RSC/Q8402: Assistant Machine Operator - CNC Milling of Plastic

Brief Job Description

The Assistant Machine Operator CNC Milling of Plastic supports CNC machining operations by assisting in machine setup, loading/unloading materials, monitoring processes, carrying out basic quality checks, and supporting routine maintenance. The role ensures efficient production of plastic components under supervision while adhering to safety and quality standards.

Personal Attributes

The role exists to provide essential shop-floor support in CNC milling of plastic components by assisting operators in setup, operation, quality checks, and maintenance. It helps industries maintain productivity, reduce downtime, and ensure consistent quality in manufacturing plastic parts.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [RSC/N8403: Understand job requirements and work instructions](#)
2. [RSC/N9907: Assist in CNC Machine setup and operation](#)
3. [RSC/N9908: Carry out quality checks and maintenance](#)
4. [RSC/N5007: Follow health & safety protocol](#)
5. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

RSC/N8403: Understand job requirements and work instructions

Description

This NOS covers the ability of the Assistant Machine Operator CNC Milling of Plastic to correctly interpret job requirements, technical drawings, and work instructions. It ensures accuracy in preparing for machining tasks in line with quality, productivity, and safety standards.

Scope

The scope covers the following :

- Interpretation of Work Documents
- Preparation for Job Execution

Elements and Performance Criteria

Interpretation of Work Documents

To be competent, the user/individual on the job must be able to:

- PC1.** read and interpret job sheets, operation manuals, and engineering drawings related to CNC milling of plastic components
- PC2.** identify dimensions, tolerances, surface finish, and special instructions mentioned in work documents
- PC3.** recognize the type and grade of plastic material specified for the machining operation
- PC4.** confirm cutting tools, tool holders, and fixtures required as per the job instructions
- PC5.** cross-check machining parameters (spindle speed, feed rate, depth of cut) mentioned in the work instruction sheet
- PC6.** verify availability of raw materials, tools, and measuring instruments before beginning machine setup
- PC7.** report any discrepancies, unclear details, or missing information in work documents to the supervisor/operator
- PC8.** follow standard operating procedures (SOPs) for documentation and record-keeping

Preparation for Job Execution

To be competent, the user/individual on the job must be able to:

- PC9.** verify availability of raw materials, plastic workpieces, and consumables required for the assigned job
- PC10.** check the availability and readiness of appropriate cutting tools, tool holders, and fixtures as per work instructions
- PC11.** ensure measuring instruments (calipers, micrometers, gauges) are calibrated and ready for use
- PC12.** collect and wear the required personal protective equipment (PPE) before entering the CNC work area
- PC13.** confirm the CNC machine is clean, free from obstructions, and in working condition prior to setup

Qualification Pack

- PC14.** arrange tools, materials, and documents systematically to support smooth execution of the machining operation
- PC15.** communicate with the supervisor/operator to clarify doubts and confirm job readiness
- PC16.** record job preparation details in the prescribed format or logbook as per organizational procedures

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** basics of CNC milling and its application in machining plastic components
- KU2.** types of job documents job sheets, SOPs, operation manuals, and engineering drawings
- KU3.** common symbols, dimensions, and tolerances used in technical drawings
- KU4.** surface finish requirements and their significance in plastic milling
- KU5.** different grades and types of plastics used in machining operations
- KU6.** cutting tool nomenclature, specifications, and usage for plastics
- KU7.** importance of spindle speed, feed rate, and depth of cut in machining plastics
- KU8.** methods for cross-checking job requirements with available resources
- KU9.** procedures for handling unclear or incomplete job instructions
- KU10.** documentation practices and logbook maintenance
- KU11.** organizational quality standards and customer requirements
- KU12.** escalation procedures for reporting discrepancies in work documents
- KU13.** types and properties of plastics used in CNC milling
- KU14.** raw material identification methods (grade, size, quality)
- KU15.** importance of calibration of measuring instruments
- KU16.** safe handling and preparation of raw material for machining
- KU17.** PPE types and significance for CNC operations
- KU18.** steps in pre-operational checks for CNC machines
- KU19.** preventive maintenance practices to ensure machine readiness
- KU20.** importance of systematic arrangement of tools and materials
- KU21.** methods of recording preparation activities in logbooks
- KU22.** communication protocols with supervisors and team members
- KU23.** workplace housekeeping and 5S practices

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** identify required tools, fixtures, and raw materials from job documents
- GS2.** select appropriate cutting parameters based on instructions
- GS3.** differentiate between plastic grades specified in work documents
- GS4.** cross-check machining tolerances and dimensions with the job sheet

Qualification Pack

- GS5.** recognize errors in documents and take corrective actions
- GS6.** prepare a checklist for setup requirements based on instructions
- GS7.** ensure proper documentation of interpreted data for record-keeping
- GS8.** apply organizational SOPs while handling technical documents
- GS9.** interpret surface finish requirements and relate them to tool choice
- GS10.** assist senior operators in preparing jobs by interpreting work documents
- GS11.** compare customer/job requirements with production feasibility
- GS12.** apply safe practices while handling documents and drawing sheets
- GS13.** select correct raw material based on job requirements
- GS14.** arrange cutting tools, tool holders, and fixtures systematically
- GS15.** check calibration status of measuring instruments
- GS16.** conduct pre-operational checks of CNC machine
- GS17.** clean work area and machine before setup
- GS18.** wear PPE appropriately before handling tools/materials
- GS19.** handle and store raw materials safely
- GS20.** assist in fixing workpiece and tools as per instructions
- GS21.** record preparation details accurately in logbooks
- GS22.** follow SOPs and safety standards in preparation activities
- GS23.** perform minor maintenance tasks during job preparation
- GS24.** support senior operators in setup readiness

RSC/N9907: Assist in CNC Machine setup and operation

Description

This NOS covers the skills and knowledge required to assist in the setup and operation of CNC milling machines for plastic components. It includes preparing tools, raw materials, and fixtures supporting machine operation under supervision, monitoring machining cycles, and ensuring adherence to quality and safety standards. Covers the skills and knowledge required to assist in the setup and operation of CNC milling machines for plastic components. It includes preparing tools, raw materials, and fixtures supporting machine operation under supervision, monitoring machining cycles, and ensuring adherence to quality and safety standards.

Scope

The scope covers the following :

- Preparation and Setup Support
- Machine Operation Assistance
- Monitoring and Adjustments

Elements and Performance Criteria

Preparation and Setup Support

To be competent, the user/individual on the job must be able to:

- PC1.** identify and confirm the raw materials required for the CNC milling job as per job sheet/work instructions
- PC2.** arrange and organize required cutting tools, inserts, tool holders, and fixtures as instructed by the supervisor/operator
- PC3.** collect and verify jigs, clamps, and gauges specified for the job
- PC4.** read and interpret reference work documents, drawings, and setup sheets to understand setup requirements
- PC5.** ensure safe handling and proper placement of raw materials and tools at the designated machine location
- PC6.** assist in cleaning and preparing the machine bed, fixtures, and work holding devices before setup
- PC7.** check availability of required consumables (e.g., coolant, lubricants, cleaning clothes) as per instructions
- PC8.** arrange the setup items in a systematic and accessible manner to avoid delays in machine setup
- PC9.** follow organizational protocols and safety procedures while handling raw materials and tools
- PC10.** report any missing, damaged, or unsuitable tools/fixtures/materials to the concerned authority for corrective action

Machine Operation Assistance

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC11.** confirm the CNC milling program and machining parameters with the operator/supervisor before starting operations
- PC12.** assist in safely loading raw materials/workpieces onto the machine using proper handling techniques
- PC13.** secure workpieces in the chuck/fixture/clamp as per instructions to ensure stability during machining
- PC14.** assist in aligning the workpiece with reference points or datums as guided by the operator
- PC15.** support in running trial cycles under supervision to check program correctness and machine readiness
- PC16.** monitor machine operation during machining cycles for unusual sounds, vibrations, or tool issues
- PC17.** monitor machine operation during machining cycles for unusual sounds, vibrations, or tool issues
- PC18.** handle finished workpieces and transfer them to designated inspection/collection areas
- PC19.** follow standard operating procedures (SOPs) while assisting in machining operations
- PC20.** report any abnormalities or deviations observed during machining (e.g., tool, wear, dimensional variation, coolant leakage) to the operator/supervisor immediately

Monitoring and Adjustments

To be competent, the user/individual on the job must be able to:

- PC21.** handle finished workpieces and transfer them to designated inspection/collection areas
- PC22.** monitor machining parameters such as spindle speed, feed rate, and coolant flow as per the job instructions
- PC23.** identify minor deviations in tool alignment, workpiece positioning, or clamping during the machining process
- PC24.** assist the operator in making minor adjustments to fixtures, tools, or machine settings under supervision
- PC25.** check for signs of tool wear, damage, or incorrect cutting action and report promptly
- PC26.** ensure that finished parts meet dimensional and quality requirements by visual inspection or basic measurement
- PC27.** follow SOPs and safety protocols while monitoring the machine and adjusting
- PC28.** document any observations, adjustments, or issues in the job log as per organizational procedures
- PC29.** communicate effectively with the operator/supervisor regarding any critical observations that may affect production quality
- PC30.** report immediately any machine faults, breakdowns, or safety hazards to the supervisor

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organizational procedures for machine setup and tool arrangement
- KU2.** types of raw materials (plastics, composites, etc.) used in CNC milling
- KU3.** different types of cutting tools, inserts, and tool holders used in CNC milling of plastics
- KU4.** purpose and usage of fixtures, jigs, and clamps for securing workpieces

Qualification Pack

- KU5.** reading and interpreting work instructions, job sheets, and engineering drawings
- KU6.** importance of arranging tools and materials systematically to reduce setup time
- KU7.** safe handling practices for raw materials, sharp tools, and heavy fixtures
- KU8.** common consumables (coolants, lubricants, cleaning aids) and their role in machining
- KU9.** housekeeping and 5S practices in a CNC workshop environment
- KU10.** reporting procedures for missing, damaged, or unsuitable setup items
- KU11.** basic CNC milling machine components (spindle, chuck, clamps, tool turret, control panel)
- KU12.** functions of G-codes, M-codes, and CNC programs at a basic level
- KU13.** standard operating procedures (SOPs) for loading and unloading workpieces
- KU14.** correct methods of securing and aligning workpieces in fixtures/jigs
- KU15.** common machining operations (facing, drilling, slotting, contouring, etc.)
- KU16.** hazards associated with CNC machine operation and methods to prevent accidents
- KU17.** importance of trial runs and dry runs to verify program correctness
- KU18.** safe handling and transfer of machined components to inspection areas
- KU19.** role of operators and supervisors in monitoring CNC operations
- KU20.** escalation and reporting process in case of machining or safety issues
- KU21.** common machining parameters spindle speed, feed rate, depth of cut, and coolant flow
- KU22.** signs of tool wear, tool breakage, and incorrect cutting action
- KU23.** symptoms of misalignment, vibration, or abnormal noise during machining
- KU24.** types of basic adjustments (fixture tightening, tool re-clamping, coolant adjustment)
- KU25.** measurement tools for quality checks (vernier caliper, micrometer, gauge blocks, etc.)
- KU26.** tolerance limits and basic quality requirements for CNC-milled plastic components
- KU27.** documentation practices job log, machine records, and adjustment reports
- KU28.** importance of immediate reporting of breakdowns and unsafe conditions
- KU29.** communication protocols with machine operators and supervisors
- KU30.** emergency procedures in case of machine malfunction or workplace hazard

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** follow work instructions, job sheets, and supervisor guidance accurately
- GS2.** arrange raw materials, tools, and fixtures systematically for efficient setup
- GS3.** handle cutting tools, inserts, and jigs safely to prevent damage or injury
- GS4.** clean and prepare the machine bed, fixtures, and workholding devices
- GS5.** identify and segregate defective, missing, or unsuitable tools/fixtures
- GS6.** check availability of consumables (coolants, lubricants, cleaning aids)
- GS7.** apply safe lifting and material handling practices while arranging items
- GS8.** maintain a clean and organized work environment using 5S practices
- GS9.** use basic checklists to confirm readiness for machine setup
- GS10.** report promptly to the operator/supervisor in case of discrepancies

Qualification Pack

- GS11.** support in loading and unloading workpieces using correct handling methods
- GS12.** secure workpieces in clamps, jigs, or fixtures as per job requirements
- GS13.** assist in aligning workpieces with reference marks or datums
- GS14.** perform trial runs or dry runs under supervision to check job readiness
- GS15.** monitor CNC program execution under guidance of the operator
- GS16.** follow SOPs during machining to maintain safety and consistency
- GS17.** transfer finished components safely to inspection or storage area
- GS18.** identify abnormal conditions (noise, vibration, improper feed) during machining
- GS19.** adhere to organizational safety protocols while operating CNC machine
- GS20.** communicate clearly with team members regarding job progress or issues
- GS21.** observe machining parameters like spindle speed, feed, depth of cut, and coolant
- GS22.** identify signs of tool wear, breakage, or improper cutting action
- GS23.** recognize abnormal vibrations, sounds, or misalignment during operation
- GS24.** assist in making minor adjustments to fixtures, clamps, or coolant flow under supervision
- GS25.** use basic measuring instruments (vernier caliper, micrometer, gauges) for quick checks
- GS26.** compare finished parts against specified tolerance limit
- GS27.** record observations, adjustments, and issues in machine/job logs
- GS28.** escalate major deviations, machine faults, or unsafe conditions immediately
- GS29.** follow standard reporting formats for defects or breakdowns
- GS30.** work collaboratively with operators and supervisors to maintain production quality

Qualification Pack

RSC/N9908: Carry out quality checks and maintenance

Description

This NOS covers the skills and knowledge required to perform quality checks on CNC-milled plastic components and assist in routine machine maintenance. It includes inspecting parts for accuracy and defects, recording results, cleaning and lubricating machines, and supporting preventive maintenance activities to ensure consistent quality and safe operations.

Scope

The scope covers the following :

- Perform Quality Checks
- Assist in Maintenance Activities

Elements and Performance Criteria

Perform Quality Checks

To be competent, the user/individual on the job must be able to:

- PC1.** verify dimensions of machined plastic components using vernier calipers, micrometers, gauges, and other measuring instruments
- PC2.** inspect surface finish and tolerances against the specifications in the job sheet or drawing
- PC3.** identify defects such as burrs, cracks, warping, or dimensional deviations in finished parts
- PC4.** ensure compliance with organizational quality standards and customer requirements
- PC5.** record inspection results accurately in the quality log or job sheet
- PC6.** report non-conforming components or deviations to the supervisor/operator promptly
- PC7.** assist in segregating acceptable and rejected components to prevent mix-up
- PC8.** apply basic troubleshooting techniques to identify potential causes of defects
- PC9.** follow safety and SOP protocols while performing quality inspection
- PC10.** participate in continuous improvement activities by suggesting minor enhancements in process or inspection

Assist in Maintenance Activities

To be competent, the user/individual on the job must be able to:

- PC11.** carry out routine cleaning of CNC machine surfaces, fixtures, and work area
- PC12.** apply lubricants and coolants as per machine maintenance schedule
- PC13.** inspect tools, inserts, and fixtures for wear, damage, or improper functioning
- PC14.** assist in minor adjustments or replacements under supervision to maintain machine efficiency
- PC15.** ensure that all maintenance activities comply with organizational SOPs and safety standards
- PC16.** maintain maintenance logs and record all preventive and corrective actions taken
- PC17.** identify and report any major faults, breakdowns, or safety hazards to the supervisor
- PC18.** follow proper storage procedures for tools, lubricants, and consumables

Qualification Pack

PC19. participate in periodic checks to ensure continued machine reliability and performance

PC20. support senior operators in implementing preventive maintenance schedules

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** basics of quality standards for CNC-milled plastic components
- KU2.** use and care of common measuring instruments (vernier caliper, micrometer, height gauge, plug gauges, etc.)
- KU3.** dimensional tolerances and surface finish requirements as per job sheets/drawings
- KU4.** common machining defects in plastics (burrs, cracks, tool marks, warping, uneven finish)
- KU5.** standard inspection procedures and checklists used in CNC workshops
- KU6.** recording and documentation requirements for inspection data
- KU7.** organizational protocols for segregation of accepted/rejected parts
- KU8.** safety procedures to be followed during inspection activities
- KU9.** basics of root cause identification for quality defects
- KU10.** importance of maintaining traceability and quality logs
- KU11.** importance of preventive and routine maintenance in CNC operations
- KU12.** cleaning methods for CNC machines, fixtures, and work areas
- KU13.** types of lubricants and coolants and their role in machine performance
- KU14.** common signs of tool wear, insert damage, or fixture malfunction
- KU15.** procedures for minor maintenance tasks (tightening, alignment, coolant refilling)
- KU16.** organizational SOPs for machine maintenance
- KU17.** documentation and reporting methods for maintenance logs
- KU18.** safety precautions while handling lubricants, coolants, and cleaning agents
- KU19.** escalation process for reporting major faults or hazards
- KU20.** storage norms for tools, consumables, and maintenance material

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** handle and use measuring instruments with accuracy
- GS2.** measure critical dimensions of machined parts against job requirements
- GS3.** perform visual checks for defects such as cracks, burrs, and poor finish
- GS4.** compare finished parts against tolerance limits and specifications
- GS5.** record inspection results neatly and accurately in prescribed formats
- GS6.** identify non-conforming parts and segregate them from acceptable ones
- GS7.** report quality deviations promptly to the supervisor/operator
- GS8.** follow organizational quality inspection checklists
- GS9.** handle finished plastic components safely to prevent damage

Qualification Pack

- GS10.** communicate clearly with team members about inspection findings
- GS11.** clean CNC machine surfaces, fixtures, and work area regularly
- GS12.** apply lubricants and coolants as per schedule and instructions
- GS13.** inspect and report tool wear, insert damage, and fixture issues
- GS14.** assist in minor adjustments like tightening clamps or coolant adjustments
- GS15.** replace consumables (e.g., cleaning cloths, filters) under supervision
- GS16.** maintain logs of maintenance tasks and activities performed
- GS17.** store tools and consumables properly after maintenance work
- GS18.** follow proper disposal methods for used lubricants and cleaning agents
- GS19.** report breakdowns or unsafe conditions immediately
- GS20.** work under guidance of senior operators to execute preventive maintenance schedules

Description

This unit is about maintaining health and safety of self and others at workplace.

Scope

The scope covers the following :

- Maintain a clean and efficient workplace
- Render appropriate emergency procedures
- Maintain standard safety procedures at the workplace
- Participate in safety awareness campaigns
- Understand potential sources of accidents
- Use safety gears to avoid accidents

Elements and Performance Criteria

Maintain a clean and efficient workplace

To be competent, the user/individual on the job must be able to:

- PC1.** undertake basic safety checks before operation of all machinery and equipment and report hazards to the appropriate supervisor
- PC2.** work for which protective clothing or equipment is required is identified and the appropriate protective clothing or equipment is used in performing these duties in accordance with workplace policy
- PC3.** read and understand the hazards of use and contamination mentioned on the labels of chemicals, utilities etc
- PC4.** prior to performing manual handling jobs, risk is assessed and work is carried out according to currently recommended safe practices.
- PC5.** use equipment and materials safely and correctly and return the same to designated storage when not in use
- PC6.** dispose off waste safely and correctly in a designated area
- PC7.** risks to bystanders are recognized and action taken to reduce risk associated with jobs in the workplace
- PC8.** perform work in a manner which minimizes environmental damage
- PC9.** all procedures and work instructions for controlling risk are followed closely
- PC10.** report any accidents, incidents or problems without delay to an appropriate person and take immediate necessary action to reduce further danger

Render appropriate emergency procedures

To be competent, the user/individual on the job must be able to:

- PC11.** follow procedures for dealing with accidents, fires and emergencies, including communicating location and directions to emergency.
- PC12.** follow emergency procedures as per company standards and workplace requirements

Qualification Pack

- PC13.** use emergency equipment in accordance with manufacturers' specifications and workplace requirements
- PC14.** provide treatment appropriate to the patient's injuries in accordance with recognized first aid techniques.
- PC15.** recover (if practical), clean, inspect/test, refurbish, replace and store the first aid equipment as appropriate
- PC16.** dispose off medical waste in accordance with workplace requirements
- PC17.** report details of first aid administered in accordance with work place procedures

Maintain standard safety procedures at the workplace

To be competent, the user/individual on the job must be able to:

- PC18.** comply with general safety procedures
- PC19.** follow standard safety procedures while handling equipment, hazardous material or tool
- PC20.** check parts of the workplace and take preventive actions like spraying and other steps to protect from leakages, water logging, pests, fire, pollution, etc.
- PC21.** ensure no accidents and damages at the workplace, reporting of any breach of company safety procedure
- PC22.** keep the workplace organized, swept, clean and hazard free

Participate in safety awareness campaigns

To be competent, the user/individual on the job must be able to:

- PC23.** attend fire drills and other safety related workshops organized at the workplace
- PC24.** be aware of first aid, evacuation and emergency procedures
- PC25.** be alert of any events and do not be negligent to any safety procedures to be followed

Understand potential sources of accidents

To be competent, the user/individual on the job must be able to:

- PC26.** avoid accidents while using hazardous chemicals, machines, sharp tools and equipment

Use safety gears to avoid accidents

To be competent, the user/individual on the job must be able to:

- PC27.** use safety materials such as protective gear, goggles, caps, shoes, etc.(as applicable with workplace)
- PC28.** handle heavy and hazardous materials with care and using appropriate tools and handling equipment such as trolleys, ladders

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** policies on incentives, delivery standards, and personnel management.
- KU2.** occupational safety and health policy followed
- KU3.** emergency evacuation procedure
- KU4.** medical policy
- KU5.** company laws and acts
- KU6.** the risks to health and safety and the measures to be taken to control those risks in the area of work

Qualification Pack

- KU7.** workplace procedures and requirements for the handling of workplace injuries/illnesses.
- KU8.** basic emergency first aid procedure
- KU9.** local emergency services
- KU10.** reporting on accidents, incidents and problems to appropriate authorities.
- KU11.** how to use machines as per standard operating procedure
- KU12.** how to maintain work area safe and secure
- KU13.** use of hazardous materials, tools and equipments
- KU14.** emergency evacuation and first aid procedures to be followed
- KU15.** personal hygiene and fitness requirements
- KU16.** general duties under the relevant health and safety legislation
- KU17.** what personal protective equipment and clothing should be worn and how it is cared for
- KU18.** the correct and safe way to use materials and equipment required for work
- KU19.** the importance of good housekeeping in the workplace
- KU20.** safe disposal methods for waste
- KU21.** methods for minimizing environmental damage during work

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** record data which are required for record keeping purpose
- GS2.** report problems to the appropriate person in a timely manner
- GS3.** write descriptions and details about incidents in reports
- GS4.** read instruction manuals for hand tools and equipment
- GS5.** read instructions on work orders and procedures
- GS6.** receive instructions and seek advice from superiors
- GS7.** communicate clearly and effectively with others
- GS8.** take a decision for any change/issue based on earlier successes(documented previous history)on similar issues
- GS9.** work out changes in case a new improved machine/equipment is added in the process or any new material/chemical is developed replacing existing one.
- GS10.** make changes in cycle time due to improved process.
- GS11.** use the standard operating procedure or trouble shooting manuals for trouble shooting and other reference documents approved by plant management
- GS12.** consult the peer group and superiors to arrive at a favourable decision.
- GS13.** use of standard available problem solving techniques for decision making
- GS14.** review and analyze the process steps to check on system non adherence andnon conformity
- GS15.** review the current sop and other standards for continuous improvement to facilitate decision making
- GS16.** take a calculated risk with minimum losses
- GS17.** schedule daily activities and drawing up priorities; allocate start times, estimation of completion times and materials, equipment and assistance required for completion.

Qualification Pack

- GS18.** match customer needs/specification by adjusting the processing conditions (interact with customer in case any clarification required)
- GS19.** ensure that performance of his action/operation/activity does not lead to any divergence from the specified quality of the final product as required by the customer.
- GS20.** complete the assigned task in timely manner so that the final product is delivered in the timeline given by the customer.
- GS21.** communicate effectively to the superior/customer for any delay in supplies to the clients.
- GS22.** work towards fulfilling the customers requirement as per their demand.
- GS23.** in case of any complaint, ensure its timely resolution if the problem is emanating at his level
- GS24.** communicate effectively to the superior/customer for any delay in resolving the problem faced by the customer.
- GS25.** maintain good/cordial relation with customers.
- GS26.** work on the feedback received from customer regarding the product.
- GS27.** use first aid treatment in case of any injury/accident.
- GS28.** monitor and maintain the condition of tools and equipment
- GS29.** assess situation & identify appropriate control measures
- GS30.** act, communicate and report in emergency situation

Qualification Pack

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 50

(**Please note:** Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
