SGJ/Q4104: Plastic Recycling Micro Entrepreneur

Brief Job Description

A Plastic Recycling Micro Entrepreneur sets up a unit for recycling of plastic waste and converting into different recycled products. He/she deals with suppliers of raw material, technology, and other input material required for the recycling process. He has a sound understanding of the recycling process, technologies/ machines used and the end recycled product. During the same, ensures compliance related to setting up the business, statutory compliance for running the business and other type of environmental compliance that are required in the sector. He/she is responsible for financial management, people management, networking, market analysis and overall maintenance and sustenance of the business. He also manages the sales and customers of the recycled products.

Personal Attributes

The individual is required to have good interpersonal and problem solving skills. The individual must be self-driven and organized with their work and act with integrity while performing multiple task for the customers with quality deliverables.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [SGJ/N4107: Basic of waste management and market survey for the waste supply chain](#)
2. [SGJ/N4111: Learn financial budget and developing business plans](#)
3. [SGJ/N4112: Assess various compliance with applicable statutory laws, policies and procedures in Recycling Unit](#)
4. [SGJ/N4113: Ensure proper operation of recycling unit](#)
5. [SGJ/N4114: Ensure Quality of production](#)
6. [SGJ/N4117: Maintain Environment, Health & Safety at Plastic recycling manufacturing unit](#)
7. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

SGJ/N4107: Basic of waste management and market survey for the waste supply chain

Description

MRF Entrepreneur sets up a MRF unit for segregating collected waste in the form of paper, cardboard, plastic, metal, glass, etc. He/she collaborates with waste collectors, aggregators, recyclers, etc for buying and selling waste material. During the same, ensures compliance related to setting up the business, statutory compliance for running the business and other type of environmental compliance that are required in the sector. He/she is responsible for financial management, people management, networking, market analysis and overall maintenance and sustenance of the business.

Scope

The scope covers the following :

- Understanding of waste and process of waste management
- Assess the demand of the different types of waste
- Ability to develop a network with waste collectors

Elements and Performance Criteria

Basic of waste management and market survey for the waste supply chain

To be competent, the user/individual on the job must be able to:

- PC1.** explain different component of waste management from source to disposal
- PC2.** explain waste generation and its characterization at different sources and recognition of different types of waste material
- PC3.** explain different types of waste, its recyclability and market price
- PC4.** provide detail of vendor, supplier and buyers related to MRF operation and business
- PC5.** explain the potential market for the supply of recycled products
- PC6.** show how to identify different types of waste material
- PC7.** describe supply chain of waste material
- PC8.** show how to survey of demand of recycled products in the market
- PC9.** show how to do survey the other Recycling units operational in the nearby area and knowing their working

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organizations reporting structure
- KU2.** organizations documentation policy.
- KU3.** organizational culture
- KU4.** schedule of waste transportation vehicles

Qualification Pack

- KU5.** signs, symbols and colour codes used for solid waste management
- KU6.** different ways of handling and collecting of recyclable waste
- KU7.** precautions in carrying and transportation of waste
- KU8.** basic skills required to perform the task of Plastic Recycling Entrepreneur

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** fill up relevant documents
- GS2.** read vernacular language.
- GS3.** understand the various colour codes used in waste management.
- GS4.** express statements or information clearly so that others can understand.
- GS5.** understand the main points of simple discussions.
- GS6.** follow organization rule-based decision making process.
- GS7.** planning and organization of work to meet schedule.
- GS8.** work constructively and collaboratively with others.
- GS9.** communicate and create awareness.
- GS10.** recognize problems & approach relevant authority.
- GS11.**
 - critically evaluate information obtained from supervisor and co-workers to perform day to
 - day activities.
- GS12.** ask questions for better understanding.

SGJ/N4111: Learn financial budget and developing business plans

Description

This unit explain about financial budget and developing business plans

Scope

The scope covers the following :

- enterprise in plastic recycling
- process of managing the entrepreneurial activities
- how to comply with rules and regulations

Elements and Performance Criteria

Learn financial budget and developing business plans

To be competent, the user/individual on the job must be able to:

- PC1.** discuss how to decide overall capacity of the Recycling unit based on the raw material/land/machine/funds available
- PC2.** explain different Recycling unit models based on the capacity, process, and technologies and its related cost
- PC3.** explain different cost component involved in establishing and operation of Recycling unit
- PC4.** describe parameters for the identification of land for Recycling unit
- PC5.** describe parameter for the selection of machines and technologies
- PC6.** discuss and assess financial requirement to set up Recycling unit -fixed and working capital requirements
- PC7.** explain the role of logistic cost involved
- PC8.** describe various financial support mechanisms from central/state government/ULB/Corporate
- PC9.** explain the methods for raising finances including components of loan applications for fund raising
- PC10.** identify vendors for raw material, technology/machinery, tools and equipment and other input material
- PC11.** identify skilled workforce suitable for the unit
- PC12.** discuss and introduce effective resource management techniques including human resource management, land use management, and logistic cost management
- PC13.** explain monitoring, reviewing and verification system for Cost cutting and performance evaluation
- PC14.** outline the importance of time management and leadership skills
- PC15.** develop a strategy to target the potential buyers
- PC16.** identify the operational challenges in setting up Recycling unit and mitigation strategy
- PC17.** identify ways to assist colleagues positively to maximize effectiveness and efficiency in carrying out tasks

Qualification Pack

- PC18.** demonstrate opening of bank account with the required facilities to conduct business transactions
- PC19.** demonstrate the process of maintaining book of accounts
- PC20.** demonstrate the process of reviewing the business account regularly to ensure the profitability of the business
- PC21.** demonstrate the internal and external audit of funds
- PC22.** demonstrate responsible and disciplined behaviour at the project site
- PC23.** demonstrate how to promote a friendly, co-operative environment that is conducive to employee's sense of belonging
- PC24.** demonstrate how to escalate grievances and problems to appropriate authority as per procedure and to resolve them and avoid conflict
- PC25.** demonstrate how to promote a safe and interactive environment
- PC26.** demonstrate time management for raw material procurement and product delivery

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organizations reporting structure
- KU2.** organizations documentation policy
- KU3.** organizational culture
- KU4.** schedule of waste transportation vehicles
- KU5.** signs, symbols and colour codes used for solid waste management
- KU6.** different ways of handling and collecting of recyclable waste.
- KU7.** precautions in carrying and transportation of waste
- KU8.** basic skills required to perform the task of Recyclable waste collector and Segregator

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** fill up relevant documents
- GS2.** read vernacular language.
- GS3.** understand the various colour codes used in waste management.
- GS4.** express statements or information clearly so that others can understand.
- GS5.** understand the main points of simple discussions.
- GS6.** follow organization rule-based decision making process.
- GS7.** planning and organization of work to meet schedule

SGJ/N4112: Assess various compliance with applicable statutory laws, policies and procedures in Recycling Unit

Description

This unit explain about various compliance with applicable statutory laws, policies and procedures in Recycling Unit

Scope

The scope covers the following :

- statutory compliances and procedures associated with the operation and management of Recycling unit

Elements and Performance Criteria

Assess various compliance with applicable statutory laws, policies and procedures in a Recycling Unit

To be competent, the user/individual on the job must be able to:

- PC1.** identify local authorities having a bearing on business process
- PC2.** explain waste management rules associated with the unit
- PC3.** explain hazardous waste management and trans boundary movement rule 2016
- PC4.** explain how to co-ordinate with government authorities/local authorities, corporations etc. to comply with their regulations relating to Recycling unit and illustrate applicable statutory laws, policies, standard, permissions and compliances to Recycling unit
- PC5.** explain procedures to obtain clearance of pollution control board
- PC6.** demonstrate methods of completing business registration, associated legal formalities and compliances
- PC7.** show how to maintain records

Knowledge and Understanding (KU)

SGJ/N4113: Ensure proper operation of recycling unit

Description

This unit explain about proper operation of recycling unit

Scope

The scope covers the following :

- process of converting plastic waste into chips
- Information of suppliers of raw material, technology/ machinery, tools and other input material
- Knowledge of specific machinery, raw material and end product specification
- Knowledge of procedure for preparing raw material quality report
- Understanding of documentation that is required to be done for the end product, its packaging and dispatch

Elements and Performance Criteria

Operation of Recycling unit to convert plastic waste to chips

To be competent, the user/individual on the job must be able to:

- PC1.** discuss about Knowledge of raw material specification of the chip- quality and quantity
- PC2.** discuss timely ordering of raw material, machinery and other requirements for the recycling process
- PC3.** discuss about knowledge of procedures to conduct quality analysis of the raw material received at the unit
- PC4.** discuss procedure to prepare quality report of the raw material received
- PC5.** discuss about knowledge of pre- process requirements for preparing the feed stock for recycling
- PC6.** discuss about knowledge of machines and technology required for making chips and demonstrate practical experience of all the theoretical training provided in the module
- PC7.** discuss about knowledge of SOP (process of segregation, washing, grinding, and cleaning) for converting plastic waste into chips
- PC8.** discuss about knowledge of market of the recycled product
- PC9.** discuss about ability to develop communication and marketing strategy for the products
- PC10.** discuss ability to develop a brand for the product
- PC11.** discuss about packing of the end product for sale and demonstrate how to pack and store recycled products
- PC12.** discuss about knowledge of necessary documentation for facility and for dispatch of end product
- PC13.** develop a sequence of operation in the Recycling unit for optimum utilization of workforce and material and demonstrate practical experience of all the theoretical training provided in the module

Qualification Pack

- PC14.** • ● Discuss about the uses of following equipment given below
- o Conveyor belt
 - o Hydraulic baler
 - o Shredder
 - o Electric panel
 - o Cutter
 - o Grinder
 - o Hot and cold press, etc
 - and demonstrate how to ensure proper functioning and use of following equipments
 - o Conveyor belt
 - o Hydraulic baler
 - o Shredder
 - o Electric panel
 - o Cutter
 - o Grinder
 - o Hot and cold press, etc

PC15. describe how to review production reports and resolve challenges encountered in daily operation

PC16. explain case studies on waste to wealth

PC17. explain how to create hospitable, friendly and productive work environment

PC18. explain the value proposition of the products from the point of view of marketing

PC19. explain how to effectively market the products

Operations of Recycling Unit to convert plastic waste into granules

To be competent, the user/individual on the job must be able to:

- PC20.** discuss knowledge of raw material specification of the granule- quality and quantity and demonstrate practical experience of day-to-day functioning of plastic grinding facility
- PC21.** discuss timely ordering of raw material, machinery and other requirements for the recycling process
- PC22.** discuss about knowledge of procedures to conduct quality analysis of the raw material received at the unit and demonstrate practical experience of all the theoretical training provided in the module
- PC23.** discuss procedure to prepare quality report of the raw material received
- PC24.** discuss about knowledge of pre- process requirements for preparing the feed stock for recycling
- PC25.** discuss about knowledge of machines and technology required for making granule
- PC26.** discuss about knowledge of SOP (process of segregation, washing, grinding, and extrusion) for converting plastic waste into granule
- PC27.** discuss about knowledge of market of the recycled product
- PC28.** discuss about ability to develop communication and marketing strategy for the products
- PC29.** discuss packing of the end product for sale and demonstrate Packing of the end product for sale
- PC30.** discuss ability to develop a brand for the product
- PC31.** discuss about knowledge of necessary documentation for facility and for dispatch of end product

Operations of Recycling Unit to convert plastic waste into boards

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC32.** discuss knowledge of raw material specification of the board- quality and quantity
- PC33.** discuss about timely ordering of raw material, machinery and other requirements for the recycling process and showcase some practical experience of day-to-day functioning of plastic grinding facility
- PC34.** discuss about knowledge of procedures to conduct quality analysis of the raw material received at the unit
- PC35.** discuss procedure to prepare quality report of the raw material received
- PC36.** discuss about knowledge of pre- process requirements for preparing the feed stock for recycling
- PC37.** discuss about knowledge of machines and technology required for making board
- PC38.** discuss about knowledge of SOP process of segregation, washing, grinding, chiller, boiler, hot and cold press, cutter) for converting plastic waste into boards and showcase some practical experience of all the theoretical training provided in the module
- PC39.** discuss about knowledge of market of the recycled product
- PC40.** discuss about ability to develop communication and marketing strategy for the products
- PC41.** discuss about packing of the end product for sale and demonstrate Packing of the end product for sale
- PC42.** discuss about ability to develop a brand for the product
- PC43.** discuss about knowledge of necessary documentation for facility and for dispatch of end product

Processing of LDPE plastic waste into LDPE Recycled Sheets

To be competent, the user/individual on the job must be able to:

- PC44.** discuss about raw material specification of the sheet quality and quantity
- PC45.** discuss about knowledge of procedures to conduct quality analysis of the raw material received at the unit
- PC46.** discuss about procedure to prepare quality report of the raw material received
- PC47.** discuss about knowledge of pre-process requirements for preparing the LDPE sheets for recycling known as 'Layering Process' and demonstrate practical experience of day-to-day functioning of LDPE plastic waste sheet press machinery, facility, and process
- PC48.** discuss about knowledge of machines and technology required for making LDPE sheets and demonstrate practical experience of all the theoretical training provided in the module
- PC49.** discuss about knowledge of SOP (process of segregation, washing, cleaning, and cutting) for converting LDPE plastic waste into sheet
- PC50.** discuss about LDPE Plastic Waste Recycled sheet designing and production
- PC51.** discuss about packing of the end product for sale and demonstrate Packing of the end product for sale
- PC52.** discuss how to maintain necessary documentation for facility and for dispatch of end product

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organizations reporting structure
- KU2.** organizations documentation policy

Qualification Pack

- KU3.** organizational culture
- KU4.** schedule of waste transportation vehicles
- KU5.** signs, symbols and colour codes used for solid waste management
- KU6.** different ways of handling and collecting of recyclable waste.
- KU7.** precautions in carrying and transportation of waste
- KU8.** basic skills required to perform the task of Recyclable waste collector and Segregator

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** fill up relevant documents.
- GS2.** read vernacular language.
- GS3.** understand the various colour codes used in waste management.
- GS4.** express statements or information clearly so that others can understand.
- GS5.** understand the main points of simple discussions.
- GS6.** follow organization rule-based decision making process.
- GS7.** planning and organization of work to meet schedule.
- GS8.** work constructively and collaboratively with others
- GS9.** communicate and create awareness.
- GS10.** recognize problems & approach relevant authority.
- GS11.**
 - critically evaluate information obtained from supervisor and co-workers to perform day to
 - day activities.
- GS12.** ask questions for better understanding

<i>Operations of Recycling Unit to convert plastic waste into boards</i>	16	9	-	-
PC32. discuss knowledge of raw material specification of the board- quality and quantity	1	-	-	-
PC33. discuss about timely ordering of raw material, machinery and other requirements for the recycling process and showcase some practical experience of day-to-day functioning of plastic grinding facility	1	3	-	-
PC34. discuss about knowledge of procedures to conduct quality analysis of the raw material received at the unit	2	-	-	-
PC35. discuss procedure to prepare quality report of the raw material received	2	-	-	-
PC36. discuss about knowledge of pre- process requirements for preparing the feed stock for recycling	2	-	-	-
PC37. discuss about knowledge of machines and technology required for making board	1	-	-	-
PC38. discuss about knowledge of SOP process of segregation, washing, grinding, chiller, boiler, hot and cold press, cutter) for converting plastic waste into boards and showcase some practical experience of all the theoretical training provided in the module	1	3	-	-
PC39. discuss about knowledge of market of the recycled product	1	-	-	-
PC40. discuss about ability to develop communication and marketing strategy for the products	2	-	-	-
PC41. discuss about packing of the end product for sale and demonstrate Packing of the end product for sale	1	3	-	-
PC42. discuss about ability to develop a brand for the product	1	-	-	-

Qualification Pack

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC43. discuss about knowledge of necessary documentation for facility and for dispatch of end product	1	-	-	-
<i>Processing of LDPE plastic waste into LDPE Recycled Sheets</i>	10	8	-	-
PC44. discuss about raw material specification of the sheet quality and quantity	1	-	-	-
PC45. discuss about knowledge of procedures to conduct quality analysis of the raw material received at the unit	1	-	-	-
PC46. discuss about procedure to prepare quality report of the raw material received	1	-	-	-
PC47. discuss about knowledge of pre-process requirements for preparing the LDPE sheets for recycling known as 'Layering Process' and demonstrate practical experience of day-to-day functioning of LDPE plastic waste sheet press machinery, facility, and process	1	3	-	-
PC48. discuss about knowledge of machines and technology required for making LDPE sheets and demonstrate practical experience of all the theoretical training provided in the module	1	3	-	-
PC49. discuss about knowledge of SOP (process of segregation, washing, cleaning, and cutting) for converting LDPE plastic waste into sheet	1	-	-	-
PC50. discuss about LDPE Plastic Waste Recycled sheet designing and production	2	-	-	-
PC51. discuss about packing of the end product for sale and demonstrate Packing of the end product for sale	-	2	-	-
PC52. discuss how to maintain necessary documentation for facility and for dispatch of end product	2	-	-	-
NOS Total	60	40	-	-

Qualification Pack

SGJ/N4114: Ensure Quality of production

Description

This unit explain about Quality of production

Scope

The scope covers the following :

- requirement of time and raw material for timely completion of activity
- maintain quality of recycling process and end product

Elements and Performance Criteria

Quality check and control

To be competent, the user/individual on the job must be able to:

- PC1.** discuss Raw material specification of the sheet quality and quantity
- PC2.** discuss about Quality Analysis of the raw material supplied with respect to percentage of contamination (presence of unwanted material such as dust, inert, other grades of plastic, moisture, other elements, etc
- PC3.** discussing about overseeing the preparation of quality report based on above analysis
- PC4.** ensuring that raw material is utilised to its full potential and the rate of wastage is at the minimum
- PC5.** ensuring that the SOPs are followed during the recycling process
- PC6.** ensure the process is completed within time limit
- PC7.** ensuring the products are manufactured as per specifications of the customer
- PC8.** discuss about conducting quality assessment of the end product before dispatch
- PC9.** discuss ability to introduce mitigation measure in case of breach in quality
- PC10.** ensure proper stocking of product as per the quality specifications
- PC11.** ensuring all the worker and staff are working as per the plan
- PC12.** demonstrate practical experience of monitoring the working of machines
- PC13.** demonstrate practical experience of monitoring the process of recycling
- PC14.** demonstrate practical experience of monitoring the quality of end product
- PC15.** show how understanding of steps that can be taken to maintain and improve the quality

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organizations reporting structure
- KU2.** organizations documentation policy
- KU3.** organizational culture
- KU4.** schedule of waste transportation vehicles

Qualification Pack

- KU5.** signs, symbols and colour codes used for solid waste management
- KU6.** different ways of handling and collecting of recyclable waste.
- KU7.** precautions in carrying and transportation of waste.
- KU8.** basic skills required to perform the task of Recyclable waste collector and Segregator

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** fill up relevant documents.
- GS2.** read vernacular language.
- GS3.** understand the various colour codes used in waste management.
- GS4.** express statements or information clearly so that others can understand.
- GS5.** understand the main points of simple discussions.
- GS6.** follow organization rule-based decision making process
- GS7.** planning and organization of work to meet schedule.
- GS8.** work constructively and collaboratively with others.
- GS9.** communicate and create awareness.
- GS10.** recognize problems & approach relevant authority.
- GS11.**
 - critically evaluate information obtained from supervisor and co-workers to perform day to
 - day activities.
- GS12.** ask questions for better understanding.

SGJ/N4117: Maintain Environment, Health & Safety at Plastic recycling manufacturing unit

Description

This unit is about maintaining Environment, Health & Safety at Plastic recycling manufacturing unit

Scope

The scope covers the following :

- Maintain standard health and workplace safety
- Organize safety awareness sessions and participate in safety drills
- Use and maintain protective safety gears

Elements and Performance Criteria

Maintain Environment, Health & Safety at Plastic recycling manufacturing unit

To be competent, the user/individual on the job must be able to:

- PC1.** identify the requirements for safe work area
- PC2.** explain how to Administer first aid.demonstrate how to Administer first aid.
- PC3.** identify the personal protective equipment used for the specific purpose and illustrate the personal protective equipment used for the specific purpose
- PC4.** identify the heavy electrical and mechanical equipment's associated with manufacturing and show how to Identify the heavy electrical and mechanical equipment's associated with plastic recycling facility
- PC5.** identify work safety procedures and instructions to operate plastic recycling facility
- PC6.** explain occupational health & safety standards and regulations for Plastic recycling process and demonstrate how to Identify and perform work safety procedures and instructions to operate plastic recycling machines
- PC7.** demonstrate good housekeeping practices and infection control guidelines
- PC8.** demonstrate how to Dispose- off any waste materials in accordance with safe working practices and procedures.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** company occupational safety and health policy
- KU2.** company's medical policy
- KU3.** personal protective equipments (PPEs) required for safe operation
- KU4.** occupational health and safety (OHS) standards for workplace and machine safety
- KU5.** risk identification and mitigation procedures
- KU6.** workplace safety procedures including emergency evacuation, first aid procedures among others

Qualification Pack

KU7. understand work safety procedures and instructions to operate plastic recycling machines

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** how to be able to read safety instructions and warning signage
- GS2.** fill up documentation applicable to ones role
- GS3.** read instruction and safety manuals.
- GS4.** express statements or information clearly so that others can hear and understand
- GS5.** participate in and understand the main points of simple discussions
- GS6.** effectively communicate the danger
- GS7.** make decisions pertaining to safety procedures at workplace
- GS8.** identify need of first aid and render it accordingly
- GS9.** report potential sources of danger and wear appropriate safety gear to avoid accidents
- GS10.** planning of work and using tools in an organized manner to avoid accidents/incidents
- GS11.** schedule daily activities and drawing up priorities related to workplace safety
- GS12.** use of safety equipment such as fire extinguisher during fire accidents
- GS13.** use personal protective equipments (ppes) such as protective gear, goggles, caps, shoes, etc
- GS14.** follow code of safety conduct
- GS15.**
 - manage relationships with co-workers and managers of the who may be stressed, frustrated,
 - confused or angry
- GS16.** recognize problems and search for solutions
- GS17.** choose best methods to complete assigned tasks
- GS18.** identify problems immediately and take up solutions quickly to resolve delays
- GS19.** assess situation & identify appropriate control measures
- GS20.** critically evaluate information obtained from customers, supervisor and co-workers to perform day to day activities
- GS21.** initiate and take-up own working and learning.

Qualification Pack

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e-mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
