SSC/Q2213: Domestic Biometric Data Operator

Brief Job Description

A Domestic biometric Data Operator is responsible for capturing, authenticating and processing biometric data of target users. Depending on the size and structure of the organisation, the tasks may include installing and the computer hardware and software monitoring and maintaining computer systems and networks, troubleshooting biometric system, relevant computer hardware software issues and network problems.

Personal Attributes

This job requires the individual to have thorough knowledge of various technology trends and processes as well as have updated knowledge about biometric systems and IT initiatives. The individual should have fast and accurate typing / data encoding.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [SSC/N3023: Undertake Bio-Metric data entry and processing](#)
2. [SSC/N2208: Data Security and Privacy Management for Data Handling Roles](#)
3. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

SSC/N3023: Undertake Bio-Metric data entry and processing

Description

This unit is about undertaking the authentication and entry of biometric data

Scope

The scope covers the following :

- Check the authentication process
- Maintain appropriate records

Elements and Performance Criteria

Check the authentication process

To be competent, the user/individual on the job must be able to:

- PC1.** capture the biometric data of target users through data collection and processing, including face recognition and iris scanning, while adhering to established guidelines.
- PC2.** establish the user's identity, based on the matching process
- PC3.** ensuring validation of biometric data by verifying accuracy and completeness during data collection and processing
- PC4.** grant access to the users based on the match of the captured biometric data with that stored in the system
- PC5.** ensure the users are aware of the guidelines applicable to the access and use of the relevant facility or system
- PC6.** identify and handle exceptions to ensure smooth system operation
- PC7.** coordinate with the biometric equipment manufacturer to resolve complex issues with the biometrics system

Maintain appropriate records

To be competent, the user/individual on the job must be able to:

- PC8.** log the biometric data transactions for auditing purposes
- PC9.** collect and enter data from handwritten applications of individuals in the appropriate computer program
- PC10.** review and verify the captured biometric data
- PC11.** compare the transcribed data with the source document and correct any errors, with the supervisor's help as required
- PC12.** managing errors in biometric face recognition or iris scanning by adhering to SOP guidelines and maintaining compliance with security protocols
- PC13.** ensure all biometric documentation is complete and ensure data privacy and security
- PC14.** maintain data back-ups to prevent the accidental loss of data
- PC15.** ensure compliance with the relevant privacy and security laws and regulations governing biometric data collection and storage

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** appropriate biometric data entry procedures, tools, and techniques for accurate data capture and entry
- KU2.** requirements of typical helpdesk customers and tools for incident management and customer support in biometric systems
- KU3.** criteria distinguishing acceptable vs. non-acceptable biometric data per standards and policies
- KU4.** basic computer configuration, networking, and maintenance requirements for biometric data capture and processing
- KU5.** principles of biometric system error rates, including false accept, false reject, equal error rate, and detection error trade-off
- KU6.** procedures for compiling reports and making data comparisons using appropriate database management software
- KU7.** importance of documenting, classifying, and prioritizing service requests effectively
- KU8.** initial registration and secure capture/storage of biometric data in systems
- KU9.** encryption methods, like hashing and salting, to secure biometric templates and data transmission
- KU10.** factors affecting the accuracy and reliability of biometric sensors
- KU11.** distinction between one-to-one (verification) and one-to-many (identification) biometric matching algorithms
- KU12.** biometric codes and standards, including relevant data protection laws and regulations
- KU13.** use of biometric authentication in physical (building access) and logical (system access) control systems, including on mobile devices and relevant performance metrics (FAR, FRR, accuracy rates)

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** maintain work-related notes and records
- GS2.** read pertinent literature to stay informed about the latest advancements in the field.
- GS3.** listen attentively to understand the information/ instructions being shared by the speaker
- GS4.** communicate clearly and politely with co-workers and clients
- GS5.** coordinate with co-workers to achieve work objectives
- GS6.** plan and prioritize tasks to ensure timely completion
- GS7.** identify possible disruptions to work and take appropriate preventive measures
- GS8.** take quick decisions to deal with workplace emergencies/ accidents
- GS9.** evaluate all possible solutions to a problem to select the best one

SSC/N2208: Data Security and Privacy Management for Data Handling Roles

Description

This unit defines the responsibilities of individuals in data-related roles to secure sensitive information, ensure compliance with privacy regulations, and implement secure data handling practices. It involves protecting data from unauthorized access, mitigating security risks, and adhering to legal, organizational, and ethical standards to maintain data integrity, availability, and confidentiality.

Scope

The scope covers the following :

- Ensure compliance with data security and privacy regulations
- Secure data collection, storage, and transmission
- Implement access controls and authentication mechanisms
- Identify and mitigate data security risks
- Ensure data integrity and availability
- Ensure secure data disposal and archiving
- Collaborate with relevant stakeholders to maintain security standards

Elements and Performance Criteria

Ensure Compliance with Data Security and Privacy Regulations

To be competent, the user/individual on the job must be able to:

- PC1.** follow applicable data privacy laws and organizational data security policies
- PC2.** verify compliance through audits, assessments, and regular reviews
- PC3.** report any breaches or non-compliance to relevant authorities in a timely manner

Secure data collection, storage, and transmission

To be competent, the user/individual on the job must be able to:

- PC4.** ensure the collection, storage, and transmission of sensitive data is encrypted and securely handled
- PC5.** apply access controls to data storage and ensure only authorized personnel have access
- PC6.** verify secure transmission protocols to prevent unauthorized access during data transfer

Implement access controls and authentication mechanisms

To be competent, the user/individual on the job must be able to:

- PC7.** set up role-based access control (RBAC) and enforce multi-factor authentication (MFA) for system access
- PC8.** regularly monitor and review access logs for suspicious activities and potential security threats
- PC9.** ensure regular updates, patches, and maintenance of systems to address vulnerabilities

Identify and mitigate data security risks

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC10.** assess potential risks related to data security, including malware, insider threats, and external attacks
- PC11.** implement proactive measures and technologies to mitigate identified security risks
- PC12.** maintain a risk management log to track and address security incidents and vulnerabilities

Ensure data integrity and availability

To be competent, the user/individual on the job must be able to:

- PC13.** implement data backup, disaster recovery, and availability strategies to ensure business continuity
- PC14.** protect data from unauthorized alteration or corruption by using encryption and validation mechanisms
- PC15.** regularly test data integrity and availability to verify the reliability and accuracy of stored information

Ensure secure data disposal and archiving

To be competent, the user/individual on the job must be able to:

- PC16.** securely dispose of or anonymize data that is no longer needed or legally required
- PC17.** implement data retention policies and ensure data is archived securely for future retrieval and compliance purposes
- PC18.** apply secure deletion methods to remove sensitive data from storage and systems when no longer required

Collaborate with relevant stakeholders to maintain security standards

To be competent, the user/individual on the job must be able to:

- PC19.** work with IT security, legal, and compliance teams to implement and maintain security measures
- PC20.** provide necessary documentation, training, and updates to stakeholders regarding data privacy and security
- PC21.** communicate security policies and procedures effectively to all relevant personnel within the organization

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** legal and regulatory requirements for data security, privacy, and compliance, including GDPR, CCPA, and other regional laws.
- KU2.** best practices for encrypting data at rest, in transit, and during collection.
- KU3.** methods for implementing role-based access control (RBAC) and the principle of least privilege.
- KU4.** authentication methods such as passwords, biometrics, multi-factor authentication (MFA), and token-based authentication.
- KU5.** strategies for monitoring and logging system access, data changes, and user activities to detect security threats.
- KU6.** techniques for identifying, assessing, and mitigating risks like malware, phishing, and insider threats.

Qualification Pack

- KU7.** response protocols for handling data breaches, including containment, notification, and reporting.
- KU8.** methods for securing sensitive data during storage and transmission, including cloud environments.
- KU9.** approaches for conducting vulnerability assessments and penetration testing to identify and address system weaknesses.
- KU10.** principles of data integrity to ensure the reliability and accuracy of data throughout its lifecycle
- KU11.** disaster recovery strategies to ensure data availability and business continuity in the event of data loss or breach
- KU12.** best practices for managing data retention, disposal, and anonymization in compliance with legal and organizational requirements
- KU13.** tools and technologies used in data security, such as encryption software, firewalls, antivirus software, and intrusion detection systems.
- KU14.** emerging trends in data security, such as AI and machine learning-driven threats.
- KU15.** the roles and responsibilities of data protection officers (DPOs), IT security teams, and compliance officers in maintaining data privacy and security.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** maintain work-related notes and records
- GS2.** Review pertinent literature to stay informed about the latest advancements in the field.
- GS3.** listen attentively to understand the information/ instructions being shared by the speaker
- GS4.** communicate clearly and politely with co-workers and clients
- GS5.** coordinate with co-workers to achieve work objectives
- GS6.** plan and prioritize tasks to ensure timely completion
- GS7.** identify possible disruptions to work and take appropriate preventive measures
- GS8.** take quick decisions to deal with workplace emergencies/ accidents
- GS9.** evaluate all possible solutions to a problem to select the best one

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
Helpdesk	Helpdesk is an entity to which the customers will report their IT problems. IT Service Helpdesk Attendant is responsible for managing the helpdesk.
