SSC/N2305: Maintain customer accounts

Description

This unit is about setting up customer accounts and keeping them up-to-date, as part of an outsourced finance and accounting process.

Scope

The scope covers the following :

- Check appropriate sources like contracts, supporting documentation, service level agreements (SLAs), sales team, customers, client, account manager clients, etc.
- Perform credit checks using internal sources and external agencies
- Interact with appropriate people like line manager, peers, team taxation specialists, etc.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** check master database to verify whether records of customers already exist
- PC2.** ensure accurate setup of customer accounts in the financial system
- PC3.** utilize financial tools effectively to analyze, track, and report financial data
- PC4.** update customer account information regularly, including contact details
- PC5.** record credit terms and limits for each customer as per agreements
- PC6.** monitor customer account balances and aging reports
- PC7.** add relevant charts, graphs, and tables where necessary to visually enhance the document
- PC8.** apply payments received to corresponding customer invoices
- PC9.** identify and resolve account discrepancies or payment mismatches
- PC10.** verify customer credit status before processing orders
- PC11.** use AI-based platforms to ensure compliance with F&A policies, including tax, audit, and regulatory requirements
- PC12.** process adjustments for any disputed or incorrect charges
- PC13.** generate monthly statements for customer accounts
- PC14.** ensure accurate preparation and review of the balance sheet by recording all financial transactions correctly and reconciling assets, liabilities, and equity as per accounting standards
- PC15.** use AI-driven tools for automating bank reconciliations and the generation of financial reports
- PC16.** analyze patterns in transactional data to flag potential fraudulent activities using AI algorithms
- PC17.** communicate with supervisors to confirm that shared documents align with organizational requirements

Qualification Pack

- PC18.** utilise AI-powered automation tools to optimize workflows, improve operational efficiency by streamlining repetitive tasks like transaction matching, audit trail tracking, and data validation
- PC19.** monitor and manage customer payments, generate aging reports, and follow up on outstanding balances to maintain healthy cash flow
- PC20.** close inactive or settled customer accounts per organisational policy

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organizations financial accounting policies, procedures, and internal controls related to customer account management.
- KU2.** structure and functioning of enterprise financial systems used for customer account creation and maintenance.
- KU3.** principles of customer credit management, including credit terms, limits, and risk assessment practices.
- KU4.** interpretation and preparation of financial statements including balance sheets, customer aging reports, and reconciliation statements
- KU5.** role of data accuracy and integrity in maintaining customer accounts and financial reporting.
- KU6.** types of discrepancies that may occur in customer accounts and standard procedures for resolving them.
- KU7.** importance of regulatory compliance and audit requirements in financial processes, including those related to taxation.
- KU8.** use of AI-powered tools in automating financial processes like reconciliations, transaction validation, and fraud detection.
- KU9.** methods for identifying suspicious transactional patterns and preventing fraudulent activity using data analysis.
- KU10.** process of documenting financial transactions in accordance with applicable accounting standards
- KU11.** format and features of visually-enhanced financial reports, including the effective use of charts, graphs, and tables.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** analyze financial data to identify inconsistencies, trends, and actionable insights
- GS2.** use digital tools and AI platforms efficiently to streamline repetitive accounting tasks and improve productivity.
- GS3.** communicate effectively with supervisors and relevant departments to validate financial information and resolve issues.
- GS4.** organize and prioritize tasks to ensure timely updates, reconciliations, and reporting
- GS5.** maintain attention to detail while recording, reviewing, and validating customer financial data

Qualification Pack

- GS6.** apply logical reasoning and problem-solving skills to resolve account discrepancies and mismatches
- GS7.** adhere to confidentiality protocols when handling sensitive customer and financial information.

SSC/N2306: Generate invoices and credit notes

Description

This unit is about generating invoices and credit notes to send to customers, as part of an outsourced finance and accounting process.

Scope

The scope covers the following :

- This unit/task covers the following:
- Process invoices and claims
- Interact with appropriate people like line manager, peers, sales team, etc.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** interpret the research requirements and objectives to ensure relevance and accuracy in analysis
- PC2.** obtain requests to generate invoices, credit notes and other supporting documentation from relevant departments
- PC3.** use AI-driven tools to automatically capture, validate, and categorize invoices
- PC4.** verify customer details and account status before generating invoices and credit notes
- PC5.** review the terms of service or product delivery to determine invoice accuracy
- PC6.** calculate applicable taxes, discounts, and other charges
- PC7.** generate invoices as per agreed-upon pricing and terms
- PC8.** review invoices for completeness and accuracy before dispatch
- PC9.** send invoices/credit notes to department heads for signature, if required
- PC10.** issue credit notes for returned goods, service errors, or billing adjustments, etc.
- PC11.** confirm authorization of credit notes with relevant departments
- PC12.** ensure timely generation and dispatch of invoices to customers
- PC13.** ensure timely generation and dispatch of invoices to customers
- PC14.** ensure compliance with accounting standards in invoice generation
- PC15.** reconcile monthly totals for invoices and credit notes issued

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organizations invoicing policies, billing cycles, and approval workflows.
- KU2.** components of a valid invoice or credit note, including applicable tax structures, discounts, and other charges.

Qualification Pack

- KU3.** interpretation of service agreements or product delivery terms in relation to invoicing accuracy
- KU4.** use and benefits of AI-based invoicing tools for automation, validation, and categorization of financial documents.
- KU5.** importance of verifying customer details, account status, and authorization requirements before issuing financial documents.
- KU6.** procedures for issuing credit notes for returns, billing disputes, and pricing adjustments.
- KU7.** implications of errors in invoice generation and the corrective measures to address them
- KU8.** compliance requirements related to tax laws, accounting standards, and audit trails in invoice and credit note generation
- KU9.** protocols for maintaining, archiving, and reconciling invoice and credit note records.
- KU10.** format, structure, and accuracy checks involved in preparing professional financial documentation
- KU11.** coordination processes among departments (e.g., sales, accounts, logistics) to ensure accurate and timely documentation.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** interpret billing requirements based on research objectives or departmental inputs.
- GS2.** communicate effectively with internal stakeholders for clarifications and approvals
- GS3.** pay close attention to detail to minimize errors in calculations and data entry.
- GS4.** prioritize tasks and manage time efficiently to ensure timely dispatch of invoices and credit notes.
- GS5.** maintain confidentiality and accuracy while handling financial and customer records

SSC/N2302: Process invoices, credit notes and claims

Description

This unit is about processing invoices and credit notes from vendors and travel and expenses claims from personnel/ employees, as part of an outsourced finance and accounting process.

Scope

The scope covers the following :

- Interact with people like line managers, software developers, subject matter experts, etc.
- Analyze codes related to cost centre, accounting, tax codes, etc.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** verify invoice details with purchase orders and goods received notes and assign appropriate codes
- PC2.** ensure accuracy of invoice information, including vendor details, invoice number, and date
- PC3.** extract and validate information from invoices and receipts automatically using AI tools
- PC4.** check for applicable taxes, discounts, and rebates as per company policy
- PC5.** flag and resolve discrepancies between invoices and purchase orders
- PC6.** utilize advanced tools like pivot tables to prepare forecasts, scenario analyses, and budget plans that align with organizational goals
- PC7.** prepare credit notes for returned goods or services as per sop
- PC8.** prepare credit notes for returned goods or services as per sop
- PC9.** validate claims documentation against contractual terms
- PC10.** classify and prioritize invoices, credit notes, and claims for processing
- PC11.** enter invoice data into accounting or ERP software accurately
- PC12.** route invoices, credit notes, and claims for approvals as per workflow
- PC13.** utilize software like Excel, SAP, or Tally for data processing and analysis
- PC14.** track invoice status and report discrepancies for timely resolution

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** standard operating procedures (SOPs) and company policies for processing invoices, credit notes, and claims.
- KU2.** relationship between purchase orders, goods received notes, and invoices for accurate verification and coding
- KU3.** tax structures, discount policies, and rebate mechanisms applicable to vendor transactions.

Qualification Pack

- KU4.** principles and formats of financial documentation such as invoices, credit notes, and claims, and how they align with accounting standards.
- KU5.** importance of data integrity and validation in accounting entries to ensure accurate processing in ERP or accounting systems.
- KU6.** tools and techniques used for financial analysis and forecasting, including the use of Excel features like pivot tables and scenario planning
- KU7.** classification criteria for prioritizing invoices, credit notes, and claims for timely action and resolution
- KU8.** approval workflow and authorization hierarchy for routing financial documents within the organization.
- KU9.** functionalities of enterprise software such as Tally, SAP, or other ERP systems used for invoice and claim processing.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** analyze invoice and claims data to draw insights and prepare accurate reports.
- GS2.** apply numerical and logical reasoning to assess, validate, and interpret financial records
- GS3.** communicate effectively with vendors, team members, and approvers to clarify document details and resolve issues
- GS4.** adapt quickly to automated tools and AI-based systems used for data extraction, categorization, and validation.
- GS5.** prioritize and organize tasks to meet deadlines and ensure smooth processing in high-volume scenarios.

SSC/N2303: Pay invoices and claims

Description

This unit is about making payments to vendors and personnel/employees following approval of invoices, travel and expense claims, etc. as part of an outsourced finance and accounting process.

Scope

The scope covers the following :

- Interact with appropriate people like line manager, peers, subject matter experts, etc.
- Analyze payment types like wire payments, EFTs, BACs, ACHs, etc.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** verify due dates of invoices to ensure timely payment
- PC2.** review payment terms and conditions to avoid penalties
- PC3.** ensure availability of funds in relevant accounts before payment
- PC4.** verify payment methods and associated charges
- PC5.** ensure payment approvals are obtained as per organisational policy
- PC6.** process payments through ERP or financial software as required
- PC7.** confirm and record payment details, including transaction numbers
- PC8.** reconcile accounts payable ledger with processed payments
- PC9.** resolve any payment discrepancies or errors identified
- PC10.** reconcile payments against bank statements on a periodic basis
- PC11.** maintain accurate records of payments for audit purposes
- PC12.** co-ordinate with banks regarding any queries about reconciliation or non- receipt of authorized payments
- PC13.** review outstanding claims and initiate payments as per agreed terms
- PC14.** prepare payment summaries and reports as required by management
- PC15.** record transactions in the appropriate financial system post payments to ensure compliance with accounting principles and company policies

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organizations financial policies, procedures, and approval hierarchies for processing payments
- KU2.** various payment methods (e.g., NEFT, RTGS, cheques, UPI, etc.) and their associated charges, risks, and suitability.
- KU3.** payment terms and contractual obligations associated with different vendors or service providers.

Qualification Pack

- KU4.** structure and components of the accounts payable ledger and how it relates to invoice payment and reconciliation.
- KU5.** principles and standards of accounting and documentation required to maintain audit-ready records
- KU6.** process and tools for reconciling payments with bank statements and resolving mismatches.
- KU7.** key features and functions of ERP systems or financial software used to execute and track payments.
- KU8.** statutory and regulatory requirements for payment processing, including tax deduction at source (TDS), GST compliance, and recordkeeping.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** apply numerical and analytical skills to reconcile ledgers and detect discrepancies in payment
- GS2.** communicate effectively with banks, vendors, and internal teams to clarify and resolve payment-related queries.
- GS3.** prioritize payments based on due dates and cash flow conditions to avoid penalties or service disruptions.
- GS4.** use digital tools and ERP platforms efficiently to execute, record, and track payment transactions
- GS5.** maintain attention to detail while reviewing payment details to prevent financial errors or duplications.
- GS6.** prepare accurate summaries and reports to assist management in reviewing financial transactions and cash flow.

SSC/N2304: Deal with queries at the accounts payable

Description

This unit is about dealing with queries received from vendors or personnel/ employees relating to invoices or claims they have submitted.

Scope

The scope covers the following :

- This unit is about dealing with queries received from vendors or personnel/ employees relating to invoices or claims they have submitted.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** greet helpdesk users and verify their details as per organisational procedure
- PC2.** listen carefully to helpdesk users and ask appropriate questions to understand the nature of their queries
- PC3.** analyze the nature of each query and assign priority
- PC4.** retrieve relevant information from the accounts payable database
- PC5.** resolve queries related to unpaid or delayed invoices
- PC6.** address concerns about incorrect or partial payments
- PC7.** explain payment policies and procedures to stakeholders
- PC8.** collaborate with other departments to gather required information
- PC9.** seek confirmation from helpdesk users that their queries have been resolved to their satisfaction
- PC10.** track progress on open queries and follow up with concerned parties
- PC11.** escalate unresolved or complex queries to senior management
- PC12.** record all query responses in the helpdesk system/query management tool for future reference
- PC13.** ensure the timely and accurate recording of supplier invoices, verifying payment terms, matching purchase orders, and processing payments to avoid delays or discrepancies in financial records

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organization's standard procedures for greeting and authenticating helpdesk users.
- KU2.** structure and functionality of the accounts payable database and query management tools
- KU3.** common types of accounts payable queries and how to categorize and prioritize them.

Qualification Pack

- KU4.** key elements of invoice processing, including purchase orders, payment terms, and authorization workflows.
- KU5.** escalation matrix and criteria for transferring unresolved or complex issues to senior management
- KU6.** company's policies on invoice payments, dispute resolution, and supplier communications.
- KU7.** importance of maintaining accurate and updated records of all queries for audit and compliance purposes.
- KU8.** documentation and data privacy policies applicable to vendor and payment information

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate clearly and empathetically with internal and external stakeholders to understand and resolve queries.
- GS2.** listen actively and ask relevant follow-up questions to gain complete understanding of the user concern.
- GS3.** analyze and evaluate the urgency and impact of different queries to assign appropriate priority
- GS4.** collaborate effectively with cross-functional teams to collect necessary information for query resolution.
- GS5.** use digital tools and helpdesk/query management systems efficiently to track and document query progress.
- GS6.** follow up systematically on open queries to ensure timely resolution and stakeholder satisfaction.

SSC/N2307: Receive payments and apply cash

Description

This unit is about receiving payments from customers and applying payments to relevant invoices, as part of an outsourced finance and accounting process.

Scope

The scope covers the following :

- This unit/task covers the following:
- Types of cash application like split, partial, full adjustments, chargebacks, etc.
- Interact with appropriate people like line manager, peers, team taxation specialists, sales team, etc.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** verify details of incoming payments against outstanding invoices
- PC2.** match payments received to the respective customer accounts
- PC3.** apply payments to customer invoices in the accounting/ERP system
- PC4.** reconcile daily payment receipts with the bank statement and liaise with them for any discrepancies
- PC5.** identify and report any discrepancies in payment amounts to supervisors/managers
- PC6.** process refunds for overpayments or duplicate payments
- PC7.** update customer accounts for all payments received
- PC8.** ensure all payment receipts are accurately recorded for audit purposes
- PC9.** prepare periodic cash receipt summaries and reports
- PC10.** track outstanding payments and follow up as per the organisational policy
- PC11.** assist with end-of-month reconciliation of accounts receivable

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organizations procedures and policies for receiving, recording, and applying customer payments.
- KU2.** structure and functionality of accounting/ERP systems used for payment processing and reconciliation
- KU3.** significance of accurate cash application to maintain correct customer account balances
- KU4.** common causes of discrepancies in payment receipts and standard procedures for their resolution
- KU5.** audit and compliance requirements related to documenting and storing payment receipts

Qualification Pack

KU6. process for generating and interpreting payment summaries, bank statements, and accounts receivable reports.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively with banks, customers, and internal teams regarding payment issues or clarifications
- GS2.** use financial software and tools efficiently to enter data, track payments, and generate reports.
- GS3.** prioritize tasks and follow timelines to ensure timely posting and reconciliation of receipts.
- GS4.** collaborate effectively with cross-functional teams to resolve issues

SSC/N2309: Deal with queries at the accounts receivable helpdesk

Description

This unit is about dealing with queries received from customers relating to invoices they have received.

Scope

The scope covers the following :

- Different queries received through telephone, e-mail, chat, etc. Interact with appropriate people like line manager, peers, accounts payable team, etc.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** greet helpdesk users and verify their details as per SOP
- PC2.** receive and document incoming queries related to accounts receivable
- PC3.** analyze each query and prioritize for response
- PC4.** provide a justifiable estimate of time to respond to the queries
- PC5.** retrieve relevant customer account information from the ERP/accounting system
- PC6.** address queries related to outstanding balances or payment terms
- PC7.** develop and track key financial metrics and performance indicators to evaluate and enhance the effectiveness of financial processes
- PC8.** resolve issues concerning invoicing errors or adjustments
- PC9.** clarify account statements and transaction details to customers
- PC10.** track the status of queries and update the stakeholders regularly
- PC11.** coordinate with the billing team to resolve discrepancies
- PC12.** record query responses in the helpdesk software for tracking

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organizations standard operating procedures (SOPs) for managing customer interactions and recording queries.
- KU2.** structure and components of customer account records and invoices in the ERP/accounting system
- KU3.** common types of queries related to accounts receivable, including outstanding balances, payment terms, and transaction history.
- KU4.** escalation protocols for unresolved or complex customer queries
- KU5.** financial performance indicators and metrics used to evaluate the effectiveness of accounts receivable processes.

Qualification Pack

- KU6.** importance of timely and accurate documentation in helpdesk software for query tracking and audit readiness.
- KU7.** implications of invoicing errors or delays on customer satisfaction and organizational cash flow

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate clearly and professionally with customers and internal teams to understand and address concerns.
- GS2.** analyze customer queries to identify root causes and determine appropriate responses
- GS3.** use helpdesk software and ERP/accounting tools efficiently to retrieve information and update query logs.
- GS4.** collaborate effectively with cross-functional teams such as billing and finance to resolve account discrepancies
- GS5.** prioritize multiple customer queries and manage response timelines to ensure customer satisfaction.

SSC/N2321: Maintain Data Security and Privacy of customer accounts

Description

Maintain Data Security and Privacy of customer accounts

Scope

The scope covers the following :

- Maintain Data Security and Privacy of customer accounts

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** develop and adhere to organizational data security policies, ensuring compliance with regulations like GDPR, CCPA, or equivalent standards
- PC2.** implement and regularly review role-based access control (RBAC) to safeguard sensitive data
- PC3.** ensure appropriate authorization levels for employees and revoke access when necessary
- PC4.** identify and classify PII within organizational systems and apply necessary protections (e.g., encryption, anonymization)
- PC5.** verify and process data access, modification, or deletion requests in compliance with applicable data protection laws
- PC6.** securely handle financial transactions, ensuring that payment and customer account data are encrypted and protected against fraud
- PC7.** implement an incident response plan to address data breaches or cyberattacks promptly
- PC8.** conduct root-cause analysis of incidents and ensure lessons learned are incorporated into improved processes
- PC9.** periodically audit organizational data handling practices to ensure compliance with data protection standards
- PC10.** apply restrictions on data sharing with third parties, ensuring adherence to contractual agreements and legal standards
- PC11.** establish automated and secure data backup processes to protect against data loss
- PC12.** test and refine recovery procedures to minimize downtime and ensure continuity after an incident
- PC13.** maintain a helpdesk for responding to internal and external queries on data security and privacy
- PC14.** regularly review policies to address evolving ethical and legal considerations in data handling

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** legal and regulatory requirements related to data protection and privacy such as GDPR, CCPA, and relevant national standards

Qualification Pack

- KU2.** principles and implementation of role-based access control (RBAC) and its importance in minimizing data exposure
- KU3.** types of personally identifiable information (PII) and sensitive data handled within the organization and methods to classify them
- KU4.** techniques for data protection such as encryption, anonymization, secure backups, and access logging
- KU5.** components and significance of an effective incident response and recovery plan in case of data breaches or cyberattacks
- KU6.** ethical considerations involved in data handling, storage, sharing, and deletion practices.
- KU7.** organizational policies and procedures for auditing, reviewing, and updating data security and privacy frameworks.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** analyze and interpret data security risks to proactively implement mitigation measures
- GS2.** communicate technical and regulatory information clearly to internal stakeholders and external entities
- GS3.** collaborate with cross-functional teams such as IT, legal, compliance, and operations to uphold data security
- GS4.** apply critical thinking to identify the root cause of data security incidents and recommend improvements
- GS5.** handle sensitive information responsibly, maintaining confidentiality, integrity, and trust in all transactions.

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.
Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.

Qualification Pack

Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
Helpdesk	Helpdesk is an entity to which the customers will report their IT problems. IT Service Helpdesk Attendant is responsible for managing the helpdesk.
Helpdesk	Helpdesk is an entity to which the customers will report their IT problems. IT Service Helpdesk Attendant is responsible for managing the helpdesk.
