Qualification Pack

SSC/Q0929: Cybersecurity

Brief Job Description

Individuals at this job are responsible for protecting an organization networks, systems, and data assets. They monitor security posture through vulnerability assessment/ penetration testing and implement suitable mitigation measures and disaster recovery plans. They also possess the necessary skills to perform forensic tasks.

Personal Attributes

This job may require the individual to work independently and take decisions for his/her own area of work. The individual should be result oriented and have a high attention for detail. The individual should also be able to demonstrate communication skills, logical thinking along with willingness to undertake desk-based job with long hours.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [SSC/N0942: Work organization and management for cybersecurity](#)
2. [SSC/N0943: Communication and interpersonal skills for cyber security](#)
3. [SSC/N0944: Secure systems design and creation](#)
4. [SSC/N0945: Secure systems operation and maintenance](#)
5. [SSC/N0946: Secure Systems Protection and defense](#)
6. [SSC/N0947: Operations and Management](#)
7. [SSC/N0948: Intelligence collection and analysis](#)
8. [SSC/N0949: Investigation and Digital Forensics](#)

SSC/N0942: Work organization and management for cybersecurity

Description

Work organization and management for cybersecurity

Scope

The scope covers the following :

- Work organization and management for cybersecurity

Elements and Performance Criteria

Work organization and management for cybersecurity

To be competent, the user/individual on the job must be able to:

- PC1.** Follow health and safety standards, rules, and regulations
- PC2.** Maintain a safe working environment
- PC3.** Identify and use the appropriate Personal Protective Equipment for ESD
- PC4.** Select, use, clean, maintain, and store tools and equipment safely and securely
- PC5.** Plan the work area to maximize efficiency and maintain the discipline of regular tidying
- PC6.** Work efficiently and check progress and outcomes regularly
- PC7.** Keep up to date with 'license to practice' requirements and maintain currency
- PC8.** Undertake thorough and efficient research methods to support knowledge growth
- PC9.** Update and maintain security policies as needs and the field evolves
- PC10.** Plan to optimize device usage and sustainability for clients
- PC11.** Proactively try new methods, systems, and embrace change
- PC12.** Safety and sustainability dispose of electronic data storage devices

SSC/N0943: Communication and interpersonal skills for cyber security

Description

Communication and interpersonal skills for cyber security

Scope

The scope covers the following :

- Communication and interpersonal skills for cyber security

Elements and Performance Criteria

Communication and interpersonal skills for cyber security

To be competent, the user/individual on the job must be able to:

- PC1.** Use strong listening and questioning skills to deepen understanding of complex situations
- PC2.** Ensure consistently effective verbal and written communications with colleagues
- PC3.** Recognize and adapt to the changing needs of colleagues
- PC4.** Proactively contribute to the development of strong and effective teams
- PC5.** Share knowledge and expertise with colleagues and develop supportive learning cultures
- PC6.** Manage tension/anger and give individuals confidence that their problems can be resolved
- PC7.** Accurately document steps taken and findings in the course of investigations
- PC8.** Ensure policies and procedures for security and operation on information systems are carefully followed

SSC/N0944: Secure systems design and creation

Description

Secure systems design and creation

Scope

The scope covers the following :

- Secure systems design and creation

Elements and Performance Criteria

Secure systems design and creation

To be competent, the user/individual on the job must be able to:

- PC1.** Apply cyber security and privacy principles to organizational requirements (relevant to confidentiality, integrity, availability, authentication, non- repudiation) when designing and documenting overall program Test & Evaluation procedures
- PC2.** Conduct independent comprehensive assessments of the management, operational, and technical security controls and control enhancements employed within or inherited by information technology (IT) systems to determine the overall effectiveness of controls
- PC3.** Develop and conduct assessments of systems to evaluate compliance with specifications and requirements
- PC4.** Secure the interoperability of systems or elements of systems incorporating IT
- PC5.** Analyse the security of new or existing computer applications, software, or specialized utility programs, to provide actionable results
- PC6.** Develop and maintain business, systems, and information processes, to support enterprise mission needs
- PC7.** Develop information technology (IT) rules and requirements that describe baseline and target architectures
- PC8.** Ensure that stakeholder security requirements necessary to protect the organization's mission and business processes are adequately addressed in all aspects of enterprise architecture, including reference models, segment and solution architectures, and the resulting systems supporting those missions and business processes
- PC9.** Conduct software and systems engineering and software systems research to develop new capabilities, ensuring cyber security is fully integrated
- PC10.** Conduct research (including penetration testing) to evaluate potential vulnerabilities in cyberspace systems
- PC11.** Consult with stakeholders to evaluate functional requirements and translate functional requirements into technical solutions
- PC12.** Plan, prepare, and execute tests of systems
- PC13.** Analyse, evaluate and report results against specifications and requirements
- PC14.** Design, develop, test, and evaluate information system security throughout the systems development life cycle

SSC/N0945: Secure systems operation and maintenance

Description

Secure systems operation and maintenance

Scope

The scope covers the following :

- Secure systems operation and maintenance

Elements and Performance Criteria

Secure systems operation and maintenance

To be competent, the user/individual on the job must be able to:

- PC1.** Install, configure, test, operate, maintain, and manage network infrastructure
- PC2.** Manage software that permits the sharing and transmission of all data
- PC3.** Install, configure, troubleshoot, and maintain server configurations (hardware and software) to ensure their confidentiality, integrity, and availability
- PC4.** Manage accounts in relation to access control, passwords, account creation, and administration
- PC5.** Analyse organization's computer systems and update information systems solutions to help them operate more securely, efficiently and effectively
- PC6.** Analyse organization's computer systems and update information systems solutions to help them operate more securely, efficiently and effectively
- PC7.** Conduct audits of information technology (IT) programs, infrastructure network to provide ongoing optimization, cyber security and problem- solving support

SSC/N0946: Secure Systems Protection and defense

Description

Secure Systems Protection and defense

Scope

The scope covers the following :

- Secure Systems Protection and defense

Elements and Performance Criteria

Secure Systems Protection and defense

To be competent, the user/individual on the job must be able to:

- PC1.** Use defensive measures and information collected from a variety of sources to identify, analyse, and report events that occur or might occur within the network to protect information, information systems, and networks from threats
- PC2.** Test, implement, deploy, maintain, review, and administer the infrastructure hardware and software that are required to effectively manage the computer network and resources
- PC3.** Monitor network to actively remediate unauthorized activities
- PC4.** Respond to crises or urgent situations within own areas of expertise to mitigate immediate and potential threats
- PC5.** Use mitigation, preparedness, and response and recovery approaches, as needed, to maximize survival of life, preservation of property, and information security Investigate and analyse all relevant response activities
- PC6.** Investigate and analyse all relevant response activities
- PC7.** Conduct assessments of threats and vulnerabilities
- PC8.** Determine deviations from acceptable configurations, enterprise, or local policy
- PC9.** Assess the level of risk and develop and/or recommend appropriate mitigation countermeasures in operational and non-operational situations
- PC10.** Follow documented enterprise procedures for incident preparedness and response

SSC/N0947: Operations and Management

Description

Operations and Management

Scope

The scope covers the following :

- Operations and Management

Elements and Performance Criteria

Operations and Management

To be competent, the user/individual on the job must be able to:

- PC1.** Identify and assess the capabilities and activities of cyber security criminals or foreign intelligence entities
- PC2.** Produce findings to help initialize or support law enforcement and counterintelligence investigations or activities
- PC3.** Analyse collected information to identify vulnerabilities and potential for exploitation
- PC4.** Analyse threat information from multiple sources, disciplines, and agencies across the Intelligence Community
- PC5.** Synthesize and place intelligence information in context, draw insights about the possible implications
- PC6.** Apply current knowledge of one or more regions, countries, non-state entities, and/or technologies
- PC7.** Apply language, cultural, and technical expertise to support information collection, analysis, and other cyber security activities
- PC8.** Identify, preserve, and use system artefacts for analysis
- PC9.** Execute successful data and systems recovery in case of loss

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

- Carry out assessments under realistic work pressures found in the normal industry workplace (or simulated workplace).
- Ensure that the range of materials, equipment, and tools that learners use are current and of the type routinely found in the normal industry workplace (or simulated workplace) environments.
- Assess that all tasks and functions are completed in a way, and to a timescale that is acceptable in the normal industry workplace.
- Assign workplace (or simulated workplace) responsibilities that enable learners to meet the requirements of the NOS.
- Productivity levels must be checked to ensure that it reflects those that are found in the work situation being replicated.
- Provide situations that allow learners to interact with the range of personnel and contractors found in the normal industry workplace (or simulated workplace).

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
