- PC8.** explain roles of Emergency Response Sanitation Unit (ERSU) including Responsible Sanitation Authority (RSA) and Duty Supervisor
- PC9.** explain roles of Sewer Entry Professionals (SEP) and Private Sanitation Service Organisation (PSSO)
- PC10.** identify role of ERSU Authority, ULB in case of manual entry of SSW required
- PC11.** discuss the powers of the Sanitary Inspector as part of PEMSR Act, 2020
- PC12.** discuss Roles and responsibilities of Employer, Local Authority in implementing Manual Sewer Cleaning
- PC13.** illustrate the importance of sewer cleaning and outline key challenges in manual sewer cleaning
- PC14.** outline key aspects of performing sewage cleaning operations manually while ensuring all safety requirements
- PC15.** illustrate Roles and responsibilities of all key stakeholders including Employer, Local Authority in implementing Manual Sewer Cleaning
- PC16.** illustrate process of accessing PEMSR 2020 and Swachhta Udyami Yojna

##### *Provisions and Entitlements for Sewer/ Workers (SSW)- Role of ULBs*

## Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC17.** explain the list of regular medical check-ups and appropriate vaccinations to be administered to SSW as a role of ULB
- PC18.** discuss about the relief package including life insurance policy for all SSW at ULBs
- PC19.** explain grievance redressal mechanism for SSW at ULB
- PC20.** discuss health assurance scheme under Pradhan Mantri Jan Arogya Yojana (PM-JAY), access to educational scholarship for children, access to housing through subsidized loans/ schemes
- PC21.** explain Swachhta Udyami Yojana (SUY) scheme including the types of loans with its financials, role of ULB's etc. and the Self-Employment Scheme for Rehabilitation of Manual Scavengers (SRMS)
- PC22.** discuss case studies on JLG/SHG formed by SSW for procurement of tools and equipment's, business model and their achievements
- PC23.** discuss the steps involved in setting up an Enterprise
- PC24.** discuss the process involved in the sanction of loan under SUY scheme
- PC25.** list out various parameters for medical examinations
- PC26.** show the use of safety gears and PPE
- PC27.** list various parameters under health assurance scheme under PM-JAY and other welfare incentives
- PC28.** show how to avail health/life insurance under Pradhan Mantri Jan Arogya Yojana (PM-JAY) scheme along with accessing educational scholarship for children and access to housing through subsidized loans/ schemes
- PC29.** outline grievance redressal mechanism for SSW at ULB
- PC30.** show how to avail various benefits under Swachhta Udyami Yojana (SUY) scheme including the types of loans with its financials, role of ULB's etc. and the Self-Employment Scheme for Rehabilitation of Manual Scavengers (SRMS)
- PC31.** outline key aspects of case studies on JLG/SHG formed by SSW for procurement of tools and equipment's

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organizational culture and setup
- KU2.** various policies and regulations
- KU3.** organization's customer support policy
- KU4.** organization's documentation policy
- KU5.** health and safety policy
- KU6.** septic tank emptying services
- KU7.** do's and don'ts of cleaning services of the septic tanks
- KU8.** no fire or flame should be used near the septic tanks as there may be inflammable gases inside septic tanks
- KU9.** installation of pipes
- KU10.** manual scavenging act 2013

## Qualification Pack

**KU11.** personal protection equipment including the use of related safety gears & equipment's

### Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** fill up relevant documents
- GS2.** read relevant documents to understand the purpose of the work
- GS3.** express statements or information clearly so that others can understand
- GS4.** participate in and understand main points of simple discussions
- GS5.** respond appropriately to queries
- GS6.** follow organization rule-based decision-making process
- GS7.** take decisions with systematic course of actions and/or response
- GS8.** complete tasks efficiently and accurately within stipulated time
- GS9.** working constructively and collaboratively with others
- GS10.** coordinate with multidisciplinary stakeholders
- GS11.** understand limitations of the customers
- GS12.** recognize problems and search for solutions
- GS13.** choose best methods to complete assigned tasks
- GS14.** approach relevant authority when required

## Qualification Pack

### Assessment Criteria

| Assessment Criteria for Outcomes                                                                                                                    | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|-----------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|
| <i>Introduction to Manual Sewerage Cleaning practices and associated schemes</i>                                                                    | <b>36</b>    | <b>16</b>       | -             | -          |
| <b>PC1.</b> discuss the importance of sewer cleaning management                                                                                     | 3            | -               | -             | -          |
| <b>PC2.</b> explain how to perform sewer cleaning manually while following safety guidelines                                                        | 3            | -               | -             | -          |
| <b>PC3.</b> explain the key challenges with manual sewage cleaning and the Government initiatives to address the issues                             | 3            | -               | -             | -          |
| <b>PC4.</b> explain the modalities of Government schemes for faecal sludge management like Swachh Bharat Mission, Swachhta Udyami Yojana (SUY) etc. | 3            | -               | -             | -          |
| <b>PC5.</b> explain benefits of govt. scheme for Sewage and Septic Tank Sanitation Workers(SSW)                                                     | 3            | -               | -             | -          |
| <b>PC6.</b> describe Legal provision for punitive actions against hazardous cleaning as per PEMSAR Act, 2013                                        | 3            | -               | -             | -          |
| <b>PC7.</b> describe Roles and responsibilities of the Employer, Local Authority in preventing Hazardous manual cleaning                            | 3            | -               | -             | -          |
| <b>PC8.</b> explain roles of Emergency Response Sanitation Unit (ERSU) including Responsible Sanitation Authority (RSA) and Duty Supervisor         | 3            | -               | -             | -          |
| <b>PC9.</b> explain roles of Sewer Entry Professionals (SEP) and Private Sanitation Service Organisation (PSSO)                                     | 3            | -               | -             | -          |
| <b>PC10.</b> identify role of ERSU Authority, ULB in case of manual entry of SSW required                                                           | 3            | -               | -             | -          |
| <b>PC11.</b> discuss the powers of the Sanitary Inspector as part of PEMSAR Act, 2020                                                               | 3            | -               | -             | -          |
| <b>PC12.</b> discuss Roles and responsibilities of Employer, Local Authority in implementing Manual Sewer Cleaning                                  | 3            | -               | -             | -          |

## Qualification Pack

| Assessment Criteria for Outcomes                                                                                                                                                                            | Theory Marks | Practical Marks | Project Marks | Viva Marks |

### SGJ/N4046: Maintain health and safety at Sewer cleaning site

#### Description

This unit is about to explain how to maintain health and safety at sewer cleaning site

#### Scope

The scope covers the following :

- Health & Safety in manual sewage cleaning operations
- Emergency Preparedness during manual cleaning of sewers

#### Elements and Performance Criteria

##### *Health & Safety in manual sewage cleaning operations*

To be competent, the user/individual on the job must be able to:

- PC1.** explain the importance of safety and discuss how to incorporate safety measures in manual sewer cleaning
- PC2.** discuss how to fully adhere to safety requirements and norms for manual sewer cleaning
- PC3.** explain how to ensure personal cleanliness and hygiene
- PC4.** discuss the potential hazards and preventive actions to be taken during sewer cleaning
- PC5.** discuss mitigating occupational hazards like biological hazards, gas hazards, electrical hazards, fire hazards, chemical drain openers, heavy load lifting, high-pressure water, sinking and animal/rodent/snake bites etc.
- PC6.** discuss the common myths about PPE such as comfort and productivity
- PC7.** discuss the possible injuries from sharp objects, animal and/ or insect bites, management of bleeding, bruises, and sprain
- PC8.** discuss how to respond to emergencies and identify the essential items in first aid box with their uses
- PC9.** explain first aid intervention during suffocation, asphyxiation, and nausea
- PC10.** demonstrate how to keep sewer sites clean, ensure personal cleanliness and hygiene and safety during work
- PC11.** show how to fully adhere to safety requirements and norms for manual sewer cleaning
- PC12.** demonstrate how to use appropriate Personal Protective Equipment (PPE) while performing work
- PC13.** demonstrate correct techniques to move an injured person during an emergency
- PC14.** show how to provide first aid to a victim in case of injuries from sharp objects, animal and/ or insect bites, management of bleeding, bruises, and sprain
- PC15.** demonstrate how to measure temperature of a person
- PC16.** demonstrate how to dispose hazardous waste as per State/ Local Authority norms
- PC17.** perform the steps to clean and disinfect material, tools, equipment, and other supplies before starting work and after completing the job

##### *Emergency Preparedness during manual cleaning of sewers*

## Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC18.** discuss key aspects of emergency preparedness at manual sewage cleaning site
- PC19.** discuss about the helpline number 14420 for enabling citizens to register any complaints regarding unsafe practices being adopted for cleaning and maintenance of sewers and septic tanks
- PC20.** explain the hazard involved in the cleaning activity and consent requirement to start cleaning activities
- PC21.** explain about confine space in detail. and precautions to be taken while working in confine space
- PC22.** discuss about the functions of Emergency Response Sanitation Unit (ERSU)
- PC23.** explain about the precautions to be taken against gas Hazards
- PC24.** explain about the precautions to be taken against infections
- PC25.** explain about the precautions to be taken while working near vehicular traffic
- PC26.** discuss about action to be taken during gas emergency at site
- PC27.** explain about CPR in detail
- PC28.** illustrate the importance of emergency preparedness at sewage cleaning site
- PC29.** demonstrate by conducting mock drills how to prepare for emergency during manual cleaning of sewers
- PC30.** demonstrate through pictures and videos how to take actions during different types of emergency conditions during manual cleaning of sewers
- PC31.** demonstrate a practical session of CPR on a Dummy
- PC32.** illustrate how institutional set up function to access Emergency Response Sanitation Unit (ERSU)

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organizational culture and setup
- KU2.** various policies and regulations.
- KU3.** organization's customer support policy
- KU4.** organization's documentation policy
- KU5.** health and safety policy
- KU6.** septic tank emptying services
- KU7.** do's and don'ts of cleaning services of the sewer
- KU8.** no fire or flame should be used near the septic tanks as there may be inflammable gases inside sewer
- KU9.** installation of pipes
- KU10.** health and safety procedure
- KU11.** manual scavenging act 2013
- KU12.** personal protection equipment including the use of related safety gears & equipment's

## Generic Skills (GS)

## Qualification Pack

User/individual on the job needs to know how to:

- GS1.** fill up relevant documents
- GS2.** read relevant documents to understand the purpose of the work
- GS3.** express statements or information clearly so that others can understand
- GS4.** participate in and understand main points of simple discussions
- GS5.** respond appropriately to queries
- GS6.** follow organization rule-based decision-making process
- GS7.** take decisions with systematic course of actions and/or response
- GS8.** complete tasks efficiently and accurately within stipulated time
- GS9.** working constructively and collaboratively with others
- GS10.** coordinate with multidisciplinary stakeholders
- GS11.** understand limitations of the customers
- GS12.** identify the spending trends of customers
- GS13.** recognize problems and search for solutions
- GS14.** choose best methods to complete assigned tasks
- GS15.** approach relevant authority when required
- GS16.** critically evaluate the information obtained from other departments and stakeholders

## Qualification Pack

### SGJ/N4047: Describe process to perform Manual sewer cleaning operations

#### Description

This unit is about to describe process to perform Manual sewer cleaning operations

#### Scope

The scope covers the following :

- Checklist for Inspection and examination of sewer before cleaning
- Procedure for Manual Cleaning of Sewer
- Faecal sludge management and sewer cleaning Post checklist

#### Elements and Performance Criteria

##### *Checklist for Inspection and examination of sewer before cleaning*

To be competent, the user/individual on the job must be able to:

- PC1.** inspect site and examine traffic condition near sewer to be clean
- PC2.** explain the checklist for accepting sanitation service request
- PC3.** discuss the requirements of duties entering into confined space
- PC4.** explain the use of safety devices- example, multigas detector to gauge gas levels, axial blowers if the gas levels are high for ventilation
- PC5.** determine and mark whether PPE, Machines and safety devices are available at site
- PC6.** assess the availability and condition record of the PPE, Machines and Tools. Inform to Supervisor if it is not available
- PC7.** explain how to find if the request is documented from where it has been received (helpline/ informal/ PSSO)
- PC8.** inform about availability of helpline number 14420 for registering any complaint by citizens
- PC9.** role of worker and the Authority for permitting manual cleaning of sewer where the worker has to get down into the sewer
- PC10.** explain the PPE kit necessary for undertaking manual cleaning
- PC11.** prepare checklist of safety gears (O2 gas cylinder, full wader suit, etc) required for manual cleaning as per SOP
- PC12.** prepare the complete list of activities involved in the cleaning activity and consent requirement to start cleaning activities
- PC13.** list out the check points before cleaning of Sewer
- PC14.** demonstrate different types methods for inspection of site (direct and indirect)
- PC15.** show through pictures and videos Exercises relating to steps involved in Manual Cleaning of Sewers
- PC16.** depict through pictures Exercise relating to site inspection and the tools used

##### *Procedure for Manual Cleaning of Sewer*

To be competent, the user/individual on the job must be able to:

## Qualification Pack

- PC17.** explain how to barricade the identified site and to isolate the area during open up of sewer manhole
- PC18.** explain how to set up adequate road markings
- PC19.** explain how to set up adequate ventilation before entering manhole
- PC20.** explain how to stop the water flow before any activity
- PC21.** discuss about the requirement of testing gas at regular interval without failure
- PC22.** explain the indirect method for inspection and examination of Sewers like Light & Mirror method, Sonar system, Close Conduit Camera Method etc.
- PC23.** explain about the manual methods of sewer cleaning
- PC24.** discuss the mechanism for clearing the blockage while manual cleaning of sewer
- PC25.** discuss about cleaning frequency of sewer
- PC26.** explain the use of PPE, opening of sewage holes and ventilation
- PC27.** discuss the different types of tools, equipment's and their SOP for sewer cleaning and their usage
- PC28.** discuss the type of hose pipes used for removal of sludge (checking of hose pipes for cracks/holes, checking the sludge levels)
- PC29.** explain broad steps involved in manual cleaning
- PC30.** explain the SOPs issued by MoHUA in this regard
- PC31.** demonstrate how to use PPE and safety devices
- PC32.** show how to open the manholes and the use of axial blowers if the gas levels are high for ventilation
- PC33.** demonstrate the isolation of nearby manholes using inflatable plugs
- PC34.** demonstrate use of sewer cleaning tools and equipment's
- PC35.** show how to follow the standard operating procedure during manual cleaning of sewer
- PC36.** outline the mechanism for clearing the blockage while manual cleaning of sewer

### *Faecal sludge management and sewer cleaning Post checklist*

To be competent, the user/individual on the job must be able to:

- PC37.** discuss an overview about waste disposal site
- PC38.** explain about the cleaning of PPE, Tools, and Equipment's after the completion of sewer cleaning job
- PC39.** explain about the cleaning of any Spillage
- PC40.** discuss the removal of barricade post completion of cleaning activity
- PC41.** discuss about the process of closing the sewage manhole properly after job completion
- PC42.** explain about the safe disposal at designated disposal site
- PC43.** explain the process of cleaning protective gear and other safety devices used for manual cleaning of sewer
- PC44.** Do's and Don'ts during manual cleaning activity and disposing of sludge at a designated place
- PC45.** prepare and complete the checklist carefully post sewer cleaning
- PC46.** show how to safely Clean PPE, Tools, and equipment's as well as cleaning of any Spillage post completion of manual cleaning of sewer
- PC47.** show how to safely remove barricade from the site after completion of cleaning activity

## Qualification Pack

**PC48.** show how to safely dispose the sludge at designated disposal site

**PC49.** show how to clean protective gear and other safety devices used for manual cleaning of sewer

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

**KU1.** organizational culture and setup

**KU2.** various policies and regulations

**KU3.** organization's customer support policy

**KU4.** organization's documentation policy

**KU5.** health and safety policy

**KU6.** sewage cleaning services

**KU7.** do's and don'ts of sewage cleaning services

**KU8.** no fire or flame should be used near the sewer as there may be inflammable gases inside sewer

**KU9.** installation of pipes

**KU10.** manual scavenging act 2013

**KU11.** personal protection equipment including the use of related safety gears & equipment's

## Generic Skills (GS)

User/individual on the job needs to know how to:

**GS1.** fill up relevant documents

**GS2.** read relevant documents to understand the purpose of the work

**GS3.** express statements or information clearly so that others can understand

**GS4.** participate in and understand main points of simple discussions

**GS5.** respond appropriately to queries

**GS6.** follow organization rule-based decision-making process

**GS7.** take decisions with systematic course of actions and/or response

**GS8.** complete tasks efficiently and accurately within stipulated time

**GS9.** working constructively and collaboratively with others

**GS10.** coordinate with multidisciplinary stakeholders

**GS11.** understand limitations of the customers

**GS12.** identify the spending trends of customers

**GS13.** recognize problems and search for solutions

**GS14.** choose best methods to complete assigned tasks

**GS15.** approach relevant authority when required

## Qualification Pack

### Assessment Criteria

| Assessment Criteria for Outcomes                                                                                                                        | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|
| <i>Checklist for Inspection and examination of sewer before cleaning</i>                                                                                | <b>36</b>    | <b>12</b>       | -             | -          |
| <b>PC1.</b> inspect site and examine traffic condition near sewer to be clean                                                                           | 3            | -               | -             | -          |
| <b>PC2.</b> explain the checklist for accepting sanitation service request                                                                              | 3            | -               | -             | -          |
| <b>PC3.</b> discuss the requirements of duties entering into confined space                                                                             | 3            | -               | -             | -          |
| <b>PC4.</b> explain the use of safety devices- example, multigas detector to gauge gas levels, axial blowers if the gas levels are high for ventilation | 3            | -               | -             | -          |
| <b>PC5.</b> determine and mark whether PPE, Machines and safety devices are available at site                                                           | 3            | -               | -             | -          |
| <b>PC6.</b> assess the availability and condition record of the PPE, Machines and Tools. Inform to Supervisor if it is not available                    | 3            | -               | -             | -          |
| <b>PC7.</b> explain how to find if the request is documented from where it has been received (helpline/ informal/ PSSO)                                 | 3            | -               | -             | -          |
| <b>PC8.</b> inform about availability of helpline number 14420 for registering any complaint by citizens                                                | 3            | -               | -             | -          |
| <b>PC9.</b> role of worker and the Authority for permitting manual cleaning of sewer where the worker has to get down into the sewer                    | 3            | -               | -             | -          |
| <b>PC10.</b> explain the PPE kit necessary for undertaking manual cleaning                                                                              | 3            | -               | -             | -          |
| <b>PC11.</b> prepare checklist of safety gears (O2 gas cylinder, full wader suit, etc) required for manual cleaning as per SOP                          | 3            | -               | -             | -          |
| <b>PC12.</b> prepare the complete list of activities involved in the cleaning activity and consent requirement to start cleaning activities             | 3            | -               | -             | -          |

### Qualification Pack

| Assessment Criteria for Outcomes                                                                                                                             | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|
| <b>PC13.</b> list out the check points before cleaning of Sewer                                                                                              | -            | 3               | -             | -          |
| <b>PC14.</b> demonstrate different types methods for inspection of site (direct and indirect)                                                                | -            | 3               | -             | -          |
| <b>PC15.</b> show through pictures and videos Exercises relating to steps involved in Manual Cleaning of Sewers                                              | -            | 3               | -             | -          |
| <b>PC16.</b> depict through pictures Exercise relating to site inspection and the tools used                                                                 | -            | 3               | -             | -          |
| <i>Procedure for Manual Cleaning of Sewer</i>                                                                                                                | <b>42</b>    | <b>18</b>       | -             | -          |
| <b>PC17.</b> explain how to barricade the identified site and to isolate the area during open up of sewer manhole                                            | 3            | -               | -             | -          |
| <b>PC18.</b> explain how to set up adequate road markings                                                                                                    | 3            | -               | -             | -          |
| <b>PC19.</b> explain how to set up adequate ventilation before entering manhole                                                                              | 3            | -               | -             | -          |
| <b>PC20.</b> explain how to stop the water flow before any activity                                                                                          | 3            | -               | -             | -          |
| <b>PC21.</b> discuss about the requirement of testing gas at regular interval without failure                                                                | 3            | -               | -             | -          |
| <b>PC22.</b> explain the indirect method for inspection and examination of Sewers like Light & Mirror method, Sonar system, Close Conduit Camera Method etc. | 3            | -               | -             | -          |
| <b>PC23.</b> explain about the manual methods of sewer cleaning                                                                                              | 3            | -               | -             | -          |
| <b>PC24.</b> discuss the mechanism for clearing the blockage while manual cleaning of sewer                                                                  | 3            | -               | -             | -          |
| <b>PC25.</b> discuss about cleaning frequency of sewer                                                                                                       | 3            | -               | -             | -          |
| <b>PC26.</b> explain the use of PPE, opening of sewage holes and ventilation                                                                                 | 3            | -               | -             | -          |

## Qualification Pack

| Assessment Criteria for Outcomes                                                                                                              | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|-----------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|
| <b>PC27.</b> discuss the different types of tools, equipment's and their SOP for sewer cleaning and their usage                               | 3            | -               | -             | -          |
| <b>PC28.</b> discuss the type of hose pipes used for removal of sludge (checking of hose pipes for cracks/ holes, checking the sludge levels) | 3            | -               | -             | -          |
| <b>PC29.</b> explain broad steps involved in manual cleaning                                                                                  | 3            | -               | -             | -          |
| <b>PC30.</b> explain the SOPs issued by MoHUA in this regard                                                                                  | 3            | -               | -             | -          |
| <b>PC31.</b> demonstrate how to use PPE and safety devices                                                                                    | -            | 3               | -             | -          |
| <b>PC32.</b> show how to open the manholes and the use of axial blowers if the gas levels are high for ventilation                            | -            | 3               | -             | -          |
| <b>PC33.</b> demonstrate the isolation of nearby manholes using inflatable plugs                                                              | -            | 3               | -             | -          |
| <b>PC34.</b> demonstrate use of sewer cleaning tools and equipment's                                                                          | -            | 3               | -             | -          |
| <b>PC35.</b> show how to follow the standard operating procedure during manual cleaning of sewer                                              | -            | 3               | -             | -          |
| <b>PC36.</b> outline the mechanism for clearing the blockage while manual cleaning of sewer                                                   | -            | 3               | -             | -          |

### DGT/VSQ/N0101: Employability Skills (30 Hours)

#### Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

#### Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

#### Elements and Performance Criteria

##### *Introduction to Employability Skills*

To be competent, the user/individual on the job must be able to:

**PC1.** understand the significance of employability skills in meeting the job requirements

##### *Constitutional values – Citizenship*

To be competent, the user/individual on the job must be able to:

**PC2.** identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

##### *Becoming a Professional in the 21st Century*

To be competent, the user/individual on the job must be able to:

**PC3.** explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

##### *Basic English Skills*

To be competent, the user/individual on the job must be able to:

**PC4.** speak with others using some basic English phrases or sentences

##### *Communication Skills*

To be competent, the user/individual on the job must be able to:

**PC5.** follow good manners while communicating with others

**PC6.** work with others in a team

## Qualification Pack

### *Diversity & Inclusion*

To be competent, the user/individual on the job must be able to:

**PC7.** communicate and behave appropriately with all genders and PwD

**PC8.** report any issues related to sexual harassment

### *Financial and Legal Literacy*

To be competent, the user/individual on the job must be able to:

**PC9.** use various financial products and services safely and securely

**PC10.** calculate income, expenses, savings etc.

**PC11.** approach the concerned authorities for any exploitation as per legal rights and laws

### *Essential Digital Skills*

To be competent, the user/individual on the job must be able to:

**PC12.** operate digital devices and use its features and applications securely and safely

**PC13.** use internet and social media platforms securely and safely

### *Entrepreneurship*

To be competent, the user/individual on the job must be able to:

**PC14.** identify and assess opportunities for potential business

**PC15.** identify sources for arranging money and associated financial and legal challenges

### *Customer Service*

To be competent, the user/individual on the job must be able to:

**PC16.** identify different types of customers

**PC17.** identify customer needs and address them appropriately

**PC18.** follow appropriate hygiene and grooming standards

### *Getting ready for apprenticeship & Jobs*

To be competent, the user/individual on the job must be able to:

**PC19.** create a basic biodata

**PC20.** search for suitable jobs and apply

**PC21.** identify and register apprenticeship opportunities as per requirement

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

**KU1.** need for employability skills

**KU2.** various constitutional and personal values

**KU3.** different environmentally sustainable practices and their importance

**KU4.** Twenty first (21st) century skills and their importance

**KU5.** how to use basic spoken English language

**KU6.** Do and dont of effective communication

**KU7.** inclusivity and its importance

**KU8.** different types of disabilities and appropriate communication and behaviour towards PwD

**KU9.** different types of financial products and services

## Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

## Assessment Guidelines and Assessment Weightage

### Assessment Guidelines

1. Criteria for assessment for each Qualification will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification.

## Qualification Pack

### Minimum Aggregate Passing % at QP Level : 70

(**Please note:** Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

### Assessment Weightage

|----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Sector</b>                                | Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.                                                                      |
| <b>Sub-sector</b>                            | Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.                                                                                                                                                                                     |
| <b>Occupation</b>                            | Occupation is a set of job roles, which perform similar/ related set of functions in an industry.                                                                                                                                                                                                |
| <b>Job role</b>                              | Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.                                                                                                                                                                                |
| <b>Occupational Standards (OS)</b>           | OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts. |
| <b>Performance Criteria (PC)</b>             | Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.                                                                                                                                                                    |
| <b>National Occupational Standards (NOS)</b> | NOS are occupational standards which apply uniquely in the Indian context.                                                                                                                                                                                                                       |
| <b>Qualifications Pack (QP)</b>              | QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.                                                                                                                       |
| <b>Unit Code</b>                             | Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'                                                                                                                                                                                                        |
| <b>Unit Title</b>                            | Unit title gives a clear overall statement about what the incumbent should be able to do.                                                                                                                                                                                                        |
| <b>Description</b>                           | Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.                                                                                                                   |
| <b>Scope</b>                                 | Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.                                                                                            |

|                                         |                                                                                                                                                                                                                                                                                                                                                                        |
|-----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Knowledge and Understanding (KU)</b> | Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.                                                                                                                                               |
| <b>Organisational Context</b>           | Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.                                                                                                                                                                       |
| <b>Technical Knowledge</b>              | Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.                                                                                                                                                                                                                                                               |
| <b>Core Skills/ Generic Skills (GS)</b> | Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles. |
| <b>Electives</b>                        | Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.                                                                            |
| <b>Options</b>                          | Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.                                                                                                                                                          |
