Qualification Pack

SGJ/Q3101: Micro-Entrepreneur NTFP (Non Timber Forest Produce) Plant Origin

Brief Job Description

NTFP includes all the Non- Timber Forest products that are harvested from trees, shrubs and other plants in the forests. The course on (I) Coconut Shells & Fibre Handicrafts covers utilization of the freely and locally available materials such as coconut leaves, coconut fibre for handicraft production and their marketing. The course on (II) Bamboo Crafts broadly covers aspects such as species and products range of bamboo, operation of processing machine, conversion of bamboo, product making & product design, Bamboo boards preparation/Mud reinforced wall preparation/Roof design/Furniture making.

Personal Attributes

This unit tells about Micro-Entrepreneur NTFP (Non Timber Forest Produce) Plant Origin

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [SGJ/N1829: Importance of Non-Timber Forest Produce and Handicrafts and livelihood generation](#)
2. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

Electives(mandatory to select at least one):

Elective 1: Coconut Shells & Fibre Handicrafts

The elective on coconut shells & fibre handicrafts covers utilization of the freely and locally available materials such as coconut leaves, coconut fibre for handicraft production and their marketing

1. [SGJ/N1830: Perform collection and processing of raw materials of Coconut Shells & Fibre Handicrafts industry and concept of zero cost production](#)
2. [SGJ/N1831: Making of the Products](#)
3. [SGJ/N1832: Perform Finishing & Marketing of the Products](#)

Elective 2: Bamboo Crafts

The elective on bamboo crafts broadly covers aspects such as species and products range of bamboo, operation of processing machine, conversion of bamboo, product making & product design, bamboo boards preparation/mud reinforced wall preparation/roof design/furniture making

1. [SGJ/N1833: Preservation Conversion & primary processing in Bamboo](#)

Qualification Pack

2. [SGJ/N1834: Perform Products making in bamboo industry](#)
3. [SGJ/N1835: Perform Finishing of products in Bamboo industry](#)

SGJ/N1829: Importance of Non-Timber Forest Produce and Handicrafts and livelihood generation

Description

This unit tell about Importance of Non-Timber Forest Produce and Handicrafts and livelihood generation

Scope

The scope covers the following :

- Understanding the Importance of Non-Timber Forest Produce (NTFPs) and locally available NTFPs lies in recognizing their significant contributions to livelihoods, biodiversity conservation, cultural heritage preservation, and sustainable development.
- Understanding the Importance of Handicrafts and livelihood generation and facilitating community development through the artisanal production and sale of handmade goods.

Elements and Performance Criteria

Importance of NTFPs and locally available NTFPs

To be competent, the user/individual on the job must be able to:

- PC1.** explain to the learners comprehend the Importance of NTFPs.
- PC2.** explain to the learners internalize the NTFPs and its socio environmental relevance.
- PC3.** show how to the learner identifies NTFPs and value add for its economization.

Importance of Handicrafts and livelihood generation

To be competent, the user/individual on the job must be able to:

- PC4.** discuss how to the learner understands the sustainable socio economic development patterns.
- PC5.** explain how to the learner comprehends the requirement of human resources on different handicraft trade.
- PC6.** discuss how the learner acquires the skills of working in partnership for entrepreneurship development and empowerment.
- PC7.** show how to the learner analyses and understands the ways to protect, conserve and preserve biodiversity.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Identification and sustainable harvesting: recognizing different plant species, knowing their ecological roles, and harvesting methods that don't harm the forest ecosystem.
- KU2.** Processing and value addition: techniques for drying, storing, and processing NTFPs to enhance their value and shelf life.
- KU3.** Product development: creating innovative products like jams, soaps, or herbal teas from NTFPs.

Qualification Pack

- KU4.** Marketing and sales: reaching customers, understanding market demands, and negotiating fair prices.
- KU5.** Business management: Budgeting, record-keeping, and financial planning for their micro-enterprises.
- KU6.** Handicrafts often use traditional skills and techniques, preserving cultural heritage and identity.
- KU7.** Understanding proper harvesting techniques ensures both resource sustainability and income generation.
- KU8.** Processing and transforming raw materials into higher-value products increases profit margins.
- KU9.** Understanding market trends, consumer preferences, and pricing strategies is crucial for success.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** ability to analyze data on NTFP collection, production, and market trends. Prepare reports and proposals clearly and concisely.
- GS2.** skills in product design, processing, packaging, and quality control for NTFPs and handicrafts.
- GS3.** ability to work effectively in teams with diverse backgrounds and perspectives. Build strong partnerships with communities, NGOs, and government agencies.
- GS4.** leadership skills to inspire and motivate communities and teams. Ability to identify and solve challenges related to NTFP and handicraft businesses.
- GS5.** ability to stay updated on new knowledge and innovations in the field.
- GS6.** participate in workshops, trainings, and conferences related to NTFPs, handicrafts, and livelihoods.
- GS7.** understanding and respecting diverse cultural values and practices related to NTFPs and handicrafts.

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e-mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

SGJ/N1830: Perform collection and processing of raw materials of Coconut Shells & Fibre Handicrafts industry and concept of zero cost production

Description

This unit tells about Perform collection and processing of raw materials of Coconut Shells & Fibre Handicrafts industry and concept of zero cost production

Scope

The scope covers the following :

- Exploring innovative uses of coconut byproducts, livelihood generation, and cultural heritage preservation.
- Perform Collection and Processing of raw material encompasses efficient gathering methods, quality control measures and fostering economic viability within various industries.
- Analyse and expected to practice zero cost production of handicrafts from coconut shells and fibres .

Elements and Performance Criteria

Introduction to Coconut Shells & Fibre Handicrafts industry

To be competent, the user/individual on the job must be able to:

- PC1.** explain to the trainees will be able to understand the locally available Coconut shells and fibre and their importance.
- PC2.** discuss how they will get an advanced knowledge of coconut shells & fibre handicrafts.
- PC3.** show how to the trainees will acquire advanced knowledge of Coconut shells and fibre and their importance.
- PC4.** show how to the trainees will be able to familiarize themselves on executing standard operating procedures pertaining to NTFPs processing.

Collection and Processing of raw material

To be competent, the user/individual on the job must be able to:

- PC5.** discuss how to the trainees will learn and internalize the availability and collection of Coconut shell and fibres.
- PC6.** explain the trainees equip themselves in the production of handicrafts from coconut shells and fibres.
- PC7.** show how the learner acquire the skill of identifying the availability and collection of Coconut shell and fibres.
- PC8.** show how the skill learning happens among the learners on production of handicrafts from coconut shells and fibres.

Zero cost production

To be competent, the user/individual on the job must be able to:

- PC9.** explain how to the trainees will understand ecofriendly practices and sustainable waste management plans.
- PC10.** explain how to the trainees will be able to comprehend conservation and management of the environment.

Qualification Pack

- PC11.** discuss how the trainees will learn the zero cost production of handicrafts from coconut shells and fibres.
- PC12.** ensure the trainees demonstrate ecofriendly practices and sustainable waste management plans.
- PC13.** ensure the trainees analyse the conservation and management of the environment.
- PC14.** ensure the trainees will analyse and expected to practice zero cost production of handicrafts from coconut shells and fibres.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** identify reliable sources for discarded coconut shells like plantations, processing units, local markets. Understand seasonal variations in availability.
- KU2.** learn to differentiate between mature and immature shells, thickness, and absence of cracks for optimal crafting.
- KU3.** master different techniques like soaking, scraping, drying, and sanding to remove flesh and impurities without damaging the shell.
- KU4.** understand methods like bleaching, polishing, and applying natural oils to enhance appearance and durability.
- KU5.** learn manual or mechanical methods for extracting fibre from husks without damaging its strength.
- KU6.** develop a unique design aesthetic that reflects cultural heritage, sustainability, and caters to market trends
- KU7.** understand basic business principles like cost analysis, pricing, marketing, and record-keeping for financial sustainability.
- KU8.** master various techniques like carving, etching, weaving, dyeing, and embellishments to create diverse and marketable products.
- KU9.** utilize recycled materials like discarded wood, fabric scraps, or natural elements.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** understanding their properties, processing techniques, and potential uses.
- GS2.** safe and efficient operation of hand tools, power tools, and potentially CNC machines.
- GS3.** maintaining a safe and clean work environment, especially when handling natural materials.
- GS4.** identifying and reaching target markets effectively with minimal spend.
- GS5.** continuously improve your skills and learn new techniques.
- GS6.** identifying quality materials, spotting imperfections, and ensuring precise crafting requires keen observation.

SGJ/N1831: Making of the Products

Description

This unit tells about Making of the Products

Scope

The scope covers the following :

- Understand the Production and making of handicrafts from coconut shells and fibres.

Elements and Performance Criteria

Making of the Products: (i) Coconut Shell (ii) Coconut Fibre

To be competent, the user/individual on the job must be able to:

- PC1.** explain to the participants acquires factual knowledge of NTFP utilization, preservation, processing of raw material, operating processing machines, independent assembling of the products, value addition of NTFP for handicrafts (Coconut shell and coconut fibre).
- PC2.** show how will the participants be able to augment entrepreneurship among themselves and to promote them to form Self Help Groups (SHGs).
- PC3.** ensure learning skills will enable the trainees to demonstrate professional knowledge on how to utilize coconut husk and fiber, conservation, processing of raw materials, operation of processing machines, independent assembly of products, value addition of NTFPs for handicrafts.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** consider the intended use of your product and choose appropriate techniques and materials for longevity.
- KU2.** learn basic pricing strategies, costing techniques, and profit margin calculations.
- KU3.** understand intellectual property rights and how to protect your designs.
- KU4.** understand and implement sustainable practices throughout your process, from sourcing to packaging. Minimize waste, utilize recycled materials, and promote eco-friendly practices.
- KU5.** learn about safe handling practices for tools and materials, especially natural fibres.
- KU6.** identifying popular styles, colors, and functionalities.
- KU7.** cultural significance of coconut shells and fibres in your region adding depth and meaning to your creations.
- KU8.** basic carpentry and woodworking skills useful for creating frames, bases, or other supportive structures.
- KU9.** basic photography and design skills presenting your products professionally for marketing purposes.

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** skilled hand movements are crucial for processing raw materials, crafting intricate designs, and ensuring precise finishing.
- GS2.** identifying quality materials, spotting imperfections, and ensuring consistent aesthetics require keen observation.
- GS3.** minimizing waste, utilizing recycled materials, and finding affordable alternatives to support zero-cost production principles.
- GS4.** building relationships with suppliers, artisans, customers, and potential collaborators effectively.
- GS5.** understanding their properties, processing techniques, potential uses, and market value.
- GS6.** maintaining a safe and clean work environment, especially when handling natural materials and using tools.
- GS7.** safe and efficient operation of hand tools, power tools, and potentially CNC machines or specialized equipment.

SGJ/N1832: Perform Finishing & Marketing of the Products

Description

This unit tells about Finishing & Marketing of the Products

Scope

The scope covers the following :

- Acquire Skill of handicrafts finishing from coconut shells and fibres.
- Acquire marketing knowledge and Entrepreneurship Skills

Elements and Performance Criteria

Finishing of the Products: (i) Coconut Shell (ii) Coconut Fibre

To be competent, the user/individual on the job must be able to:

- PC1.** discuss how the participants will analyse problems and try to approach solutions.
- PC2.** ensure the participants learn to analyze problems and find out solutions on finishing of products.
- PC3.** ensure trainees would get a factual knowledge of NTFP, Create processes to solve problems, independent assembling of the products, value addition of NTFP for handicrafts.

Marketing of the products

To be competent, the user/individual on the job must be able to:

- PC4.** discuss how trainees will gain the skill of entrepreneurship and transacting with banks on schemes.
- PC5.** discuss how the trainees will get exposure with the successful entrepreneurs.
- PC6.** discuss how the trainees will independently initiate the processing of NTFPs, equipment handling, market oriented design and product development and their marketing.
- PC7.** show how the trainees will realise the responsibility of acquiring product value addition and practicing it.
- PC8.** ensure the trainee will learn the professional skill to operate processing machines and making quality products from locally available NTFPs.
- PC9.** ensure the trainees will realise their responsibility on quality improvement in product development by using processing machines as handicraft maker/ entrepreneur.
- PC10.** ensure the trainees are expected to become Master Trainers on marketing of the products for further percolation and spread.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** learn basic pricing strategies, costing techniques, and profit margin calculations.
- KU2.** consider the intended use of your product and choose appropriate techniques and materials for longevity.

Qualification Pack

- KU3.** understand intellectual property rights and how to protect your designs.
- KU4.** understand and implement sustainable practices throughout your process, from sourcing to packaging. Minimize waste, utilize recycled materials, and promote eco-friendly practices.
- KU5.** learn about safe handling practices for tools and materials, especially natural fibres.
- KU6.** identifying popular styles, colors, and functionalities.
- KU7.** cultural significance of coconut shells and fibres in your region adding depth and meaning to your creations.
- KU8.** basic carpentry and woodworking skills useful for creating frames, bases, or other supportive structures.
- KU9.** basic photography and design skills presenting your products professionally for marketing purposes.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** skilled hand movements are crucial for processing raw materials, crafting intricate designs, and ensuring precise finishing.
- GS2.** identifying quality materials, spotting imperfections, and ensuring consistent aesthetics require keen observation.
- GS3.** minimizing waste, utilizing recycled materials, and finding affordable alternatives to support zero-cost production principles.
- GS4.** building relationships with suppliers, artisans, customers, and potential collaborators effectively.
- GS5.** understanding their properties, processing techniques, potential uses, and market value.
- GS6.** maintaining a safe and clean work environment, especially when handling natural materials and using tools.
- GS7.** safe and efficient operation of hand tools, power tools, and potentially CNC machines or specialized equipment.

SGJ/N1833: Preservation Conversion & primary processing in Bamboo

Description

This unit tells about Preservation Conversion & primary processing in Bamboo

Scope

The scope covers the following :

- Understand processing of bamboo and importance of locally available resources and zero cost resources.
- Perform Preservation of bamboo and handicrafts.
- Acquire the skill of making handicrafts from bamboo

Elements and Performance Criteria

Introduction of bamboo industry

To be competent, the user/individual on the job must be able to:

- PC1.** discuss how the trainees will realise importance of NTFPs, bamboo handicrafts.
- PC2.** discuss how the trainees will understand the importance of bamboo, distribution and identification of species which is used for making handicrafts.
- PC3.** ensure the trainees will acquire advanced knowledge of bamboo and their importance, distribution, identification of species and used for making handicrafts.

Preservation of bamboo

To be competent, the user/individual on the job must be able to:

- PC4.** discuss how the trainees will be able to learn and internalize the durability of bamboo, types, preparation, testing and treatment of preservatives.
- PC5.** ensure the trainees will acquire advanced knowledge and practice on durability of bamboo, types, preparation, testing and treatment of preservatives.

Conversion & primary processing

To be competent, the user/individual on the job must be able to:

- PC6.** discuss how the trainees will learn conversion and primary processing of bamboo.
- PC7.** discuss how the trainees in addition will also learn operation and working of bamboo processing machine, node removal, cross cutting, splitter of bamboo, sliver making, splinters making and weaving of mat and patterns.
- PC8.** ensure the trainees will imbibe advanced knowledge and practice on conversion of bamboo, primary processing of bamboo, operation and working of bamboo processing machine, node removal, cross cutting, splitter, sliver making, splinters making, weaving of mat and patterns.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** understand different bamboo species have varying characteristics like size, strength, and durability. Identify the species you're working with to determine suitable preservation and processing methods.
- KU2.** understand proper harvesting practices to ensure sustainable resource management and prevent damage to the bamboo culms.
- KU3.** understand bamboo culms have a unique structure with nodes and internodes. Knowing this structure helps in efficient processing and utilization of different parts.
- KU4.** proper drying is crucial to prevent mold, fungus growth, and cracking. Understand natural drying techniques or explore kiln drying for faster results.
- KU5.** consider using eco-friendly preservatives like borax or natural oils to protect against insects and decay, depending on the intended use.
- KU6.** store dried bamboo in well-ventilated, cool, and dry conditions to maintain its quality.
- KU7.** different splitting techniques like splitting knives or machines are used to obtain various sizes and shapes for diverse applications.
- KU8.** other methods like crushing, boiling, and pulping can be used to convert bamboo into fibers for textiles, paper, or biofuel production.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** understanding the characteristics and properties of different bamboo species is essential for selecting the right material for specific applications.
- GS2.** expertise in drying methods, preservative treatments, and storage practices ensures bamboo quality and longevity.
- GS3.** knowledge of heat treatment, chemical treatments, and surface finishing for enhancing bamboo's properties and aesthetics.
- GS4.** mastery of splitting, slicing, milling, and other conversion methods based on processing goals and product requirements.
- GS5.** implementing consistent quality checks throughout the process ensures products meet desired standards.
- GS6.** understanding and implementing sustainable practices for minimizing waste and utilizing scrap effectively.
- GS7.** knowledge of market demands, production costs, and pricing strategies for successful commercialization of bamboo products.
- GS8.** bamboo processing requires precision and adherence to specific procedures to ensure quality and avoid damage.

SGJ/N1834: Perform Products making in bamboo industry

Description

This unit tells about Products making in bamboo industry

Scope

The scope covers the following :

- Acquire knowledge in different types of Agarbatti stick making.
- Understand the Bamboo composites, methods for preparation of composites, qualitative and quantitative testing, adhesives.
- Acquire an advanced knowledge and practice on production of handicrafts from bamboo.

Elements and Performance Criteria

Agarbatti stick making

To be competent, the user/individual on the job must be able to:

- PC1.** discuss how the trainees acquire knowledge in Agarbatti stick making, square stick making and round stick making.
- PC2.** ensure the trainees will acquire an advanced knowledge and practice on Agarbatti stick, square stick, round stick making.

Bamboo composites

To be competent, the user/individual on the job must be able to:

- PC3.** discuss the trainees will learn and comprehend , Bamboo composites., preparations of composites, qualitative and quantitative testing, adhesives and types, application of adhesives on bamboo mat, mat pressing, bamboo boards
- PC4.** ensure the trainees will acquire advanced knowledge and practice on bamboo composites, methods for preparations of composites, qualitative and quantitative testing of bamboo composites, adhesives and types, adhesives on bamboo mat, mat pressing, bamboo boards and composites.

Product making

To be competent, the user/individual on the job must be able to:

- PC5.** discuss how the trainees will learn the production of handicrafts from bamboo
- PC6.** discuss how the trainees will learn the making of bamboo basketry.
- PC7.** discuss how the trainees will learn the bamboo products design making.
- PC8.** discuss how the trainees will learn the bamboo products decoration.
- PC9.** discuss how the trainees will learn the finishing of bamboo products.
- PC10.** ensure the trainees will acquire an advanced knowledge and practice on production of handicrafts from bamboo, design making, decoration and finishing of the bamboo handicrafts.

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** understanding design principles and market trends helps create products that are functional, aesthetically pleasing, and meet consumer demands.
- KU2.** each species has unique characteristics impacting suitability for different products. Understanding strength, flexibility, durability, and processing needs is crucial.
- KU3.** different products require specific manufacturing processes, including splitting, milling, treatment methods, and finishing techniques. Mastering these processes is essential for quality and efficiency.
- KU4.** utilizing eco-friendly harvesting, processing, and waste management practices is crucial for responsible and ethical production.
- KU5.** understanding market dynamics, pricing strategies, and cost management is necessary for successful product development and commercialization.
- KU6.** focusing on a specific product category or market segment allows for specialization and deeper knowledge.
- KU7.** connect with other bamboo professionals, designers, and manufacturers to share knowledge and explore opportunities.
- KU8.** continuously learn about new technologies, trends, and sustainable practices in the bamboo industry.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** understand the characteristics and properties of different species to select the right material for specific applications.
- GS2.** master drying methods, preservative use, and storage practices to ensure bamboo quality and longevity.
- GS3.** expertise in splitting, slicing, milling, and other conversion methods based on processing goals and product requirements.
- GS4.** knowledge of heat treatment, chemical treatments, and surface finishing to enhance properties and aesthetics.
- GS5.** adherence to safety protocols and proper use of tools and machinery are crucial for accident prevention.
- GS6.** implement consistent quality checks throughout the process to ensure products meet desired standards.
- GS7.** understand and implement sustainable practices for minimizing waste and utilizing scrap effectively.
- GS8.** knowledge of market demands, production costs, and pricing strategies is crucial for successful commercialization.
- GS9.** handling bamboo culms, operating tools, and manipulating materials necessitate good hand-eye coordination and fine motor skills.
- GS10.** unexpected challenges arise during processing. Possess adaptability and ingenuity to find solutions while maintaining quality.

SGJ/N1835: Perform Finishing of products in Bamboo industry

Description

This unit tells about Finishing of products in Bamboo industry

Scope

The scope covers the following :

- Bamboo furniture making and designing.
- Understand the finishing and seasoning of bamboo products.
- Understand the conservation of bamboo and low cost bamboo housing

Elements and Performance Criteria

Furniture making Design and Joinery

To be competent, the user/individual on the job must be able to:

- PC1.** discuss how the trainees will learn bamboo furniture making.
- PC2.** discuss how the trainees will learn furniture designing.
- PC3.** discuss how the trainees will learn bamboo Joinery.
- PC4.** ensure the trainees will acquire knowledge and practice on bamboo furniture making, furniture designing and Joinery.

Finishing/Seasoning of products

To be competent, the user/individual on the job must be able to:

- PC5.** discuss how the trainees will learn finishing of bamboo products.
- PC6.** discuss how the trainees will learn seasoning of bamboo handicrafts.
- PC7.** ensure the trainees will achieve a mastery over knowledge and practice of finishing bamboo handicrafts

Low cost bamboo housing

To be competent, the user/individual on the job must be able to:

- PC8.** discuss how the trainees will learn low cost bamboo housing. conservation of bamboo, mud reinforced walls, paneling, roof making, floor making
- PC9.** ensure the trainees acquire knowledge and practice of low cost bamboo housing, conservation of bamboo, paneling, roof making, and floor making.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** understanding design principles and market trends helps create products that are functional, aesthetically pleasing, and meet consumer demands.
- KU2.** each species has unique characteristics impacting suitability for different products. Understanding strength, flexibility, durability, and processing needs is crucial.

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification will be created by the Sector Skill Council/Awarding Body. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC/AB will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC/AB.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the assessment, every trainee should score the Recommended Pass % aggregate for the Qualification.

Qualification Pack

7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification.

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
