RSC/Q7202: Chemical Safety Supervisor

Brief Job Description

The Chemical Safety Supervisor is responsible for conducting chemical risk assessment followed by developing and implementing a safety program. The person is also responsible for conducting safety audits and maintaining the related documents as well as performing accident investigation and suggesting preventive measures.

Personal Attributes

This job requires the individual to work independently and be comfortable in handling demanding tasks. The person should be focused and attentive in performing the assigned task diligently. The individual should be result oriented and positive in attitude. The person must be able to work independently under the guidance of the engineer. The individual must be willing to work in the factory environment which involves handling and managing chemicals also.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [RSC/N7202: Conduct chemical risk assessment](#)
2. [RSC/N7203: Develop and implement safety program](#)
3. [RSC/N7204: Perform accident investigation and suggest preventive measures](#)
4. [RSC/N7205: Conduct safety audits and maintain documents including Global Standards on Chemical Safety](#)
5. [RSC/N5601: Maintain health and safety](#)
6. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

Qualification Pack

RSC/N7202: Conduct chemical risk assessment

Description

This unit is about categorizing various chemicals and conducting a risk evaluation as per the standards.

Scope

The scope covers the following :

- Identifying and categorizing chemicals
- Assessing chemical exposure and consequences
- Perform chemical risk evaluation

Elements and Performance Criteria

Identifying and categorizing chemicals

To be competent, the user/individual on the job must be able to:

- PC1.** create a wide list of all chemicals used, stored, or produced in the workplace
- PC2.** refer to Safety Data Sheets (SDS) to understand the physical, chemical, and toxicological properties of each chemical
- PC3.** review and understand local, national, and international regulations pertaining to chemical safety
- PC4.** identify and categorize potential hazards associated with each chemical, including health hazards (toxicity), physical hazards (flammability, reactivity), and environmental hazards

Assessing chemical exposure and consequences

To be competent, the user/individual on the job must be able to:

- PC5.** determine potential exposure routes, such as inhalation, ingestion, and skin contact
- PC6.** quantify potential exposure levels by considering factors like concentration, duration, and frequency of exposure
- PC7.** determine effect of mixing chemical with other chemicals or exposure to high temperatures or pressure
- PC8.** evaluate the potential health effects resulting from exposure, considering acute and chronic effects
- PC9.** evaluate potential health effects resulting from mixing chemicals or their exposure to high temperatures or pressure
- PC10.** assess the impact of chemical releases on the environment, including air, water, and soil

Perform chemical risk evaluation

To be competent, the user/individual on the job must be able to:

- PC11.** use qualitative methods (e.g., risk matrices) to assess and prioritize risks based on the likelihood and severity of potential harm which can be caused by different chemicals
- PC12.** employ quantitative methods, such as exposure modelling or calculations, to assess risks more precisely
- PC13.** prioritize identified risks based on the results of the risk assessment, focusing on high-priority hazards

Qualification Pack

- PC14.** document the entire risk assessment process, including data sources, assumptions, methodologies, and outcomes. Keep records for future reference and regulatory compliance
- PC15.** periodically review and update the risk assessment, especially when there are changes in chemicals used, processes, or regulations

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the importance of creating a comprehensive list of all chemicals used, stored, or produced in the workplace
- KU2.** how to refer to Safety Data Sheets (SDS) to extract information about the physical, chemical, and toxicological properties of each chemical
- KU3.** the relevance of reviewing and comprehending local, national, and international regulations related to chemical safety
- KU4.** identification and categorization of potential hazards associated with each chemical, including health hazards (toxicity), physical hazards (flammability, reactivity), and environmental hazards
- KU5.** potential exposure routes such as inhalation, ingestion, and skin contact
- KU6.** the factors involved in quantifying potential exposure levels, including concentration, duration, and frequency of exposure
- KU7.** the impact of mixing chemicals with other substances or exposure to high temperatures or pressure
- KU8.** potential health effects resulting from exposure, considering both acute and chronic effects
- KU9.** the importance of assessing the impact of chemical releases on the environment, encompassing air, water, and soil
- KU10.** qualitative methods, such as risk matrices, for assessing and prioritizing risks based on the likelihood and severity of potential harm caused by different chemicals
- KU11.** the application of quantitative methods, including exposure modeling or calculations, to assess risks more precisely
- KU12.** identified risks based on the results of the risk assessment, with a focus on high-priority hazards
- KU13.** the significance of documenting the entire risk assessment process, including data sources, assumptions, methodologies, and outcomes
- KU14.** the importance of keeping records for future reference and regulatory compliance
- KU15.** risk and impact of not following defined procedures/ work instructions
- KU16.** the escalation matrix for reporting identified problems
- KU17.** the importance of housekeeping and good shop floor practices
- KU18.** the health, safety, environment guidelines, legislation and regulations as applicable
- KU19.** the impact of poor practices on health, safety and environment
- KU20.** the potential hazards and actions to minimize the same
- KU21.** the escalation matrix and escalation procedure for reporting the hazards
- KU22.** the implications of not adhering the sequence of activities and operations

Qualification Pack

- KU23.** the need for periodic review and update of the risk assessment, particularly when there are changes in chemicals used, processes, or regulations
- KU24.** the factors that may trigger a review, such as changes in the workplace environment, new chemicals introduced, or updates in safety regulations
- KU25.** the indicators and reasons of potential problems
- KU26.** the appropriate solutions to the problems encountered
- KU27.** the response to emergencies e.g. power failures, fire and system failures
- KU28.** the use of different type of fire extinguishers
- KU29.** safety measures to be considered during handling chemicals

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** construct simple sentences and express ideas clearly through written communication
- GS2.** fill up appropriate technical forms, process charts, activity logs in required format of the company
- GS3.** perform functional mathematical operations, including basic mathematical principles, such as numbers and space, and techniques such as: estimation and approximation, for practical purposes
- GS4.** read and understand manuals, health and safety instructions, memos, reports, job cards, images, graphs, diagrams, etc. using language that is open and respectful
- GS5.** practice honesty with respect to company property and time
- GS6.** resolve any difficulties in relationships with colleagues, or get help from an appropriate person, in a way that preserves goodwill and trust
- GS7.** take responsibility for completing one's own work assignment
- GS8.** take initiative to enhance/ learn skills in ones area of work
- GS9.** learn from experience in a range of settings and scenarios and the capacity to reflect on and analyse ones learning
- GS10.** envisage and articulate personal goals
- GS11.** avoid absenteeism
- GS12.** act objectively, rather than impulsively or emotionally when faced with difficult/ stressful or emotional situations
- GS13.** work in disciplined factory environment and be punctual
- GS14.** take a decision for any change/ issue based on earlier successes (documented previous history) on similar issues
- GS15.** work out changes in case a new improved machine/ equipment is added in the process or any new material is given for replacing the existing one
- GS16.** consult the peer group and superiors to arrive at a favourable decision
- GS17.** use the standard operating procedure or trouble shooting manuals and other reference documents for troubleshooting
- GS18.** review and analyze the process steps to check on system non adherence and non-conformity
- GS19.** take a calculated risk with minimum losses

Qualification Pack

- GS20.** plan work as per the given schedule
- GS21.** complete the assigned task in timely manner
- GS22.** ensure timely resolution of the problems, which is possible at his level

RSC/N7203: Develop and implement safety program

Description

This unit is about developing and implementing safety program after risk evaluation is conducted.

Scope

The scope covers the following :

- Proposing risk mitigation measures
- Implementation of safety program

Elements and Performance Criteria

Proposing risk mitigation measures

To be competent, the user/individual on the job must be able to:

- PC1.** propose appropriate control measures to mitigate identified chemical risks
- PC2.** consider the hierarchy of controls and recommend measures that eliminate or minimize the risks at the source
- PC3.** provide justifications for the selected risk mitigation measures, considering their effectiveness and feasibility
- PC4.** propose control measures to eliminate or reduce identified risks. Follow the hierarchy of controls: elimination, substitution, engineering controls, administrative controls, and personal protective equipment
- PC5.** develop and implement chemical safety policies and procedures to minimize risks and ensure compliance with regulatory requirements
- PC6.** create detailed procedures for the safe handling, storage, transportation, and disposal of chemicals

Implementation of safety program

To be competent, the user/individual on the job must be able to:

- PC7.** ensure that the organization complies with all relevant safety standards and regulatory requirements
- PC8.** develop and implement training programs for employees, emphasizing chemical hazards, emergency response, and proper use of personal protective equipment (PPE)
- PC9.** conduct regular training sessions and refresher courses to ensure ongoing awareness and compliance
- PC10.** develop comprehensive emergency response plans specific to chemical incidents
- PC11.** coordinate drills and exercises to test the effectiveness of the plans
- PC12.** establish a clear communication plan for disseminating chemical safety information to all relevant stakeholders
- PC13.** ensure proper labelling of chemicals and effective communication of hazards through Safety Data Sheets (SDS)
- PC14.** implement systems for reporting and documenting chemical incidents, spills, or exposure

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the concept of risk mitigation and its significance in chemical safety
- KU2.** control measures to mitigate identified chemical risks
- KU3.** the hierarchy of controls and the importance of recommending measures that eliminate or minimize risks at the source
- KU4.** the implications of not following the correct material handling procedure
- KU5.** risk mitigation measures, considering their effectiveness and feasibility
- KU6.** the hierarchy of controls: elimination, substitution, engineering controls, administrative controls, and personal protective equipment (PPE)
- KU7.** the process of developing and implementing chemical safety policies and procedures
- KU8.** the importance of policies and procedures in minimizing risks and ensuring compliance with regulatory requirements
- KU9.** detailed procedures for the safe handling, storage, transportation, and disposal of chemicals
- KU10.** the relevance of compliance with safety standards and regulatory requirements in organizational operations
- KU11.** knowledge of developing and implementing training programs for employees, emphasizing chemical hazards, emergency response, and proper use of personal protective equipment (PPE)
- KU12.** the importance of conducting regular training sessions and refresher courses to ensure ongoing awareness and compliance
- KU13.** comprehensive emergency response plans specific to chemical incidents
- KU14.** the coordination of drills and exercises to test the effectiveness of emergency response plans
- KU15.** knowledge of establishing a clear communication plan for disseminating chemical safety information to all relevant stakeholders
- KU16.** the importance of proper labeling of chemicals and effective communication of hazards through Safety Data Sheets (SDS)
- KU17.** implementing systems for reporting and documenting chemical incidents, spills, or exposure
- KU18.** health, safety and environment guidelines, legislation and regulations as applicable
- KU19.** personal protection equipment (which protective equipment to be used and how)
- KU20.** the importance of handling equipment safely
- KU21.** the impact of poor work practices on health, safety and environment
- KU22.** escalation matrix and procedure for reporting hazards
- KU23.** the problem-solving approaches in different situations

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** construct simple sentences and express ideas clearly through written communication

Qualification Pack

- GS2.** fill up appropriate technical forms, process charts, activity logs in required format of the company

RSC/N7204: Perform accident investigation and suggest preventive measures

Description

This unit is about carrying out accident investigation and suggesting preventive measures to avoid accidents in future.

Scope

The scope covers the following :

- Incident Reporting and Investigation
- Implementing preventive measures

Elements and Performance Criteria

Incident reporting and investigation

To be competent, the user/individual on the job must be able to:

- PC1.** implement systems for reporting and documenting chemical incidents, spills, exposures or any type of chemical hazard
- PC2.** implement damage control methods and ensure that employees are safe and sound
- PC3.** perform thorough accident investigation and collect requisite data and perform analysis
- PC4.** perform root cause identification and suggest preventive measures after successful analysis
- PC5.** perform case study of accidents happened in the past
- PC6.** implement preventive measures on basis of the analysis done on past accidents
- PC7.** communicate investigation findings and preventive measures to management, employees, and relevant stakeholders

Implementing preventive measures

To be competent, the user/individual on the job must be able to:

- PC8.** conduct group exercises simulating accident scenarios
- PC9.** participants practice conducting investigations, identifying root causes, and proposing preventive measures
- PC10.** ensure preventive measures are being implemented
- PC11.** ensure safety guidelines are being implemented as per the set rules and regulations
- PC12.** update regulations, guidelines, preventive measures to be followed as required

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the importance of incident reporting systems for chemical incidents, spills, exposures, and hazards
- KU2.** effective systems for reporting and documenting chemical incidents

Qualification Pack

- KU3.** damage control methods and ensuring the safety of employees during incidents
- KU4.** the process of performing thorough accident investigations, including data collection and analysis
- KU5.** the principles of root cause analysis in the context of chemical incidents
- KU6.** root cause identification and suggesting effective preventive measures
- KU7.** how to perform a case study of past accidents and extracting valuable lessons for future prevention
- KU8.** the importance of clear and effective communication during and after accident investigations
- KU9.** how to report investigation findings and suggest preventive measures to management, employees, and relevant stakeholders
- KU10.** communication skills to convey technical information to non-technical stakeholders
- KU11.** the significance of group exercises simulating accident scenarios for proactive learning
- KU12.** how to acquire knowledge of guiding participants in practicing investigations, root cause identification, and proposing preventive measures
- KU13.** how to ensure the effective implementation of preventive measures derived from investigations
- KU14.** the role of enforcing safety guidelines as per established rules and regulations
- KU15.** the regulatory requirements related to safety guidelines and preventive measures
- KU16.** the importance of regularly updating regulations, guidelines, and preventive measures based on evolving standards and best practices
- KU17.** the process of ensuring ongoing compliance with updated regulations and guidelines
- KU18.** the importance of housekeeping and good shop floor practices (e.g. 5S)
- KU19.** health, safety and environment guidelines, legislation and regulations as applicable
- KU20.** personal protection equipment (which protective equipment to be used and how)
- KU21.** the impact of poor work practices on health, safety and environment
- KU22.** escalation matrix and procedure for reporting hazards
- KU23.** the problem-solving approaches in different situations
- KU24.** the process of referring anomalies to the line manager

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** construct simple sentences and express ideas clearly through written communication
- GS2.** fill up appropriate technical forms, process charts, activity logs in required format of the company
- GS3.** perform functional mathematical operations, including basic mathematical principles, such as numbers and space, and techniques such as: estimation and approximation, for practical purposes
- GS4.** read and understand manuals, health and safety instructions, memos, reports, job cards, images, graphs, diagrams, etc. using language that is open and respectful

RSC/N7205: Conduct safety audits and maintain documents including Global Standards on Chemical Safety

Description

This unit is about conducting safety audits and maintaining the relevant documents for easy access.

Scope

The scope covers the following :

- Conduct safety audits
- Maintaining documents

Elements and Performance Criteria

Conduct safety audits

To be competent, the user/individual on the job must be able to:

- PC1.** plan and conduct routine safety audits of chemical storage and handling areas
- PC2.** recommend and implement corrective actions to address safety deficiencies
- PC3.** interpret and apply regulatory requirements to chemical processes
- PC4.** respond to inquiries and provide guidance on chemical safety matters
- PC5.** collaborate with regulatory agencies during inspections and audits

Maintaining documents

To be competent, the user/individual on the job must be able to:

- PC6.** evaluate and document safety procedures, protocols and global standards on chemical safety
- PC7.** develop and implement a document control system for chemical safety procedures
- PC8.** maintain records of safety audits, inspections, and incident reports
- PC9.** ensure accessibility and confidentiality of safety documents
- PC10.** review and update documents in accordance with regulatory changes
- PC11.** communicate regulatory changes to relevant stakeholders
- PC12.** communicate safety procedures and guidelines to employees
- PC13.** collaborate with cross-functional teams to enhance safety awareness

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** relevant safety regulations and standards applicable to chemical storage and handling areas
- KU2.** the principles and methods of planning routine safety audits, with a specific focus on chemical processes
- KU3.** how to recommend and implement corrective actions to address safety deficiencies identified during audits

Qualification Pack

- KU4.** the role of collaboration with regulatory agencies during inspections and audits, ensuring compliance
- KU5.** how to evaluate and document safety procedures and protocols associated with chemical processes
- KU6.** how to establish and implement a document control system specific to chemical safety procedures
- KU7.** the importance of maintaining records of safety audits, inspections, and incident reports
- KU8.** how to ensure both accessibility and confidentiality of safety documents
- KU9.** the process of reviewing and updating documents in response to regulatory changes
- KU10.** effective communication skills to relay regulatory changes to relevant stakeholders
- KU11.** how to communicate safety procedures and guidelines to employees, facilitating understanding and compliance
- KU12.** the importance of collaborating with cross-functional teams to enhance safety awareness and integrate safety protocols across departments
- KU13.** the importance of housekeeping and good shop floor practices (e.g. 5S)
- KU14.** health, safety and environment guidelines, legislation and regulations as applicable
- KU15.** personal protection equipment (which protective equipment to be used and how)
- KU16.** the importance of handling equipment safely
- KU17.** the impact of poor work practices on health, safety and environment
- KU18.** escalation matrix and procedure for reporting hazards
- KU19.** the problem-solving approaches in different situations
- KU20.** the process of referring anomalies to the line manager

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** construct simple sentences and express ideas clearly through written communication
- GS2.** fill up appropriate technical forms, process charts, activity logs in required format of the company
- GS3.** perform functional mathematical operations, including basic mathematical principles, such as numbers and space, and techniques such as: estimation and approximation, for practical purposes
- GS4.** read and understand manuals, health and safety instructions, memos, reports, job cards, images, graphs, diagrams, etc. using language that is open and respectful
- GS5.** practice honesty with respect to company property and time
- GS6.** resolve any difficulties in relationships with colleagues, or get help from an appropriate person, in a way that preserves goodwill and trust
- GS7.** take responsibility for completing one's own work assignment
- GS8.** take initiative to enhance/ learn skills in ones area of work
- GS9.** learn from experience in a range of settings and scenarios and the capacity to reflect on and analyse ones learning
- GS10.** envisage and articulate personal goals

Qualification Pack

- GS11.** avoid absenteeism
- GS12.** act objectively, rather than impulsively or emotionally when faced with difficult/ stressful or emotional situations
- GS13.** work in disciplined factory environment and be punctual
- GS14.** take a decision for any change/ issue based on earlier successes (documented previous history) on similar issues
- GS15.** work out changes in case a new improved machine/ equipment is added in the process or any new material is given for replacing the existing one
- GS16.** consult the peer group and superiors to arrive at a favourable decision
- GS17.** use the standard operating procedure or trouble shooting manuals and other reference documents for troubleshooting
- GS18.** review and analyze the process steps to check on system non adherence and non-conformity
- GS19.** take a calculated risk with minimum losses
- GS20.** plan work as per the given schedule
- GS21.** complete the assigned task in timely manner
- GS22.** ensure timely resolution of the problems, which is possible at his level

RSC/N5601: Maintain health and safety

Description

This unit is about maintaining health and safety of self and others at workplace.

Scope

The scope covers the following :

- Maintain a safe and hygienic workplace
- Maintain an organized workplace as per 5S procedures
- Use safety equipment
- Follow appropriate emergency procedures

Elements and Performance Criteria

Maintain a safe and hygienic workplace

To be competent, the user/individual on the job must be able to:

- PC1.** undertake basic safety checks before operation of all machinery and equipment
- PC2.** assess risk prior to performing manual handling jobs
- PC3.** follow standard safety procedures while handling equipment and hazardous materials
- PC4.** take preventive actions to protect from leakages, water logging, pests, fire, pollution, etc.
- PC5.** identify contamination and cross-contamination risks and take steps to reduce them
- PC6.** observe hygiene and sanitation practices as per regulatory and workplace requirements
- PC7.** report hazards, breach of company safety procedures and accidents without delay to an appropriate authority
- PC8.** ensure segregation of waste as hazardous/ non-hazardous
- PC9.** dispose-off waste safely and correctly in the designated area

Maintain an organized workplace as per 5S procedures

To be competent, the user/individual on the job must be able to:

- PC10.** follow the 5S sorting process to remove unnecessary items from work area
- PC11.** place sorted items and red tag items at their proper locations as mentioned in the 5S guidelines/work instructions
- PC12.** ensure extra material and all items are returned to the designated storage areas after work
- PC13.** ensure that storage area is organized and does not overflow
- PC14.** ensure work area is cleaned before and after completion of job/shift
- PC15.** inspect work area regularly for compliance to specified standards including 5S
- PC16.** follow the proper mechanism for labelling instruments, containers, chemicals etc.
- PC17.** maintain documents and records as per given coding procedures

Use safety equipment

To be competent, the user/individual on the job must be able to:

- PC18.** use personal protective equipment (e.g. goggles, caps, shoes, etc.) as per workplace policy

Qualification Pack

PC19. handle heavy and hazardous materials with care using appropriate tools and equipment such as trolleys, ladders

Follow appropriate emergency procedures

To be competent, the user/individual on the job must be able to:

PC20. follow procedures for dealing with accidents, fires, evacuations and emergencies as per company standards and workplace requirements

PC21. use emergency equipment in accordance with manufacturers' specifications and workplace requirements.

PC22. use the appropriate fire extinguishers on different types of fires correctly

PC23. avoid accidents while using hazardous chemicals, machines, sharp tools and equipment

PC24. provide appropriate first aid treatment as per recognized techniques.

PC25. report details of first aid administered in accordance with workplace procedures

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. policies on incentives, delivery standards, and personnel management.

KU2. medical, occupational safety and health policy followed

KU3. Five's methodology

KU4. emergency first aid and evacuation procedure

KU5. the risks to health and safety and the measures to be taken to control them

KU6. workplace procedures and requirements for the handling of workplace injuries/illnesses

KU7. how to contact local emergency services

KU8. report accidents, incidents and problems to appropriate authorities

KU9. how to use machines as per standard operating procedure

KU10. how to ensure work area is safe and secure

KU11. use of hazardous materials, tools and equipments

KU12. personal hygiene and fitness requirements

KU13. general duties under the relevant health and safety legislation

KU14. what personal protective equipment and clothing should be worn and how it is cared for

KU15. the importance of good housekeeping in the workplace

KU16. safe disposal methods for waste

KU17. methods for minimizing environmental damage during work

KU18. hazards of use and contamination mentioned on the labels of chemicals, utilities etc

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. record data for record keeping purpose

GS2. report problems to the appropriate person in a timely manner

Qualification Pack

- GS3.** communicate clearly and effectively with others
- GS4.** use the standard operating procedure or trouble shooting manuals for trouble shooting and other reference documents approved by plant management
- GS5.** consult the peer group and superiors to arrive at a favourable decision
- GS6.** review and analyze the process steps to check on system non adherence and non conformity
- GS7.** review the current SOP and other standards for continuous improvement
- GS8.** take a calculated risk with minimum losses

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down the proportion of marks for Theory and Skills Practical for each PC.
2. The assessment for the theory part will be based on the knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for the theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score a minimum of 70% of % aggregate marks to successfully clear the assessment.

Qualification Pack

7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
