RSC/Q7402: Machine Operator (Non-Leather Footwear Manufacturing)

Brief Job Description

A Machine Operator (Non- Leather Footwear Manufacturing) is responsible for supporting the manufacturing and assembling of non-leather footwear by assisting in machine operations, material handling, and quality control inspections. Ensure a safe and organized work environment while contributing to the efficient workflow of the manufacturing process.

Personal Attributes

This job role requires the individual to handle multiple tasks in the manufacturing and assembling operations with a strong attention to detail, ensuring precision in tasks such as machine operation, material handling, assembling and quality control inspections. Must demonstrate excellent teamwork and communication skills to collaborate effectively with colleagues in achieving production goals. The ability to adapt to a fast-paced environment while maintaining a focus on safety and efficiency is essential.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [RSC/N7107: Perform Polymer Compounding and Processing Operations](#)
2. [RSC/N7108: Carry out Non-Leather Footwear Sole Production](#)
3. [RSC/N7109: Perform assisting and assembling activities](#)
4. [RSC/N5003: Carry out quality checks](#)
5. [RSC/N5007: Follow health & safety protocol](#)
6. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

Qualification Pack

RSC/N7107: Perform Polymer Compounding and Processing Operations

Description

This unit is about selecting raw materials and getting the instruments and machineries ready for the manufacturing operation.

Scope

The scope covers the following :

- Selection of Raw Materials
- Readiness of the Instruments
- Optimizing the Material Selection

Elements and Performance Criteria

Selection of Raw Materials

To be competent, the user/individual on the job must be able to:

- PC1.** select the desired polymers depending on their desired properties
- PC2.** choose additives such as plasticizers, stabilizers, flame retardants, colorants, fillers, reinforcements
- PC3.** identify solvents used for dissolution or dispersion of additives (if applicable)

Readiness of the Instruments

To be competent, the user/individual on the job must be able to:

- PC4.** check single-screw or twin-screw extruders for blending and melting polymers with additives such as internal mixers, Banbury mixers, or two-roll mills for achieving homogeneous mixing
- PC5.** ensure availability of auxiliary equipments, such as extruders, mixers, and pelletizers, are properly connected, calibrated, and functioning correctly
- PC6.** setup pelletizers to form the compounded polymer into pellets for easier handling
- PC7.** inspect Molding Machine for processes such as Injection molding, blow molding, compression molding, or rotational molding
- PC8.** use Extrusion lines to produce tubes, films, and sheets
- PC9.** produce thin films and sheets with precise thickness using calendaring machines
- PC10.** measure the flow properties of molten properties with the help of Rheometers
- PC11.** use viscometer for viscosity measurements
- PC12.** use spectrophotometers for color analysis
- PC13.** handle Mechanical Testing Machines in order to evaluate the mechanical properties like tensile strength, impact resistance, fracture point
- PC14.** use personal Protective Equipment (PPE): such as gloves, goggles, aprons, and respirators
- PC15.** utilize ventilation systems to control fumes and dust
- PC16.** prevent accidents in case of equipment malfunction using emergency shutdown systems

Optimization of parameters

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC17.** ensure additives, fillers, and reinforcements are uniformly distributed throughout the polymer matrix to achieve consistent properties
- PC18.** control temperature, pressure, screw speed, and residence time in compounding and processing equipment to prevent degradation and achieve desired properties
- PC19.** avoid thermal or shear degradation of polymers and additives during processing, which can lead to property deterioration
- PC20.** maintain tight control over process parameters to produce consistent product quality batch-to-batch
- PC21.** minimize material waste and energy consumption while maximizing throughput to ensure cost-effective production
- PC22.** meet all regulatory and customer specifications regarding mechanical, thermal, and chemical properties of the final product
- PC23.** ensure operations comply with safety regulations and environmental standards, minimizing risks to workers and the environment

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the polymerization reactions (addition, condensation)
- KU2.** the polymer structure, molecular weight, and polymerization techniques (e.g., emulsion, suspension, solution, and bulk polymerization)
- KU3.** the familiarity with different types of polymers (thermoplastics, thermosets, elastomers) and their properties
- KU4.** the characteristics of common polymers like polyethylene, polypropylene, PVC, polystyrene, etc
- KU5.** various additives such as plasticizers, stabilizers, antioxidants, pigments, and fillers
- KU6.** the role of additives in enhancing polymer properties and processing
- KU7.** the compounding processes like melt blending, solution blending, and reactive blending
- KU8.** the knowledge of twin-screw extruders, mixers, and other compounding equipment
- KU9.** familiarity with equipment used in polymer processing, including extruders, injection molding machines, blow molding machines, and calendars
- KU10.** the working principles and parameters of processing equipment
- KU11.** the knowledge of processing parameters such as temperature, pressure, screw speed, and residence time
- KU12.** ability to optimize processing conditions to achieve desired material properties
- KU13.** quality control techniques for monitoring and ensuring product consistency
- KU14.** the knowledge of testing methods for mechanical, thermal, and rheological properties
- KU15.** the practical knowledge of testing equipment for measuring properties like tensile strength, melt flow index, impact strength, etc
- KU16.** the interpretation of test results and correlation with processing conditions
- KU17.** the ability to identify and address common processing issues such as melt fracture, uneven mixing, and poor dispersion of additives
- KU18.** how to troubleshoot equipment and processing problems effectively

Qualification Pack

- KU19.** about the awareness of safety protocols in handling and processing polymers
KU20. environmental impacts and sustainability considerations in polymer processing

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** identify and troubleshoot issues that arise during compounding and processing operations
- GS2.** plan capacity to analyze problems systematically and propose effective solutions
- GS3.** ensure clear communication with team members, supervisors, and other stakeholders
- GS4.** convey technical information effectively, both verbally and in writing
- GS5.** ensure collaboration with colleagues in a team environment to achieve common goals
- GS6.** willingly share knowledge and expertise for the benefit of the team
- GS7.** take precision in the procedures and maintaining quality standards
- GS8.** take careful observation of equipment and material behavior to detect anomalies
- GS9.** efficiently use time to complete tasks within deadlines
- GS10.** prioritize activities to maximize productivity
- GS11.** ensure flexibility to adapt to changing circumstances and requirements
- GS12.** learn and apply new techniques and technologies as needed
- GS13.** take evaluation of information and data to make informed decisions
- GS14.** take consideration of potential consequences and alternatives before taking action
- GS15.** ensure commitment to following safety protocols and procedures to prevent accidents and injuries
- GS16.** vigilate in identifying and addressing potential safety hazards
- GS17.** take dedication to producing high-quality products that meet specifications and customer expectations
- GS18.** commit to continuous improvement in processes and outcomes
- GS19.** use the adherence to ethical standards in all aspects of work, including integrity, honesty, and respect for intellectual property rights
- GS20.** take commitment to environmentally responsible practices and sustainability
- GS21.** be proficient in documenting procedures, observations, and outcomes accurately
- GS22.** maintain organized records for future reference and analysis
- GS23.** understand the customer needs and preferences
- GS24.** ensure the dedication to delivering products and services that satisfy customer requirements

RSC/N7108: Carry out Non-Leather Footwear Sole Production

Description

Execute the production of non-leather footwear materials and soles with precision and adherence to quality standards, ensuring consistent product performance and durability

Scope

The scope covers the following :

- Material Selection and Preparation
- Assembling, Stitching & Sole Production
- Quality Control and Environmental Sustainability

Elements and Performance Criteria

Material Selection and Preparation

To be competent, the user/individual on the job must be able to:

- PC1.** identify suitable non-leather materials for the desired footwear type
- PC2.** ensure materials meet required specifications for durability, flexibility, and aesthetic appeal
- PC3.** cut and prepare materials according to design specifications and production requirements
- PC4.** develop or follow patterns for cutting non-leather materials
- PC5.** ensure accurate cutting of materials to minimize waste and optimize material usage
- PC6.** verify the correctness of patterns and dimensions to meet design specifications

Assembling, Stitching & Sole Production

To be competent, the user/individual on the job must be able to:

- PC7.** assemble non-leather materials using appropriate techniques such as stitching, bonding, or heat sealing
- PC8.** ensure precise alignment of components to achieve desired aesthetics and functionality
- PC9.** perform stitching or bonding operations efficiently to maintain production flow
- PC10.** select appropriate materials for sole production, considering factors like traction, cushioning, and durability
- PC11.** prepare and mold sole materials using suitable techniques such as compression molding or injection molding
- PC12.** ensure consistent quality and uniformity in sole production to meet performance standards
- PC13.** apply adhesives accurately and uniformly to bond non-leather materials and soles
- PC14.** ensure proper curing and adhesion strength to withstand stress and wear during use
- PC15.** follow safety protocols when handling adhesives to prevent health hazards

Quality Control, Performance Testing and Environmental Sustainability

To be competent, the user/individual on the job must be able to:

- PC16.** trim excess material and clean finished footwear to achieve a polished appearance
- PC17.** inspect footwear for defects such as stitching irregularities, material flaws, or misalignment

Qualification Pack

- PC18.** implement quality control measures to detect and rectify defects before packaging and distribution
- PC19.** conduct durability and performance tests on finished footwear to assess functionality and longevity
- PC20.** test sole traction, flexibility, and abrasion resistance to ensure suitability for intended use
- PC21.** analyze test results and make necessary adjustments to improve product performance
- PC22.** optimize production processes to minimize cycle times and maximize output
- PC23.** monitor production metrics such as yield, throughput, and resource utilization to identify areas for improvement
- PC24.** implement lean manufacturing principles to streamline operations and reduce waste
- PC25.** adhere to safety regulations and guidelines to ensure a safe working environment for employees
- PC26.** provide training on safe handling of equipment and materials to prevent accidents and injuries
- PC27.** implement measures to mitigate ergonomic risks associated with repetitive tasks
- PC28.** minimize environmental impact by selecting eco-friendly materials and manufacturing processes
- PC29.** implement waste reduction strategies such as recycling and reuse of materials wherever possible
- PC30.** comply with environmental regulations and standards governing waste disposal and emissions

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** about the non-leather materials such as synthetic fabrics, rubber, EVA (ethylene-vinyl acetate), PU (polyurethane), and TPR (thermoplastic rubber)
- KU2.** material properties including durability, flexibility, abrasion resistance, and water resistance
- KU3.** footwear design principles, techniques etc.
- KU4.** interpretation of design specifications and translate them into production requirements
- KU5.** different types of footwear style, including athletic shoes, casual shoes, boots, and sandals
- KU6.** the proficiency in pattern making for non-leather materials, considering factors like material stretch and grain direction
- KU7.** the cutting techniques to minimize material waste and optimize efficiency
- KU8.** about pattern creation in upper components, lining, and insoles
- KU9.** various manufacturing processes such as stitching, bonding, molding, and assembly
- KU10.** the equipment and machinery used in footwear production, including cutting machines, sewing machines, sole molding machines, and adhesive applicators
- KU11.** the adhesive types suitable for bonding non-leather materials and soles
- KU12.** about the knowledge of adhesive application techniques and curing processes
- KU13.** the familiarity with adhesive properties such as bonding strength, flexibility, and resistance to environmental factors

Qualification Pack

- KU14.** the sole materials and manufacturing techniques such as compression molding, injection molding, and casting
- KU15.** about the sole design considerations, including tread patterns, cushioning, and support
- KU16.** the ability to select appropriate sole materials based on intended use and performance requirements
- KU17.** the quality standards and specifications for footwear production
- KU18.** the training in safe handling of equipment, machinery, and materials to prevent accidents and injuries
- KU19.** the training in safe handling of equipment, machinery, and materials to prevent accidents and injuries
- KU20.** about the willingness to stay updated on emerging trends, technologies, and materials in the footwear industry
- KU21.** about training in safe handling of equipment, machinery, and materials to prevent accidents and injuries

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** effectively communicate with team members, supervisors, and suppliers to convey information and coordinate tasks
- GS2.** clearly articulate about production requirements, design specifications, and quality standards
- GS3.** collaborate with colleagues in various departments such as design, production, quality control, and logistics
- GS4.** work effectively in a team environment, sharing knowledge and expertise to achieve common goals
- GS5.** think analytically to identify and troubleshoot issues that arise during production
- GS6.** devise practical solutions to overcome challenges and optimize processes
- GS7.** understand precision in following instructions, measurements, and specifications to ensure product consistency and quality
- GS8.** thoroughly inspect materials and finished products to detect defects or irregularities
- GS9.** efficiently allocate time and resources to meet production schedules and deadlines
- GS10.** prioritize tasks to maximize productivity and minimize downtime
- GS11.** adapt to changes in production requirements, schedules, or procedures
- GS12.** flexibly switch between different tasks or roles as needed to support production objectives
- GS13.** handle tools, equipment, and materials with precision and control
- GS14.** handle motor skills for tasks such as cutting, stitching, and assembling components
- GS15.** vigilate in adherence to safety protocols and guidelines to prevent accidents and injuries
- GS16.** compliance with safety regulations regarding equipment operation, material handling, and personal protective equipment (PPE) usage
- GS17.** commit to producing high-quality products that meet or exceed customer expectations
- GS18.** consistently adhere to quality control measures and standards throughout the production process

Qualification Pack

- GS19.** proactively approach to identifying opportunities for process improvement and efficiency gains
- GS20.** take the ownership of assigned tasks and accountability for outcomes
- GS21.** handle pressure situations or tight deadlines without compromising quality or safety
- GS22.** effectively cope with strategies for managing stress and maintaining focus during challenging circumstances
- GS23.** willingly acquire new skills, techniques, and knowledge through training, self-study, or on-the-job experience
- GS24.** stay updated on industry trends, best practices, and technological advancements in footwear production

RSC/N7109: Perform assisting and assembling activities

Description

Perform assistance and assembling activities with precision and attention to detail, contributing to the efficient production of high-quality products in a collaborative team environment

Scope

The scope covers the following :

- Components Identification, Tools Preparation and Handling
- Assembly Procedures, Quality Control and Problem Solving
- Safety Compliance, Continuous improvement and Customer Focus

Elements and Performance Criteria

Components Identification, Tools Preparation and Handling

To be competent, the user/individual on the job must be able to:

- PC1.** identify elemental components required for assembly
- PC2.** accurately identify components based on specifications or instructions
- PC3.** verify component integrity and quality before assembly
- PC4.** prepare tools and equipment for the assembly process
- PC5.** ensure all necessary tools and equipment are available and in working condition
- PC6.** set up workstations with appropriate tools and supplies for efficient assembly
- PC7.** handle components safely and efficiently
- PC8.** use proper lifting and handling techniques to prevent damage or injury
- PC9.** avoid mishandling or dropping components during the assembly process

Assembly Procedures, Quality Control and Problem Solving

To be competent, the user/individual on the job must be able to:

- PC10.** follow elemental assembly procedures and instructions
- PC11.** understand and follow assembly instructions or standard operating procedures (SOPs)
- PC12.** perform assembly tasks in the correct sequence to ensure product integrity and functionality
- PC13.** ensure quality standards are met during elemental assembly operations
- PC14.** inspect components and finished products for defects or irregularities
- PC15.** identify and address quality issues promptly to maintain product quality
- PC16.** address problems or issues that arise during elemental assembly operations
- PC17.** implement solutions or escalate issues to appropriate personnel for resolution
- PC18.** work collaboratively with team members
- PC19.** communicate effectively with team members to coordinate assembly tasks
- PC20.** work at a steady pace to meet production targets or deadlines
- PC21.** minimize downtime by addressing issues promptly and optimizing workflow

Safety Compliance, Continuous improvement and customer focus

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC22.** adhere to safety regulations and procedures
- PC23.** follow safety protocols for equipment operation, PPE usage, and hazardous material handling
- PC24.** report any safety hazards or incidents to supervisors promptly
- PC25.** maintain accurate records and documentation
- PC26.** document assembly activities, including component usage, production quantities, and any deviations from standard procedures
- PC27.** keep records organized and up to date for reference and audit purposes
- PC28.** seek opportunities for process improvement
- PC29.** identify areas for efficiency gains or quality enhancement in the assembly process
- PC30.** propose and implement improvements to streamline workflows or reduce waste
- PC31.** ensure products meet customers' requirements and expectations
- PC32.** understand customer specifications and quality standards
- PC33.** ensure finished products meet quality criteria and performance specifications

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the components, materials and specifications of the products being assembled
- KU2.** the product assembly instructions, figures, diagrams, and technical documentation
- KU3.** about the knowledge of the tools and equipment used in assembly activities, including their functions and proper usage
- KU4.** the safety procedures related to tool operation and maintenance
- KU5.** the familiarity with various assembly techniques such as fastening, soldering, welding, and gluing
- KU6.** the sequence of assembly steps and the importance of following procedures accurately
- KU7.** the knowledge of quality control principles and standards relevant to the assembly process
- KU8.** the quality checkpoints and inspection criteria to ensure product integrity
- KU9.** the ability to troubleshoot and address issues that arise during assembly, such as component misalignment or defects
- KU10.** the capacity to identify root causes of problems and implement effective solutions
- KU11.** the ability of work with precision and accuracy to ensure components are assembled correctly
- KU12.** the attention to detail in identifying and correcting errors or discrepancies during the assembly process
- KU13.** the safety protocols and regulations related to assembly activities
- KU14.** the adherence to safety guidelines to prevent accidents, injuries, or damage to equipment and materials
- KU15.** the collaboration with team members to coordinate assembly tasks and achieve production goals
- KU16.** how to store the product at a designated place

Qualification Pack

- KU17.** the ability to manage time efficiently to complete assembly tasks within deadlines
- KU18.** about the prioritization of tasks to optimize productivity and workflow
- KU19.** the willingness to learn and adapt to new assembly techniques, tools, and technologies
- KU20.** about proactive approach to identifying opportunities for process improvement and efficiency gains
- KU21.** the customer requirements and expectations regarding product quality and delivery

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** effectively communicate with team members, supervisors, and suppliers to convey information and coordinate tasks
- GS2.** have clear articulation of production requirements, design specifications, and quality standards
- GS3.** collaborate with colleagues in various departments such as design, production, quality control, and logistics
- GS4.** work effectively in a team environment, sharing knowledge and expertise to achieve common goals
- GS5.** identify and troubleshoot issues that arise during production
- GS6.** possess the ability to devise practical solutions to overcome challenges and optimize processes
- GS7.** follow instructions, measurements, and specifications to ensure product consistency and quality
- GS8.** thoroughly inspect materials and finished products to detect defects or irregularities
- GS9.** efficiently allocate time and resources to meet production schedules and deadlines
- GS10.** prioritize tasks to maximize productivity and minimize downtime
- GS11.** adapt to changes in production requirements, schedules, or procedures
- GS12.** flexibly switch between different tasks or roles as needed to support production objectives
- GS13.** proficiently handle tools, equipment, and materials with precision and control
- GS14.** find motor skills for tasks such as cutting, stitching, and assembling components
- GS15.** vigilantly adhere to safety protocols and guidelines to prevent accidents and injuries
- GS16.** apply safety regulations regarding equipment operation, material handling, and personal protective equipment (PPE) usage
- GS17.** have commitment to producing high-quality products that meet or exceed customer expectations
- GS18.** consistently adhere to quality control measures and standards throughout the production process
- GS19.** proactively approach to identifying opportunities for process improvement and efficiency gains
- GS20.** take ownership of assigned tasks and accountability for outcomes
- GS21.** handle pressure situations or tight deadlines without compromising quality or safety

Qualification Pack

- GS22.** cope with strategies for managing stress and maintaining focus during challenging circumstances
- GS23.** willingly acquire new skills, techniques, and knowledge through training, self-study, or on-the-job experience
- GS24.** stay updated on industry trends, best practices, and technological advancements in footwear production

RSC/N5003: Carry out quality checks

Description

This NOS unit is about carrying out the quality checks

Scope

The scope covers the following :

- Carry out quality checks
- Analyse the identified problems
- Report the results

Elements and Performance Criteria

Carry out quality checks

To be competent, the user/individual on the job must be able to:

- PC1.** ensure that the test samples of the product are preserved
- PC2.** plan quality check sequence as per the product
- PC3.** perform the required quality checks regularly and consistently
- PC4.** use appropriate measuring instruments, equipment, tools, accessories etc. to carry out quality checks

Analyze the identified problem

To be competent, the user/individual on the job must be able to:

- PC5.** identify non-conformities against the quality assurance standards
- PC6.** determine the potential causes of the non-conformities
- PC7.** analyse the impact on the final product due to non-conformance to company standards
- PC8.** evaluate the need for the actions to ensure that problems do not recur
- PC9.** suggest the corrective actions to address the problem
- PC10.** review effectiveness of the corrective actions

Report the results

To be competent, the user/individual on the job must be able to:

- PC11.** interpret the results of the quality checks performed in a correct manner
- PC12.** discuss the findings of the result with QC incharge/ appropriate authority within the stipulated time
- PC13.** record the results of the corrective actions taken
- PC14.** record adjustments which are not covered by the established procedures for future reference
- PC15.** follow reporting procedures where causes of the defect cannot be identified

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** the sample handling procedures
- KU2.** the process of finding the work instructions
- KU3.** the proper procedure for selecting the material/ product and performing quality checks without affecting the material
- KU4.** the implications of using inaccurate measuring and testing instruments
- KU5.** the use of suitable equipment, monitoring and measuring devices
- KU6.** the importance of quality control procedures
- KU7.** the characteristics of the product/ material
- KU8.** the relevance and importance of activities and how they contribute to the achievement of the quality objectives
- KU9.** the cost of non-conformance to the quality standards
- KU10.** the implications (impact on internal/ external customers) of defective products, materials or components
- KU11.** how to escalate issues affecting the material, equipment and surroundings
- KU12.** how to refer to identified anomalies/abnormalities
- KU13.** the need to report within the stipulated time
- KU14.** the importance of maintaining accurate up-to-date records
- KU15.** the requirement of the records
- KU16.** reporting and documentation formats

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and understand documentation clearly
- GS2.** write in English/regional language
- GS3.** adopt problem-solving approach
- GS4.** suggest methods to improve work processes
- GS5.** communicate with all stakeholders in a polite and courteous manner

RSC/N5007: Follow health & safety protocol

Description

This unit is about maintaining health and safety of self and others at workplace.

Scope

The scope covers the following :

- Maintain a clean and efficient workplace
- Render appropriate emergency procedures
- Maintain standard safety procedures at the workplace
- Participate in safety awareness campaigns
- Understand potential sources of accidents
- Use safety gears to avoid accidents

Elements and Performance Criteria

Maintain a clean and efficient workplace

To be competent, the user/individual on the job must be able to:

- PC1.** undertake basic safety checks before operation of all machinery and equipment and report hazards to the appropriate supervisor
- PC2.** work for which protective clothing or equipment is required is identified and the appropriate protective clothing or equipment is used in performing these duties in accordance with workplace policy
- PC3.** read and understand the hazards of use and contamination mentioned on the labels of chemicals, utilities etc
- PC4.** prior to performing manual handling jobs, risk is assessed and work is carried out according to currently recommended safe practices.
- PC5.** use equipment and materials safely and correctly and return the same to designated storage when not in use
- PC6.** dispose off waste safely and correctly in a designated area
- PC7.** risks to bystanders are recognized and action taken to reduce risk associated with jobs in the workplace
- PC8.** perform work in a manner which minimizes environmental damage
- PC9.** all procedures and work instructions for controlling risk are followed closely
- PC10.** report any accidents, incidents or problems without delay to an appropriate person and take immediate necessary action to reduce further danger

Render appropriate emergency procedures

To be competent, the user/individual on the job must be able to:

- PC11.** follow procedures for dealing with accidents, fires and emergencies, including communicating location and directions to emergency.
- PC12.** follow emergency procedures as per company standards and workplace requirements

Qualification Pack

- PC13.** use emergency equipment in accordance with manufacturers' specifications and workplace requirements
- PC14.** provide treatment appropriate to the patient's injuries in accordance with recognized first aid techniques.
- PC15.** recover (if practical), clean, inspect/test, refurbish, replace and store the first aid equipment as appropriate
- PC16.** dispose off medical waste in accordance with workplace requirements
- PC17.** report details of first aid administered in accordance with work place procedures

Maintain standard safety procedures at the workplace

To be competent, the user/individual on the job must be able to:

- PC18.** comply with general safety procedures
- PC19.** follow standard safety procedures while handling equipment, hazardous material or tool
- PC20.** check parts of the workplace and take preventive actions like spraying and other steps to protect from leakages, water logging, pests, fire, pollution, etc.
- PC21.** ensure no accidents and damages at the workplace, reporting of any breach of company safety procedure
- PC22.** keep the workplace organized, swept, clean and hazard free

Participate in safety awareness campaigns

To be competent, the user/individual on the job must be able to:

- PC23.** attend fire drills and other safety related workshops organized at the workplace
- PC24.** be aware of first aid, evacuation and emergency procedures
- PC25.** be alert of any events and do not be negligent to any safety procedures to be followed

Understand potential sources of accidents

To be competent, the user/individual on the job must be able to:

- PC26.** avoid accidents while using hazardous chemicals, machines, sharp tools and equipment

Use safety gears to avoid accidents

To be competent, the user/individual on the job must be able to:

- PC27.** use safety materials such as protective gear, goggles, caps, shoes, etc.(as applicable with workplace)
- PC28.** handle heavy and hazardous materials with care and using appropriate tools and handling equipment such as trolleys, ladders

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** policies on incentives, delivery standards, and personnel management.
- KU2.** occupational safety and health policy followed
- KU3.** emergency evacuation procedure
- KU4.** medical policy
- KU5.** company laws and acts
- KU6.** the risks to health and safety and the measures to be taken to control those risks in the area of work

Qualification Pack

- KU7.** workplace procedures and requirements for the handling of workplace injuries/illnesses.
- KU8.** basic emergency first aid procedure
- KU9.** local emergency services
- KU10.** reporting on accidents, incidents and problems to appropriate authorities.
- KU11.** how to use machines as per standard operating procedure
- KU12.** how to maintain work area safe and secure
- KU13.** use of hazardous materials, tools and equipments
- KU14.** emergency evacuation and first aid procedures to be followed
- KU15.** personal hygiene and fitness requirements
- KU16.** general duties under the relevant health and safety legislation
- KU17.** what personal protective equipment and clothing should be worn and how it is cared for
- KU18.** the correct and safe way to use materials and equipment required for work
- KU19.** the importance of good housekeeping in the workplace
- KU20.** safe disposal methods for waste
- KU21.** methods for minimizing environmental damage during work

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** record data which are required for record keeping purpose
- GS2.** report problems to the appropriate person in a timely manner
- GS3.** write descriptions and details about incidents in reports
- GS4.** read instruction manuals for hand tools and equipment
- GS5.** read instructions on work orders and procedures
- GS6.** receive instructions and seek advice from superiors
- GS7.** communicate clearly and effectively with others
- GS8.** take a decision for any change/issue based on earlier successes(documented previous history)on similar issues
- GS9.** work out changes in case a new improved machine/equipment is added in the process or any new material/chemical is developed replacing existing one.
- GS10.** make changes in cycle time due to improved process.
- GS11.** use the standard operating procedure or trouble shooting manuals for trouble shooting and other reference documents approved by plant management
- GS12.** consult the peer group and superiors to arrive at a favourable decision.
- GS13.** use of standard available problem solving techniques for decision making
- GS14.** review and analyze the process steps to check on system non adherence andnon conformity
- GS15.** review the current sop and other standards for continuous improvement to facilitate decision making
- GS16.** take a calculated risk with minimum losses
- GS17.** schedule daily activities and drawing up priorities; allocate start times, estimation of completion times and materials, equipment and assistance required for completion.

Qualification Pack

- GS18.** match customer needs/specification by adjusting the processing conditions (interact with customer in case any clarification required)
- GS19.** ensure that performance of his action/operation/activity does not lead to any divergence from the specified quality of the final product as required by the customer.
- GS20.** complete the assigned task in timely manner so that the final product is delivered in the timeline given by the customer.
- GS21.** communicate effectively to the superior/customer for any delay in supplies to the clients.
- GS22.** work towards fulfilling the customers requirement as per their demand.
- GS23.** in case of any complaint, ensure its timely resolution if the problem is emanating at his level
- GS24.** communicate effectively to the superior/customer for any delay in resolving the problem faced by the customer.
- GS25.** maintain good/cordial relation with customers.
- GS26.** work on the feedback received from customer regarding the product.
- GS27.** use first aid treatment in case of any injury/accident.
- GS28.** monitor and maintain the condition of tools and equipment
- GS29.** assess situation & identify appropriate control measures
- GS30.** act, communicate and report in emergency situation

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e-mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).

Qualification Pack

5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.

6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.

7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Compulsory NOS

National Occupational Standards	Theory Marks	Practical Marks	Project Marks	Viva Marks	Total Marks	Weightage
RSC/N7107.Perform Polymer Compounding and Processing Operations	30	70	0	0	100	25
RSC/N7108.Carry out Non-Leather Footwear Sole Production	30	70	0	0	100	25
RSC/N7109.Perform assisting and assembling activities	33	67	0	0	100	25
RSC/N5003.Carry out quality checks	35	65	-	-	100	5
RSC/N5007.Follow health & safety protocol	30	70	-	-	100	10
DGT/VSQ/N0102.Employability Skills (60 Hours)	20	30	-	-	50	10
Total	178	372	-	-	550	100

Acronyms

NOS	National Occupational Standard(s)
NSQF	National Skills Qualifications Framework
QP	Qualifications Pack
TVET	Technical and Vocational Education and Training

Qualification Pack

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
