Qualification Pack

SSC/Q0505: IT Technical Writer

Brief Job Description

An IT Technical Writer for IT services and application development is responsible for creating technical documentation, such as job aids, help documents, user guides, reference manuals, training materials, online help content, etc. These documents facilitate the transfer of knowledge between application development teams and user teams. They collaborate with cross-functional teams to gather information, utilize documentation tools, and ensure consistency with industry standards. Additionally, they format and publish content across multiple platforms, maintaining and updating documents to reflect changes in products or services.

Personal Attributes

The individual should have excellent collaboration skills to effectively engage with stakeholders and a strong analytical mindset. They should stay informed about evolving technologies, demonstrate a self-driven attitude, and manage tasks efficiently. Adaptability in a fast-paced environment and a continuous drive for improvement and learning are also essential qualities.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [SSC/N0703: Create and Manage Documentation for Knowledge Transfer](#)
2. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

SSC/N0703: Create and Manage Documentation for Knowledge Transfer

Description

This NOS focuses on creating, managing, and publishing technical documentation, including case studies, best practices, project artefacts, reports, minutes, policies, procedures, and work instructions for knowledge sharing with internal or external stakeholders. It involves collaborating with stakeholders, using documentation tools, ensuring accuracy, and following organizational policies and guidelines.

Scope

The scope covers the following :

- Understand Documentation Requirements
- Create Technical Documentation
- Structure and Format Documentation
- Collaborate with Development and User Teams
- Use Documentation Tools and Technologies
- Edit and Proofread Content
- Publish Technical Documentation
- Maintain and Update Documentation
- Use GEN AI in Documentation Creation and Management

Elements and Performance Criteria

Understand Documentation Requirements

To be competent, the user/individual on the job must be able to:

- PC1.** identify the need for technical documentation such as job aids, help documents, user guides, reference manuals, and training materials.
- PC2.** collaborate with application development teams and user teams to understand the technical and functional aspects of the application.
- PC3.** conduct interviews or research to gather necessary information for documentation.

Create Technical Documentation

To be competent, the user/individual on the job must be able to:

- PC4.** write clear, concise, and accurate content for job aids, help documents, training guides, and software manuals.
- PC5.** alter the content to meet the needs of the target audience (end-users, developers, and support teams).
- PC6.** apply proper grammar, style, and tone for user-friendly documentation

Structure and Format Documentation

To be competent, the user/individual on the job must be able to:

- PC7.** organize content in a logical and easy-to-follow structure using headings, subheadings, tables, and lists
- PC8.** create navigable content with cross-references and indexing where necessary.
- PC9.** ensure accessibility and usability, adhering to WCAG guidelines for users with disabilities

Qualification Pack

Collaborate with Development and User Teams

To be competent, the user/individual on the job must be able to:

- PC10.** work with application development teams to understand the software's features and functionalities.
- PC11.** gather feedback from user teams to ensure the documentation meets their needs and is easily understood.
- PC12.** adapt content based on user feedback to improve clarity and usability

Use Documentation Tools and Technologies

To be competent, the user/individual on the job must be able to:

- PC13.** utilize documentation tools (e.g., MS Word, Google Docs, Markdown, and others) to create and format documentation
- PC14.** use version control systems (e.g., Git) to manage updates to documentation
- PC15.** leverage content management systems (CMS) such as Confluence and SharePoint for organizing and sharing documentation.

Edit and Proofread Content

To be competent, the user/individual on the job must be able to:

- PC16.** review and revise documents for technical accuracy, consistency, and adherence to style guides
- PC17.** correct errors in grammar, punctuation, and formatting.

Publish Technical Documentation

To be competent, the user/individual on the job must be able to:

- PC18.** format and publish documentation in appropriate formats (e.g., PDF, HTML, ePub) for distribution
- PC19.** ensure that online help content and other resources are easily accessible to end-users.
- PC20.** maintain version control throughout the publishing process to ensure content accuracy

Maintain and Update Documentation

To be competent, the user/individual on the job must be able to:

- PC21.** regularly update documentation based on software updates, product changes, or user feedback
- PC22.** archive outdated versions of documents following organizational guidelines

Use GEN AI in Documentation Creation and Management

To be competent, the user/individual on the job must be able to:

- PC23.** understand the basics of GEN AI technologies, including its potential applications for technical documentation
- PC24.** identify use cases where GEN AI can improve the speed, efficiency, and accuracy of content creation, such as automatic text generation, content summarization, and translation
- PC25.** use prompt engineering techniques to effectively guide GEN AI tools in generating relevant, high-quality documentation
- PC26.** incorporate GEN AI outputs into documentation workflows, ensuring the content is verified and edited for accuracy and consistency.
- PC27.** utilize GEN AI for content adaptation, helping in scaling documentation for different languages and formats

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the organizations standard operating procedures (SOPs), policies, procedures, and guidelines for creating documents, especially for knowledge sharing
- KU2.** the purpose and scope of the work to be carried out and the importance of staying within these boundaries for documentation tasks.
- KU3.** how to identify the key stakeholders when developing documents (e.g., developers, subject matter experts, end-users).
- KU4.** the roles and responsibilities of the key stakeholders in the documentation process and how to engage them effectively
- KU5.** the procedures for approving, publishing, and updating the organization's knowledge base, along with how to manage this knowledge effectively
- KU6.** the importance of verifying and reviewing information for accuracy and relevance to ensure it is fit for knowledge sharing
- KU7.** how to gather feedback from stakeholders and users to improve documentation
- KU8.** how to incorporate feedback to improve documents, enhancing clarity, quality, and utility
- KU9.** the methods and techniques for publishing and approving documents, especially when working with others, ensuring content is accurate and aligned with organizational standards.
- KU10.** how to use tools, templates, and language standards to convert raw technical information into organized, user-friendly documents.
- KU11.** how to identify sources of information and reference materials for document creation, ensuring they are reliable.
- KU12.** how to review documents to correct common editorial issues like grammar, formatting, and technical accuracy.
- KU13.** how to follow change management procedures, including version control, approvals, and tracking document revisions to ensure documents are always up-to-date and correctly versioned.
- KU14.** the GEN AI technologies, particularly their applications in documentation tasks such as content generation, summarization, and editing
- KU15.** how to use prompt engineering to interact effectively with GEN AI tools for generating accurate, relevant documentation content

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** maintain work-related notes and records
- GS2.** read the relevant literature to learn about the latest developments in the work
- GS3.** listen attentively to understand the information/ instructions being shared by the speaker
- GS4.** communicate clearly and politely with co-workers and clients
- GS5.** coordinate with co-workers to achieve work objectives
- GS6.** plan and prioritize tasks to ensure timely completion

Qualification Pack

- GS7.** identify possible disruptions to work and take appropriate preventive measures
- GS8.** take quick decisions to deal with workplace emergencies/ accidents
- GS9.** evaluate all possible solutions to a problem to select the best one

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
Helpdesk	Helpdesk is an entity to which the customers will report their IT problems. IT Service Helpdesk Attendant is responsible for managing the helpdesk.
Helpdesk	Helpdesk is an entity to which the customers will report their IT problems. IT Service Helpdesk Attendant is responsible for managing the helpdesk.
Helpdesk	Helpdesk is an entity to which the customers will report their IT problems. IT Service Helpdesk Attendant is responsible for managing the helpdesk.
Helpdesk	Helpdesk is an entity to which the customers will report their IT problems. IT Service Helpdesk Attendant is responsible for managing the helpdesk.
