Qualification Pack

RSC/Q7103: Technician: Battery (Alkaline) Maintenance, Processing and Recycling

Brief Job Description

The individual is involved in performing the production and maintenance of alkaline batteries as per the organizational standards and procedures. He/she also responsible for performing process of recycling of alkaline batteries.

Personal Attributes

The individual must be attentive, focused, disciplined and able to plan and priorities tasks effectively. The individual must possess manual dexterity and capable of performing routine works accurately.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [RSC/N7103: Carry out processing of alkaline batteries](#)
2. [RSC/N7104: Carry out recycling of alkaline batteries](#)
3. [RSC/N7105: Carry out maintenance of alkaline batteries](#)
4. [RSC/N5614: Manage chemical hazards in the workplace](#)
5. [RSC/N5610: Coordinate and communicate effectively at the workplace](#)
6. [RSC/N5001: Carry out housekeeping](#)
7. [RSC/N5007: Follow health & safety protocol](#)
8. [RSC/N5603: Follow ethical and sustainable practices at the workplace](#)
9. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

Qualification Pack

RSC/N7103: Carry out processing of alkaline batteries

Description

This unit is about performing various tasks for manufacturing alkaline batteries by following organizational standards and procedures.

Scope

The scope covers the following :

- Prepare for manufacturing process
- Perform production of alkaline batteries
- Perform post-production activities

Elements and Performance Criteria

Prepare for production process

To be competent, the user/individual on the job must be able to:

- PC1.** obtain the information and instructions from supervisor about the production schedule
- PC2.** ensure that required quantity of raw material i.e., nickel plated steel sheet (container), manganese dioxide powder and graphite/coal dust (cathode), zinc powder (anode), potassium hydroxide solution (electrolyte), gelling agent, brass pins, paper or fibrous fabric (separator), sealing plug, negative cap, sealant etc. are available as per the production plan and job requirements
- PC3.** ensure that raw material is as per the required and approved quality
- PC4.** prepare the assembly line for the alkaline battery manufacturing process
- PC5.** check that assembly line is functioning properly before starting the manufacturing process
- PC6.** adhere to all safety norms (such as wearing protective gloves and shoes, etc.) in accordance with the international/ national and organisational standards

Perform production of alkaline batteries

To be competent, the user/individual on the job must be able to:

- PC7.** start the assembly line and perform battery manufacturing process by following SOP
- PC8.** set the mixers and their parameters as per the SOP
- PC9.** fill the manganese dioxide powder, graphite/coal dust, electrode, sealing agent etc. in mixers to prepare cathode tablets/rings/powder as per the organisational standards and procedures
- PC10.** fill zinc powder with potassium hydroxide solution and gelling agent in mixers to prepare anode gel as per the organisational standards and procedures
- PC11.** ensure that cathode and anode are free from any foreign articles, dust, other metals
- PC12.** feed the nickel-plated steel sheet through the cutters, coaters and rollers for performing cutting, trimming and carbon coating operation and preparing the steel container of the battery by following SOP
- PC13.** move the steel cans to next section of assembly line for inserting and pressing the required quantity of cathode tablets/rings/powder in the steel can by following SOP

Qualification Pack

- PC14.** move the steel containers through to next section where a paper strip is rolled into a small tube and sealed on the bottom, formed separator and then it is inserted into the middle of the cathode rings
- PC15.** add electrolyte inside the battery container after the separator as per SOP
- PC16.** move the steel container to next section, where the zinc gel (anode) is injected into the inner part of the separator
- PC17.** move the steel container for last section where a brass nail, plastic seal ring and metal bottom is inserted into the steel can and the metal container is sealed to complete the manufacturing of battery by following SOP
- PC18.** follow shutdown procedures in case of any emergency/ normal process as per the SOP
- PC19.** report any issues faced (if any) during the production process to the supervisor

Perform post-production activities

To be competent, the user/individual on the job must be able to:

- PC20.** collect the manufactured batteries into bins or plastic trays as per organisational guidelines and procedures
- PC21.** check the batteries for any defect, charge leakage, appropriate voltage and amperage ratings by following SOP
- PC22.** segregate the defective and correct batteries into different bins as per organisational guidelines and procedures
- PC23.** carry out labelling and packaging of batteries as per organisational guidelines and procedures
- PC24.** send the final packaged batteries to the store room as per SOP
- PC25.** clean the equipment properly as per SOP after completion of work
- PC26.** dispose waste material into the disposal area in accordance with the company's policies and environmental regulations
- PC27.** update and maintain the log book with details of production output, material usage, lot number, batch number etc. to facilitate the traceability

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organisational and government standards, guidelines and procedures related to alkaline battery production work
- KU2.** safety requirements to be followed during production work
- KU3.** SOP recommended by the manufacturer for using machines for alkaline battery production
- KU4.** raw materials required for production of an alkaline battery
- KU5.** different parts of an alkaline battery
- KU6.** procedure of an alkaline battery production
- KU7.** safe handling of different parts of an alkaline battery
- KU8.** various types of defects in an alkaline battery
- KU9.** quality check procedure of an alkaline battery
- KU10.** labelling and packaging requirements of an alkaline battery

Qualification Pack

KU11. documentation and records need to maintain regarding production work performed

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret work instructions, equipment manuals and process documents
- GS2.** attentively listen and comprehend the information given by the supervisor/team members
- GS3.** write work related information in English/regional language
- GS4.** recognise a workplace problem and take suitable action
- GS5.** analyse and apply the information gathered from observation, experience, reasoning or communication to act efficiently
- GS6.** plan and organise work according to the work requirements
- GS7.** complete the assigned tasks with minimum supervision
- GS8.** report to the supervisor or deal with a colleague individually, depending on the type of concern

Qualification Pack

RSC/N7104: Carry out recycling of alkaline batteries

Description

This unit is about performing various tasks for recycling of alkaline batteries.

Scope

The scope covers the following :

- Prepare for recycling process
- Perform recycling of alkaline batteries

Elements and Performance Criteria

Prepare for recycling process

To be competent, the user/individual on the job must be able to:

- PC1.** obtain the information and instructions from supervisor and manufacturer manual related to battery type, specifications and recycling procedure
- PC2.** arrange tools and equipment such as battery recycler or a hammermill required for performing alkaline battery recycling process
- PC3.** check the recycler for proper functioning or any defects before starting the recycling process
- PC4.** ensure that batteries are discharged completely before starting the recycling process
- PC5.** adhere to all safety norms (such as wearing protective gloves and shoes, etc.) in accordance with the international/ national and organisational standards

Perform recycling of alkaline batteries

To be competent, the user/individual on the job must be able to:

- PC6.** fill the batteries into recycler/ hammermill by following SOP
- PC7.** start the recycler/ hammermill and perform battery recycling process by following SOP
- PC8.** dismantle the different parts (i.e., steel, plastic and zinc/manganese) of alkaline batteries and then segregate them properly into recycler/ hammermill by following SOP
- PC9.** collect all the parts separately into different bins/boxes as per organisational guidelines and procedures
- PC10.** send the segregated bins/boxes to their designated places for next process as per organisational guidelines and procedures
- PC11.** prepare and maintain all the records and documents related to recycling work as per organisational guidelines

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organisational and government standards, guidelines and procedures related to alkaline battery recycling work
- KU2.** safety requirements to be followed during recycling work

Qualification Pack

- KU3.** importance and need of recycling of alkaline batteries
- KU4.** SOP recommended by the manufacturer for using an alkaline battery recycler
- KU5.** different parts of an alkaline battery
- KU6.** procedure of recycling an alkaline battery
- KU7.** safe handling of different parts of an alkaline battery
- KU8.** documentation and records need to maintain regarding recycling work performed

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret work instructions, equipment manuals and process documents

RSC/N7105: Carry out maintenance of alkaline batteries

Description

This unit is about performing various tasks for routine and preventive maintenance of alkaline batteries.

Scope

The scope covers the following :

- Prepare for maintenance work
- Perform maintenance activities of the battery
- Perform post-maintenance activities

Elements and Performance Criteria

Prepare for maintenance work

To be competent, the user/individual on the job must be able to:

- PC1.** determine the routine maintenance requirements of alkaline batteries by interpreting manufacturer manual, maintenance checklist, work instructions, etc.
- PC2.** track battery usage to assess the need of battery service
- PC3.** arrange tools, consumables, spare parts, etc. required for performing repair and maintenance
- PC4.** clear the work area thoroughly to ensure no unwanted materials are present before starting the work
- PC5.** ensure that battery is not connected with the equipment or any power source before starting maintenance work
- PC6.** adhere to all safety norms (such as wearing protective gloves and shoes, etc.) in accordance with the international/ national and organisational standards

Perform maintenance activities of the battery

To be competent, the user/individual on the job must be able to:

- PC7.** perform basic health check-up of battery as specified in the manufacturer manual
- PC8.** check that the battery is clean, dry, free of dirt and grime
- PC9.** inspect the battery case, terminals, screws, clamps and cables for breakage, damage or loose connections
- PC10.** ensure that battery terminals, screws, clamps and cables clean, tight and free of corrosion
- PC11.** check battery for any sign of electrolyte leakage, overheating or overcharging
- PC12.** check that battery has sufficient electrolyte covering the battery plates in case of maintainable battery
- PC13.** use distilled or demineralised water for top up the electrolyte in battery, do not over fill as the fluid levels will rise when the battery is fully charged and may overflow
- PC14.** check the battery's state of charge by checking State of Charge Indicator on top of the battery that will give an on-the-spot diagnosis of the battery condition

Qualification Pack

- PC15.** perform open-circuit voltage test by using a voltmeter to determine the stabilised voltage and specific gravity test by using a hydrometer to determine the specific gravity (SG) of the electrolyte
- PC16.** replace/pair the battery as per the requirement and battery condition
- PC17.** recharge the battery (if required) by using an appropriate charger and following the instructions given in manufacturer manual
- PC18.** clean and tighten the battery case, terminals, screws, clamps and cables and ensure that they are free from dirt, grime and corrosion by following the instructions given in manufacturer manual
- PC19.** apply a thin coating of high temperature grease to posts and cable connections for added protection
- PC20.** assess when the problem is beyond his competence and report the problem to suitably qualified/designated and competent personnel

Perform maintenance activities of the battery

To be competent, the user/individual on the job must be able to:

- PC21.** dispose off waste materials such as failed batteries/parts/aggregates, as per organisation's and environmental policies
- PC22.** record all repairs carried out, time taken and other significant findings observed during the work process
- PC23.** ensure that all maintenance activities are adequately addressed

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** safety requirements to be followed during alkaline batteries maintenance work
- KU2.** how to obtain information related to alkaline battery maintenance from manufacturer manual, maintenance checklist, etc.
- KU3.** different types of alkaline batteries
- KU4.** parts of an alkaline battery
- KU5.** working principle of an alkaline battery
- KU6.** battery specifications and elements of desired functioning of battery
- KU7.** SOP recommended by the manufacturer for using material, tools and equipment such as PPE, Baking Soda, Distilled Water, Hydrometer, Voltmeter, Post Cleaner, Grease, Wrench, Screw Driver, Adjustable Load Testers, Digital Battery Testers, Battery Charger, Constant Rate Discharge Testers etc. during the maintenance activities
- KU8.** various maintenance activities need to perform on alkaline batteries
- KU9.** procedure to be followed for checking performance of alkaline batteries
- KU10.** safe techniques to handle alkaline batteries
- KU11.** how to check and perform minor repairs in alkaline batteries
- KU12.** how to check charging requirement and recharge alkaline batteries safely
- KU13.** procedure of open-circuit voltage test and specific gravity test
- KU14.** how to refill electrolyte in the battery safely
- KU15.** corrective actions taken to address alkaline battery problems

Qualification Pack

KU16. documentation and records need to maintain regarding repair and maintenance activities performed

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret work instructions, equipment manuals and process documents
- GS2.** attentively listen and comprehend the information given by the supervisor/team members
- GS3.** write work related information in English/regional language

RSC/N5614: Manage chemical hazards in the workplace

Description

This unit is about following the correct procedures to prevent, control, minimise and deal with chemical hazards.

Scope

The scope covers the following :

- Follow safety measures while handling chemicals

Elements and Performance Criteria

Follow safety measures while handling chemicals

To be competent, the user/individual on the job must be able to:

- PC1.** identify the hazards and risks associated with chemicals with the help of safety data sheet
- PC2.** use appropriate Personal Protective Equipment (PPE) as per work requirements
- PC3.** recognise the labels on the chemical containers
- PC4.** carryout risk assessment and work according to the recommended safe practices
- PC5.** follow hierarchical control measures to mitigate risks
- PC6.** follow guidelines to handle chemicals
- PC7.** ensure workplace has well-ventilated and safe chemical storage areas with safety cabinets suited to each substance
- PC8.** isolate hazardous substances in separate storage areas
- PC9.** follow guidelines to collect, segregate and dispose chemicals waste into appropriate containers based on their toxicity or hazardous nature
- PC10.** follow organisational guidelines to protect self and others from chemical hazards
- PC11.** follow safe evacuation and emergency procedure in the event of chemical accidents/emergencies
- PC12.** identify and report any chemical hazards, risks or breaches in site safety to the appropriate authority

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organisation guidelines to handle chemicals
- KU2.** safety data sheet
- KU3.** types of chemicals hazards and levels of risks
- KU4.** risk assessment procedure and principle of risk control hierarchy
- KU5.** types of PPE like overalls and aprons, gloves, chemical resistant glasses, respiratory protection, boots etc.

Qualification Pack

- KU6.** different types of labels, like dangerous to the environment, explosive, toxic, flammable, corrosive etc.
- KU7.** importance of safe chemical storage areas
- KU8.** safe disposal of chemical wastes
- KU9.** reporting procedures in cases of breaches or hazards, accidents, and emergency situations as per guidelines
- KU10.** procedure for responding to chemical accidents and other emergencies at workplace

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and understand documentation clearly
- GS2.** adopt problem-solving approach
- GS3.** suggest solutions to improve work processes
- GS4.** write in English/regional language
- GS5.** seek clarification as and when required

Qualification Pack

RSC/N5610: Coordinate and communicate effectively at the workplace

Description

This OS unit is about communicating effectively with seniors, colleagues and others, coordinating with cross-functional teams at workplace as per standards.

Scope

The scope covers the following :

- Communicate effectively with colleagues and seniors
- Coordinate with cross-functional teams

Elements and Performance Criteria

Communicate effectively with colleagues and seniors

To be competent, the user/individual on the job must be able to:

- PC1.** interact with colleagues and senior in a polite and professional manner
- PC2.** listen actively to the issues or requirements of colleagues and respond timely and appropriately
- PC3.** exhibit trust, support and respect to all colleagues and seniors
- PC4.** pass on essential information to the colleagues timely
- PC5.** maintain clarity, honesty and transparency while communicating with the seniors and colleagues
- PC6.** coordinate with seniors on work-related and behavioral feedback
- PC7.** comply with organization's policies and procedures for team work
- PC8.** seek clarification on the information provided by seniors, if needed
- PC9.** respect the personal and professional space of colleagues and superiors
- PC10.** report status of work as per the schedule to seniors and inform about any deviations or anomalies
- PC11.** provide information in the desired format and frequency

Coordinate with cross-functional teams

To be competent, the user/individual on the job must be able to:

- PC12.** support colleagues of other departments for smooth work process, as required
- PC13.** coordinate with maintenance/engineering team for preventive and corrective maintenance, break down and calibration errors
- PC14.** provide inputs to the concerned stakeholders in periodic fence line review to detect non-compliance
- PC15.** coordinate with health and safety team for incident or authorized personnel, accident and emergency, if any

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** organizational policies on behavioural etiquette and professionalism
- KU2.** organizational policies on gender sensitive service practices at workplace
- KU3.** organizational hierarchy and reporting structure
- KU4.** importance of communicating clearly with other
- KU5.** effective ways of team coordination
- KU6.** key helpline numbers

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** note down instructions received from the seniors
- GS2.** read and interpret written instructions

RSC/N5001: Carry out housekeeping

Description

This unit is about carrying out housekeeping activities.

Scope

The scope covers the following :

- Preparing for housekeeping activities
- Carry out housekeeping activities
- Post housekeeping activities

Elements and Performance Criteria

Preparing for housekeeping activities

To be competent, the user/individual on the job must be able to:

- PC1.** inspect the area while taking into account various surfaces
- PC2.** identify the material requirements for cleaning the areas, inspected by considering risk, time, efficiency and type of stain
- PC3.** ensure that the cleaning equipment is in proper working condition
- PC4.** select the suitable alternatives for cleaning the areas in case the appropriate equipment and materials are not available and inform the concerned person
- PC5.** plan the sequence for cleaning the area to avoid re-soiling clean areas and surfaces
- PC6.** inform the affected people about the cleaning activity
- PC7.** display the appropriate signage for the work being conducted
- PC8.** ensure that there is adequate ventilation for the work being carried out
- PC9.** wear the personal protective equipment required for cleaning method and know the materials being used

Carry out housekeeping activities

To be competent, the user/individual on the job must be able to:

- PC10.** use the correct cleaning method for the work area, types of soiling and surface
- PC11.** carry out cleaning activity without disturbing others
- PC12.** manage the accidental damage, if any, caused while carrying out the work
- PC13.** report to the appropriate person about any difficulties in carrying out work
- PC14.** identify and report to the appropriate person, if any additional cleaning is required, which is outside the scope of one's responsibility or skill

Post housekeeping activities

To be competent, the user/individual on the job must be able to:

- PC15.** ensure that there is no oily substance on the floor to avoid slippage
- PC16.** ensure that no scrap material is lying around
- PC17.** maintain and store housekeeping equipment and supplies

Qualification Pack

- PC18.** follow workplace procedures to deal with any accidental damage caused during the cleaning process
- PC19.** ensure that, on completion of the work, the area is left clean and dry and meets requirements
- PC20.** return the equipment, materials and personal protective equipment that are used to the right places, making sure they are clean, safe and stored securely
- PC21.** dispose off the waste garnered from the activity in an appropriate manner
- PC22.** dispose of used and un-used solutions according to the manufacturer's instructions, and clean the equipment thoroughly
- PC23.** maintain schedules and records for housekeeping duty
- PC24.** replenish any necessary supplies or consumables

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** importance of learning proper procedures and techniques
- KU2.** implications of not following the organisational requirement for approval, for undertaking the specific tasks
- KU3.** importance of completing the activities as per the schedule
- KU4.** implications of not following the defined procedures/work instructions
- KU5.** importance of teamwork
- KU6.** health, safety and environment guidelines, legislation and regulations as applicable
- KU7.** actions to be taken in case of non-conformity to behavioural standards of the organisation
- KU8.** impact of poor practices on the individuals and organisation's performance
- KU9.** importance of optimal utilisation of resources
- KU10.** importance of providing feedback for improvement
- KU11.** importance of indigenous knowledge for evolving/adopting operation specific practices
- KU12.** rectification/solution of problems/conflicts for the smooth functioning of the organisation
- KU13.** importance of documentation/reporting as per guidelines and procedures
- KU14.** knowledge of dos and don'ts (company's HR instructions)
- KU15.** importance of attending troubleshooting processes
- KU16.** importance of subject learning/ training
- KU17.** importance of product and its application
- KU18.** the levels of hygiene required by a workplace and why it is important to maintain them during work
- KU19.** how to inspect a work area to decide what type of cleaning it needs
- KU20.** methods and materials used for cleaning a variety of surfaces
- KU21.** the types of cleansing agents those are not to be mixed
- KU22.** the correct method for cleaning equipment and/or machinery used during your work
- KU23.** the importance of personal protective equipment

Qualification Pack

- KU24.** appropriate personal protective equipment for work area, cleaning equipment, tools, materials and chemicals used
- KU25.** the correct sequence for cleaning the work area
- KU26.** importance of following the manufacturer's instructions on cleaning agents
- KU27.** the most appropriate place to carry out test cleans and why this should be done before applying treatments
- KU28.** the importance of applying treatments evenly and the effect of not doing this
- KU29.** process of cleaning the surfaces without causing injury or damage
- KU30.** the method to check the treated surface and equipment on completion of cleaning
- KU31.** procedures for reporting any unidentified soiling
- KU32.** procedures for disposing off waste
- KU33.** procedures for disposing off or storing personal protective equipment
- KU34.** escalation procedures for soils or stains that could not be removed

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** construct simple sentences and express ideas clearly through written communication
- GS2.** fill up appropriate technical forms, process charts, activity logs in the required format of the company
- GS3.** write simple letters, emails, etc.
- GS4.** perform functional mathematical operations, including the application of basic mathematical principles, such as numbers and space, and techniques such as estimation and approximation, for practical purposes
- GS5.** read and understand manuals, health and safety instructions, memos, reports, job cards, etc.
- GS6.** read images, graphs, diagrams
- GS7.** understand the various coding systems as per company norms
- GS8.** express statements, opinions or information clearly so that others can hear and understand
- GS9.** respond appropriately to any queries
- GS10.** communicate with supervisor
- GS11.** communicate with upstream and downstream teams
- GS12.** work in a team and other behavioural skills required to support the small group activities (Quality Circle, Cross Functional Team, and Suggestion Scheme)
- GS13.** practice honesty with respect to company property and time
- GS14.** communicate with people in a specific form and manner and use language that is open and respectful
- GS15.** resolve difficulties in relationship with colleagues, or get help from an appropriate person, in a way that preserves goodwill and trust
- GS16.** take responsibility for completing one's own work assignment
- GS17.** take the initiative to enhance/learn skills in ones' area of work
- GS18.** have the capacity to learn from experience in a range of settings and scenarios and the capacity to reflect on and analyse one's learning

Qualification Pack

- GS19.** be open to new ways of doing things
- GS20.** have the capacity to envisage and articulate personal goals; to develop strategies and take action to achieve them
- GS21.** avoid absenteeism
- GS22.** act objectively, rather than impulsively or emotionally when faced with difficult/stressful or emotional situations
- GS23.** work in a disciplined factory environment
- GS24.** be punctual
- GS25.** take decisions for any change/issue based on earlier successes (documented in the previous history) on similar issues
- GS26.** work out changes in case a new, improved machine/equipment, when added in the process or any new material/chemical is developed replacing the existing one
- GS27.** make changes in cycle time due to an improved process
- GS28.** use the standard operating procedure or troubleshooting manuals for troubleshooting and other reference documents approved by plant management
- GS29.** consult the peer group and superiors to arrive at a favourable decision
- GS30.** use of standards available for problem-solving techniques for decision-making
- GS31.** review and analyse the process steps to check on system non-adherence and non-conformity
- GS32.** review the current SOP and other standards for continuous improvement to facilitate decision making
- GS33.** take calculated risks with minimum losses
- GS34.** seek clarification on problems from others
- GS35.** apply problem-solving approaches in different situations
- GS36.** refer anomalies to the line manager
- GS37.** match customer needs/specification by adjusting the processing conditions (interact with customers in case any clarification is required)
- GS38.** ensure that performance of his action/operation/activity does not lead to any divergence from the specified quality of the final product as required by the customer
- GS39.** complete the assigned task on time so that the final product is delivered in the timeline given by the customer
- GS40.** communicate effectively to the superiors/customers for any delay in supplies to the clients
- GS41.** work towards fulfilling the customer's requirement as per their demand
- GS42.** ensure its timely resolution if the problem is emanating at his level in case of any complaint
- GS43.** communicate effectively to the superior/customer for any delay in resolving the problem faced by the customer
- GS44.** maintain good/cordial relation with customers
- GS45.** work on the feedback received from the customer regarding the product
- GS46.** interpret quality for sheet
- GS47.** suggest improvements (if any) in process/product/materials, based on results and experience a for proper collection of waste material
- GS48.** proper collection of waste material

Qualification Pack

- GS49.** identify defects in the material and communicate it at the earliest and suggest improvements (if any) in process/material, based on experience
- GS50.** diagnose common problems in the machine based on visual inspection, sound, temperature, etc.
- GS51.** suggest improvements (if any) in the process based on experience
- GS52.** seek clarification on problems from others
- GS53.** apply problem-solving approaches in different situations
- GS54.** refer anomalies to the line manager

RSC/N5007: Follow health & safety protocol

Description

This unit is about maintaining health and safety of self and others at workplace.

Scope

The scope covers the following :

- Maintain a clean and efficient workplace
- Render appropriate emergency procedures
- Maintain standard safety procedures at the workplace
- Participate in safety awareness campaigns
- Understand potential sources of accidents
- Use safety gears to avoid accidents

Elements and Performance Criteria

Maintain a clean and efficient workplace

To be competent, the user/individual on the job must be able to:

- PC1.** undertake basic safety checks before operation of all machinery and equipment and report hazards to the appropriate supervisor
- PC2.** work for which protective clothing or equipment is required is identified and the appropriate protective clothing or equipment is used in performing these duties in accordance with workplace policy
- PC3.** read and understand the hazards of use and contamination mentioned on the labels of chemicals, utilities etc
- PC4.** prior to performing manual handling jobs, risk is assessed and work is carried out according to currently recommended safe practices.
- PC5.** use equipment and materials safely and correctly and return the same to designated storage when not in use
- PC6.** dispose off waste safely and correctly in a designated area
- PC7.** risks to bystanders are recognized and action taken to reduce risk associated with jobs in the workplace
- PC8.** perform work in a manner which minimizes environmental damage
- PC9.** all procedures and work instructions for controlling risk are followed closely
- PC10.** report any accidents, incidents or problems without delay to an appropriate person and take immediate necessary action to reduce further danger

Render appropriate emergency procedures

To be competent, the user/individual on the job must be able to:

- PC11.** follow procedures for dealing with accidents, fires and emergencies, including communicating location and directions to emergency.
- PC12.** follow emergency procedures as per company standards and workplace requirements

Qualification Pack

- PC13.** use emergency equipment in accordance with manufacturers' specifications and workplace requirements
- PC14.** provide treatment appropriate to the patient's injuries in accordance with recognized first aid techniques.
- PC15.** recover (if practical), clean, inspect/test, refurbish, replace and store the first aid equipment as appropriate
- PC16.** dispose off medical waste in accordance with workplace requirements
- PC17.** report details of first aid administered in accordance with work place procedures

Maintain standard safety procedures at the workplace

To be competent, the user/individual on the job must be able to:

- PC18.** comply with general safety procedures
- PC19.** follow standard safety procedures while handling equipment, hazardous material or tool
- PC20.** check parts of the workplace and take preventive actions like spraying and other steps to protect from leakages, water logging, pests, fire, pollution, etc.
- PC21.** ensure no accidents and damages at the workplace, reporting of any breach of company safety procedure
- PC22.** keep the workplace organized, swept, clean and hazard free

Participate in safety awareness campaigns

To be competent, the user/individual on the job must be able to:

- PC23.** attend fire drills and other safety related workshops organized at the workplace
- PC24.** be aware of first aid, evacuation and emergency procedures
- PC25.** be alert of any events and do not be negligent to any safety procedures to be followed

Understand potential sources of accidents

To be competent, the user/individual on the job must be able to:

- PC26.** avoid accidents while using hazardous chemicals, machines, sharp tools and equipment

Use safety gears to avoid accidents

To be competent, the user/individual on the job must be able to:

- PC27.** use safety materials such as protective gear, goggles, caps, shoes, etc.(as applicable with workplace)
- PC28.** handle heavy and hazardous materials with care and using appropriate tools and handling equipment such as trolleys, ladders

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** policies on incentives, delivery standards, and personnel management.
- KU2.** occupational safety and health policy followed
- KU3.** emergency evacuation procedure
- KU4.** medical policy
- KU5.** company laws and acts
- KU6.** the risks to health and safety and the measures to be taken to control those risks in the area of work

Qualification Pack

- KU7.** workplace procedures and requirements for the handling of workplace injuries/illnesses.
- KU8.** basic emergency first aid procedure
- KU9.** local emergency services
- KU10.** reporting on accidents, incidents and problems to appropriate authorities.
- KU11.** how to use machines as per standard operating procedure
- KU12.** how to maintain work area safe and secure
- KU13.** use of hazardous materials, tools and equipments
- KU14.** emergency evacuation and first aid procedures to be followed
- KU15.** personal hygiene and fitness requirements
- KU16.** general duties under the relevant health and safety legislation
- KU17.** what personal protective equipment and clothing should be worn and how it is cared for
- KU18.** the correct and safe way to use materials and equipment required for work
- KU19.** the importance of good housekeeping in the workplace
- KU20.** safe disposal methods for waste
- KU21.** methods for minimizing environmental damage during work

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** record data which are required for record keeping purpose
- GS2.** report problems to the appropriate person in a timely manner
- GS3.** write descriptions and details about incidents in reports
- GS4.** read instruction manuals for hand tools and equipment
- GS5.** read instructions on work orders and procedures
- GS6.** receive instructions and seek advice from superiors
- GS7.** communicate clearly and effectively with others
- GS8.** take a decision for any change/issue based on earlier successes(documented previous history)on similar issues
- GS9.** work out changes in case a new improved machine/equipment is added in the process or any new material/chemical is developed replacing existing one.
- GS10.** make changes in cycle time due to improved process.
- GS11.** use the standard operating procedure or trouble shooting manuals for trouble shooting and other reference documents approved by plant management
- GS12.** consult the peer group and superiors to arrive at a favourable decision.
- GS13.** use of standard available problem solving techniques for decision making
- GS14.** review and analyze the process steps to check on system non adherence andnon conformity
- GS15.** review the current sop and other standards for continuous improvement to facilitate decision making
- GS16.** take a calculated risk with minimum losses
- GS17.** schedule daily activities and drawing up priorities; allocate start times, estimation of completion times and materials, equipment and assistance required for completion.

Qualification Pack

- GS18.** match customer needs/specification by adjusting the processing conditions (interact with customer in case any clarification required)
- GS19.** ensure that performance of his action/operation/activity does not lead to any divergence from the specified quality of the final product as required by the customer.
- GS20.** complete the assigned task in timely manner so that the final product is delivered in the timeline given by the customer.
- GS21.** communicate effectively to the superior/customer for any delay in supplies to the clients.
- GS22.** work towards fulfilling the customers requirement as per their demand.
- GS23.** in case of any complaint, ensure its timely resolution if the problem is emanating at his level
- GS24.** communicate effectively to the superior/customer for any delay in resolving the problem faced by the customer.
- GS25.** maintain good/cordial relation with customers.
- GS26.** work on the feedback received from customer regarding the product.
- GS27.** use first aid treatment in case of any injury/accident.
- GS28.** monitor and maintain the condition of tools and equipment
- GS29.** assess situation & identify appropriate control measures
- GS30.** act, communicate and report in emergency situation

RSC/N5603: Follow ethical and sustainable practices at the workplace

Description

This unit is about Greening of Jobs, PwD, and Behavioural Skills

Scope

The scope covers the following :

- Adopt resource conservation practices (Greening)
- Follow effective waste management practices
- Display behavioural Skills at workplace
- Adopt workplace practices and policies respecting gender and ability differences

Elements and Performance Criteria

Adopt resource conservation practices (Greening)

To be competent, the user/individual on the job must be able to:

- PC1.** follow organizational policies for usage of alternate energy source, such as solar energy, for the site
- PC2.** ensure proper usage of fuels (such as diesel) to minimise pollution and conserve energy
- PC3.** use resources in a responsible manner
- PC4.** ensure water conservation practices at the workplace
- PC5.** carry out processes to prevent soil erosion during plantation and other related activities

Follow effective waste management practices

To be competent, the user/individual on the job must be able to:

- PC6.** identify and segregate different types of waste such as recyclable, non-recyclable, and hazardous waste generated
- PC7.** store waste into different types of bins/containers or appropriate areas based on their categorisation
- PC8.** undertake disposal of non-recyclable waste appropriately as per the prescribed procedure
- PC9.** organise storage of recyclable and reusable material at identified location
- PC10.** ensure proper disposal of hazardous waste as per specified processes

Display behavioural Skills at workplace

To be competent, the user/individual on the job must be able to:

- PC11.** ensure timely execution of the assigned tasks.
- PC12.** exhibit proper etiquette and emotional behaviour at workplace and among team members

Adopt workplace practices and policies respecting gender and ability differences

To be competent, the user/individual on the job must be able to:

- PC13.** follow appropriate non verbal communications taking gender and disability of the person into consideration
- PC14.** communicate in a polite and appropriate manner irrespective of the ability and gender of the person

Qualification Pack

- PC15.** ensure to provide work assistance/support to PwD team members and coordinate with them if needed or requested

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** alternate energy sources (such as solar and wind energy) and their advantages
- KU2.** alternate fuels (such as bio-fuel), their production and consumption for cluster sites
- KU3.** harmful effect (such as pollution) of using fuel such as diesel on the environment and ways to prevent it
- KU4.** efficient utilisation of resources
- KU5.** water harvesting techniques and common practices of conserving water
- KU6.** what is soil erosion and how to prevent it
- KU7.** different types of waste and the ways to categorize waste into dry, wet, recyclable, non-recyclable and items of single-use plastics
- KU8.** usage of different colours of dustbins for proper waste management and waste disposal methods

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 50

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
