SSC/Q0922: IT Forensic Analyst

Brief Job Description

An IT Forensic analyst is responsible for a comprehensive range of tasks aimed at investigating digital incidents and preserving evidence. This includes ensuring necessary authorizations are in place for conducting forensic evidence seizure and securing physical scenes to prevent unauthorized access and protect evidence from alteration or damage. They identify potential sources of data, handle digital devices carefully, and utilize forensic tools to collect both volatile and non-volatile data, ensuring data integrity and proper documentation of chain of custody. The specialist conducts thorough examinations of extracted data, including network traffic, call data records, and emails, while analyzing metadata and digital logs to detect unauthorized access and identify anomalous activities. They participate in incident response activities, develop data recovery methods, and collaborate with law enforcement agencies when necessary.

Personal Attributes

This job may require the individual to work independently and take decisions for his/her own area of work. The individual should have a high level of analytical thinking ability, passion for information security and attention for detail. The individual should also be ethical, compliance and result oriented, should also be able to demonstrate interpersonal skills, along with willingness to undertake desk-based job with long working hours.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [SSC/N0929: Identify, preserve, and seize digital/electronics devices or records for investigation of possible breach or crime](#)
2. [SSC/N0930: Extract relevant data or information from digital forensic evidence](#)
3. [SSC/N0931: Analyze information or data extracted from digital forensic evidence](#)
4. [SSC/N0932: Report & present the results of a forensic investigation](#)
5. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

Qualification Pack

SSC/N0929: Identify, preserve, and seize digital/electronics devices or records for investigation of possible breach or crime

Description

This unit is about Identifying and seizing computing devices or records for investigation of possible breach or crime.

Scope

The scope covers the following :

- Identify, preserve, and seize digital/electronics devices or records for investigation of possible breach or crime

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Ensure necessary authorizations and resources are in place to conduct evidence seizure for an investigation
- PC2.** Secure the scene physically to prevent unauthorized access or damage to potential evidence sources
- PC3.** Survey the area to identify and locate potential digital evidence sources and relevant devices or records
- PC4.** Identify additional data sources and their owners that can be accessed for evidence collection
- PC5.** Obtain materials related to digital communications relevant to the investigation while ensuring device integrity
- PC6.** Confirm that devices are operational but disconnected from networks to preserve data and prevent tampering
- PC7.** Check and terminate destructive software on devices while maximizing preservation of data
- PC8.** Prioritize potential data sources based on their likely value and relevance to the investigation
- PC9.** Determine whether data is volatile or non-volatile to ensure proper preservation techniques
- PC10.** Develop a plan to acquire data sources in a logical order based on priority and type
- PC11.** Use forensic tools to collect volatile data and verify the integrity of sources throughout the process
- PC12.** Record the current state and configuration of digital devices and media at the time of seizure
- PC13.** Handle digital evidence carefully to preserve fingerprints, DNA, and other physical evidence as well as digital data
- PC14.** Document every activity performed on devices including photographs, logs, and detailed notes for chain of custody
- PC15.** Package seal and label evidence properly following forensic procedures, addressing any packaging issues
- PC16.** Maintain detailed logs of all steps taken including tools used and personnel involved to ensure traceability

Qualification Pack

- PC17.** Transport and store evidence securely to prevent contamination, damage, or loss while following legal guidelines
- PC18.** Ensure all forensic team members are trained and certified to meet legal and industry standards
- PC19.** Follow legal regulations and establish procedures for collaboration with law enforcement agencies
- PC20.** Maintain comprehensive case files and implement quality controls to validate findings and ensure ongoing process integrity

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** relevant legislation, policies, procedures, codes of practice, guidelines and applicable standards for seizing and recording electronic evidence sources
- KU2.** organizations knowledge base and how to access and update this
- KU3.** limits of your role and responsibilities and who to seek guidance from
- KU4.** the organizational systems, procedures and tasks/checklists within the domain and how to use these
- KU5.** the operating procedures that are applicable to the system(s) being used
- KU6.** typical response times and service times related to own work area
- KU7.** Proficiency with forensic software tools (e.g., EnCase, FTK, Autopsy) for data recovery and analysis.
- KU8.** Understanding of tools for imaging and data duplication.
- KU9.** Strong knowledge of various operating systems (Windows, macOS, Linux) and their file systems (NTFS, HFS, ext4).
- KU10.** Familiarity with network protocols and architectures, including TCP/IP, to understand data transmission and gather evidence from network devices.
- KU11.** Knowledge of volatile and non-volatile data, including cloud storage, database management systems, and mobile device data management.
- KU12.** Familiarity with laws and regulations governing digital evidence, privacy, and forensic processes (e.g., GDPR, HIPAA, local laws).
- KU13.** Understanding procedures for maintaining the integrity of evidence, including documentation and preservation methods.
- KU14.** Proficiency in recovering lost or deleted data from different storage media, including hard drives, SSDs, and mobile devices.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Strong problem-solving abilities to analyze data and evidence, identify anomalies or patterns, and develop strategies for investigation.
- GS2.** High level of precision when documenting processes, preserving evidence, and executing technical procedures.

Qualification Pack

- GS3.** Effective verbal and written communication skills to report findings, create documentation, and interact with law enforcement or legal teams.
- GS4.** Ability to work collaboratively within a team and with external stakeholders, including law enforcement and legal counsel.
- GS5.** Capacity to prioritize tasks and manage time efficiently, especially when working under tight deadlines or during ongoing investigations.
- GS6.** Strong ethical considerations in handling sensitive information and maintaining confidentiality throughout investigations.
- GS7.** Ability to stay adaptable and learn new tools, techniques, or methodologies as the technology landscape and legal standards evolve.
- GS8.** Skills for evaluating a situation, interpreting data effectively, and making informed decisions based on the evidence gathered.

SSC/N0930: Extract relevant data or information from digital forensic evidence

Description

This unit contains the practical competences, knowledge and understanding and skills required for extracting data or information from the digital forensic evidences collected for the investigation of an information security/cybercrime so that the data may be made available for further analysis. This has to be done without contaminating or effecting the data nor physical evidences like DNA, fingerprints, etc.

Scope

The scope covers the following :

- Extract relevant data or information from evidence

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Obtain forensic items relevant to investigations from authorized channels in accordance with procedures and verify their accuracy against records
- PC2.** Identify and prepare necessary resources and tools for extracting data from evidence devices or media
- PC3.** Create a backup by making a forensic image or copy of the original storage device using clean and verified media
- PC4.** Install write blocking tools to prevent any modification of the original data and select suitable extraction methods based on device type and make
- PC5.** Use forensic tools and manual techniques to locate required files and data including hidden, deleted, or lost information
- PC6.** Analyze slack space, encrypted data, steganography, and file headers to uncover additional or concealed information
- PC7.** Crack or bypass passwords protecting files and devices using appropriate utilities and cryptographic techniques to access data
- PC8.** Extract data and metadata from files and disk images, and recover information from damaged or encrypted disks while ensuring data integrity through hashing and checksums
- PC9.** Document each step of the extraction process including tools used, data recovered, and any analysis performed to maintain chain of custody and procedural integrity
- PC10.** Collaborate with forensic specialists and stakeholders to verify findings, develop forensic timelines, and ensure compliance with data privacy and safety protocols

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** relevant legislation, standards, policies, and procedures followed in the company

Qualification Pack

- KU2.** organizations knowledge base and how to access and update this
- KU3.** the organizational systems, procedures and tasks/checklists within the domain and how to use these
- KU4.** the operating procedures that are applicable to the system(s) being used or task
- KU5.** organizations network architecture and the IP addresses used by critical assets
- KU6.** organizations typical patterns of usage on systems and networks
- KU7.** typical response times and service times related to own work area
- KU8.** limits of own responsibility and level of competence required
- KU9.** Proficiency with forensic software (e.g., EnCase, FTK, Autopsy) for data extraction and analysis.
- KU10.** Knowledge of imaging software to create exact copies of storage devices.
- KU11.** Understanding of how various operating systems (Windows, macOS, Linux) function, including their file systems and data storage.
- KU12.** Familiarity with methods for recovering deleted, hidden, or corrupted data from various media.
- KU13.** Knowledge of network protocols and architecture to analyze network traffic and gather evidence.
- KU14.** Understanding of encryption methods and techniques to decrypt data and recognize steganographic content.
- KU15.** Skills in analyzing metadata for insights into file history, creation and modification dates, and access patterns.
- KU16.** Awareness of laws and regulations regarding digital evidence handling and privacy concerns.
- KU17.** Proficiency in documentation and procedures to maintain the integrity of digital evidence.
- KU18.** Knowledge of ethical considerations related to privacy and the handling of sensitive data.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Strong problem-solving and critical thinking skills to analyze data and detect anomalies.
- GS2.** Ability to carefully document evidence, processes, and findings with accuracy.
- GS3.** Effective verbal and written communication skills to articulate findings and collaborate with teams.
- GS4.** Capacity to work effectively with other stakeholders, including law enforcement and legal representatives.
- GS5.** Ability to efficiently prioritize tasks and manage time during investigations and data extraction.
- GS6.** Flexibility to learn and adapt to new technologies, tools, and best practices in digital forensics.
- GS7.** Skills in identifying and mitigating risks associated with data handling and forensic investigations.
- GS8.** Capacity to manage forensic projects, including planning, execution, and follow-up activities.

SSC/N0931: Analyze information or data extracted from digital forensic evidence

Description

This unit contains the practical competences, knowledge and understanding and skills required for examining and analyzing data or information extracted from the digital forensic evidences to make inferences about the offender, extent and impact of crime, method used, possible remediation, etc. This has to be done without contaminating or effecting the data nor physical evidences like DNA, fingerprints, etc..

Scope

The scope covers the following :

- Analyze Information from evidence

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Gather necessary resources and tools to support the analysis of forensic evidence and ensure all required data is available
- PC2.** Use forensic tools and techniques to analyze extracted data and identify relevant insights related to the investigation
- PC3.** Review time stamps, system and application logs to establish a timeline of activity and link files or events to investigation periods
- PC4.** Analyze file metadata including authorship, last edited time, and save locations to gather detailed evidence context
- PC5.** Assess data hiding techniques, such as steganography or concealed files, to uncover hidden information and indications of knowledge or intent
- PC6.** Examine network traffic and mobile device records to identify connections, locations, and potential point of attack or breach
- PC7.** Correlate evidence from various sources to reconstruct activities, identify compromised systems, and determine the scope and impact of incidents
- PC8.** Use data visualization and reporting techniques to present analysis findings clearly and aid understanding among stakeholders
- PC9.** Conduct interviews, gather witness statements, and review related materials to supplement digital evidence and provide additional context
- PC10.** Identify elements of proof related to the crime, evaluate the effectiveness of existing security controls, and recommend improvements based on analysis results

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** relevant legislation, standards, policies, and procedures followed in the company

Qualification Pack

- KU2.** organizations knowledge base and how to access and update this
- KU3.** the organizational systems, procedures and tasks/checklists within the domain and how to use these
- KU4.** the operating procedures that are applicable to the system(s) being used
- KU5.** organizations network architecture and the IP addresses used by critical assets
- KU6.** organizations typical patterns of usage on systems and networks
- KU7.** typical response times and service times related to own work area
- KU8.** limits of own responsibility and level of competence required
- KU9.** Proficiency with analysis tools and software used for digital forensics (e.g., EnCase, FTK, X1 Social Discovery).
- KU10.** Familiarity with data visualization tools to present findings effectively.
- KU11.** Understanding of operating systems (Windows, macOS, Linux) and their file structures, file systems, and behavior.
- KU12.** Knowledge of statistical analysis techniques and methods for interpreting data, including metadata analysis and log analysis.
- KU13.** Skills in analyzing network traffic data, protocols, and network logs to determine security incidents or abnormal activities.
- KU14.** Familiarity with common cyber threats, attack vectors, and evidence of malicious activities to recognize patterns in forensic data.
- KU15.** Knowledge of techniques for detecting and recovering hidden or deleted data, understanding methods of data obfuscation.
- KU16.** Skills in conducting incident response activities, including triage, to assess security incidents swiftly.
- KU17.** Awareness of relevant laws, regulations, and best practices related to forensic investigations, privacy, and data protection.
- KU18.** Ability to use visualization techniques to represent complex information in an easily understandable format for stakeholders.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Critical thinking and problem-solving skills to analyze data and identify patterns or anomalies within forensic reports.
- GS2.** High level of precision in documenting findings, analyzing data, and maintaining chain of custody for evidence.
- GS3.** Effective verbal and written communication skills to present findings to technical and non-technical stakeholders.
- GS4.** Ability to work in interdisciplinary teams, collaborating with law enforcement, legal teams, or other forensic specialists.
- GS5.** Skills in prioritizing tasks and managing time effectively during investigations and analyses.
- GS6.** Flexibility to adapt to new technologies, tools, and changing conditions in forensic analysis.
- GS7.** Capacity to carefully document every stage of the investigation and the methodologies used for analysis.

Qualification Pack

- GS8.** Strong ethical considerations in handling sensitive evidence and ensuring the privacy of individuals involved.
- GS9.** Skills for managing forensic analysis projects, including planning, execution, and assessment of analysis outcome.

SSC/N0932: Report & present the results of a forensic investigation

Description

This unit contains the practical competences, knowledge and understanding and skills required for reporting and presenting the results of a forensic investigation. This has to be done without contaminating or effecting the data nor physical evidences like DNA, fingerprints, etc..

Scope

The scope covers the following :

- Report forensic investigation

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Obtain and organize all necessary resources and supporting materials required for drafting and presenting the forensic report
- PC2.** Collate and accurately capture all relevant information and evidence findings in the report with clear documentation
- PC3.** Summarize key examination results and provide comprehensive details of findings to support conclusions
- PC4.** Create an executive summary to highlight main findings and recommendations for high-level stakeholders
- PC5.** Develop a glossary of terms and clearly differentiate between facts and opinions within the report to aid understanding
- PC6.** Ensure evidence remains unaltered and maintains the integrity of digital evidence throughout the reporting process
- PC7.** Document each stage of the investigation meticulously and include chain of custody records and supporting evidence
- PC8.** Prepare and deliver an oral presentation with visual aids to effectively communicate findings to stakeholders or legal authorities
- PC9.** Verify the completeness and accuracy of the report and supporting materials through review and peer validation before final submission
- PC10.** Ensure secure storage and backup of all digital evidence and related documents post-reporting and maintain a record of all communications.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** relevant legislation, standards, policies, and procedures followed in the company
- KU2.** organizations knowledge base and how to access and update this
- KU3.** the organizational systems, procedures and tasks/checklists within the domain and how to use these

Qualification Pack

- KU4.** the operating procedures that are applicable to the system(s) being used
- KU5.** organizations network architecture and the IP addresses used by critical assets
- KU6.** organizations typical patterns of usage on systems and networks
- KU7.** typical response times and service times related to own work area
- KU8.** Limits of own responsibility and level of competence required
- KU9.** Understanding of established standards and best practices for reporting forensic investigations.
- KU10.** Familiarity with processes for documenting the chain of custody, evidence collection, and handling procedures.
- KU11.** Knowledge of data storage, backup procedures, and data security best practices for digital evidence.
- KU12.** Understanding of metadata principles and the structure of digital file systems that impact evidence storage.
- KU13.** Awareness of laws and regulations around data privacy, evidence handling, and reporting requirements.
- KU14.** Proficiency in tools for creating reports and presentations (e.g., Microsoft Office, Google Slides, PowerPoint).
- KU15.** Familiarity with common forensic terms and concepts to create a glossary and communicate findings effectively.
- KU16.** Knowledge of health and safety regulations and practices related to working with forensic items.
- KU17.** Understanding the importance of peer review in ensuring the accuracy and credibility of forensic reports.
- KU18.** Knowledge of effective communication methods within forensic investigations, including the use of visual aids in presentations.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Strong analytical thinking to interpret findings and synthesize information into clear reports.
- GS2.** Precision in documenting evidence, findings, and ensuring accuracy in reporting.
- GS3.** Effective verbal and written communication skills to articulate findings clearly to various audiences.
- GS4.** Ability to organize supporting materials and evidence methodically to create coherent reports.
- GS5.** Skills in managing time effectively to meet reporting deadlines while ensuring thoroughness.
- GS6.** Ability to differentiate between facts and opinions, as well as critically evaluate peer feedback.
- GS7.** Skills to work collaboratively with other professionals in forensic investigations and during the review process.
- GS8.** Proficiency in delivering engaging presentations, utilizing visual aids to enhance understanding.
- GS9.** Flexibility to adjust reporting approaches based on the audience or changing requirements.

Qualification Pack

GS10. Strong ethical considerations with regards to confidentiality and integrity in reports and communications.

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
