RSC/Q6602: Processing Technician - Rubber Sheet

Brief Job Description

The Processing Technician - Rubber Sheet is responsible for carrying out operations involved in the preparation, coagulation, sheeting, smoking, and drying of ribbed smoked sheets (RSS) from natural latex. The individual ensures process efficiency, product quality, hygiene, and safety compliance throughout the rubber processing stages under the supervision of senior technicians or plant operators.

Personal Attributes

The individual must be detail-oriented, safety-conscious, and physically capable of handling rubber processing operations efficiently. They should demonstrate discipline, teamwork, observational skills, and a commitment to quality and environmental practices.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [RSC/N1018: Prepare for RSS Processing](#)
2. [RSC/N1019: Carry out coagulation and sheeting operations](#)
3. [RSC/N1020: Perform smoking and drying of rubber sheets](#)
4. [RSC/N5007: Follow health & safety protocol](#)
5. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

Qualification Pack

RSC/N1018: Prepare for RSS Processing

Description

This NOS covers the preparation of raw rubber for RSS (Ribbed Smoked Sheet) processing, including sorting, cleaning, blending, and staging of raw material. The individual ensures material uniformity, quality compliance, workplace safety, and proper documentation under supervision.

Scope

The scope covers the following :

- Preparation of Raw Rubber Processing
- Conduct Quality and Safety Compliance in RSS Rubber processing

Elements and Performance Criteria

Preparation of Raw Rubber Processing

To be competent, the user/individual on the job must be able to:

- PC1.** identify and list raw latex, coagulum, or field rubber for processing
- PC2.** demonstrate and perform preliminary cleaning and sorting of raw rubber
- PC3.** apply standard techniques to break or blend coagulum for uniform consistency
- PC4.** show and display proper measurement of raw rubber quantities as per batch requirements
- PC5.** recognize impurities or contaminants and report them to the supervisor
- PC6.** ensure safe handling of raw rubber and chemicals used in pre-processing
- PC7.** develop and carry out proper storage and staging of raw rubber for processing
- PC8.** conduct checks on moisture content and physical quality of rubber before processing
- PC9.** explain, define, and elaborate on the preparation procedures to team members
- PC10.** point out, state, and mention deviations from standard quality or preparation practice
- PC11.** demonstrate correct use of personal protective equipment (PPE) during preparation
- PC12.** apply housekeeping practices to maintain a clean and safe work area
- PC13.** summarize batch preparation details and document all observations in logbooks
- PC14.** perform coordination with downstream processing teams to ensure smooth workflow
- PC15.** understand and display compliance with environmental and waste disposal norms

Conduct Quality and Safety Compliance in RSS Rubber processing

To be competent, the user/individual on the job must be able to:

- PC16.** identify and list out quality parameters and safety standards applicable to RSS rubber processing
- PC17.** demonstrate and perform inspections of raw and processed rubber to ensure compliance with specifications
- PC18.** apply standard procedures to monitor consistency, moisture content, and physical quality of rubber sheets

Qualification Pack

- PC19.** show and display correct handling and storage of rubber to prevent contamination or damage
- PC20.** recognize deviations from quality or safety standards and report them to supervisors
- PC21.** ensure proper use of personal protective equipment (PPE) by self and team members
- PC22.** develop and carry out corrective actions to maintain quality and safety compliance
- PC23.** conduct audits of work area, equipment, and processes for hygiene and safety adherence
- PC24.** explain, define, and elaborate on standard operating procedures (SOPs) for quality and safety compliance
- PC25.** point out, state, and mention potential hazards and preventive measures in the processing area
- PC26.** perform regular checks on processing equipment to ensure safe and efficient operation
- PC27.** apply environmental and waste management practices in line with organizational norms
- PC28.** summarize inspection findings and document all quality and safety observations
- PC29.** understand the importance of quality and safety compliance for product consistency and workplace well-being
- PC30.** display and demonstrate teamwork and communication to support adherence to quality and safety standards

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** standard Operating Procedures (SOPs) for raw rubber preparation, RSS processing, and downstream operations
- KU2.** quality parameters for raw latex, coagulum, field rubber, and finished RSS sheets, including moisture content, uniformity, and physical integrity
- KU3.** functioning and operational principles of equipment used in preparation, processing, drying, sieving, and packaging of rubber
- KU4.** techniques to identify impurities, defects, or deviations in raw and processed rubber
- KU5.** proper methods for handling, sorting, and storing raw and finished rubber to prevent contamination or damage
- KU6.** importance of workplace hygiene, housekeeping, and maintaining a clean processing environment
- KU7.** use and significance of personal protective equipment (PPE) for safety during all processing stages
- KU8.** safety guidelines, hazard identification, and emergency procedures in RSS rubber processing
- KU9.** environmental and waste management practices, including effluent disposal, recycling, and safe handling of by-products
- KU10.** documentation and record-keeping requirements for raw material, process parameters, batch details, quality checks, and safety compliance
- KU11.** corrective actions and preventive measures in case of deviations from quality or safety standards
- KU12.** coordination and communication requirements with team members, supervisors, and downstream processing teams

Qualification Pack

- KU13.** regulatory requirements and industry standards applicable to RSS rubber processing
- KU14.** importance of process monitoring for efficiency, consistency, and quality assurance
- KU15.** impact of improper preparation or handling on product quality, safety, and operational efficiency

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively with supervisors, team members, and downstream processing personnel regarding raw material, process, quality, and safety issues
- GS2.** read, interpret, and follow instructions, SOPs, and process documentation accurately
- GS3.** maintain precise records of raw material preparation, batch processing, quality checks, and safety inspections
- GS4.** observe, identify, and report deviations from quality, process, or safety standards
- GS5.** apply basic numerical skills to measure quantities, moisture content, and batch parameters
- GS6.** summarize and explain preparation and quality monitoring procedures to team members
- GS7.** identify and sort raw latex, coagulum, or field rubber for processing
- GS8.** demonstrate, perform, and carry out pre-processing tasks such as cleaning, breaking, blending, and staging raw rubber
- GS9.** apply preparation procedures to ensure uniformity, consistency, and compliance with quality standards
- GS10.** recognize impurities, defects, or process deviations and report to supervisors
- GS11.** ensure adherence to hygiene, housekeeping, and workplace safety practices, including proper use of PPE
- GS12.** develop and conduct quality inspections and safety compliance checks for raw and processed rubber
- GS13.** show, display, and perform proper handling, storage, and documentation of rubber at all stages
- GS14.** perform corrective actions as needed to maintain process efficiency and quality standards
- GS15.** display teamwork, coordination, and effective communication to support smooth processing, quality, and safety compliance

RSC/N1019: Carry out coagulation and sheeting operations

Description

This NOS covers the operations involved in coagulating latex and forming ribbed rubber sheets through controlled processing. The individual prepares equipment, performs coagulation, operates sheeting rollers, and ensures quality, safety, and process efficiency.

Scope

The scope covers the following :

- Prepare and Set Up Equipment for Coagulation and Sheeting
- Perform Coagulation of Latex to Form Rubber Sheets
- Operate and Maintain Sheeting, Rolling, and Handling Processes

Elements and Performance Criteria

Prepare and Set Up Equipment for Coagulation and Sheeting

To be competent, the user/individual on the job must be able to:

- PC1.** identify and arrange the required raw materials, equipment, and coagulants as per instructions
- PC2.** inspect the coagulation tanks, rollers, and sheeting tables to ensure cleanliness and operational readiness
- PC3.** prepare and calibrate measuring instruments and mixing tools for latex and coagulant solutions
- PC4.** verify the availability and concentration of coagulants (e.g., formic acid) as per standard ratios
- PC5.** mix latex and coagulant in specified proportions under supervision to initiate uniform coagulation
- PC6.** ensure the work area is clean, dry, and free from contaminants before beginning operations
- PC7.** follow equipment pre-checks for mechanical integrity, lubrication, and safety compliance
- PC8.** arrange and label collection trays or molds for sheet formation as per batch plan
- PC9.** wear appropriate PPE and adhere to safety procedures during setup
- PC10.** record preparation parameters and confirm readiness with the supervisor before starting coagulation

Perform Coagulation of Latex to Form Rubber Sheets

To be competent, the user/individual on the job must be able to:

- PC11.** pour latex into the coagulation tanks or trays in measured quantities as per batch instructions
- PC12.** add coagulant solution gradually and mix gently to ensure uniform coagulation without air entrapment
- PC13.** observe the coagulation process and identify signs of uneven setting or poor separation
- PC14.** maintain optimal temperature and resting time for complete coagulation as per SOP

Qualification Pack

- PC15.** identify and remove any impurities or foreign materials from the coagulum surface
- PC16.** confirm completion of coagulation and test sheet consistency through visual and tactile inspection
- PC17.** drain excess serum from the tank or tray carefully to avoid disturbing the formed sheet
- PC18.** ensure uniformity in sheet thickness and texture before transferring to the sheeting operation
- PC19.** record coagulation time, coagulant used, and batch identification details
- PC20.** follow safety and environmental protocols while handling coagulants and effluent disposal

Operate and Maintain Sheeting, Rolling, and Handling Processes

To be competent, the user/individual on the job must be able to:

- PC21.** transfer coagulated rubber to the sheeting area safely and systematically
- PC22.** feed the coagulum into the roller machine to produce uniform ribbed sheets
- PC23.** adjust roller pressure, speed, and gap according to material thickness requirements
- PC24.** continuously monitor sheet formation to ensure even surface and proper ribbing pattern
- PC25.** remove water and impurities during rolling to enhance sheet quality
- PC26.** handle and stack freshly rolled sheets carefully to prevent folding or tearing
- PC27.** perform periodic cleaning of rollers and drainage systems to avoid contamination
- PC28.** follow safe operating procedures and lockout-tagout practices during maintenance
- PC29.** maintain records of processed sheet batches, dimensions, and operator details
- PC30.** support preventive maintenance activities by reporting equipment issues or irregularities

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the standard operating procedures (SOPs) for coagulation and sheeting of natural rubber to produce Ribbed Smoked Sheets (RSS)
- KU2.** the composition, quality parameters, and properties of field latex, coagulants (e.g., formic acid), and water used in processing
- KU3.** the function, setup, and maintenance requirements of coagulation tanks, rollers, and sheeting tables
- KU4.** methods to identify impurities, foreign particles, or air bubbles in latex before and after coagulation
- KU5.** the appropriate ratios and concentration of coagulant solution required for uniform coagulation
- KU6.** factors affecting coagulation efficiency such as temperature, resting time, and pH levels
- KU7.** the correct procedure to test sheet consistency, thickness, and uniformity during formation
- KU8.** techniques for adjusting roller speed, pressure, and gap to ensure consistent ribbed sheet quality
- KU9.** the importance of removing excess water and impurities during rolling to enhance sheet strength and finish
- KU10.** proper material handling methods to prevent tearing, folding, or contamination of fresh sheets

Qualification Pack

- KU11.** quality control checks for visual, tactile, and dimensional parameters of finished sheets
- KU12.** safety protocols for handling coagulants, operating rollers, and disposing of process effluents responsibly
- KU13.** preventive maintenance and cleaning schedules for coagulation and rolling equipment
- KU14.** documentation and record-keeping practices for process parameters, batch details, and quality observations
- KU15.** the significance of teamwork, communication, and coordination with supervisors to maintain continuous and efficient operations

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** identify and prepare the required tools, equipment, and coagulant solutions for coagulation and sheeting operations
- GS2.** demonstrate and carry out coagulation procedures to form uniform rubber sheets from latex
- GS3.** apply correct proportions of latex and coagulant, ensuring controlled mixing and resting for optimum results
- GS4.** operate, adjust, and monitor sheeting rollers to achieve desired sheet thickness and rib pattern
- GS5.** recognize and rectify inconsistencies such as uneven coagulation, air entrapment, or roller malfunction
- GS6.** ensure safe handling and disposal of coagulants, effluents, and waste material as per environmental norms
- GS7.** perform cleaning and maintenance of coagulation tanks, rollers, and work areas to maintain hygiene and quality
- GS8.** display proper use of PPE and adherence to workplace safety standards during all operations
- GS9.** develop good housekeeping and quality monitoring habits to sustain consistent production and compliance
- GS10.** communicate effectively with supervisors and team members regarding process setup, material quality, and operational requirements
- GS11.** read, interpret, and follow SOPs, work instructions, and process documentation accurately
- GS12.** maintain detailed records of latex batches, coagulant usage, sheet dimensions, and equipment parameters
- GS13.** identify and report deviations or abnormalities in process conditions or product quality promptly
- GS14.** apply basic arithmetic and measurement skills to prepare coagulant solutions and assess sheet thickness or yield
- GS15.** demonstrate discipline, teamwork, and time management to ensure efficient workflow and coordination across processes

RSC/N1020: Perform smoking and drying of rubber sheets

Description

This NOS covers the smoking and drying operations of ribbed rubber sheets to achieve the desired moisture content, texture, and color. The individual operates smoking chambers, monitors drying parameters, and ensures product quality, safety, and process efficiency.

Scope

The scope covers the following :

- Prepare and Operate Smoking and Drying Chambers for Rubber Sheets
- Monitor, Control, and Ensure Quality of Smoked and Dried Rubber Sheets

Elements and Performance Criteria

Prepare and Operate Smoking and Drying Chambers for Rubber Sheets

To be competent, the user/individual on the job must be able to:

- PC1.** identify and list out the equipment, fuel, and materials required for smoking and drying operations
- PC2.** explain the functioning of the smoking chamber, heating system, and ventilation controls
- PC3.** demonstrate the correct procedure to load semi-dried rubber sheets into smoking trays or racks
- PC4.** ensure that the sheets are arranged with adequate spacing for uniform air and smoke circulation
- PC5.** perform pre-start checks on burners, flues, and temperature gauges to confirm operational readiness
- PC6.** apply the specified fuel type (e.g., wood, coconut husk) to generate smoke as per process requirements
- PC7.** carry out ignition, heat control, and airflow adjustments to maintain optimum smoking temperature
- PC8.** recognize signs of improper combustion, smoke leakage, or uneven heating and report deviations
- PC9.** develop an understanding of the moisture reduction process and time cycles for different sheet grades
- PC10.** ensure safety protocols while handling fire, smoke, and hot surfaces using PPE and fire extinguishers
- PC11.** conduct periodic inspection of sheets during smoking to assess progress and prevent over-drying
- PC12.** record operational parameters such as chamber temperature, duration, and fuel usage in process logs

Monitor, Control, and Ensure Quality of Smoked and Dried Rubber Sheets

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC13.** explain the critical quality parameters for smoked sheets, including color, texture, and moisture content
- PC14.** identify defects such as blistering, uneven coloration, or smoky odor caused by improper drying
- PC15.** demonstrate correct use of measuring tools to assess temperature, humidity, and moisture levels
- PC16.** show how to adjust chamber conditions to achieve consistent and uniform drying results
- PC17.** recognize differences between under-smoked and over-smoked sheets and apply corrective measures
- PC18.** ensure that sheets are cooled and conditioned properly before unloading from the chamber
- PC19.** carry out safe unloading and stacking of smoked sheets to avoid folding or contamination
- PC20.** perform visual and tactile inspection to verify the final quality of dried rubber sheets
- PC21.** summarize findings from quality checks and record them in inspection reports
- PC22.** develop awareness of process optimization to reduce fuel consumption and drying time
- PC23.** ensure compliance with workplace safety, environmental, and fire prevention norms
- PC24.** conduct housekeeping and cleaning activities around smoking and drying areas after operations

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** define the purpose and importance of smoking and drying processes in improving the physical and chemical properties of rubber sheets
- KU2.** explain the working principles and operational features of smoking chambers and dryers used in RSS production
- KU3.** identify different types of smoking chambers (traditional, modified, and mechanical) and their fuel sources
- KU4.** list out the steps involved in preparing wet sheets before loading them into the smoking chamber
- KU5.** understand the role of temperature, humidity, and airflow control in achieving uniform drying
- KU6.** elaborate on the relationship between smoking duration and the final grade of ribbed smoked sheets
- KU7.** mention the safe handling procedures for fuels and ignition systems used in smoking operations
- KU8.** recognize common defects that arise during smoking and drying such as blistering, uneven coloration, mold formation, or brittleness
- KU9.** summarize the standard quality parameters (e.g., moisture content, color, thickness, elasticity) for classifying RSS grades
- KU10.** explain the use of moisture meters and visual grading techniques to assess sheet dryness and quality
- KU11.** state the importance of cooling, stacking, and proper storage conditions after smoking to maintain product integrity

Qualification Pack

- KU12.** discuss the environmental and safety implications of smoke emissions and methods for pollution control
- KU13.** point out the preventive maintenance requirements for smoking chamber components such as vents, burners, chimneys, and racks
- KU14.** understand the documentation procedures for recording drying cycles, fuel usage, and quality control data
- KU15.** describe the workplace safety, fire prevention, and personal protective measures relevant to smoking and drying operations

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** prepare and arrange semi-dried rubber sheets systematically for efficient loading into the smoking chamber
- GS2.** operate smoking chambers and control parameters such as temperature, humidity, and smoke density as per process requirements
- GS3.** monitor drying cycles and make necessary adjustments to maintain consistent heat distribution
- GS4.** apply safe ignition and fire-handling practices while using wood, coconut husks, or other fuel
- GS5.** ensure optimal use of fuel and energy to achieve uniform drying without wastage or overheating
- GS6.** recognize visual and textural cues that indicate under-dried or over-dried sheets and take corrective action
- GS7.** demonstrate the ability to use moisture meters and other testing tools to assess sheet dryness and quality
- GS8.** identify and segregate defective or mold-affected sheets for reprocessing or rejection
- GS9.** carry out basic maintenance and cleaning of smoking chambers, chimneys, and drying racks to prevent contamination
- GS10.** follow workplace safety protocols, including the use of PPE and fire safety equipment
- GS11.** record drying times, temperature readings, and batch-wise observations accurately in logbooks or digital records
- GS12.** communicate effectively with supervisors and co-workers to coordinate smoking operations and maintenance schedules
- GS13.** develop an understanding of quality control standards and compliance norms for RSS grades
- GS14.** ensure proper cooling, stacking, and safe storage of smoked sheets to avoid deformation or spoilage
- GS15.** perform visual inspection and documentation for process traceability and continuous improvement in drying efficiency

Qualification Pack

RSC/N5007: Follow health & safety protocol

Description

This unit is about maintaining health and safety of self and others at workplace.

Scope

The scope covers the following :

- Maintain a clean and efficient workplace
- Render appropriate emergency procedures
- Maintain standard safety procedures at the workplace
- Participate in safety awareness campaigns
- Understand potential sources of accidents
- Use safety gears to avoid accidents

Elements and Performance Criteria

Maintain a clean and efficient workplace

To be competent, the user/individual on the job must be able to:

- PC1.** undertake basic safety checks before operation of all machinery and equipment and report hazards to the appropriate supervisor
- PC2.** work for which protective clothing or equipment is required is identified and the appropriate protective clothing or equipment is used in performing these duties in accordance with workplace policy
- PC3.** read and understand the hazards of use and contamination mentioned on the labels of chemicals, utilities etc
- PC4.** prior to performing manual handling jobs, risk is assessed and work is carried out according to currently recommended safe practices.
- PC5.** use equipment and materials safely and correctly and return the same to designated storage when not in use
- PC6.** dispose off waste safely and correctly in a designated area
- PC7.** risks to bystanders are recognized and action taken to reduce risk associated with jobs in the workplace
- PC8.** perform work in a manner which minimizes environmental damage
- PC9.** all procedures and work instructions for controlling risk are followed closely
- PC10.** report any accidents, incidents or problems without delay to an appropriate person and take immediate necessary action to reduce further danger

Render appropriate emergency procedures

To be competent, the user/individual on the job must be able to:

- PC11.** follow procedures for dealing with accidents, fires and emergencies, including communicating location and directions to emergency.
- PC12.** follow emergency procedures as per company standards and workplace requirements

Qualification Pack

- PC13.** use emergency equipment in accordance with manufacturers' specifications and workplace requirements
- PC14.** provide treatment appropriate to the patient's injuries in accordance with recognized first aid techniques.
- PC15.** recover (if practical), clean, inspect/test, refurbish, replace and store the first aid equipment as appropriate
- PC16.** dispose off medical waste in accordance with workplace requirements
- PC17.** report details of first aid administered in accordance with work place procedures

Maintain standard safety procedures at the workplace

To be competent, the user/individual on the job must be able to:

- PC18.** comply with general safety procedures
- PC19.** follow standard safety procedures while handling equipment, hazardous material or tool
- PC20.** check parts of the workplace and take preventive actions like spraying and other steps to protect from leakages, water logging, pests, fire, pollution, etc.
- PC21.** ensure no accidents and damages at the workplace, reporting of any breach of company safety procedure
- PC22.** keep the workplace organized, swept, clean and hazard free

Participate in safety awareness campaigns

To be competent, the user/individual on the job must be able to:

- PC23.** attend fire drills and other safety related workshops organized at the workplace
- PC24.** be aware of first aid, evacuation and emergency procedures
- PC25.** be alert of any events and do not be negligent to any safety procedures to be followed

Understand potential sources of accidents

To be competent, the user/individual on the job must be able to:

- PC26.** avoid accidents while using hazardous chemicals, machines, sharp tools and equipment

Use safety gears to avoid accidents

To be competent, the user/individual on the job must be able to:

- PC27.** use safety materials such as protective gear, goggles, caps, shoes, etc.(as applicable with workplace)
- PC28.** handle heavy and hazardous materials with care and using appropriate tools and handling equipment such as trolleys, ladders

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** policies on incentives, delivery standards, and personnel management.
- KU2.** occupational safety and health policy followed
- KU3.** emergency evacuation procedure
- KU4.** medical policy
- KU5.** company laws and acts
- KU6.** the risks to health and safety and the measures to be taken to control those risks in the area of work

Qualification Pack

- KU7.** workplace procedures and requirements for the handling of workplace injuries/illnesses.
- KU8.** basic emergency first aid procedure
- KU9.** local emergency services
- KU10.** reporting on accidents, incidents and problems to appropriate authorities.
- KU11.** how to use machines as per standard operating procedure
- KU12.** how to maintain work area safe and secure
- KU13.** use of hazardous materials, tools and equipments
- KU14.** emergency evacuation and first aid procedures to be followed
- KU15.** personal hygiene and fitness requirements
- KU16.** general duties under the relevant health and safety legislation
- KU17.** what personal protective equipment and clothing should be worn and how it is cared for
- KU18.** the correct and safe way to use materials and equipment required for work
- KU19.** the importance of good housekeeping in the workplace
- KU20.** safe disposal methods for waste
- KU21.** methods for minimizing environmental damage during work

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** record data which are required for record keeping purpose
- GS2.** report problems to the appropriate person in a timely manner
- GS3.** write descriptions and details about incidents in reports
- GS4.** read instruction manuals for hand tools and equipment
- GS5.** read instructions on work orders and procedures
- GS6.** receive instructions and seek advice from superiors
- GS7.** communicate clearly and effectively with others
- GS8.** take a decision for any change/issue based on earlier successes(documented previous history)on similar issues
- GS9.** work out changes in case a new improved machine/equipment is added in the process or any new material/chemical is developed replacing existing one.
- GS10.** make changes in cycle time due to improved process.
- GS11.** use the standard operating procedure or trouble shooting manuals for trouble shooting and other reference documents approved by plant management
- GS12.** consult the peer group and superiors to arrive at a favourable decision.
- GS13.** use of standard available problem solving techniques for decision making
- GS14.** review and analyze the process steps to check on system non adherence andnon conformity
- GS15.** review the current sop and other standards for continuous improvement to facilitate decision making
- GS16.** take a calculated risk with minimum losses
- GS17.** schedule daily activities and drawing up priorities; allocate start times, estimation of completion times and materials, equipment and assistance required for completion.

Qualification Pack

- GS18.** match customer needs/specification by adjusting the processing conditions (interact with customer in case any clarification required)
- GS19.** ensure that performance of his action/operation/activity does not lead to any divergence from the specified quality of the final product as required by the customer.
- GS20.** complete the assigned task in timely manner so that the final product is delivered in the timeline given by the customer.
- GS21.** communicate effectively to the superior/customer for any delay in supplies to the clients.
- GS22.** work towards fulfilling the customers requirement as per their demand.
- GS23.** in case of any complaint, ensure its timely resolution if the problem is emanating at his level
- GS24.** communicate effectively to the superior/customer for any delay in resolving the problem faced by the customer.
- GS25.** maintain good/cordial relation with customers.
- GS26.** work on the feedback received from customer regarding the product.
- GS27.** use first aid treatment in case of any injury/accident.
- GS28.** monitor and maintain the condition of tools and equipment
- GS29.** assess situation & identify appropriate control measures
- GS30.** act, communicate and report in emergency situation

Qualification Pack

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
