SSC/Q7203: IT Technical Support Executive

Brief Job Description

An IT Technical Support Executive resolves customer queries and technical issues across various channels, such as voice, non-voice (chat, email), or hybrid formats. The role involves troubleshooting hardware/software problems, providing remote support, documenting resolutions, and ensuring a seamless customer experience. Adherence to organizational protocols, strong communication skills, and the use of technology, including Generative AI, are critical for success.

Personal Attributes

This role requires the individual to work independently while interacting with customers to address their concerns. The ideal candidate should be result-oriented, possess strong logical thinking and interpersonal skills, and effectively prioritize their workload. A willingness to work in a desk-based environment and a commitment to delivering exceptional service are essential for success in this position.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [SSC/N7202: Assist and Support Customers with Basic IT and Service Queries](#)
2. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

Electives (mandatory to select at least one):

Elective 1: Voice

Voice

1. [SSC/N7301: Incident and Request Management through Voice Support](#)

Elective 2: Non-Voice

Non-Voice

1. [SSC/N7201: Manage Basic IT Service Requests and Incidents Remotely- Non-Voice](#)

SSC/N7202: Assist and Support Customers with Basic IT and Service Queries

Description

This unit focuses on equipping individuals with the skills and knowledge to handle basic customer queries and provide support through effective communication. It emphasizes understanding customer needs, offering first-level assistance, and ensuring excellent customer service.

Scope

The scope covers the following :

- Proactive Customer Engagement
- Personalized Service Delivery
- Multichannel Support Management
- Knowledge Base and Self-Learning
- Collaboration and Team Coordination
- Accessibility and Inclusivity in Support
- Root Cause Analysis and Long-Term Solutions
- Emotional Intelligence and Conflict Management

Elements and Performance Criteria

Proactive Customer Engagement

To be competent, the user/individual on the job must be able to:

- PC1.** identify common IT service issues, such as connectivity problems or login errors, based on customer usage trends
- PC2.** guide customers on preventive measures, such as password management or avoiding phishing emails, to reduce basic IT issues

Personalized Service Delivery

To be competent, the user/individual on the job must be able to:

- PC3.** adapt explanations of IT services or solutions to match the customer's technical skill level
- PC4.** use customer-specific details, such as device type or service history, to provide accurate and relevant troubleshooting steps
- PC5.** provide follow-up assistance to ensure issues like basic software installations or configuration changes are resolved effectively

Collaboration and Team Coordination

To be competent, the user/individual on the job must be able to:

- PC6.** share insights with the team about recurring customer issues, such as email syncing errors or slow device performance
- PC7.** support colleagues by sharing solutions to common IT problems or assisting during high volumes of customer queries

Accessibility and Inclusivity in Support

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC8.** rationalize technical explanations for non-technical customers, using easy-to-understand terms or regional languages to address diverse needs effectively
- PC9.** provide tailored support for customers with accessibility requirements, ensuring clarity and usability in device or software settings

Root Cause Analysis and Long-Term Solutions

To be competent, the user/individual on the job must be able to:

- PC10.** identify underlying reasons for recurring basic IT problems, such as frequent software crashes or outdated drivers
- PC11.** document recurring issues and their resolutions to improve response times for similar queries
- PC12.** suggest basic system or software updates to customers to avoid known technical glitches

Emotional Intelligence and Conflict Management

To be competent, the user/individual on the job must be able to:

- PC13.** recognize and address customer frustration due to common issues, such as slow systems or connectivity failures, with empathy
- PC14.** maintain composure and provide clear, step-by-step resolutions to de-escalate tense situations
- PC15.** regularly update customers on the status of their service requests, ensuring transparency and trust

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** basic principles of customer service and effective communication techniques
- KU2.** common IT service issues, including login errors, connectivity problems, and software malfunctions
- KU3.** standard operating procedures for handling IT service requests and troubleshooting steps
- KU4.** the use of ticketing systems and escalation protocols for unresolved issues
- KU5.** techniques for managing customer interactions across various communication channels like phone, email, and chat
- KU6.** steps to configure basic IT services such as network settings, software installations, and peripheral device connections
- KU7.** the importance of documentation and maintaining accurate records of service interactions
- KU8.** fundamentals of accessibility features in IT devices and services, including options for visually or hearing-impaired users
- KU9.** tools and processes for performing root cause analysis on recurring IT issues
- KU10.** best practices for handling sensitive customer information and ensuring data security
- KU11.** the importance of staying updated on new IT tools, technologies, and support trends
- KU12.** strategies for maintaining professionalism and empathy during challenging customer interactions
- KU13.** processes for identifying and implementing long-term solutions to common IT problems
- KU14.** the importance of collaboration within a team to enhance customer service delivery

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** maintain work-related notes and records
- GS2.** read the relevant literature to learn about the latest developments in the works
- GS3.** listen attentively to understand the information/ instructions being shared by the speaker
- GS4.** communicate clearly and politely with co-workers and clients
- GS5.** coordinate with co-workers to achieve work objectives
- GS6.** plan and prioritize tasks to ensure timely completion
- GS7.** identify possible disruptions to work and take appropriate preventive measures
- GS8.** take quick decisions to deal with workplace emergencies/ accidents
- GS9.** evaluate all possible solutions to a problem to select the best one

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

SSC/N7301: Incident and Request Management through Voice Support

Description

This National Occupational Standard (NOS) specifies the skills, knowledge, and attributes required for effectively managing and resolving IT service requests and incidents remotely through voice support. It focuses on handling customer queries, troubleshooting basic issues, and ensuring prompt resolution or escalation as per organizational protocols.

Scope

The scope covers the following :

- Acknowledge and Categorize Service Requests/Incidents
- Understand and Diagnose the Issue
- Troubleshoot and Provide Remote Support
- Escalate and Monitor Incidents
- Resolution and Documentation
- Customer Interaction Management
- Compliance with Tools and Technology
- Feedback and Continuous Improvement
- Use Gen AI for Technical Support- Voice

Elements and Performance Criteria

Acknowledge and Categorize Service Requests/Incidents

To be competent, the user/individual on the job must be able to:

- PC1.** acknowledge receipt of customer service requests/incidents
- PC2.** empathize for any inconvenience caused and reassure customers of a commitment to resolve the issue
- PC3.** record and categorize service requests/incidents accurately using the organization's incident management tool.

Understand and Diagnose the Issue

To be competent, the user/individual on the job must be able to:

- PC4.** obtain sufficient information from customers to understand the nature of the problem
- PC5.** perform an initial diagnosis of the reported issue to identify possible solutions

Troubleshoot and Provide Remote Support

To be competent, the user/individual on the job must be able to:

- PC6.** guide customers remotely to test potential solutions and resolve basic issues
- PC7.** provide customers with a justifiable resolution time when an immediate solution cannot be found.

Escalate and Monitor Incidents

To be competent, the user/individual on the job must be able to:

- PC8.** prioritize service requests/incidents according to organizational guidelines

Qualification Pack

PC9. escalate problems to line managers and obtain advice and guidance where the issues cannot be resolved by the helpdesk.

PC10. monitor ongoing issues to keep customers informed about progress and any delays in resolution.

Resolution and Documentation

To be competent, the user/individual on the job must be able to:

PC11. obtain confirmation from customers that their problems have been resolved satisfactorily

PC12. record the resolution of problems accurately in the organization's system

PC13. comply with relevant standards, policies, procedures, and guidelines when managing IT service requests/incidents.

Customer Interaction Management

To be competent, the user/individual on the job must be able to:

PC14. maintain a professional and empathetic tone during customer interactions to ensure customer satisfaction.

PC15. actively listen to customer feedback and identify areas for service improvement.

Compliance with Tools and Technology

To be competent, the user/individual on the job must be able to:

PC16. use customer relationship management (CRM) tools effectively to log, track, and resolve customer queries

PC17. ensure accurate utilization of scripts, templates, and knowledge bases provided by the organization to troubleshoot incidents

Feedback and Continuous Improvement

To be competent, the user/individual on the job must be able to:

PC18. solicit feedback from customers on their experience with the resolution process.

PC19. recommend improvements to existing processes or tools based on recurring service issues or customer feedback.

Use Gen AI for Technical Support

To be competent, the user/individual on the job must be able to:

PC20. understand the concept and capabilities of Gen AI in providing automated support for basic IT service requests/incidents

PC21. utilize Gen AI to answer frequently asked questions and troubleshoot basic technical issues remotely, ensuring quick resolution and customer satisfaction

PC22. employ Gen AI to automate data entry and categorization of service requests/incidents, ensuring faster case resolution and accurate tracking of customer issues.

PC23. develop clear and effective prompts for AI tools to ensure accurate and helpful responses to customer queries

PC24. continuously evaluate and refine prompts based on customer feedback and real-world usage to improve response quality

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** the organizations standards, policies, procedures, guidelines, and service level agreements for dealing with basic IT service requests/incidents
- KU2.** the incident management and CRM tools used by the organization for recording, categorizing, and resolving customer queries
- KU3.** the importance of accurately documenting and categorizing service requests/incidents to ensure timely resolution
- KU4.** the common types of service requests/incidents and the standard processes for resolving them.
- KU5.** the range of troubleshooting techniques available for resolving network, account maintenance, hardware, and software issues
- KU6.** the best practices for prioritizing service requests/incidents according to organizational guidelines
- KU7.** the expected response times for different types of incidents and how to keep customers informed about resolution timelines
- KU8.** the escalation process for unresolved incidents and how to effectively refer issues to higher-level support teams
- KU9.** the tools, templates, scripts, and knowledge base available to support service request resolution.
- KU10.** the importance of customer communication skills, including maintaining a professional tone and empathy during customer interactions
- KU11.** how to actively listen to customers, gather detailed information, and identify the underlying cause of the issue.
- KU12.** the significance of providing justifiable resolution timelines to customers when an immediate solution is not possible
- KU13.** how to use methods for testing solutions remotely with customers to confirm resolution of the issue.
- KU14.** how to collect customer feedback on the service experience and use it to improve future service interactions
- KU15.** the importance of complying with relevant standards, policies, and procedures when handling service requests/incidents to ensure consistency and quality in support.
- KU16.** the principles of General Artificial Intelligence (Gen AI) and how it can be used to enhance technical support operations
- KU17.** the different use cases where Gen AI can automate basic IT service requests/incidents and reduce resolution times
- KU18.** the basics of prompt engineering for AI-based tools to ensure correct responses in technical support scenarios
- KU19.** the tools and technologies available for integrating Gen AI into technical support workflows.
- KU20.** the best practices for training and fine-tuning Gen AI models to enhance their accuracy and effectiveness in resolving IT service issues.
- KU21.** the importance of continuous feedback and monitoring in AI systems to ensure that they are evolving with the needs of the business and customer base.

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** maintain work-related notes and records
- GS2.** read the relevant literature to learn about the latest developments in the work
- GS3.** listen attentively to understand the information/ instructions being shared by the speaker

SSC/N7201: Manage Basic IT Service Requests and Incidents Remotely-Non-Voice

Description

This unit covers handling basic IT service requests at the helpdesk, ensuring cybersecurity, and using soft skills for domestic users. It includes writing clear chats/emails, using remote desktop tools, following escalation protocols, and leveraging Gen AI for task automation. Complex issues are escalated to experts.

Scope

The scope covers the following :

- Communication with Customers
- Incident Recording and Categorization
- Remote Support and Troubleshooting
- Escalation and Referrals
- Compliance and Standards
- Soft Skills for Domestic Users
- Gen AI in Technical Support- Non-Voice

Elements and Performance Criteria

Communication with Customers

To be competent, the user/individual on the job must be able to:

- PC1.** prepare receipt of service requests/incidents and provide acknowledgment to customers, ensuring clear communication
- PC2.** acknowledge the difficulties faced by the customer with empathy and assure them that the issue will be resolved promptly
- PC3.** collect adequate information from customers to assess the issue and conduct an initial diagnosis
- PC4.** prioritize service requests/incidents according to organizational guidelines, ensuring alignment with service level agreements (SLAs)
- PC5.** provide customers with a realistic resolution time when immediate solutions cannot be provided
- PC6.** monitor progress of unresolved issues, keeping customers informed about updates and delays as per escalation protocols
- PC7.** obtain customer confirmation that the issue has been resolved to their satisfaction

Incident Recording and Categorization

To be competent, the user/individual on the job must be able to:

- PC8.** document and classify service requests/incidents in the organization's incident management tool, following cybersecurity protocols
- PC9.** record the resolution of problems accurately in the incident management system, ensuring traceability

Remote Support and Troubleshooting

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC10.** assist customers remotely by using remote desktop tools to diagnose and implement potential solutions to resolve issues
- PC11.** use remote desktop tools to access customer devices and troubleshoot technical issues efficiently
- PC12.** identify, isolate, and resolve hardware/software issues remotely, ensuring minimal disruption to customers
- PC13.** assist customers in troubleshooting by providing clear and effective guidance throughout the process.
- PC14.** ensure customer data protection and privacy when using remote desktop tools and other troubleshooting methods
- PC15.** verify and validate solutions by conducting remote tests, ensuring that the issue is fully resolved before closure

Escalation and Referrals

To be competent, the user/individual on the job must be able to:

- PC16.** escalate unresolved issues to line managers or subject matter experts for further investigation and resolution
- PC17.** adhere to established escalation procedures for issues that cannot be resolved at the first level of support
- PC18.** provide clear, detailed, and accurate documentation of the issue to ensure a smooth handover to higher-level technicians or experts
- PC19.** ensure timely escalation of critical or high-priority incidents to facilitate prompt resolution and prevent service disruption
- PC20.** monitor the escalation process and keep customers updated on the progress of their unresolved issues
- PC21.** follow up on escalated issues to ensure proper handling and keep the customer informed of any developments

Compliance and Standards

To be competent, the user/individual on the job must be able to:

- PC22.** ensure compliance with relevant standards, policies, procedures, and guidelines while handling service requests/incidents
- PC23.** adhere to cybersecurity practices when accessing customer data and resolving issues remotely

Soft Skills for Domestic Users

To be competent, the user/individual on the job must be able to:

- PC24.** apply soft skills when interacting with domestic users, ensuring effective communication via chat or email
- PC25.** use active listening skills to understand customer issues and provide relevant responses
- PC26.** maintain a professional tone in written communication, ensuring clarity and precision
- PC27.** utilize nonverbal communication strategies, like tone and phrasing, to enhance the clarity of written messages

Gen AI in Technical Support

To be competent, the user/individual on the job must be able to:

- PC28.** understand the basics of Gen AI and its potential in automating tasks in technical support

Qualification Pack

- PC29.** identify use cases for Gen AI, such as automating ticket classification, generating responses, and providing initial troubleshooting steps
- PC30.** apply prompt engineering techniques to generate effective and contextually accurate AI-driven responses for service requests and incidents.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the importance of acknowledging customer queries promptly and confirming receipt of service requests/incidents
- KU2.** the techniques for expressing empathy and concern to build rapport and assure customers of issue resolution
- KU3.** the methods to collect detailed information from customers to perform an accurate diagnosis of their technical issues
- KU4.** how to use the best practices for prioritizing service requests/incidents based on urgency and organizational guidelines
- KU5.** the strategies for providing clear and realistic resolution times to customers when an immediate solution is not available
- KU6.** the procedures for accurately recording and categorizing service requests/incidents using the organization's incident management tool
- KU7.** the need for consistent and clear documentation to ensure accurate tracking of service requests and resolutions
- KU8.** the importance of adhering to cybersecurity protocols while recording and managing incidents
- KU9.** the use of remote desktop tools for troubleshooting and resolving issues efficiently without disrupting customer workflows
- KU10.** the technical steps involved in diagnosing and resolving hardware/software issues remotely
- KU11.** the best practices for communicating troubleshooting steps clearly to customers during remote support
- KU12.** the importance of ensuring data security and privacy when accessing customer systems remotely
- KU13.** how to apply the methods to verify solutions remotely, ensuring that the issue is fully resolved before closing the ticket.
- KU14.** the escalation protocols to follow when an issue cannot be resolved at the first level of support.
- KU15.** how to provide clear, comprehensive documentation to facilitate smooth handovers to higher-level technicians or experts
- KU16.** the criteria for determining when an issue should be escalated, including criticality and complexity
- KU17.** the importance of monitoring and following up on escalated issues to ensure timely resolution.
- KU18.** the relevant industry standards, organizational policies, and cybersecurity guidelines to comply with when handling service requests and incidents

Qualification Pack

- KU19.** the importance of ensuring customer data privacy and security during all stages of service request management
- KU20.** the principles of active listening and how to apply them effectively in customer interactions
- KU21.** the techniques for conveying empathy, patience, and professionalism in written communication (e.g., chats and emails).
- KU22.** the role of nonverbal communication, such as tone and phrasing, in enhancing written customer support
- KU23.** how to maintain a positive and professional tone in email and chat communications
- KU24.** the importance of adjusting communication style based on the customers technical proficiency
- KU25.** the overview of Gen AI and its potential use in automating routine tasks like ticket classification and response generation
- KU26.** the use cases for Gen AI in technical support, including automating first-level troubleshooting, ticket categorization, and response drafting
- KU27.** the basics of prompt engineering and how to craft effective prompts to generate accurate and contextually relevant AI responses

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** maintain work-related notes and records
- GS2.** read the relevant literature to learn about the latest developments in the work
- GS3.** listen attentively to understand the information/ instructions being shared by the speaker
- GS4.** communicate clearly and politely with co-workers and clients
- GS5.** coordinate with co-workers to achieve work objectives
- GS6.** plan and prioritize tasks to ensure timely completion
- GS7.** identify possible disruptions to work and take appropriate preventive measures
- GS8.** take quick decisions to deal with workplace emergencies/ accidents
- GS9.** evaluate all possible solutions to a problem to select the best one

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Communication with Customers</i>	7	12	-	4
PC1. prepare receipt of service requests/incidents and provide acknowledgment to customers, ensuring clear communication	1	2	-	1
PC2. acknowledge the difficulties faced by the customer with empathy and assure them that the issue will be resolved promptly	1	1.5	-	0.5
PC3. collect adequate information from customers to assess the issue and conduct an initial diagnosis	1	2	-	0.5
PC4. prioritize service requests/incidents according to organizational guidelines, ensuring alignment with service level agreements (SLAs)	1	2	-	0.5
PC5. provide customers with a realistic resolution time when immediate solutions cannot be provided	1	1.5	-	0.5
PC6. monitor progress of unresolved issues, keeping customers informed about updates and delays as per escalation protocols	1	1.5	-	0.5
PC7. obtain customer confirmation that the issue has been resolved to their satisfaction	1	1.5	-	0.5
<i>Incident Recording and Categorization</i>	2	4	-	1
PC8. document and classify service requests/incidents in the organization's incident management tool, following cybersecurity protocols	1	2	-	0.5
PC9. record the resolution of problems accurately in the incident management system, ensuring traceability	1	2	-	0.5
<i>Remote Support and Troubleshooting</i>	6	11	-	5
PC10. assist customers remotely by using remote desktop tools to diagnose and implement potential solutions to resolve issues	1	2	-	1

Qualification Pack

Qualification Pack

National Occupational Standards (NOS) Parameters

NOS Code	SSC/N7201
NOS Name	Manage Basic IT Service Requests and Incidents Remotely- Non-Voice
Sector	IT-ITeS
Sub-Sector	Software Product Development
Occupation	Product Support
NSQF Level	4
Credits	6
Version	4.0
Last Reviewed Date	18/02/2025
Next Review Date	18/02/2028
NSQC Clearance Date	18/02/2025

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

The assessment will consist of a blend of hands-on practical evaluations, viva-voce, and online proctored scenario-based multiple-choice questions ensuring a thorough evaluation of the individual's proficiency in learning outcomes, practical understanding, and real-world application of concepts

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Compulsory NOS

Qualification Pack

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
Helpdesk	Helpdesk is an entity to which the customers will report their IT problems. IT Service Helpdesk Attendant is responsible for managing the helpdesk.
Helpdesk	Helpdesk is an entity to which the customers will report their IT problems. IT Service Helpdesk Attendant is responsible for managing the helpdesk.
Helpdesk	Helpdesk is an entity to which the customers will report their IT problems. IT Service Helpdesk Attendant is responsible for managing the helpdesk.
