SGJ/Q5201: Environmental Impact Assessor

Brief Job Description

The Environmental Impact Assessor evaluates the environmental effects of proposed projects to ensure regulatory compliance. Key responsibilities include applying EIA and audit concepts, conducting project screening and public consultations, monitoring baseline environments, and analyzing samples. The role also involves using GIS tools and predictive models, facilitating stakeholder participation, and developing Environmental Management Plans for sustainable project implementation.

Personal Attributes

The job requires the individual to have analytical thinking, ethical responsibility, communication, problem-solving, and project management skills, along with adaptability, teamwork, and an eye for detail to assess environmental impacts effectively and ensure sustainable project outcomes.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [SGJ/N6801: Introduce Environmental Acts, Rules, Regulations, and Standards and concept of Environmental Impact Assessment and Audit](#)
2. [SGJ/N6802: Perform Screening, Scoping, Public Consultation, Categorization of Projects, and Environmental Clearance Procedures](#)
3. [SGJ/N5901: Monitor Baseline Environment and Apply Sampling Methods](#)
4. [SGJ/N6803: Conduct Laboratory Training for Environmental Sample Analysis](#)
5. [SGJ/N6804: Utilize GIS Mapping for Environmental Assessment](#)
6. [SGJ/N6805: Conduct Field Surveys and Apply Prediction Methods and Models for Environmental Impact](#)
7. [SGJ/N6806: Facilitate Public Participation and Analyze Case Studies on Environmental Impact Assessment](#)
8. [SGJ/N6807: Develop and Audit Environmental Management Plans](#)
9. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

SGJ/N6801: Introduce Environmental Acts, Rules, Regulations, and Standards and concept of Environmental Impact Assessment and Audit

Description

This NOS provides foundational knowledge on environmental concepts, key environmental laws and regulations, and the importance of tools like Environmental Impact Assessment (EIA) and environmental audits. It aims to develop awareness and understanding of sustainable practices and regulatory compliance in various sectors.

Scope

The scope covers the following :

- The Scope Covers basic environmental concepts, key environmental laws and standards, and the fundamentals of Environmental Impact Assessment (EIA) and audits to promote regulatory compliance and sustainable practices.

Elements and Performance Criteria

Introduction to Environment.

To be competent, the user/individual on the job must be able to:

- PC1.** Explain the components of the environment.
- PC2.** Describe details about the atmosphere, hydrosphere, lithosphere, and biosphere.
- PC3.** Highlight the necessity of resource management for sustainable development.
- PC4.** Discuss types of pollution, including atmospheric pollution, water pollution, and land pollution, along with their possible causes.
- PC5.** Emphasize the quality of a healthy environment.

Introduction to various Environmental Acts & Rules, Regulations and Standards

To be competent, the user/individual on the job must be able to:

- PC6.** Impart knowledge on important acts linked with EIA.
- PC7.** Explain the roles of various authorities implementing the acts and rules.
- PC8.** Discuss the latest amendments in rules.
- PC9.** Highlight the connection of EIA to various acts.

Concept of Environment Impact Assessment, Environmental Audit, Environmental Impacts, Environmental Impact Statement and role of EIA in society

To be competent, the user/individual on the job must be able to:

- PC10.** Understand the concept of Environment Impact Assessment.
- PC11.** Gain a basic idea about Environmental Audit and various environmental impacts caused by different activities.
- PC12.** Explore the concept of Environmental Impact Statement.
- PC13.** Discuss the connection of EIA to society.

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** Components of the environment and the concept of sustainable development.
- KU2.** Key environmental legislations like the Environment Protection Act, Air Act, Water Act, Biodiversity Act, and Forest Act.
- KU3.** Provisions of the EIA Notification and its relevance.
- KU4.** Role of Environmental Impact Assessment (EIA), Environmental Audit (EA), and Environmental Impact Statement (EIS).
- KU5.** Linkages of EIA with environmental rules and regulations.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and interpret environmental legislations, notifications, and regulatory texts.
- GS2.** Communicate complex legal and regulatory terms in simple language.
- GS3.** Use digital platforms to access current updates on laws and amendments.
- GS4.** Prepare and present summaries or reports on legal provisions.
- GS5.** Interact with authorities and stakeholders on regulatory matters.
- GS6.** Maintain organized records of acts, rules, and guidelines.
- GS7.** Apply critical thinking to analyze legal implications on projects.

SGJ/N6802: Perform Screening, Scoping, Public Consultation, Categorization of Projects, and Environmental Clearance Procedures

Description

This NOS introduces the essential processes involved in Environmental Impact Assessment (EIA), including project screening, scoping, public consultation, and environmental clearance. It also covers the basic structure of EIA reports for various projects and familiarizes learners with key environmental attributes assessed during the EIA process.

Scope

The scope covers the following :

- The Scope Covers the following:
- EIA process including screening, scoping, public consultation, project categorization, and clearance procedures, along with the structure of EIA reports and key environmental attributes for impact assessment.

Elements and Performance Criteria

Concept of Screening, Scoping, Public consultation, categorization of projects & procedure for environmental clearance

To be competent, the user/individual on the job must be able to:

- PC1.** Gain a detailed understanding of project screening.
- PC2.** Learn the categorization of projects with respect to the EIA Notification.
- PC3.** Discuss the procedure and concept of public consultation and its application.
- PC4.** Illustrate the clearance procedures and the role of different authorities.

Basic parts of EIA for different projects

To be competent, the user/individual on the job must be able to:

- PC5.** Explain the procedure of project categorization.
- PC6.** Anticipate the environmental impacts.
- PC7.** Identify project alternatives.
- PC8.** Establish a monitoring program.
- PC9.** Perform an analysis of cost-benefit.
- PC10.** Prepare an Environment Management Plan.
- PC11.** Apply methods of survey.
- PC12.** Conduct survey practice at the project site.
- PC13.** Implement monitoring practices at the site.

Environmental Attributes

To be competent, the user/individual on the job must be able to:

- PC14.** Identify the different types of attributes required for analysis.
- PC15.** Discuss all attributes for a detailed study on air, water, soil, noise, land, socio-economy, biodiversity, etc.

Qualification Pack

PC16. Apply methods for calculating different statistical attributes.

PC17. Understand how to judge the required attributes for a particular project.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Project screening criteria as per EIA Notification.

KU2. Project categorization (A, B1, B2) and clearance requirements.

KU3. Steps involved in public consultation and role of stakeholders.

KU4. Scoping and TOR formulation for EIA studies.

KU5. Roles of different authorities in the clearance process

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Fill out standard forms and formats for environmental clearances.

GS2. Clearly explain the project categorization and clearance process to stakeholders

GS3. Draft and review Terms of Reference (ToR) for EIA studies.

GS4. Prepare checklists for scoping and stakeholder consultations.

GS5. Manage stakeholder communication during public consultations.

GS6. Record and compile minutes or summaries of public consultations.

GS7. Coordinate with consultants, clients, and regulators for timely approvals.

SGJ/N5901: Monitor Baseline Environment and Apply Sampling Methods

Description

This NOS covers assisting in baseline environmental studies and supporting monitoring and sampling of air, water, soil, and noise as per standard procedures to ensure environmental compliance.

Scope

The scope covers the following :

- Assist in recording baseline environmental conditions and support sampling and monitoring of air, water, soil, and noise using standard procedures.

Elements and Performance Criteria

Baseline environment

To be competent, the user/individual on the job must be able to:

- PC1.** discuss the parameter setting for individual themes.
- PC2.** explain the method of setting and selecting parameters.
- PC3.** describe the method of monitoring for each parameter.
- PC4.** illustrate the method of collecting and interpreting baseline data.
- PC5.** Understand the procedure of operating different apparatus/instruments for parameter data collection in the laboratory.

Monitoring & sampling methods

To be competent, the user/individual on the job must be able to:

- PC6.** explore various sampling methods using instruments.
- PC7.** demonstrate the practical operation of instruments.
- PC8.** conduct sampling practices at project sites.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Parameters for air, water, noise, and soil quality.
- KU2.** Selection and setting of parameters for baseline data collection.
- KU3.** Methods of sampling and monitoring protocols.
- KU4.** Use of instruments for field data collection and lab testing.
- KU5.** Interpretation and documentation of environmental baseline data.

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** Record and maintain field logs and sampling sheets accurately.
- GS2.** Operate basic environmental monitoring instruments and equipment.
- GS3.** Use mapping and GIS tools to select sampling locations.
- GS4.** Follow SOPs for environmental monitoring as per national standards
- GS5.** Communicate sampling results to team leads or technical experts
- GS6.** Troubleshoot issues in field data collection and instrumentation.
- GS7.** Ensure compliance with health and safety guidelines during monitoring.
- GS8.** Organize, label, and store samples to prevent cross-contamination.

SGJ/N6803: Conduct Laboratory Training for Environmental Sample Analysis

Description

This NOS tells about competencies required to conduct laboratory training focused on the analysis of environmental samples such as water, soil, air, and waste.

Scope

The scope covers the following :

- This involves delivering hands-on training for analyzing environmental samples like water, air, soil, and waste. It includes preparing training plans, demonstrating laboratory procedures, guiding instrument use, ensuring safety and quality standards, and assessing trainee performance.

Elements and Performance Criteria

Laboratory training for sample

To be competent, the user/individual on the job must be able to:

PC1. Analyze samples of air, water, and soil collected from project sites.

PC2. Operate various laboratory analytical instruments to perform precise analyse

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Field survey techniques and environmental data collection.

KU2. Environmental prediction models and tools

KU3. Parameters influencing prediction accuracy.

KU4. Application of modeling results in mitigation planning.

KU5. Environmental risk identification and estimation.

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Demonstrate sample testing and analytical techniques in a lab setting.

GS2. Train and mentor trainees in using lab instruments and tools.

GS3. Maintain laboratory notebooks and analysis reports.

GS4. Follow lab safety protocols and waste management procedures.

GS5. Calibrate and maintain lab instruments regularly.

GS6. Present test results and discuss deviations, if any.

GS7. Create practical lab worksheets and SOPs for trainees.

Qualification Pack

GS8. Provide constructive feedback and assess trainee performance.

SGJ/N6804: Utilize GIS Mapping for Environmental Assessment

Description

This unit outlines the competencies required to use Geographic Information System (GIS) tools for environmental assessment. It includes understanding GIS concepts, collecting and managing spatial data, creating thematic maps, and analyzing geospatial information to support environmental planning and decision-making.

Scope

The scope covers the following :

- This scope covers the following:
- Use of GIS tools and techniques to collect, analyze, and present spatial data for environmental assessment.

Elements and Performance Criteria

GIS mapping.

To be competent, the user/individual on the job must be able to:

- PC1.** Introduce the concept of GIS and its significance.
- PC2.** describe the tools used to store, visualize, analyze, and interpret geographic data.
- PC3.** explain the application of GIS in Environmental Impact Assessment (EIA) reports.
- PC4.** develop practical understanding of GIS mapping techniques.
- PC5.** demonstrate the application of GIS in site analysis.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Basics of Geographic Information System (GIS).
- KU2.** Role of GIS in site selection, impact analysis, and data visualization.
- KU3.** Layers and attributes used in environmental GIS applications.
- KU4.** GIS tools/software for mapping and analysis.
- KU5.** Integration of GIS data in EIA reporting.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Operate GIS software (e.g., QGIS, ArcGIS) for spatial analysis.
- GS2.** Interpret layers, legends, and thematic maps accurately.
- GS3.** Overlay project data with environmental sensitivity zones.
- GS4.** Create and export maps with appropriate symbology

Qualification Pack

- GS5.** explain GIS outputs to stakeholders or clients.
- GS6.** perform data cleaning, digitization, and georeferencing.
- GS7.** Use satellite imagery and remote sensing data for EIA mapping.
- GS8.** Collaborate with technical and non-technical teams for data visualization.

SGJ/N6805: Conduct Field Surveys and Apply Prediction Methods and Models for Environmental Impact

Description

This unit defines the skills and knowledge required to conduct field surveys and apply prediction methods to assess potential environmental impacts of projects. It includes collecting baseline data, identifying sources of pollution, using appropriate tools and models to predict impacts on air, water, soil, and biodiversity, and interpreting the results to support environmental planning and mitigation strategies.

Scope

The scope covers the following :

- This NOS covers the procedures and techniques for conducting field surveys and applying prediction models to assess environmental impacts. It includes collecting and analyzing environmental data, identifying potential sources of impact, using modeling tools to forecast changes, and interpreting results to support mitigation planning and informed decision-making.

Elements and Performance Criteria

Field visit to different project sites and survey.

To be competent, the user/individual on the job must be able to:

- PC1.** Conduct survey work to gather essential data.
- PC2.** Understand the nature of project activities and their implications.
- PC3.** Anticipate the causes and sources of pollution associated with these activities.

Prediction Methods

To be competent, the user/individual on the job must be able to:

- PC4.** Gain practical experience in applying prediction methods, including the use of wind rose diagrams.
- PC5.** Formulate comprehensive plans for mitigation measures.

Aspects of environment & application of various models for impact prediction

To be competent, the user/individual on the job must be able to:

- PC6.** Understand the important parameters for consideration in prediction model
- PC7.** Gain idea about application of model applications in different projects
- PC8.** Demonstrate the use of model applications with sample data.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Field survey techniques and environmental data collection.
- KU2.** know use of Environmental prediction models and tools
- KU3.** Understand Parameters influencing prediction accuracy.

Qualification Pack

KU4. Application of modeling results in mitigation planning.

KU5. Environmental risk identification and estimation.

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Use GPS devices and field instruments for accurate data collection.

GS2. Fill out field survey forms and checklists systematically.

GS3. Handle field logistics and manage team coordination.

GS4. Apply prediction models using software or templates

GS5. Present model outputs with supporting visuals and interpretation

GS6. Communicate survey findings and impact predictions to stakeholders.

GS7. Work independently and in teams to collect and verify field data.

Qualification Pack

SGJ/N6806: Facilitate Public Participation and Analyze Case Studies on Environmental Impact Assessment

Description

This unit outlines the competencies required to engage stakeholders in the Environmental Impact Assessment (EIA) process and analyze case studies for learning and improvement.

Scope

The scope covers the following :

- The scope covers the facilitation of public participation in the EIA process and the analysis of case studies to enhance understanding and application. It includes organizing public consultations, recording and addressing stakeholder feedback, and studying completed EIA projects to evaluate practices, challenges, and outcomes for improved environmental planning and compliance.

Elements and Performance Criteria

Public participation

To be competent, the user/individual on the job must be able to:

- PC1.** Discuss the necessity of public hearings based on the category of projects.
- PC2.** Explain the process of public participation.
- PC3.** Observe insights from live public hearings.
- PC4.** Understand the concept of an executive summary, queries, and compliances.

Case studies of different projects.

To be competent, the user/individual on the job must be able to:

- PC5.** Learn how to write project reports such as EIA, EMP, EIS, Feasibility Reports, Comprehensive and Rapid EIA, and Executive Reports.
- PC6.** Identify the various chapters to be covered in project reports.
- PC7.** Understand the forms and documents required for attachment by reviewing reports of different projects (new, functional, and expansion).

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Importance and process of public consultation in EIA.
- KU2.** Guidelines for conducting public hearings.
- KU3.** Legal framework supporting public participation.
- KU4.** Case study analysis framework and methodology.
- KU5.** Common public concerns and how to address them.

Generic Skills (GS)

Qualification Pack

User/individual on the job needs to know how to:

- GS1.** Prepare executive summaries and flyers for community outreach.
- GS2.** Facilitate discussions during public hearings and consultations.
- GS3.** Record, compile, and analyze public feedback and queries.
- GS4.** Translate technical terms for non-technical audiences.
- GS5.** Draft case study reports with clear structure and findings.
- GS6.** Use visual aids (charts, maps) to present EIA case studies.
- GS7.** Adhere to ethical standards in representing public opinion.

Qualification Pack

SGJ/N6807: Develop and Audit Environmental Management Plans

Description

This unit outlines the skills and knowledge required to develop, implement, and audit Environmental Management Plans (EMP) for various projects. It includes identifying environmental impacts, proposing mitigation measures, establishing monitoring systems, ensuring legal compliance, and conducting audits to evaluate the effectiveness of the EMP. The NOS also focuses on promoting sustainable practices and continuous improvement in environmental performance.

Scope

The scope covers the following :

- The scope covers the preparation and evaluation of Environmental Management Plans (EMPs) for various projects. It includes identifying environmental impacts, formulating mitigation and monitoring strategies, ensuring regulatory compliance, and conducting audits to assess the effectiveness of EMP implementation. The scope also involves recommending improvements and supporting sustainable environmental practices throughout the project lifecycle.

Elements and Performance Criteria

Environmental Management Plan.

To be competent, the user/individual on the job must be able to:

- PC1.** Discuss the concept of an Environment Management Plan.
- PC2.** Explain various impacts and mitigation measures.
- PC3.** Describe environmental health and safety management.
- PC4.** Illustrate methods for maintaining occupational health.
- PC5.** Explain hazardous management strategies.
- PC6.** Introduce the concept of cleaner production.
- PC7.** Discuss the role of the environment management cell.
- PC8.** Outline a monitoring plan and its implementation.
- PC9.** Highlight budgetary support for the Environment Management Plan (EMP).
- PC10.** Summarize regular compliance procedures and linked authorities.

Environmental Audit.

To be competent, the user/individual on the job must be able to:

- PC11.** Discuss compliance with environmental regulations.
- PC12.** Explain good environmental management practices.
- PC13.** Describe the Eco-Management and Audit Regulation.
- PC14.** Outline post-audit activities.
- PC15.** Highlight the benefits of Environmental Audit.
- PC16.** Introduce the Environmental Audit Programme in India.
- PC17.** Explain Environmental Risk Assessment.

Qualification Pack

- PC18.** Discuss Environmental Quality and Environmental Standards for Environmental Quality Assessment and Monitoring.
- PC19.** Illustrate the Environment Management Cycle.
- PC20.** Conduct self-assessment exercises.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Components of an Environmental Management Plan (EMP).
- KU2.** Mitigation measures for different environmental impacts.
- KU3.** Environmental audit processes and compliance tracking.
- KU4.** Eco-management and audit schemes (e.g., ISO 14001).
- KU5.** Environmental risk assessment and quality standards.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Draft detailed Environmental Management Plans (EMPs).
- GS2.** Prepare audit schedules, reports, and checklists.
- GS3.** Conduct internal audits and compile compliance documentation.
- GS4.** Communicate audit findings to clients and regulatory bodies.
- GS5.** Coordinate with teams to implement mitigation measures.
- GS6.** Track compliance and follow up on corrective actions.
- GS7.** Use Excel or project management tools for monitoring EMPs.

Qualification Pack

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e-mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(**Please note:** Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
