RSC/Q6701: Latex Harvest Junior Technician (Tapper)

Brief Job Description

A Latex Harvest Junior Technician (Tapper) prepares for tapping operations, performs scientific tapping of rubber trees, collects latex efficiently, and ensures post-tapping hygiene to maintain tree health and yield. The role is labour-intensive, requiring knowledge of rubber tree physiology, safe tool handling, sustainable harvesting techniques, and hygiene practices. The technician works under supervision of senior staff/field supervisor in plantations or smallholder farms.

Personal Attributes

The individual in this job must have good health to tap around 300-400 rubber trees everyday early in the morning. The individual should be punctual to perform activities on time.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [RSC/N6127: Prepare for tapping activities](#)
2. [RSC/N6701: Perform scientific tapping of rubber trees followed by latex collection](#)
3. [RSC/N5901: Maintain tree health and post tapping hygiene](#)
4. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

Qualification Pack

RSC/N6127: Prepare for tapping activities

Description

This NOS covers site and tree preparation activities before tapping operations, including tool maintenance, tapping panel identification, marking, and ensuring readiness for latex collection.

Scope

The scope covers the following :

- Prepare tapping tools and equipment
- Identify and mark tapping panel
- Prepare tree for tapping
- Ensure pre-tapping readiness

Elements and Performance Criteria

Prepare tapping tools and equipment

To be competent, the user/individual on the job must be able to:

- PC1.** check sharpness and alignment of tapping knives
- PC2.** sharpen knives to prescribed angle using stone
- PC3.** disinfect knives to avoid disease transfer
- PC4.** check availability and condition of spouts, cups, buckets, and collection pots
- PC5.** clean collection vessels before use
- PC6.** arrange tapping kit systematically for field use
- PC7.** ensure personal protective gear (gloves, boots, cap) is in place

Identify and mark tapping panel

To be competent, the user/individual on the job must be able to:

- PC8.** identify trees ready for tapping based on girth
- PC9.** select correct tapping panel based on tapping cycle
- PC10.** mark tapping line at recommended slope (30°)
- PC11.** mark depth and length according to tapping system
- PC12.** prepare alternate panel if old panel is exhausted
- PC13.** avoid marking over diseased or injured bark

Prepare tree for tapping

To be competent, the user/individual on the job must be able to:

- PC14.** clear moss, algae, or dirt from panel area
- PC15.** clean trunk around tapping zone to prevent contamination
- PC16.** fix spouts at correct angle for latex flow
- PC17.** place collection cups under spouts securely
- PC18.** apply preservative solution in cups before use

Ensure pre-tapping readiness

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC19.** inspect plantation weather condition (rain, humidity)
- PC20.** confirm safety of working area from insects or snakes
- PC21.** check water, ammonia, or preservative availability
- PC22.** report pest or disease observed on trees
- PC23.** maintain records of prepared sections ready for tapping

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** structure of latex vessels and bark physiology.
- KU2.** tools used in tapping and their maintenance
- KU3.** sharpening methods for tapping knives
- KU4.** importance of hygiene in tools and collection materials
- KU5.** tapping systems (half spiral, quarter spiral)
- KU6.** guidelines for minimum girth before tapping
- KU7.** slope and angle for tapping lines
- KU8.** safe panel marking practices
- KU9.** significance of panel rotation and rest
- KU10.** common pre-tapping pests and diseases
- KU11.** role of preservatives in latex collection
- KU12.** personal safety measures in plantation
- KU13.** weather impact on latex yield
- KU14.** procedures for reporting tree conditions
- KU15.** importance of preparing equipment beforehand.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read simple work instructions and panel marking guidelines
- GS2.** write short notes or symbols to record tree girth or panel marking
- GS3.** communicate clearly with supervisors about pre-tapping readiness
- GS4.** listen carefully to tapping system instructions
- GS5.** follow safety and hygiene rules while preparing tools and panels
- GS6.** work in a team while preparing multiple sections
- GS7.** show discipline in early morning reporting for tapping activities
- GS8.** demonstrate responsibility in handling tapping knives and sharp tools
- GS9.** practice punctuality and regularity in field operations
- GS10.** apply simple calculations to measure girth, depth, and panel length
- GS11.** identify and report pest or disease symptoms

Qualification Pack

GS12. demonstrate eco-friendly practices while preparing site and materials

Qualification Pack

RSC/N6701: Perform scientific tapping of rubber trees followed by latex collection

Description

This NOS covers scientific tapping practices, including controlled incision, depth maintenance, latex collection, and preservative use to maximize yield without harming trees.

Scope

The scope covers the following :

- Perform tapping cut
- Collect latex
- Handle tools and materials

Elements and Performance Criteria

Perform tapping cut

To be competent, the user/individual on the job must be able to:

- PC1.** hold tapping knife firmly with correct grip
- PC2.** maintain slope of 30° while cutting
- PC3.** keep depth within 1–1.5 mm avoiding cambium damage
- PC4.** maintain smooth and continuous cut
- PC5.** remove shavings uniformly without rough edges
- PC6.** follow prescribed tapping frequency (d2, d3)
- PC7.** adjust cut length depending on tapping system
- PC8.** avoid over-tapping or premature tapping
- PC9.** ensure uniform bark consumption across cycles
- PC10.** renew cut when panel becomes irregular

Collect latex

To be competent, the user/individual on the job must be able to:

- PC11.** ensure latex flows without obstruction into cups
- PC12.** collect latex into buckets after sufficient accumulation
- PC13.** sieve latex to remove impurities
- PC14.** measure latex volume from each section
- PC15.** add ammonia preservative in prescribed proportion
- PC16.** record preservative usage
- PC17.** stir latex properly for uniform preservation
- PC18.** transfer latex to larger collection vessels in shed
- PC19.** prevent spillage and wastage during transfer
- PC20.** clean cups and buckets post collection

Handle tools and materials

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC21.** clean knife periodically during tapping
- PC22.** disinfect collection cups and buckets regularly
- PC23.** use gloves while handling ammonia
- PC24.** maintain correct storage of latex in tanks
- PC25.** ensure equipment is returned after use
- PC26.** report yield abnormalities or tree bleeding
- PC27.** maintain record of latex yield and wastage
- PC28.** follow plantation protocols for section-wise latex transfer
- PC29.** assist in loading latex for transportation
- PC30.** comply with safety instructions from supervisor

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** physiology of latex flow and turgor pressure
- KU2.** principles of sustainable bark consumption
- KU3.** tapping systems and their economic importance
- KU4.** depth, slope, and angle in tapping
- KU5.** effect of tapping frequency on yield
- KU6.** tools and their correct handling
- KU7.** role of preservatives in preventing coagulation
- KU8.** safe handling of ammonia and other chemicals
- KU9.** methods of measuring and recording yield
- KU10.** significance of latex purity
- KU11.** post-harvest latex handling practices
- KU12.** occupational hazards (knife cuts, chemical burns)
- KU13.** reporting and communication formats
- KU14.** impact of seasonality on yield
- KU15.** methods for minimising spillage/wastage
- KU16.** cost implications of latex loss
- KU17.** common tapping errors and their corrections
- KU18.** plantation work discipline and timings
- KU19.** latex storage practices
- KU20.** plantation safety norms

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read basic instructions for preservative use and safety

Qualification Pack

- GS2.** write or record daily latex yield in simple formats
- GS3.** communicate yield data and problems to supervisors
- GS4.** listen and follow tapping frequency instructions (d2, d3, etc.)
- GS5.** demonstrate accuracy and care in holding and moving knives
- GS6.** apply basic numeracy to measure preservative quantities
- GS7.** show patience and consistency while making tapping cuts
- GS8.** coordinate with fellow workers for latex collection and transfer
- GS9.** maintain personal discipline while handling ammonia and chemicals
- GS10.** recognize unsafe conditions and take corrective action
- GS11.** demonstrate initiative in cleaning and storing tapping tools
- GS12.** follow environmental guidelines to avoid spillage and wastage
- GS13.** practice honesty and responsibility in reporting latex yield
- GS14.** respect plantation property and avoid misuse of resources
- GS15.** adapt to seasonal changes affecting latex flow

RSC/N5901: Maintain tree health and post tapping hygiene

Description

This NOS involves maintaining tree health after tapping through proper bark management, disease control, rest marking, and hygiene practices.

Scope

The scope covers the following :

- Post-tapping hygiene
- Maintain tree health
- Sustainable practices

Elements and Performance Criteria

Post-tapping hygiene

To be competent, the user/individual on the job must be able to:

- PC1.** clean tapping panel of residual latex
- PC2.** remove bark shavings and debris
- PC3.** disinfect spouts, cups, and buckets
- PC4.** clean moss and algae around panel area
- PC5.** apply stimulants or fungicides if instructed
- PC6.** record post-tapping hygiene activities

Maintain tree health

To be competent, the user/individual on the job must be able to:

- PC7.** observe signs of TPD (tapping panel dryness)
- PC8.** detect brown bark disease or fungal infections
- PC9.** report abnormal bark conditions
- PC10.** mark resting trees and avoid further tapping
- PC11.** assist in bark renewal when instructed
- PC12.** mulch soil around stressed trees
- PC13.** apply organic manure where required

Sustainable practices

To be competent, the user/individual on the job must be able to:

- PC14.** dispose latex waste safely
- PC15.** ensure safe disposal of used chemicals
- PC16.** conserve water during cleaning
- PC17.** follow eco-friendly practices in plantation
- PC18.** assist in maintaining biodiversity around plantation

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** causes and symptoms of tapping panel dryness
- KU2.** brown bark disease and its management
- KU3.** tree stress factors and preventive care
- KU4.** stimulants and bark safeguard methods
- KU5.** post-tapping hygiene importance
- KU6.** methods of cleaning tapping equipment
- KU7.** rest marking and bark renewal practices
- KU8.** soil enrichment practices
- KU9.** organic vs chemical manure application
- KU10.** safe disposal of chemical and latex waste
- KU11.** environmental sustainability measures
- KU12.** workplace safety during post-tapping activities
- KU13.** reporting procedure for tree health
- KU14.** plantation ecosystem and biodiversity role

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and understand basic instructions for fungicide or stimulant use
- GS2.** report tree health issues orally or in writing to supervisor
- GS3.** listen carefully to instructions about bark renewal or resting
- GS4.** follow plantation protocols for cleaning and waste disposal
- GS5.** demonstrate care and responsibility while maintaining tree panels
- GS6.** work in coordination with peers for post-tapping hygiene
- GS7.** practice safety measures during cleaning activities
- GS8.** apply environmental awareness in disposing waste materials
- GS9.** maintain discipline in regular panel cleaning and reporting
- GS10.** respect biodiversity and promote eco-friendly plantation practices
- GS11.** show alertness in identifying early signs of disease
- GS12.** demonstrate reliability in maintaining plantation hygiene tools

Qualification Pack

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Qualification Pack

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 50

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Compulsory NOS

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
