SSC/Q8102: Business Intelligence Analyst

Brief Job Description

Individuals at this job are responsible for performing different aspects of Business Analysis. S/he will be responsible for importing and preprocessing data and perform exploratory analysis to derive actionable insights.

Personal Attributes

A BI analyst needs to have strong analytical skills and problem solving ability. S/he needs to have good communication skills to work with stakeholders across multiple teams such as marketing, sales, product development, etc.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [SSC/N8157: Collect & process data and ensure data quality standards are achieved](#)
2. [SSC/N8127: Collect and define business requirements by interacting with clients](#)
3. [SSC/N8103: Perform exploratory and Inferential analysis of the data](#)
4. [SSC/N8108: Define business outcomes and create visualizations from results of the analysis](#)
5. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

Qualification Pack

SSC/N8157: Collect & process data and ensure data quality standards are achieved

Description

Collect & process data and ensure data quality standards are achieved

Scope

The scope covers the following :

- Establish Data Quality Criteria and Thresholds, Develop Processes and Controls for Data Quality Assurance, Design and Maintain Data Schemas and Validation Rules, Implement Data Loading, Merging, and Real-time Data Streaming, Set Up Monitoring, Alerts, and Dashboards for Data Quality, Conduct Regular Data Audits and Performance Reviews, Establish Feedback Loops and Continuous Improvement Processes, Promote Cross-functional Collaboration and Training, Maintain Comprehensive Documentation, Foster a Culture of Data Quality and Use Emerging Tools

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Determine clear criteria for data quality dimensions (accuracy, completeness, consistency, timeliness, validity, relevancy) and acceptable benchmarks, tailored to organizational needs
- PC2.** Create and implement processes, automated scripts, validation rules, and controls to regularly assess data against the defined standards.
- PC3.** Define data structures aligning with organizational databases, and encode rules to validate incoming data to ensure it meets quality criteria before entry.
- PC4.** Transfer validated data into data warehouses or databases, ensuring seamless merging with existing datasets, and employ real-time solutions where applicable
- PC5.** Use tools to automate monitoring, generate alerts, and visualize data quality metrics in real time for quick detection and response to issues
- PC6.** Schedule and perform audits to validate data compliance, analyze discrepancies, and perform gap analysis to identify areas for improvement
- PC7.** Gather insights from audits, monitoring, and end-users to refine standards, processes, and controls continually
- PC8.** Work closely with IT, data science, and business teams to align efforts and develop training programs to foster a culture of data quality
- PC9.** Keep detailed records of data quality standards, procedures, incidents, and improvement actions for transparency and audit readiness
- PC10.** Encourage a proactive approach toward continuous improvement, leveraging new technologies, and fostering staff awareness of data quality principles

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** the purpose and aims of the statistical analysis being undertaken
- KU2.** organizational policies, procedures and guidelines which relate to preprocessing data
- KU3.** different data sources and how to access documents and information from data sources
- KU4.** organizational policies and procedures for sharing data
- KU5.** whom to consult while preprocessing data
- KU6.** the range of standard templates and tools available and how to use them
- KU7.** the difference between various types of data. For example, qualitative vs quantitative data, processed vs unprocessed data, discrete vs continuous data
- KU8.** different statistical analysis software, packages, libraries and tools that can be used to preprocess data such as R or Pandas
- KU9.** different functions to identify and remove missing values
- KU10.** different functions to identify and transform data types of variables such as integer, float, character
- KU11.** different methodological approaches for normalizing the dataset such as standard score, feature scaling, etc.
- KU12.** different data formats and structures
- KU13.** how to index and organize data
- KU14.** how to identify and refer anomalies in data
- KU15.** how to work on various databases and operating systems

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** impact analysis of the various actions performed and disseminating relevant information to others
- GS2.** analyze data and understand its implications on business
- GS3.** check your work is complete and free from errors

Qualification Pack

SSC/N8127: Collect and define business requirements by interacting with clients

Description

This unit is about identifying the requirements of internal and external clients.

Scope

The scope covers the following :

- Determine the requirements
- Define the requirements
- Establish key success metrics

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Assess the current business of the client
- PC2.** Assess technical capabilities of the client
- PC3.** Conduct business contextual discussions with clients
- PC4.** Evaluate and define the requirements of the client
- PC5.** Map the requirements to the capabilities of the team or organization responsible for delivering on them
- PC6.** Create documentation on the requirements
- PC7.** Validate requirements with appropriate stakeholders, both internal and external to the organization

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organizational policies, procedures and guidelines which relate to collecting and defining business requirements
- KU2.** different data sources and how to access documents and information from data sources
- KU3.** organizational policies and procedures for sharing data
- KU4.** organizational policies and procedures for documenting requirements
- KU5.** who to involve when defining requirements
- KU6.** the range of standard templates and tools available and how to use them
- KU7.** different business and technological trends
- KU8.** how to conduct business contextual discussions
- KU9.** different types of requirements, could be related to a product, business, technology etc.
- KU10.** how to evaluate and define requirements

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** ask for clarification and advice from appropriate people
- GS2.** listen effectively and orally communicate information accurately
- GS3.** work effectively in a customer facing environment
- GS4.** build and maintain positive and effective relationships with clients

Qualification Pack

SSC/N8103: Perform exploratory and Inferential analysis of the data

Description

This unit is about using a variety of techniques to perform exploratory analysis to describe and summarize data for internal and external clients

Scope

The scope covers the following :

- Define the dataset
- Summarize and optimize the dataset

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Identify the data types for each variable of the dataset
- PC2.** Identify the key variables required for modelling or analysis
- PC3.** Use statistical techniques to summarize the key variables in the dataset
- PC4.** Describe summary statistics for key variables using graphical formats
- PC5.** Perform dimension reduction to optimize the variables in the dataset, if required
- PC6.** Define the correlation factors using clustering and other techniques
- PC7.** Validate data using appropriate tools and processes
- PC8.** Repeat the analysis iteratively to arrive at optimal results
- PC9.** Validate the final output in consultation with the relevant stakeholders
- PC10.** Gain inferences from the final output of the data analysis
- PC11.** Develop a hypothesis model to explain the discovered inferences
- PC12.** Evaluate the results of the analysis and define business outcomes
- PC13.** Define prescriptive actions based on the defined business outcomes

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the purpose and aims of the statistical analysis being undertaken
- KU2.** organizational policies, procedures and guidelines which relate to performing exploratory analysis
- KU3.** different data sources and how to access documents and information from data sources
- KU4.** organizational policies and procedures for sharing data
- KU5.** who to involve when performing exploratory analysis
- KU6.** the range of standard templates and tools available and how to use them
- KU7.** the difference between various types of data. For example, qualitative vs quantitative data processed vs unprocessed data discrete vs continuous data

Qualification Pack

- KU8.** different statistical analysis software, packages, libraries and tools that can be used to preprocess data such as R or Pandas
- KU9.** different statistical analysis software, packages, libraries and tools that can be used to summarize data such as R, Numpy, Statsmodels, or Pandas
- KU10.** different functions to summarize variables across different data types such as integer, float, or character
- KU11.** different graphical formats to describe summary statistics
- KU12.** different methodological approaches for dimension reduction such as PCA, LDA, or NMF
- KU13.** different methodological approaches for defining correlations between variables such as the scatter diagram method, correlation coefficients, method of least squares
- KU14.** multivariate visualizations, for mapping and understanding interactions between different fields in the data
- KU15.** how to make inferences from analysed data and explain it using a hypothesis model
- KU16.** different types of prescriptive actions
- KU17.** how to identify and refer anomalies in data
- KU18.** how to work on various operating systems such as linux, ubuntu, or windows

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** impact analysis of the various actions performed and disseminating relevant information to others
- GS2.** analyze data and understand its implications on business

SSC/N8108: Define business outcomes and create visualizations from results of the analysis

Description

This unit is about defining business outcomes from results of a statistical analysis and create visualizations to report them.

Scope

The scope covers the following :

- Define the scope
- Report business outcomes

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Identify the objective of the analysis
- PC2.** Establish the purpose, scope, and target audience to report the business outcomes
- PC3.** Define the delivery mode and format such as excel sheets, reports, APIs to report the business outcomes
- PC4.** Summarize the defined business outcomes into a narrative
- PC5.** Select suitable visualizations to represent the defined business outcomes
- PC6.** Present outcomes through selected visualizations using standard templates and agreed language standards
- PC7.** Validate visualizations with appropriate people
- PC8.** Publish visualizations for consumption across all agreed formats

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the purpose and aims of the statistical analysis being undertaken
- KU2.** organizational policies, procedures and guidelines which relate to creating visualizations
- KU3.** different data sources and how to access documents and information from data sources
- KU4.** organizational policies and procedures for sharing data
- KU5.** who to involve when defining business outcomes and creating visualizations
- KU6.** intended audiences for reporting business outcomes
- KU7.** their organization's knowledge base and how to access and update this
- KU8.** organizational processes and procedures for approving and publishing documents
- KU9.** the range of standard templates and tools available and how to use these
- KU10.** different statistical concepts such as distributions, hypothesis testing, confidence intervals etc.

Qualification Pack

- KU11.** how to evaluate results of quantitative or qualitative analysis to define business outcomes
- KU12.** different graphical formats for presenting data and how to create these
- KU13.** different styles used in visualizations, including your organizations house style, types & templates
- KU14.** different applications, libraries or packages to create visualizations using tools such as Tableau, Qlikview, d3js etc
- KU15.** different change management procedures, including version control and approvals
- KU16.** how to identify and refer anomalies in data
- KU17.** how to work on various operating systems such as linux, ubuntu, or windows

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** complete accurate well written work with attention to detail
- GS2.** follow instructions, guidelines, procedures, rules and service level agreements
- GS3.** check that your own and/or your peers work meets customer requirements
- GS4.** work effectively in a customer facing environment
- GS5.** analyze data and activities
- GS6.** ability of understand business impact and disseminate relevant information to others
- GS7.** check your work is complete and free from errors

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Qualification Pack
