SPF/Q8106: Sports Goods Factory Manager

Brief Job Description

Sports goods factory managers plan, direct and coordinate activities concerned with the production and distribution of sports goods. They plan details of production activities in terms of output quality and quantity, cost, time available and labour requirements. They may manage the production departments of large enterprises or be the managers of small manufacturing companies.

Personal Attributes

Individuals in this role should have attention to details, logical thinking, analytical skills and ability to work for long hours in their quest to attain optimality in resource utilisation. They should be able to display honesty, integrity, professionalism, have confidence, ability to communicate effectively and team working skills.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [SPF/N8115: Plan for Production of Sports Goods](#)
2. [SPF/N8116: Develop Manufacturing systems and Processes](#)
3. [SPF/N8117: Manage Supply Chain of the Factory](#)
4. [SPF/N8114: Maintain Health and Safety at manufacturing workplace](#)
5. [SPF/N1169: Improve workplace resource usage](#)
6. [DGT/VSQ/N0103: Employability Skills \(90 Hours\)](#)

SPF/N8115: Plan for Production of Sports Goods

Description

This unit is about planning for the production of sports goods in a factory

Scope

The scope covers the following :

- Develop a production plan for manufacturing processes
- Create an effective maintenance schedule
- Apply lean management approach to enhance productivity
- Ensure new product development and sustainability

Elements and Performance Criteria

Develop a production plan for manufacturing processes

To be competent, the user/individual on the job must be able to:

- PC1.** design a clear production plan that is clearly communicated and effectively to the team members
- PC2.** design a plan that ensures usage rates are calculated, recorded and communicated to team members to monitor progress
- PC3.** develop and implement production plan for shifts
- PC4.** create a production plan that has a systems thinking outlook
- PC5.** design products with reference to available equipment/capacity and monitor the production processes

Create an effective maintenance schedule

To be competent, the user/individual on the job must be able to:

- PC6.** design a maintenance schedule to ensure equipment availability and implement it according to the production plan
- PC7.** create a clear platform for linkage of maintenance types to the production process efficiency
- PC8.** a preventive maintenance program
- PC9.** prescribe maintenance engineering roles and responsibilities
- PC10.** maintain fundamental requirements of effective preventive maintenance
- PC11.** discuss with production workers' need to be conversant with the maintenance schedule and its specific activities
- PC12.** explain to production workers the life cycle of engineered products and the technologies for maintenance
- PC13.** design plant/equipment maintainability and availability through reliability and maintenance modelling

Apply lean management approach to enhance productivity

To be competent, the user/individual on the job must be able to:

- PC14.** identify necessary process deviations, record them, analyse and take appropriate action

Qualification Pack

- PC15.** minimise barriers to meeting the production plan and take and corrective steps
- PC16.** create quality and productivity information that is analysed and communicated to team members to monitor progress and identify areas for progress
- PC17.** apply total quality management to highlight the importance of quality and waste management
- PC18.** support the team to improve process quality and productivity
- PC19.** build and foster relationships with suppliers and customers to create a lean enterprise
- PC20.** apply concurrent Engineering concepts to rapidly develop low cost, high quality, high quality products for lean production

Ensure new product development and sustainability

To be competent, the user/individual on the job must be able to:

- PC21.** implement new growth platforms for innovations
- PC22.** adopt Innovative production strategies such as lean production methods
- PC23.** converge lean thinking and Total Productive Maintenance (TPM) to present a comprehensive blueprint for business-led change
- PC24.** create value long term planning of facilities, location and layout
- PC25.** execute Value Analysis (VA) and Value Engineering (VE) principles to promote innovations

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organisation standards and procedures followed for productivity and maintenance
- KU2.** components of a master production schedule
- KU3.** coordination of scheduled maintenance to be executed according to plan
- KU4.** interpretation of maintenance reports, Reliability reports, and budget variance reports
- KU5.** requirements for quality systems management
- KU6.** lean systems thinking and its impact on profitability
- KU7.** housekeeping methods and importance
- KU8.** safe disposal methods for waste
- KU9.** methods for minimising environmental damage
- KU10.** different quality control tools such as pareto chart, SPC, cause and effect, scatter diagram
- KU11.** sketches and diagrams for production planning sequences
- KU12.** different types of tools and manufacturing equipment
- KU13.** different types of measuring equipment and techniques
- KU14.** statutory provisions under relevant safety laws, environmental laws, production laws and rules prescribed by relevant authorities
- KU15.** hazards and safety aspects involved, and usage of relevant personal protective equipment
- KU16.** working at heights and appropriate equipment to select
- KU17.** fire precautions such as fire drills
- KU18.** applicable rules set by the government regulatory agencies
- KU19.** various types of machines and maintenance used in the organisation

Qualification Pack

- KU20.** relevant government regulatory agencies, factories Act and regulations
- KU21.** metrology Act and regulations
- KU22.** compulsory standards Act and regulations
- KU23.** environmental management Act and regulations
- KU24.** competition and consumer protection Act and regulations
- KU25.** occupational health and safety Act and regulations
- KU26.** workers' compensation Act
- KU27.** public Health Act and regulations, as applicable

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret information documents sent by internal teams
- GS2.** read equipment manuals and process documents
- GS3.** read requisitions to procurement/stores on the requirement of apparatus, tools etc.
- GS4.** read lean systems thinking documents and its impact on productivity
- GS5.** note down observations (if any) related to operating systems
- GS6.** note down the data for the respective shifts in the log sheets/ online systems as per applicability in the organisation
- GS7.** interpret design diagrams
- GS8.** interpret symbols and measuring instruments
- GS9.** draft equipment manuals and process documents
- GS10.** prepare report

Qualification Pack

Assessment Criteria

SPF/N8116: Develop Manufacturing systems and Processes

Description

This unit is about the management of manufacturing/production processes and related systems and methodologies

Scope

The scope covers the following :

- Design essentials of manufacturing systems
- Plan process systems for manufacturing
- Create management and value systems for manufacturing
- Manage automation systems for manufacturing
- Manage information/ social systems for manufacturing
- Work effectively with others

Elements and Performance Criteria

Design essentials of manufacturing systems

To be competent, the user/individual on the job must be able to:

- PC1.** design the fundamentals of manufacturing systems that are clearly communicated and effectively to the team members
- PC2.** create integrated manufacturing and manufacturing systems designs
- PC3.** design usage rates that are calculated, recorded and communicated to team members to monitor progress
- PC4.** create modes of production and product diversification

Plan process systems for manufacturing

To be competent, the user/individual on the job must be able to:

- PC5.** develop material and technological information flows in manufacturing systems
- PC6.** develop designs for both product planning and process planning to effectively manage the manufacturing process
- PC7.** create a clear platform for linkage of maintenance types to the production process efficiency
- PC8.** design an ergonomic layout to enable manufacturing optimisation
- PC9.** create maintenance engineering roles and responsibilities
- PC10.** train production workers to be conversant with the maintenance schedule and its specific activities
- PC11.** train production workers to understand the life cycle of engineered products and the technologies for maintenance
- PC12.** model plant/equipment maintainability and availability through reliability and maintenance

Create management and value systems for manufacturing

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC13.** design a systems of managerial information flow in manufacturing systems to facilitate manufacturing
- PC14.** create an aggregate production plan with a long term multiple objectives
- PC15.** build teams that use production scheduling tools such PERT and CPM
- PC16.** analyse quality and productivity information and communicated to team members to monitor progress and identify areas for progress
- PC17.** design multiple product inventory management systems approach
- PC18.** introduce production control and quality engineering tools such as JIT and Quality Function Deployment (QFD) to improve systems performance
- PC19.** prepare value and cost flows in manufacturing systems to monitor value creation over time
- PC20.** create manufacturing cost and product cost structure to avoid production technologies that lead to product innovation failures
- PC21.** carry out profit planning and break-even analysis and capital investment analysis for manufacturing
- PC22.** create evaluation methods for capital investment to monitor and ensure growth in the organization
- PC23.** develop long term plans through facilities, location and layout design

Manage automation systems for manufacturing

To be competent, the user/individual on the job must be able to:

- PC24.** use industrial automation through the use of Computer Integrated Manufacture (CIM) and Computer Aided Design (CAD) to enhance efficiency in the manufacturing processes
- PC25.** manage factory automation Computer Aided Designs and Computer Integrated Manufacture by using the automatic machine tools for mass production, numerically Controlled (NC) machines, machine tools, computer-controlled manufacturing systems, flexible Manufacturing System (FMS), automated assembly, automatic materials handling and automatic inspection and testing etc.

Manage information/ social systems for manufacturing

To be competent, the user/individual on the job must be able to:

- PC26.** change pulleys if there are visible sign of wear or damage
- PC27.** apply fundamentals of information technology to enhance the development of a parts oriented production information system
- PC28.** be conversant with the computer based production management system
- PC29.** adopt best practices of manufacturing strategy and tactics to enhance operation effectiveness
- PC30.** develop industrial and manufacturing structure that enhance industrial efficiency
- PC31.** apply manufacturing excellence for future production perspectives

Work effectively with others

To be competent, the user/individual on the job must be able to:

- PC32.** interact (verbal, non-verbal and written) in a gender, disability, and culturally sensitive manner
- PC33.** promote a safe and interactive environment
- PC34.** identify and report inappropriate behaviour (e.g. sexual harassment) to appropriate authority

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organisation standards and procedures followed for manufacturing systems engineering
- KU2.** fundamentals of a manufacturing system engineering
- KU3.** coordination of the information and social systems for manufacturing according to the master production plan
- KU4.** interpretation of value systems for manufacturing in order to minimise costs operating costs and capital costs, and budget variance reports
- KU5.** requirements for manufacturing systems engineering
- KU6.** lean systems thinking and its impact on manufacturing systems engineering
- KU7.** different building blocks of manufacturing systems engineering
- KU8.** sketches and diagrams for manufacturing systems engineering framework
- KU9.** different types of automation tools manufacturing industries
- KU10.** different types of social variables in manufacturing systems engineering
- KU11.** hazards and safety aspects involved, and usage of relevant personal involved in automated environment
- KU12.** working principles of industrial robots
- KU13.** fire precautions, such as fire drills
- KU14.** integration of automation to manufacturing processes
- KU15.** importance of gender and its related concepts such as gender roles, gender equality, gender power relations etc.
- KU16.** POSH (Prevention of Sexual Harassment) Act

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** document and summarize reports
- GS2.** record data on waste disposal at workplace
- GS3.** complete statutory documents relevant to safety and hygiene
- GS4.** read Standard Operating Practices (SOP) documents
- GS5.** make timely decisions for efficient utilization of resources
- GS6.** complete tasks efficiently and accurately within stipulated time
- GS7.** read and interpret information documents sent by internal teams
- GS8.** read equipment manuals and process documents
- GS9.** read requisitions to procurement/stores on the requirement of apparatus, tools etc.
- GS10.** read lean systems thinking documents and its impact on productivity

Qualification Pack

SPF/N8117: Manage Supply Chain of the Factory

Description

This unit is about adopting sustainable practices and optimizing use of resources, especially material, energy and waste, in day-to-day operations at work

Scope

The scope covers the following :

- Plan for logistics
- Take procurement and inventory decisions
- Manage warehousing and storage
- Manage Freight transport

Elements and Performance Criteria

Plan for logistics

To be competent, the user/individual on the job must be able to:

- PC1.** formulate a logistics planning framework to address the demands of the logistics processes
- PC2.** create an integrated logistics network plan within the logistics management and organisation structure
- PC3.** formulate a management framework for usage of the manufacturing materials

Take procurement and inventory decisions

To be competent, the user/individual on the job must be able to:

- PC4.** identify ways to optimize usage of material including water in various tasks/activities/processes
- PC5.** check for spills/leakages in various tasks/activities/processes
- PC6.** create warehouse operations, packaging and unit loads
- PC7.** design strategic issues affecting warehousing
- PC8.** decide different inventory requirements in the supply chain
- PC9.** set the procurement objectives
- PC10.** determine collaborative planning, forecasting and replenishment techniques
- PC11.** differentiate between inventory planning for manufacturing and inventory planning for retailing
- PC12.** list problems associated with the traditional approaches to inventory planning
- PC13.** design order picking and replenishment plans
- PC14.** create Performance monitoring in warehouse management and information
- PC15.** use information and communication technology in the supply chain
- PC16.** conduct benchmarking exercises in distribution operations
- PC17.** monitoring an outsourced logistics operation
- PC18.** provide measures for security and safety in distribution process

Qualification Pack

PC19. adopt logistics and environment best practice

Manage warehousing and storage

To be competent, the user/individual on the job must be able to:

PC20. develop a set of effective warehousing and storage principles

PC21. manage inventory levels

PC22. check containers to check for special handling, damage or contamination of materials

PC23. store inventory received according to any special handling and production requirements

PC24. rotate raw materials and stock to minimise old and outdated inventory

PC25. prepare and distribute monitoring reports in a timely way

PC26. design multiple product inventory management systems approach

PC27. conduct research to determine viability of ventures for sources of materials and services

PC28. evaluate internal/external, local/global environments for threats or opportunities

PC29. compare costs/benefits of utilising local, national and/or international markets

PC30. develop forecasts and Set lot sizes, inventory levels and order lead-time

PC31. document forecasts using graphs and charts in written reports or master file for ordering levels

PC32. evaluate most appropriate and cost-effective carrier or method is used to distribute products

PC33. maintain inventory records by using appropriate computer codes, formatting, charts, spreadsheets, etc.

PC34. develop a production plan for customer order

PC35. record and summarise financial data

PC36. monitor tool/equipment certification regularly by reviewing documentation and through observation of use

PC37. calibrate tools and instruments accurately and correctly

Manage freight transport

To be competent, the user/individual on the job must be able to:

PC38. establish availability of transport and capacity for various goods

PC39. carry out packing, crating, warehousing and storage duties in preparation for site specific program and shipment

PC40. oversee customer-based queues, plan and allocate tasks to meet configuration requirements

PC41. conduct a comparative analysis of in-house versus contracted- out operations

PC42. design logistics planning networks through logistics modelling

PC43. assessing and selecting modes of transport

PC44. use of Intermodal transport and impact of international trade

PC45. ensure adherence to legislation in road freight transport

PC46. provide measures for transportation of hazardous goods

PC47. establish and evaluate fleet management best practices

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** organisation standards and procedures followed for productivity and maintenance
- KU2.** organisation standards and procedures followed for distribution management
- KU3.** fundamentals of a logistics and distribution system
- KU4.** coordination of the information regarding trends that affect logistics and distribution
- KU5.** interpretation of value systems for distribution management in order to minimise costs operating costs and capital costs, and budget variance reports
- KU6.** economic implications of outsourcing goods and services
- KU7.** best practices in distribution management such lean systems thinking and its impact on production processes
- KU8.** different building blocks of distribution management systems
- KU9.** sketches and diagrams for a distribution management system framework
- KU10.** different types of equipment and tools used in warehouses in manufacturing industries
- KU11.** hazards and safety aspects involved, and duties of relevant personal involved in distribution of goods
- KU12.** working principles of warehouse equipment and goods vehicles
- KU13.** procedures for handling dangerous goods
- KU14.** fire precautions, such as fire drills
- KU15.** integration of supply chain to manufacturing processes
- KU16.** relevant government regulatory agencies
- KU17.** the roads and Road Traffic Act and regulations
- KU18.** competition and Consumer Protection Act and regulations

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret information documents sent by internal teams
- GS2.** read equipment manuals and process documents
- GS3.** read requisitions to procurement/stores on the requirement of apparatus, tools etc.
- GS4.** read lean systems thinking documents and its impact on productivity
- GS5.** note down observations (if any) related to operating systems
- GS6.** note down the data for the respective shifts in the log sheets/ online systems as per applicability in the organisation
- GS7.** interpret design diagrams
- GS8.** interpret symbols and measuring instruments
- GS9.** draft equipment manuals and process documents
- GS10.** prepare report

Qualification Pack

SPF/N8114: Maintain Health and Safety at manufacturing workplace

Description

This unit is about ensuring the production of goods and services while observing safety, hygiene and sanitation practices for operations.

Scope

The scope covers the following :

- Develop safety measures at manufacturing processes
- Maintain personal hygiene and safety
- Maintain safety and efficiency of equipment

Elements and Performance Criteria

Develop safety measures at manufacturing processes

To be competent, the user/individual on the job must be able to:

- PC1.** apply suitable measures for protection of workers from chemicals, sharp objects, rotating machines, and loose items
- PC2.** perform visual checks to the safety components (such as protective clothing, machine leakages, gangways, electrical fittings.) prior to their use for concealed wiring purposes in order to ascertain their appropriate specifications and usability
- PC3.** demonstrate necessary checks around the workplace to ensure that the workplace is safe to conduct work
- PC4.** mark clearly on walls and floors where concealed hazards could be posing danger to workers
- PC5.** assist in planning and mark locations of gangways and electrical fixtures/fittings to be installed on walls
- PC6.** arrange machines in the workshop in a logical sequence to promote safe movement between workstations.
- PC7.** design safety and healthy schedule for specific workplaces

Maintain personal hygiene and safety

To be competent, the user/individual on the job must be able to:

- PC8.** create effective routines to ensure healthy and hygienic conditions during all workshop practice processes including transportation of materials within
- PC9.** design work premises that are constantly monitored/inspected for undesirable breaches in the protection provided by health and hygiene measures
- PC10.** perform safety checks before operation of any equipment
- PC11.** wear protective clothing and gear as and when required and ensure adherence to safety guidelines
- PC12.** report potential hazards to the manager immediately
- PC13.** create standard procedures to deal with accidents and emergency situations
- PC14.** use first aid kit as and when required and provide appropriate treatment in case of any injuries

Qualification Pack

Maintain safety and efficiency of equipment

To be competent, the user/individual on the job must be able to:

- PC15.** identify recyclable and non-recyclable, and hazardous waste generated
- PC16.** analyse workshop equipment so that it is maintained to specifications at all times with frequent tests
- PC17.** perform routine checks/tests for occupational related infections
- PC18.** examine all equipment and tools used so that they are decontaminated, cleaned and switched off after use
- PC19.** restrict access only to authorised personnel
- PC20.** implement effective security measures for prevention of theft/sabotage

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** potential hazards, risks and threats based on the nature of work
- KU2.** organisation standards and procedures followed safety, hygiene and sanitation
- KU3.** personal hygiene and fitness requirements
- KU4.** job responsibilities/duties for following work place safety, hygiene and sanitation
- KU5.** personal protective equipment and clothing to be used
- KU6.** safe methods to use in materials and equipment handling
- KU7.** housekeeping methods and importance
- KU8.** safe disposal methods for waste
- KU9.** methods for minimising environmental damage
- KU10.** categorization of waste into dry, wet, recyclable, non-recyclable and items of single-use plastics
- KU11.** waste management and methods of waste disposal
- KU12.** common sources of pollution and ways to minimize it
- KU13.** Different safety units/specifications like wattage, resistance, voltage, frequency, current, kWh, electrical systems, water pressure and their specifications etc.
- KU14.** sketches and diagrams for safety symbols and procedures on the equipment installation
- KU15.** different types of tools and electrical equipment
- KU16.** different types of measuring equipment and techniques
- KU17.** statutory provisions under relevant safety laws, environmental laws, electrical laws and rules prescribed by relevant authorities
- KU18.** hazards and safety aspects involved, and usage of relevant personal protective equipment
- KU19.** selection of appropriate equipment to work with Fire precautions such as fire drills
- KU20.** applicable rules set by the Government regulatory agencies
- KU21.** types of machines used in the in an organisation
- KU22.** types of lubricants and their recommended usage

Generic Skills (GS)

Qualification Pack

User/individual on the job needs to know how to:

- GS1.** record data on waste disposal at workplace
- GS2.** complete statutory documents relevant to safety and hygiene
- GS3.** read Standard Operating Practices (SOP) documents
- GS4.** make timely decisions for efficient utilization of resources
- GS5.** complete tasks efficiently and accurately within stipulated time
- GS6.** work with supervisors/team members to carry out work related tasks

SPF/N1169: Improve workplace resource usage

Description

This unit is about increasing efficiencies and maximizing the use of materials, particularly resources, energy, and trash, in workplace operations.

Scope

The scope covers the following :

- conservation procedures for materials
- power conservation methods
- waste management/recycling procedures

Elements and Performance Criteria

conservation procedures for materials

To be competent, the user/individual on the job must be able to:

- PC1.** determine ways to optimize usage of material including water in various tasks/activities/processes
- PC2.** examine various tasks/activities/processes for spills/leaks
- PC3.** eliminate spills/leaks and escalate to appropriate authorities if they cannot be corrected
- PC4.** conduct routine cleaning of tools, machines, and equipment

power conservation practices

To be competent, the user/individual on the job must be able to:

- PC5.** determine ways to optimize usage of electricity/energy in various tasks/activities/processes
- PC6.** ensure if the equipment/machine is functioning normally before commencing work and rectify wherever required
- PC7.** report equipment malfunctions (fumes/sparks/emission/vibration/noise) and lapses in maintenance
- PC8.** ensure that all electrical equipment and appliances are correctly connected and turned off when not in use

waste management/recycling procedures

To be competent, the user/individual on the job must be able to:

- PC9.** determine recyclable and non-recyclable, and hazardous waste generated
- PC10.** separate waste into different categories
- PC11.** discard non-recyclable waste appropriately
- PC12.** store recyclable and reusable materials in a designated spot

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** potential hazards, risks and threats based on the nature of work
- KU2.** layout of the workstation and electrical and thermal equipment used
- KU3.** organizations' procedures for minimizing waste
- KU4.** efficient and inefficient utilization of material and water
- KU5.** ways of efficiently managing material and water in the process
- KU6.** basics of electricity and prevalent energy efficient devices
- KU7.** ways to recognize common electrical problems
- KU8.** common practices of conserving electricity
- KU9.** usage of different colours of dustbins
- KU10.** categorization of waste into dry, wet, recyclable, non-recyclable and items of single-use plastics
- KU11.** waste management and methods of waste disposal
- KU12.** common sources of pollution and ways to minimize it

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** record data on waste disposal at workplace
- GS2.** complete statutory documents relevant to safety and hygiene
- GS3.** read Standard Operating Practices (SOP) documents
- GS4.** communicate with colleagues on the significance of greening of jobs
- GS5.** make timely decisions for efficient utilization of resources
- GS6.** complete tasks efficiently and accurately within stipulated time
- GS7.** work with supervisors/team members to carry out work related tasks
- GS8.** identify cause and effect of greening of jobs

DGT/VSQ/N0103: Employability Skills (90 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** understand the significance of employability skills in meeting the current job market requirement and future of work
- PC2.** identify and explore learning and employability relevant portals
- PC3.** research about the different industries, job market trends, latest skills required and the available opportunities

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC4.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC5.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC6.** recognize the significance of 21st Century Skills for employment

Qualification Pack

- PC7.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life
- PC8.** adopt a continuous learning mindset for personal and professional development

Basic English Skills

To be competent, the user/individual on the job must be able to:

- PC9.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC10.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC11.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC12.** identify career goals based on the skills, interests, knowledge, and personal attributes
- PC13.** prepare a career development plan with short- and long-term goals

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC14.** follow verbal and non-verbal communication etiquette while communicating in professional and public settings
- PC15.** use active listening techniques for effective communication
- PC16.** communicate in writing using appropriate style and format based on formal or informal requirements
- PC17.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC18.** communicate and behave appropriately with all genders and PwD
- PC19.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC20.** identify and select reliable institutions for various financial products and services such as bank account, debit and credit cards, loans, insurance etc.
- PC21.** carry out offline and online financial transactions, safely and securely, using various methods and check the entries in the passbook
- PC22.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC23.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC24.** operate digital devices and use their features and applications securely and safely
- PC25.** carry out basic internet operations by connecting to the internet safely and securely, using the mobile data or other available networks through Bluetooth, Wi-Fi, etc.
- PC26.** display responsible online behaviour while using various social media platforms

Qualification Pack

- PC27.** create a personal email account, send and process received messages as per requirement
- PC28.** carry out basic procedures in documents, spreadsheets and presentations using respective and appropriate applications
- PC29.** utilize virtual collaboration tools to work effectively

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC30.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC31.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC32.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC33.** identify different types of customers and ways to communicate with them
- PC34.** identify and respond to customer requests and needs in a professional manner
- PC35.** use appropriate tools to collect customer feedback
- PC36.** follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

- PC37.** create a professional Curriculum vitae (Résumé)
- PC38.** search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively
- PC39.** apply to identified job openings using offline /online methods as per requirement
- PC40.** answer questions politely, with clarity and confidence, during recruitment and selection
- PC41.** identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** need for employability skills and different learning and employability related portals
- KU2.** various constitutional and personal values
- KU3.** different environmentally sustainable practices and their importance
- KU4.** Twenty first (21st) century skills and their importance
- KU5.** how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up
- KU6.** importance of career development and setting long- and short-term goals
- KU7.** about effective communication
- KU8.** POSH Act
- KU9.** Gender sensitivity and inclusivity
- KU10.** different types of financial institutes, products, and services

Qualification Pack

- KU11.** components of salary and how to compute income and expenditure
- KU12.** importance of maintaining safety and security in offline and online financial transactions
- KU13.** different legal rights and laws
- KU14.** different types of digital devices and the procedure to operate them safely and securely
- KU15.** how to create and operate an e- mail account
- KU16.** use applications such as word processors, spreadsheets etc.
- KU17.** how to identify business opportunities
- KU18.** types and needs of customers
- KU19.** how to apply for a job and prepare for an interview
- KU20.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and write different types of documents/instructions/correspondence in English and other languages
- GS2.** communicate effectively using appropriate language in formal and informal settings
- GS3.** behave politely and appropriately with all to maintain effective work relationship
- GS4.** how to work in a virtual mode, using various technological platforms
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down the proportion of marks for Theory and Skills Practical for each PC.
2. The assessment for the theory part will be based on the knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for the theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score a minimum of 70% of aggregate marks to successfully clear the assessment.

Qualification Pack

7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Minimum Aggregate Passing % at QP Level : 70

(**Please note:** Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
