/Q6501: Junior Assistant - Rubber Plantation

Brief Job Description

The Junior Assistant Rubber Plantation supports supervisors in carrying out land preparation, planting, and maintenance activities in rubber plantations. The role involves assisting in soil management, irrigation, weeding, and basic plant health care to ensure healthy growth and sustainable plantation practices.

Personal Attributes

The individual should be physically fit to work in outdoor plantation environments and willing to perform manual tasks for long hours under varying weather conditions. They must be observant, disciplined, and attentive to instructions, with patience and care in handling plants and tools. Basic teamwork, communication, and time management skills are essential, along with a positive attitude toward sustainable agricultural practices.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [RSC/N6502: Perform land preparation and planning activities](#)
2. [RSC/N6503: Carry out planting of rubber plants and its maintenance](#)
3. [RSC/N5629: Follow safety, environmental and hygiene practices](#)
4. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

RSC/N6502: Perform land preparation and planning activities

Description

This NOS covers the skills and knowledge required to prepare plantation land and plan rubber plantation activities effectively. It includes clearing and leveling land, preparing planting pits, arranging planting materials and tools, and ensuring proper layout and resource utilization while adhering to safety and environmental standards.

Scope

The scope covers the following :

- Demonstrate and carry out land preparation activities
- Identify and apply planning methods for plantation layout and resource arrangement

Elements and Performance Criteria

Demonstrate and carry out land preparation activities

To be competent, the user/individual on the job must be able to:

- PC1.** identify and clear unwanted vegetation, debris, and obstacles from the plantation area
- PC2.** demonstrate leveling of soil and preparation of planting pits according to plantation guideline
- PC3.** apply methods to ensure proper drainage and soil aeration in the prepared land
- PC4.** carry out marking of boundaries and rows for planting
- PC5.** show correct handling of soil, tools, and implements during preparation activities
- PC6.** recognize soil conditions and report unsuitable areas to the supervisor
- PC7.** ensure adherence to safety procedures while performing land preparation tasks
- PC8.** record and maintain details of land preparation activities in logs or reports

Identify and apply planning methods for plantation layout and resource arrangement

To be competent, the user/individual on the job must be able to:

- PC9.** develop a plantation layout plan following recommended spacing and row alignment
- PC10.** identify and arrange required planting materials (seedlings, budded plants) and tools
- PC11.** apply work instructions to allocate resources efficiently across the plantation area
- PC12.** conduct discussions with supervisors to clarify plantation planning requirements
- PC13.** demonstrate correct placement of planting materials in the prepared pits
- PC14.** ensure optimal utilization of land and resources as per the plantation plan
- PC15.** recognize potential issues in layout or resource allocation and report for corrective action
- PC16.** maintain records of planning and resource arrangement activities for reference

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** importance of land preparation in successful rubber plantation establishment

Qualification Pack

- KU2.** types of vegetation to be cleared before planting
- KU3.** methods for soil leveling and removal of debris
- KU4.** tools, implements, and machinery used in land preparation
- KU5.** techniques for preparing planting pits of appropriate size and depth
- KU6.** principles of soil fertility and drainage for rubber plantations
- KU7.** recommended spacing and alignment for rubber plants
- KU8.** safe handling and maintenance of land preparation equipment
- KU9.** environmental considerations while clearing land (soil erosion prevention, biodiversity conservation)
- KU10.** health and safety precautions during land preparation activities
- KU11.** principles of plantation layout for rubber (row alignment, spacing, contour planting)
- KU12.** importance of proper resource planning in plantation management
- KU13.** types of planting materials (clones, budded stumps, polybag plants)
- KU14.** procedures for arranging and transporting planting materials
- KU15.** common tools, equipment, and inputs required in plantation planning
- KU16.** methods for recording plantation layout and work instructions
- KU17.** effective utilization of available land, water, and manpower resources
- KU18.** scheduling activities for timely completion of planting
- KU19.** environmental sustainability aspects in plantation planning
- KU20.** role of Junior Assistant in supporting supervisors during planning

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** demonstrate safe use of basic land preparation tools and implements
- GS2.** carry out vegetation clearing, soil leveling, and removal of stumps/rocks
- GS3.** perform manual and assisted digging of planting pits to defined specifications
- GS4.** apply basic soil testing methods to check fertility and drainage
- GS5.** ensure proper spacing and alignment of pits as per plantation design
- GS6.** identify hazards and follow safety practices during land preparation
- GS7.** display teamwork while handling heavy tools and collective tasks
- GS8.** show time management in executing sequential land preparation tasks
- GS9.** communicate effectively with supervisors about progress and challenge
- GS10.** maintain cleanliness of tools and work area after completion of activities
- GS11.** identify and explain plantation layout requirements to peers
- GS12.** arrange and organize tools, planting materials, and inputs for the job
- GS13.** apply spacing and alignment methods as per supervisor instructions
- GS14.** demonstrate safe handling of planting materials during transport and storage
- GS15.** record and report plantation layout details in prescribed formats
- GS16.** carry out resource allocation for tools, materials, and manpower

Qualification Pack

- GS17.** ensure that work instructions are followed systematically
- GS18.** display organizational skills to avoid wastage of materials
- GS19.** coordinate effectively with team members during layout execution
- GS20.** recognize issues in layout or resource planning and inform supervisors promptly

RSC/N6503: Carry out planting of rubber plants and its maintenance

Description

This NOS outlines the competencies required to maintain a rubber plantation by performing weeding, irrigation, soil enrichment, and basic plant health care to ensure sustained growth and productivity.

Scope

The scope covers the following :

- Perform and demonstrate routine upkeep of plantation area
- Apply and ensure soil and nutrient management practices
- Identify and conduct basic plant health maintenance

Elements and Performance Criteria

Perform and demonstrate routine upkeep of plantation area

To be competent, the user/individual on the job must be able to:

- PC1.** clear unwanted weeds, grasses, and debris from the plantation area using appropriate tools
- PC2.** demonstrate proper mulching techniques to retain soil moisture
- PC3.** loosen soil around the plant base to enhance aeration and root growth
- PC4.** carry out irrigation activities as per schedule, ensuring optimum water supply
- PC5.** ensure plantation paths and surroundings are kept clean and safe
- PC6.** follow work instructions to execute upkeep tasks within given timelines
- PC7.** use tools and implements safely while performing upkeep operations
- PC8.** dispose of weeds and plant residues in an eco-friendly manner

Apply and ensure soil and nutrient management practices

To be competent, the user/individual on the job must be able to:

- PC9.** demonstrate preparation of organic manure or compost for soil enrichment
- PC10.** apply manure/fertilizers around plant roots at recommended doses and intervals
- PC11.** ensure soil moisture is maintained through mulching, irrigation, or cover cropping
- PC12.** recognize soil erosion-prone areas and apply corrective measures
- PC13.** follow instructions for safe storage, handling, and application of fertilizers
- PC14.** maintain records of fertilizer/manure application as per instructions
- PC15.** display awareness of sustainable practices to minimize environmental impact
- PC16.** use protective gear while handling chemical fertilizers, if applicable

Identify and conduct basic plant health maintenance

To be competent, the user/individual on the job must be able to:

- PC17.** regularly observe plantation for signs of pest or disease infestation
- PC18.** identify common symptoms such as leaf spots, wilting, or discoloration
- PC19.** perform basic removal of infected leaves/branches under supervision
- PC20.** apply safe and prescribed plant protection methods (e.g., neem oil, fungicide spray)

Qualification Pack

- PC21.** report major pest/disease problems to supervisors promptly
- PC22.** maintain the cleanliness of tools and equipment used for plant health management
- PC23.** ensure safety measures while handling plant protection inputs
- PC24.** keep the plantation environment conducive to healthy plant growth

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** importance of routine plantation maintenance for healthy growth
- KU2.** common weeds, grasses, and debris found in rubber plantations
- KU3.** methods for weeding, mulching, and soil loosening
- KU4.** irrigation techniques suitable for young and mature rubber plants
- KU5.** tools and implements used for upkeep activities and their safe handling
- KU6.** environmental considerations during plantation upkeep
- KU7.** health and safety precautions while performing maintenance tasks
- KU8.** organizational procedures for cleaning and disposal of plant residues
- KU9.** scheduling of routine maintenance activities
- KU10.** reporting procedures for any issues observed during upkeep
- KU11.** importance of soil fertility and nutrient management in rubber plantations
- KU12.** types of organic manure, fertilizers, and soil amendments used
- KU13.** recommended doses and application methods for fertilizers and manure
- KU14.** soil moisture management techniques
- KU15.** scheduling and timing of soil enrichment activities
- KU16.** environmental impact and sustainable practices in nutrient management
- KU17.** safety measures while handling fertilizers or soil amendments
- KU18.** tools and implements used for applying manure/fertilizers
- KU19.** organizational procedures for record-keeping of nutrient application
- KU20.** guidelines for identifying nutrient deficiencies in plants
- KU21.** common pests, diseases, and symptoms affecting rubber plants
- KU22.** basic plant protection methods, including organic and chemical control
- KU23.** techniques for removing infected plant parts safely
- KU24.** safety precautions while handling plant protection products
- KU25.** environmental considerations in pest and disease management
- KU26.** role of regular monitoring in early detection of plant health issues
- KU27.** tools and implements used in plant health maintenance
- KU28.** reporting procedures for major pest/disease incidences
- KU29.** organizational procedures for maintaining healthy plantation records
- KU30.** guidelines for maintaining hygiene and sanitation in plantation areas

Generic Skills (GS)

Qualification Pack

User/individual on the job needs to know how to:

- GS1.** demonstrate weeding, mulching, and soil loosening techniques effectively
- GS2.** perform irrigation activities according to schedule and plant requirements
- GS3.** handle tools and implements safely while performing upkeep
- GS4.** identify and remove unwanted vegetation and debris
- GS5.** maintain cleanliness and organization of the plantation area
- GS6.** follow instructions for executing maintenance tasks systematically
- GS7.** report observations of plant growth or environmental issues to supervisors
- GS8.** work collaboratively with team members during maintenance activities
- GS9.** apply environmentally sustainable practices during upkeep
- GS10.** record maintenance activities accurately in logs or reports
- GS11.** apply fertilizers and organic manure correctly around plant roots
- GS12.** demonstrate proper soil enrichment techniques
- GS13.** ensure soil moisture is maintained for optimal plant growth
- GS14.** handle fertilizers and soil amendments safely
- GS15.** identify areas requiring additional nutrients or soil correction
- GS16.** maintain records of soil and nutrient management activities
- GS17.** Follow supervisors instructions for resource utilization
- GS18.** apply sustainable practices to prevent overuse or wastage of inputs
- GS19.** report nutrient deficiencies or soil issues promptly
- GS20.** work collaboratively with team members in soil and nutrient management tasks
- GS21.** identify early signs of pest and disease infestation in rubber plants
- GS22.** conduct basic removal of infected leaves, branches, or plants safely
- GS23.** apply plant protection products as per instructions and safety norms
- GS24.** maintain cleanliness of tools and implements used in plant health activities
- GS25.** report major plant health issues to supervisors promptly
- GS26.** monitor plantation regularly to detect abnormalities in plant growth

RSC/N5629: Follow safety, environmental and hygiene practices

Description

This NOS involves adopting safety practices, using protective equipment, maintaining personal hygiene, and following environmentally sustainable practices in the nursery.

Scope

The scope covers the following :

- Follow health and safety procedures
- Maintain hygiene and cleanliness
- Practice environmental sustainability

Elements and Performance Criteria

Follow health and safety procedures

To be competent, the user/individual on the job must be able to:

- PC1.** wear basic protective equipment such as gloves and boots
- PC2.** use tools and materials safely under guidance
- PC3.** follow safety instructions while handling fertilizers and pesticides
- PC4.** store tools and agrochemicals in designated places

Maintain hygiene and cleanliness

To be competent, the user/individual on the job must be able to:

- PC5.** wash hands and maintain personal hygiene before and after work
- PC6.** keep nursery pathways and surroundings clean
- PC7.** dispose of nursery waste safely

Practice environmental sustainability

To be competent, the user/individual on the job must be able to:

- PC8.** avoid wastage of water during irrigation
- PC9.** follow eco-friendly practices such as use of organic manure
- PC10.** segregate biodegradable and non-biodegradable waste

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** importance of personal safety and protective gear
- KU2.** hazards related to improper handling of tools and agrochemicals
- KU3.** hygiene practices to prevent infections and diseases
- KU4.** safe methods of disposing waste
- KU5.** importance of water conservation and eco-friendly practices

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** follow verbal safety instructions
- GS2.** recognize basic safety and hygiene signs
- GS3.** report unsafe conditions or accidents to supervisors
- GS4.** practice responsible use of water and materials
- GS5.** show discipline in maintaining cleanliness and order

Qualification Pack

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 50

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
